

Food and Beverages Purchase

It is realized that beverages are expected as part of meetings to inform and train the public and/or staff. Purchase of beverages for meetings and/or training must comply with the District wellness policy and state and federal law. Such purchases may be made via the purchase process.

Purchase with District or activity funds of meals for employees or the public may be made only when the training or meeting takes place at time when the attendance on behalf of the employee or member of the public is expected to run through the lunch or dinner hour and, for employees, is in lieu of a lunch break.

District and/or activity funds may not be used to purchase beverages, snacks, or meals for consumption within the regular work day or for regular staff meetings within the work week.
