

TEXAS STRATEGIC LEADERSHIP JOURNEY TO SUCCESS

Texas Strategic Leadership will allow your district to partner with a highly qualified TSL ESC team as you walk through four phases of the program, seeking to answer key questions that will lead you to executing your district's envisioned student experience.

1

WHAT IS THE CURRENT STATE OF MY DISTRICT?

The TSL ESC Team supports your superintendent in launching a Steering Committee that includes various stakeholders within your district community to champion the TSL process. Your district and TSL ESC Team partner to conduct a landscape analysis (strengths and needs analysis) to see your current state.

Work hand in hand with your TSL ESC Team to

- gather stakeholder input;
- learn about your district;
- walk classrooms and campuses; and
- see other districts to observe best practices.

3

HOW CAN WE ALIGN SYSTEMS TO CREATE OUR STRATEGIC PLAN?

The TSL ESC Team and your district utilize your strategic plan to create a measurement plan, developing metrics aligned to your new strategic priorities. An implementation plan is also created to support in planning how to bring your strategic plan to life.

Partnering with your TSL ESC Team

- gather stakeholder feedback on your new strategic plan;
- identify leading metrics and indicators to measure progress; and
- create key milestones and benchmarks along the way.

2

WHAT ARE THE GOALS AND PRIORITIES AROUND THE ENVISIONED STUDENT EXPERIENCE?

The TSL ESC Team works with your district to analyze the state of your district and set goals and priorities that are centered on your district envisioned student experience.

Together with your TSL ESC Team

- analyze the landscape analysis data;
- utilize insights to determine an envisioned student experience; and
- set student outcome goals, strategic priorities, and aligned initiatives.

4

HOW DO YOU EXECUTE YOUR STRATEGIC PLAN AND MANAGE PERFORMANCE?

The TSL ESC Team works in partnership with your district to ensure all milestones and benchmarks occur, ensuring the plan is executed.

Supported by your TSL ESC Team, bridge to capacity builder supports to begin implementation.
