

EXPANDING PARTNERSHIPS

Community partnerships are essential to the success of ECPPS. Our community is abundant in resources, businesses, churches, and school partners. This presents ECPPS with an opportunity to create a community school model that expands educational experiences in the classroom and beyond.

Strategies:

Integrate the Community Schools Model into all schools and district departments.

Foster an open door culture in all of our schools so that families and community partners are integrated into the success of the school.

Support schools to develop resources and activities that engage families through regular school and community events.

ECPPS will establish an active presence at all major community events, festivals, and celebrations.

Increase family participation and engagement in the district's major communication platforms.

Establish a Family and Community Center to equip families with resources, skills, and networking opportunities to support student academic success and well-being.

Engage local and regional institutions of higher education through ongoing partnerships.

Foster an ongoing partnership with the United States Coast Guard, regional healthcare providers, and corporate partners.

Expand the DOTS (Discounts Offered to Schools) program to include more local partners and businesses.

Remain an active and engaged member of the Chamber of Commerce and fully utilize opportunities to network and expand partnerships with local businesses.

Create an ECPPS alumni program to engage and reconnect with graduates.

Enhance and streamline District and school websites, communication platforms, and social media content to increase staff, family, and community access to school information.

Increase collaboration with media partners and news outlets to share the positive and inspirational stories throughout all schools and departments in ECPPS.

Communicate with families in multiple languages and adaptability modes to best meet the needs of everyone.
