

## CURRICULUM/INSTRUCTION

### Career and Technical Education

The Board recognizes the importance of a program of career and technical education to assist students in the making of informed and meaningful occupational post-secondary career and educational choices and to prepare students for enrollment in advanced or skilled education programs. Such programs shall be included as a part of the regular curriculum of the school. In order to maintain these programs, the Board shall approve the content and organization of all career and technical courses of study prior to the time plans are submitted to the state superintendent of public instruction. Career and technical program development shall be related to employment demands, current and future, and to the educational needs and interests of students.

The Board or designee shall appoint representative citizens to serve on general and specialized career and technical education advisory committees. Such committees shall advise staff on appropriate educational objectives, instructional content and levels of achievement.

The superintendent or his designee shall be responsible for developing procedures which shall insure that all programs are operated in conformity with the district's plans for career and technical education. The superintendent shall seek and utilize all available state and federal sources of revenue for the financial support of career and technical education in the district.
