

Health and Safety Committee

The District shall have a Health and Safety Committee which meets at a minimum of once per month September through June. Meetings can be more frequent, as needed, upon request of any member. Membership shall include four representatives of the Bismarck Education Association (BEA) and four district representatives which include two principals, one special education administrator, and one member of the executive team. The work of the committee shall be to know BPS safety policies and programs, review injuries and illnesses and causes and prevention, as well as to propose changes in safety education, communication, and/or training.

Changes to this Administrative Rule shall be discussed with the BEA president and then shared with the School Board.

The BPS/BEA Health and Safety Committee began transitioning into the District's Interconnected Systems Framework processes beginning August 2020. This transition was an agreement between BEA and the superintendent and the Board was notified. In addition, District central office meets with the BEA executive team monthly.
