Income from Self-Employment	
<p>Self-employed persons may use income tax records for the preceding calendar year as a base to project the current year's net income, unless the current monthly income provides a more accurate measure. Report income derived from the business venture less operating costs incurred in the generation of that income. Deductions for personal expenses such as interest on home payments, medical expenses, and other similar non-business deductions are not allowed in reducing gross business income. Additional income from other kinds of employment must be treated as separate and apart from the income generated or lost from your business venture. For example, if you operated a business at a net loss, but held additional employment for which a salary was received, the income for purposes of applying for reduced price or free meals would be the income from the salary only. The loss from the business cannot be deducted from a positive income earned in other employment.</p> <p>For purposes of this application, it is not possible to report a negative income from any business venture. The least income possible is zero (no income). The necessary information for arriving at allowable income from private business operation may be taken from your most recent U.S. Individual Income Tax Return - Form 1040. Add together the amounts reported on the following lines:</p>	
LINE 12	0.00 Business Income or (Loss)
LINE 13	\$0.00 Capital Gain or (Loss)
LINE 14	\$0.00 Other Gains or (Losses)
LINE 17	\$0.00 Rental Real Estate, Royalties, Partnerships, S Corporations, Trusts, Etc.
LINE 18	\$0.00 Farm Income or (Loss)
TOTAL	\$0.00 Gross Annual Income Before Any Deductions
Computed Monthly Income	\$0 Gross Annual Income / 12 = Computed Monthly Income. Report in Step 3
