

Below is a list of counseling resources that have been recommended by individuals within the community. I don't have professional or personal connections to these counseling resources, but like I said, have been recommended within the community. I also always recommend to parents to call your insurance provider and ask them to give you a list of counseling service providers within your insurance network. That way you don't go through all of the trouble of finding a provider that is not covered.

Counseling Resources
