IB DP Film HL Y2

Unit Title/ Topic

CULTIVATING THE PRODUCTION PORTFOLIO

Hours

30

Mastering Content and Skills through INQUIRY (Establishing the purpose of the Unit): What will students learn? Year 2 focuses on refining the skills built in year one as students are no longer experimenting in all roles, but, rather, focusing on work in three specific roles (writer, director, cinematographer, editing, sound designer). Based on their output from Y1, students should be creating more polished, more creative, and more skilled work in their projects. Students will learn to connect their intentions towards their choices in terms of their written portfolio. Students are encouraged to expand beyond their Y1 skills (3 point lighting, compositions, basic edits) and, with the help of research, explore and attempt to use the camera, lighting, sound, and edits to explore the boundaries of filmmaking, specifically in reference to portraying a characters' subjective perspective.

Unit Description and texts

Continuing to create and refine short films/productions as part of the production process while moving through the IB Design Cycle (Inquiry, Action, and Reflection). This unit does place more emphasis on cultivating both the video and written components of the DP assessment of the Production Portfolio.

The class makes use of professional websites dedicated to film production: Film Riot, NerdWriter, Crash Course, etc.

Transfer goals/Skills	Approaches to learning (ATL)
Skills:	Category: Thinking Skills
Research: viewing films and experimenting with the boundaries of lighting, camera lenses, and asynchronous sound (and Foley). The portfolio allows for student growth, not perfection, and students should be experimenting with these tools in their work. Communication: important in two ways 1) working within their groups to communicate ideas, process, and obstacles and 2) writing in their portfolios in terms of expressing their intentions and the result of their work while providing appropriate documentation from their process.	Details: The assessments favor creativity and insight more than proficiency (or so they say). We push students to consider how to use filmic techniques to express meaning as opposed to giving character's dialogue. How can one portray a character's inner world without saying anything on screen? That requires thinking.

Details: Students will use other films, past work, and previous examples of work in the production portfolio to refine and elevate their thinking.					
Content/skills/concepts		Learning process			
	Students will know the following content	<u>:</u>	Lecture - teacher lead in terms of giving the boundaries and expectations of the	ng students insight and guidance, especially in terms of ne assessment.	
1)	Production roles				
2)	Design cycle		Small group/pair work - students work within smaller groups to brainstorm ideas, write a		
3)	Camera and lighting fundamentals		script, and develop a production plan. Also, students examine and assess previous studen		
4)	Adobe Premiere software fundamentals		work.		
			PowerPoint lecture/notes - an overvie	ew of the assessment, dos and don'ts.	
	Students will develop the following skills	<u>:</u>			
1)	Connect their intentions to creative explorations and mea	anings	Group presentations - production teams are expected to deliver a pitch of their idea as well as their creative intentions within the work.		
2)	Reflecting on their creative choices in the written compor				
3)	Selecting and judging their growth as a filmmaker across roles	different production			
4)	The importance of creating a plan for production and pos	t-production.			
1) 2)	Students will grasp the following concepts Directorial intent is subservient to audience understandin A clear artistic vision needs to be communicated to one's	ng.	Details: The process in class is one based in actively making projects students are provided specific guidelines: time, props, technical considerations, and they are tasked with creatively delivering a product. Each class, students check in for informal meetings related to story, creative choices, technical considerations, and management of team and the group.		
	Language and Learning	TOI	K Connections	CAS connections	

Language and Learning	TOK Connections	CAS connections
Activating background knowledge Acquisition of new learning through practice Demonstrating Proficiency	Areas of knowledge Details: The Arts falls within the areas of knowledge in TOK, and this explicitly correlates to the class. Film is considered art, and students are tasked with both creating meaning and reflecting	Creativity Activity Details: Since students receive a score/grade for their work, students cannot count their work from our class
Details: Clearly, Y2 students need to rely on knowledge and skills gained from Y1 activities and projects. However, Y2 students are expected to demonstrate proficiency at setting up	on said meaning through their work. For instance, one element of film (that is shared with other artistic mediums) is that of mise-en-scene what is included within the frame that offers	as CAS honors; however, the class does help facilitate CAS experiences, specifically as students can borrow film equipment to make creative projects on their own

shots, lighting, and recording sound. In addition, they are also expected to acquire new skills and knowledge. Although the portfolio is an overview of student work, the work within does not have to be perfect: the work can demonstrate a spectrum of work within a role that reveals growth (i.e. initial work that gives way later to more polished pieces).

meaning or information. Often, the director (and cinematographer) is tasked with accentuating/developing the mise-en-scene (artwork, objects, style of furniture, lighting, composition, etc). In other units, this concept applies to cultural and historical context -- how does art reflect ideas in a given time and society and culture.

(outside of class assignments), and students can use their knowledge of equipment and technical skills to participate in filming events at school (assemblies) and outside of school hours (sporting events).

Essential Understandings and Questions

Factual: Film has its own, specific language that is used to communicate ideas and emotions.

Conceptual: How do the elements of film work together to tell a story?

Debatable: Film language has certain limits, i.e. there are some ideas/emotions that film cannot communicate.

Common Assessment Tasks List of formative and summative assessments.									
DP	Assessment Objectives	Formative Assessments		Summative					
Assessments	1c. Identify informative moments and			Assessments
