Student Name:

Student ID #:

Student Statement

(Suggested length of your statement: 200 - 300 words)

Provide a written statement that explains how your mathematics coursework has adequately prepared you for your post-secondary plans and intended career. In your statement, please address the following:

1. What math skills will you need for your career goals and post-secondary plans?
2. How have your mathematics classes prepared you for your post-secondary plans? Be sure to describe your third credit of math in particular.
3. Describe what math skills you use routinely in your daily life, and those that will be needed in your personal life after graduation.

Type your statement below:
