

Greetings from our new K-5 STEM Program!

For those of you that don't know what that means, STEM stands for Science, Technology, Engineering, and Math. To your children, it will mean an exciting new way to learn!

About 60 percent of new jobs created this century will require skills in STEM-related fields. In fact, the jobs that today's elementary school students will perform twenty years from now haven't even been invented yet.

That is why we are excited to offer this project based learning center, but we need your help to make it the best program it can be. Any good stem program needs lots and lots of materials that will turn into creative projects. Those materials may be things you have at home waiting to be recycled. We have attached a list of the items that we are hoping to get donated. If you have any of these items and are willing to donate them please bring them to the SPC. There will be labeled boxes to put them in.

Thank you in advance. I look forward to sharing with you the great projects your children will be creating next year!

Pam Wortman
