

Ready Math!

Ready Mathematics uses discourse-based routines that integrate language and math to empower all students in their own learning. Each unit structure embraces what students already know and uses this prior knowledge as a springboard to learn and apply new concepts. The multiple day lesson structure allows time for students to develop a deeper understanding of concepts and skills. Each lesson allows students to explore, develop, and refine their thinking.

★ *Unit 1 - Whole Number Operations and Applications*

Volume, Multiplication, and Division

★ *Unit 2 - Decimals and Fractions*

Place Value, Addition, and Subtraction

★ *Unit 3 - More Decimals and Fractions*

Multiplication and Division

★ *Unit 4 - Measurement, Data, and Geometry*

Converting Units, Using Data, and Classifying Figures

★ *Unit 5 - Algebraic Thinking and Coordinate Plane*

Expressions, Graphing Points, Patterns and Relationships
