Logic Model: «Program_Name»
«Organization_Name»

Problem Statement:

Program Goal:

Program Assumptions:

Resources	Activities	Outputs	Short-Term Outcomes	Intermediate Outcomes	Long-Term Outcomes
What resources are allocated from your organization for this program? What resources are required from Pittsburgh Public Schools?	*What are the specific activities this program utilizes in order to operate?*	*What are the simple, quantitative measures of what your program aims to achieve?*	*What are the LEARNING or KNOWLEDGE outcomes of your program? What knowledge do you foresee students acquiring through participation, and in what shorter-term timeframe?*	*What are the SKILL-BASED outcomes of your program? This should go further than just knowing about skills: what should students be able to DO and in what intermediate timeframe?*	*What are the HABITS or DISPOSITION-BASED outcomes of your program? What do you hope becomes innate to this student through extended engagement in this activity and in what long-term timeframe?*
Resources Allocated from Organization: **Staff:** «Staff_Resources» **Financial:** «Financial_Resources» **Facilities:** «Facilities» **Technology:**	«What_are_the_specific_activities_that_th»	«Outputs__These_should_be_simple_quantita»	«ShortTerm_Outcomes__These_should_be_LEA»	«Intermediate_Outcomes__These_should_be_S»	«LongTerm_Outcomes_These_should_be_HABIT»

«Technology» **Materials:** «Materials Supplies» **Other:** «Other» **Resources Needed from Pittsburgh Public Schools:** **Staff:** «Staff_Resources1» **Financial:** «Financial_Resources1» **Facilities:** «Facilities1» **Technology:**
