What is SVTube?

- SVTube is used to stream video and audio files
    - Users are only able to see their own uploaded videos—this is used when users are unable to share through email due to the limitation of size and to reduce the insistent buffering/chopping issues
- Allows teachers/students to upload video/audio files to their own personal library and share the link them with others (may upload through computer/ phone
- Download Discover Education videos for consistent playback
- Student uploaded videos are password protected

Steps to Upload Video/Audio:

1. Navigate to svtube.svsd.net—SV computer login required

2. Enter in Media Name for video (up to 25 characters long)

3. Select Media Type: **All other types of video**

4. Select Media File: Navigate to where the video/audio file is located

5. Upload Media—**IMPORTANT**: DO NOT close this page until you see that the coding is complete (refer to the directions below). This may take a while depending on length of the video.

Upload Media

Upload		Upload complete! You may upload additional files during the encoding process.
		3/12/2020 12:41:31 PM Encoding complete! Return to the main page to play your media.
