

Principal's Commitment to Connecticut Green LEAF Schools

Leading, Educating, Achieving and Fostering
Healthy, green schools for all.

We recognize that the path to becoming a green and healthy school is a long journey. I, the undersigned principal, commit my school to participate in the Connecticut Green LEAF Schools program.

I understand that we will receive support from the CT Green LEAF program in these efforts. We commit to creating a Green LEAF Team that includes staff, students and members of the community to collect baseline information about our school, and develop a plan to meet the following goals:

Provide effective environmental and sustainability education, including: interdisciplinary learning featuring relationships between the environment, energy and human systems; connections to Science, Technology, Engineering and Mathematics (STEM) content and practice; and civic engagement with the local community.

Improve the health and wellness of students and staff, including: promoting school facility health, an integrated school environmental health program; standards for nutrition and fitness; and quality outdoor time.

Reduce environmental impact and cost, including: maximizing building energy and water efficiency, waste reduction and recycling; and alternative transportation use.

We will complete the Green LEAF School Self-Assessment Tool as a first step toward becoming a green and healthy school.

Signed,

Kathy Burke
