

Emergency Care & First Aid

All school personnel share responsibility in connection with injuries and emergencies occurring in school and at school-sponsored events, which may be classified as follows: (1) administering first aid; (2) summoning medical assistance; (3) notifying administration; (4) notifying parents; and (5) filing accident/injury reports.

The Inter-Lakes School Board requires that at least one person on staff in each building has current first aid and cardiopulmonary certification (CPR). At least one individual trained in CPR/First Aid will accompany students on field trips where access to EMS/911 services are not readily available, i.e., remote areas. School nurses will maintain a list of CPR/First Aid certified staff available in their office.

At the start of each school year, emergency contact information of parents/legal guardians for each student will be collected. Each student enrolled in the Inter-Lakes School District shall have on file complete emergency information. This card shall include, but not be limited to the following information:

- Parent/Guardian names
- Physical address
- Mailing address
- Home and cell phone number
- Work phone number
- Physician's name and phone number
- Additional contact information

The parent/guardian shall immediately notify the school of any changes in this information.

The school will obtain at the start of each school year emergency contact information of parents/ guardians for each student and staff member.

The school physician, school nurse, or specially trained staff members shall assist in the treatment of injuries or emergency situations. Such individuals have the authority to administer oxygen in case of a medical emergency, if available and if appropriate. This authorization extends to administering oxygen to students without prior notification to parents/guardians.

The school nurse or other designated personnel may administer other medications to students in emergency situations, provided such personnel has all training as is required by law. Such medication may also be administered in emergency situations if a student's medical action plan has been filed and updated with the school district to the extent required by law.

Consistent with state law, the school nurse may maintain a supply of asthma related rescue medication and the emergency medication epinephrine. The school physician, if any, the school nurse, or specially trained staff members may also administer epinephrine to any student in case of a medical emergency, if appropriate. This authorization extends to administering epinephrine without prior notification to parents/guardians. The school nurse or other designated personnel may administer or make available to self-administer a bronchodilator, spacer, or nebulizer to a student who has been diagnosed with asthma for use in emergency or other situations as determined by the school nurse.

The district will maintain all necessary records relative to the emergency administration of medication and will file all such reports as may be required under Board policy {5141.4}JLCD, or applicable laws or regulations.

Accident reports must be prepared and filed consistent with Board policy {3720}EBBB.

The District makes it possible for parents/guardians to subscribe to student accident insurance at low rates. This program is offered each year during September. The District does not provide student accident insurance.

Records related to the emergency administration of any medication under this policy shall be made and maintained by the school nurse as provided in Board policy {5141.4}JLCD. The school nurse will follow other first aid reporting protocols, as may be determined by other Board policy or administrative directive.
