

TO: Larry Mendonca, Deputy Superintendent Regular Meeting
SUBJECT: Local Indicator Update: Teaching August 12, 2024
Assignment Monitoring Outcomes, District & Charter

BACKGROUND

When the Local Indicators for 23-24 were presented in June of this year, the data provided for the Teaching Assignment Monitoring Outcomes (TAMO) was for the 2021-2022 school year. Since then, the State has released this information for the 2022-2023 school year and subsequently asked school districts and charter schools to report this new information to their governing boards at the next available opportunity.

ANALYSIS

The data given for the 2022-2023 Teaching Assignment Monitoring Outcomes shows that OJUSD has 233.3 FTE positions and breaks down that number into percentages of Clear, Out-of-Field, Intern, Ineffective, Incomplete, Unknown, and N/A. Oakdale Joint Unified School District either does better when compared to County and State percentages or is in a similar range. Compared to the 21-22 data for OJUSD, the District has fewer FTEs (233.3 compared to 239), but more Clear, and fewer Out-of-Field, Intern, and Ineffective positions and just slightly more Incomplete, Unknown, and N/A positions.

Oakdale Charter has three FTE positions (and had three in 21-22 as well), but because they teach a wide variety of subjects, they are reported as teaching out of their field more often. The rest of the measures have little to no percentage for this year.

FISCAL IMPACT

There is no fiscal impact.
