

OPERATIONAL EXCELLENCE

Efficiency is central to a high-performing organization. Our goal is to maximize our talent, resources, and time so that we increase our operational efficiency to achieve the highest outcomes for students.

Strategies:

Upgrade and modernize all major software platforms used throughout the district.

Develop and implement efficient practices that result in reliable and timely communication throughout the district.

Develop and share job descriptions for all employees to promote transparency and clarity on roles and responsibilities.

Develop and implement comprehensive data-driven informational systems to inform decision-making throughout the district.

Streamline procurement practices and procedures to ensure schools are adequately and expeditiously equipped to ensure robust learning experiences take place for all students.

Conduct a comprehensive analysis and study of all facilities in the district to determine renovation and modernization needs to support Twenty-First Century learning.

Invest strategically in technology and information-sharing infrastructure that maximizes productivity and reduces operations cost.

Modernize facilities and infrastructure by developing and implementing a five-year capital needs and renovation plan.

Provide ongoing and relevant professional learning for non-teaching employees on project management and efficiency.

Upgrade and enhance technology, network, and communications infrastructure throughout the district.

Systematically review and identify Board and district policies, procedures, and protocols that are no longer relevant to the operation of Twenty-First Century Schools.
