

## **Personnel - Certified and Non-Certified**

### **Students**

#### **Face Masks/Coverings**

This policy pertains to students, faculty, staff, and visitors. It has been developed to fulfill the guiding principles contained in the *Framework for Connecticut Schools*, specifically to safeguard the health and safety of students and staff and to allow all students the opportunity to return into classrooms.

The Board of Education (Board) is implementing this masking requirement to promote the safest possible learning, teaching and work environment for students, faculty, staff and visitors during the COVID-19 pandemic. The first priority of the Board is the health and well-being of students and staff as the District prepares for and implements the safe reopening of schools.

The Center for Disease Control (CDC) and the Connecticut Department of Health (DPH) and the Connecticut State Department of Education, as outlined in *Adapt, Advance, Achieve: Connecticut's Plan to Learn and Grow Together* requires the wearing of face coverings for all students and staff when they are inside school buildings and while riding school transportation vehicles, with certain exceptions.

#### **Definitions**

**Face covering/mask** - a cloth, paper, or disposable face covering that covers the nose and mouth. It may or may not be medical grade. (Evidence shows that the proper wearing of facial masks or coverings helps stop the spread of the virus, which is currently by droplets when an individual coughs, sneezes or talks.)

**Face shield** - a clear, plastic shield that covers the forehead, extends below the chin and wraps around the sides of the face, protecting the eyes, nose and mouth from contamination from respiratory droplets, along with masks or respirators.

**Clear plastic barrier** - a clear plastic or solid surface that can be cleaned and sanitized often.

#### **Transportation**

Student passengers are required to wear a face mask or cloth face covering that completely covers the nose and mouth during transit. The student's face covering must be in place prior to boarding the bus, van or other vehicles and must be kept in place until they are completely off the bus or van. The Board shall provide back-up masks if students do not have face coverings when boarding a school bus or van. The face mask or cloth face covering is also applicable to the drivers of the vehicle.

The Board may consider the option of assigning a temporary monitor on student transportation at the beginning of the school year to facilitate compliance with this new face mask protocol.

### **School Buildings and Grounds**

All students, staff, and visitors are required to use face coverings, that completely covers the nose and mouth, when they are inside the school building or on school grounds, even when social distancing is maintained. An individual shall be excused from this requirement for the following listed reasons, per CDC guidance.

The individual:

1. has trouble breathing during a medical emergency event;
2. is unconscious;
3. is incapacitated; or
4. cannot remove the mask or face covering without assistance.

In addition, masks or face coverings shall not be required for anyone who has a medical reason making it unsafe to wear a face mask or face covering. A written notification from a physician is required in order for the Board to permit a medical exemption. The note should state the medical reason for the requested exemption, such as, but not limited to, difficulty breathing.

Parents/guardians may not excuse their child from this face mask requirement, by signing a waiver, because such wearing is a mandated requirement that the Office of the Governor, the Connecticut State Department of Education, and/or the Connecticut State Department of Public Health have defined as necessary for school districts to comply with in order to open schools from the COVID-19 caused closure.

In addition to the wearing of face masks, the District will maximize social distancing between student's workstations and desks, achieving six feet when feasible. Space between the teacher and students is to be maximized to reduce the risk of increased droplets from teachers during instruction. A teacher is permitted to remove a face covering or mask during instruction.

Transparent (clear) masks should be considered as an option for teachers and students in classes for deaf and hard of hearing students. Pre-K and special education teachers should consider wearing clear masks.

Face shields may be an option for those students with medical, behavioral or other challenges who are unable to wear face masks or coverings. The Board recognizes that face shields are not as effective for source control and should be used only when other methods are not available or appropriate. Therefore, the use of face shields for those with medical conditions is done with the understanding of their limitations and a heightened need for strict adherence to social distancing.

The Board shall provide to any student, staff member or visitor a face mask if such individual does not have one. Training shall be provided as necessary regarding the proper use of face coverings. Information shall be provided to staff, students and students' families regarding the proper use, removal and washing of cloth face coverings.

### **Limited Exceptions to Use of Face Coverings**

When other and appropriate mitigating practices are in place, such as social distancing, students will not be required to wear face masks or coverings while eating, drinking, Exceptions may also be necessary for certain special education students or other special populations.

### **Mask Breaks**

Breaks from wearing masks shall be scheduled throughout the school day, by the teacher, provided that strict social distancing requirements are maintained and limitations are enforced regarding student and staff mobility.

During time of eating, face masks or coverings may be removed. Masks are required in all dining areas while entering and leaving or getting food and drinks. They may be removed at appropriately socially distanced tables in order to eat but must be replaced after eating.

A recess period may be used as a break from wearing masks when no more than one class is outside at a time and social distancing requirements are maintained to the greatest degree feasible.

### **Violations of this Policy**

Violations of this policy, whether by students or staff, shall be handled in the same manner as other violations of applicable Board policy.

If a student refuses to wear a face mask or covering and does not fulfill any of the exemptions allowed by this policy, such student shall be sent to the school's isolation/(Nursing Assistant's) room. The parent/guardian shall be contacted to rectify the situation. School personnel will explain the options available regarding schooling and the possible removal of the child from the school setting.

If a visitor refuses to wear a face covering, for non-medical reasons, entry to the school/district facility will be denied.

Teachers or schools may provide incentives for compliance with the face mask requirement.

### **Community Outreach**

The District shall engage in community education programs including signage, mass and targeted communication, and positive reinforcement that will actively promote mask use consistent with CDC, DDH, CSDE and OSHA guidance. Community members will be reminded that mask use does not

replace the need for social distancing, washing of hands and other preventative practices recommended by all appropriate authorities.

### **Other Considerations**

- The District shall maintain in each school a supply of disposable face coverings in the event that a staff member, student or visitor does not have one for use.
- Special attention must be given to putting on and removing face coverings for purposes such as eating. After use, the front of the face covering is considered contaminated and should not be touched during removal or replacement. Hand hygiene should be performed immediately after removing and after replacing the face covering.
- When medically appropriate, nurses shall substitute use of metered dose inhalers and spacers for students with respiratory issues.
- Face shields with face masks may be used by staff who support students with special healthcare needs such as those who are unable to wear masks and who may need assistance with activities of daily living, such as toileting and eating.
- Mask use will not be required by employees when they are alone in private offices. However, they are required to mask when anyone enters a private office space and required to wear a mask if their office space is physically shared with others and does not allow for 6 feet of physical distancing or if the work area is frequented by others (such as a reception area).
- Masks or other face coverings must comply with the district's dress code policy. Specifically, they may not contain offensive symbols or language, or symbols that promote drugs, alcohol, weapons, or represent gang affiliation.

Until further notice the Board will require the wearing of masks as prescribed in this policy. The Board reserves the right to interpret the provisions of this policy and to modify any or all matters contained in this policy at any time, subject to applicable law.
