Policy

We have established this written Injury and Illness Prevention Program (IIPP) in accordance with Title 8, California Code of Regulations, Section 3203, of the General Industry Safety Orders. All employees are required to comply with our safety and health policies and practices. This includes employees at every level and in all positions.

This IIPP includes the following elements:

- Responsibility and Authority
- Compliance
- Communication
- Hazard Assessment
- Accident Investigation
- Hazard Correction
- Training and Instruction
- Record Keeping

Responsibility and Authority

Ray Wilds, Director of Business Services/Transportation is the designated IIPP Administrator and has the authority and responsibility for implementing and maintaining this IIPP.

Managers and supervisors are responsible for implementing and maintaining the IIPP in their work areas and for answering employee questions about the IIPP. Employees are responsible for understanding and following the requirements of the IIPP and for asking questions when direction is unclear.

The department IIPP supplements provide department-specific information and additional direction. A copy of our IIPP is available from each manager and supervisor.

Compliance

All employees, including managers and supervisors, are responsible for using safe work practices; following all directives, policies, and procedures; and assisting in maintaining a safe work environment.

The system to ensure all employees comply with these practices includes the following:

- Informing employees of the requirements within our IIPP in a readily understandable language
- Training all employees on general safety policies, rules, and work practices
- Recognizing employees who perform safe and healthful work practices
- Providing additional training to employees whose safety performance is deficient
- Disciplining employees for failure to comply with safe and healthful work practices

The department IIPP supplements outline department-specific compliance requirements.

Communication

All managers and supervisors are responsible for communicating with all employees about occupational safety and health in a form readily understandable by all employees. Our communication system encourages all employees to inform their managers and supervisors about workplace hazards without fear of reprisal. Employees can report workplace hazards anonymously by completing the "NOTICE OF HAZARD/SAFETY CONCERN" Form (Exhibit A).

Our communication system includes:

- New employee orientation including a discussion of safety and health policies and procedures
- Review of our IIPP
- Safety training programs
- Regularly scheduled safety meetings
- Posted or distributed safety information

Additional details are outlined in the department IIPP supplements.

Hazard Assessment

Periodic inspections will be conducted to evaluate physical hazards, use of hazardous materials, and safe work practices. The periodic inspection schedule and the responsibility for conducting the inspections are included in the department IIPP supplements.

In addition to the department periodic inspection schedule, inspections will be conducted as required in the following situations:

- When we initially established our IIPP;
- When new substances, processes, procedures, or equipment that present potential new hazards are introduced into our workplace;
- When new, previously unidentified hazards are recognized;
- When occupational injuries and illnesses occur; and
- Whenever workplace conditions warrant an inspection

Hazard Correction

When unsafe or unhealthy work conditions, practices, or procedures are observed or discovered, they will be corrected in a timely manner based on the severity of the hazards. When an imminent hazard exists that cannot be immediately corrected, the exposed employees will be removed from the immediate hazard except those needed to correct the condition and to address security issues. Employees who are required to correct the hazardous condition will be provided with the necessary protection.

Accident/Incident Investigations

Procedures for investigating workplace accidents and hazardous substance exposures include:

- Interviewing injured employees and witnesses;
- Examining the workplace for factors associated with the accident/exposure;
- Determining the cause of the accident/exposure;
- Taking corrective action to prevent the accident/exposure from reoccurring; and
- Recording the findings and actions taken.

Department-specific investigation and reporting procedures are located in the department IIPP supplements.

Training and Instruction

All employees will participate in safety training on general and job-specific hazards and safe work practices. Each supervisor and manager will be trained on all health and safety hazards to which employees under their immediate direction and control are exposed.

In addition to hazard-specific safety training, training will be provided when:

- The IIPP is first established
- New employees are hired
- Employees are reassigned to a new area or task with no prior training
- New substances, operations, or equipment are introduced

Department-specific training procedures are located in the department IIPP supplements.

Record Keeping

All the following IIPP documentation is maintained for three years:

- Safety training for each employee, including the employee's name, training dates, type of training, and training providers
- Inspections, including the person(s) conducting the inspection; the unsafe conditions and work practices identified; corrective action, and follow up
- Accidents, illnesses, and near-miss inspections that identify the root cause and corrective action taken
- Annual program reviews

Responsibilities

The department manager has the overall authority and responsibility for ensuring the department IIPP supplement is effectively implemented throughout departmental operations. Supervisors have program oversight for operations under their direct supervision and control.

Compliance

The following department methods are used to reinforce employee compliance with safety work practices and procedures:

- Distribution of School Safety Plan in Office/Department
 - Devon Rose, Ed.D., Student Services
- Communicating IIPP responsibilities with all employees
- Employee training programs
- Recognizing employees who perform safe work practices
- Disciplinary process outlined in applicable bargaining unit agreement.

Communication

Effective communications with employees have been established using the following methods:

- | | |
|---|--|
| ☐ Site/Department safety committee | ☐ Safety newsletter, handouts |
| ☐ Specific policies/procedures | ☐ Material safety data sheets |
| ☐ Department hazard assessment | ☐ Posters and warning labels |
| ☐ Employee safety training | |

Employees are encouraged to report any potential health and safety hazard that may exist in the workplace to their Supervisor. The Hazardous/Unsafe Condition Report form (see Attachment A) is located at each school site/department office. Forms should be submitted to immediate Supervisor or I.I.P.P. Official.

Hazard Assessment and Correction

Periodic Workplace Inspections

Inspections are conducted at each department facilities or workplace:

Department inspection forms are located at school site/department office (Exhibit B).

Corrective Action

Supervisors will document corrective actions, including projected and actual completion dates. If an imminent hazard exists, work in the area must cease, and the manager must be contacted immediately. If the hazard cannot be immediately corrected without endangering employees or property, all personnel need to leave the area except those qualified and necessary to correct the condition. Contact Jeff Peiten or Ray Wilds when this occurs.

Accident Investigation

Employees will immediately notify their supervisor when an injury or illness occurs on the job. Supervisors will promptly investigate all accidents, injuries, occupational illnesses, and near-miss incidents to determine the cause of the incident. Appropriate corrective actions will be implemented promptly to mitigate the hazards identified during the investigation.

The Accident Report for Workers' Compensation and the Supervisor's Report of Injury form will be completed and a copy retained. The forms are located at each school site/department office and retained in the Business Services Division.

Note: Serious occupational injuries and illnesses must be reported to Cal/OSHA within eight hours after they have become known to the supervisor. This includes, but is not limited to, permanent disfigurement or hospitalization. Cal/OSHA notification will be the responsibility of Jeff Peiten.

Training and Instruction

Health and safety training, covering both general work practices online and job-specific hazard training, is the responsibility of the supervisor.

General and department specific safety training requirements are located at each school site/department. (Exhibit C).

Record Keeping and Documentation

The following documents are located at the district office in the Maintenance Department and will be maintained within the **Department JIPP Records** for at least the three years.

- Department Hazard Assessment
- Employee Hazard Report Forms
- Inspection Reports
- Accident Investigation Forms
- Hazard Correction Reports
- Employee Safety Training Requirements and Attendance Records

NOTICE OF HAZARD/SAFETY CONCERN

STOP! Do not use this form to report an emergency.
You may remain anonymous if you wish.

Name of reporter (**not required**): _____

Date of report: _____ Time of report: _____

Site: _____

Contact information (phone, e-mail – **optional**): _____

TYPE OF HAZARD/SAFETY CONCERN

Check only one.
