

## Turn Private Address off for a network

- **Google Pixel / Motorola / Other Androids:**

- Open the Settings app
- Select Network and Internet
- Select WiFi
- Connect to the Wireless network
- Tap the gear icon next to the current connection
- Select Advanced
- Select Privacy
- Select "Use device MAC"

- **Samsung Galaxy:**

- Navigate to "Settings"
- Select "Connections"
- Select "WiFi"
- Select "the Wireless Network you wish to connect to"
- Tap the gear shaped icon next to the network you connected to
- Select "Advanced"
- On the next screen there is a menu labeled "MAC Address Type".
- Tap on "MAC Address Type"
- Select "Use Phone/Device MAC"

- **iPhone:**

- Open the "Settings app", then tap "Wi-Fi"
- Tap the "information button" next to your Plume network
- Tap on the "Use private Address" toggle to turn it off
