

Understand the meaning of the equal sign and decide if equations are true or false.

Example: $5 + 3 = 8 \rightarrow$ TRUE

$3 + 5 = 9 \rightarrow$ FALSE

1. Which equations are true and which are false? Circle your answer.

$9 + 0 = 10$ true false

$3 + 2 = 5$ true false

$4 = 5 - 1$ true false

2. Add the numbers inside the strawberry. Circle the ones that add up to the number on the leaf.

3. If the number sentence is true, circle it.
If the number sentence is false, cross the problem out.

$10 = 5 + 5$

$4 + 3 = 8$

$7 + 2 = 10$

$3 = 5 - 2$

$8 - 3 = 5$

$9 - 5 = 4$
