

BAS Health Advisory Committee
Feb. 5, 2014
Minutes

1. STD 8th Grade Presentation Update: Pam Lee-Campbell, Mary Beano, and Laurie Bechhofer (MDE HIV/STD Consultant) have been unable to locate a commercial product to use instead of our STD slides. Laurie also said that she did not know of a district that has a comparable program (outside of the 7th grade health Michigan Model curriculum).

2 yr. Sex Education Report: We will need to compile this again in the spring. Dr. Surrey will be in communication with the principals to have pre- and post test results collected from our Reproductive Health unit at BHS and Scranton.

3. School-Based HIV/STD and Pregnancy Prevention five-year initiative: BAS is now one of 15 partner districts to participate in a 5 year comprehensive initiative that may help us address a number of the agenda items listed above. Dr. Surrey spoke with Laurie Bechhofer (MDE HIV/STD coordinator) about the work before us. She said that the MDE team will need to attend a Health Advisory Meeting this spring. They will need two hours. We can either do this at our April meeting or schedule a special one. Barb will also be putting out more information on this great opportunity. The link for the initiative follows:
