MCS MYP Grade 6 Honors Mathematics Subject Group Overview

Statement of Inquiry	Gathering and modeling data provides for a better understanding of a population.	Making decisions can be improved by using a model to represent relationships.	By examining relationships and patterns, we can make predictions in real world situations.	Expressions, equations and inequalities communicate real world scenarios through symbols, numbers, and algebraic thinking.	Expressions, equations and inequalities communicate real world scenarios through symbols, numbers, and algebraic thinking.	Understanding simple shapes helps us enhance our environments.	Modeling using a logical process helps us to understand the world	By examining relationships and patterns, we can make predictions in real world situations.	A logical process helps to model and generalize the natural world.
