

Drummond Procedures for a Safe and Orderly School

Teachers: Every student at Drummond must be taught each and every one of these procedures. Your job is not only to teach the procedures, but also to make sure that they are reviewed on a regular basis and that every student in your classroom knows the procedures.

Students: Every student at Drummond is expected to know the proper procedures for everyday life at Drummond. The procedures do not need to be memorized, but do need to be clearly understood by everyone and each student should be able to demonstrate a satisfactory knowledge of each of these procedures.

Rationale: Each of the Drummond Procedures is designed with the safety of our students, optimal learning environment and ease of school operations in mind.

Drummond Core Beliefs

1. I believe that students should be responsible for solving their own problems with adult guidance.
2. I believe that students should learn that breaking rules results in appropriate consequences and the loss of privileges.
3. I believe that preserving and/or enhancing a student's self-respect and dignity is crucial to a successful disciplinary action.
4. I believe that a student should always be left with some control. However, this control is on the adult's terms within limits.
5. I believe that the adult's emphasis should be placed on learning new behaviors instead of "paying" for past deeds.
6. I believe that discipline should be considered an opportunity for personal growth rather than a bad thing that should never happen.
