

Marietta City Schools
District Unit Planner

Fifth Grade

Unit Name

Unit 3: Building Conceptual Understanding of Multiplication and Division with Whole Numbers

Unit Duration (Days)

3-4 Weeks

GA K-12 Standards

In this unit, students build on their conceptual understanding of, and strategies for multiplication and division from previous grades and units to multiply and divide multi digit whole numbers using place value understanding, properties of operations, and the relationship between multiplication and division. Previous experience with area diagrams in fourth grade and in the previous unit will make the partial products diagram more accessible in this unit. Students will use strategies to multiply multi to four digit whole numbers and partial quotient algorithms to divide whole numbers up to two digits by two digits. Students will also have the opportunity to ask and answer statistical questions using the statistical reasoning framework which includes collecting, organizing, and interpreting data.

5.NR.2: Multiply and divide multi-digit whole numbers to solve real-life, mathematical problems.

- **5.NR.2.1** Fluently multiply multi-digit (up to 3-digit by 2-digit) whole numbers to solve real-life problems.
- **5.NR.2.2** Fluently divide multi-digit whole numbers (up to 4- digit dividends and 2-digit divisors no greater than 25) to solve real-life problems

5.NR.5: Write, interpret, and evaluate numerical expressions within real-life problems.

- **5.NR.5.1** Write, interpret, and evaluate simple numerical expressions involving whole numbers with or without grouping symbols to represent real-life situations.
* This is not PEMDAS. Students should understand the purpose behind grouping with parentheses.

5.MDR.7: Solve problems involving customary measurements, metric measurements, and time and analyze graphical displays of data to answer relevant questions.

- **5.MDR.7.2** Ask questions and answer them based on gathered information, observations, and appropriate graphical displays to solve problems relevant to everyday life.

5.MP.1-8 Display perseverance and patience in problem-solving. Demonstrate skills and strategies needed to succeed in mathematics, including critical thinking, reasoning, and effective collaboration and expression. Seek help and apply feedback. Set and monitor goals. (It is important to note that MPs 1, 3 and 6 should support the learning in every lesson.)

- **5.MP.1** Make sense of problems and persevere in solving them.
- **5.MP.2** Reason abstractly and quantitatively.
- **5.MP.3** Construct viable arguments and critique the reasoning of others.
- **5.MP.4** Model with mathematics.
- **5.MP.5** Use appropriate tools strategically.
- **5.MP.6** Attend to precision.
- **5.MP.7** Look for and make use of structure.

- **5.MP.8** Look for and express regularity in repeated reasoning.

The [Framework for Statistical Reasoning](#) and the [Mathematical Modeling Framework](#) should be taught throughout the units. The [K-12 Mathematical Practices](#) should be evidenced at some point throughout each unit depending on the tasks that are explored. It is important to note that MP's 1, 3 and 6 should support the learning in every lesson.

Essential Questions/ I CAN statements

- (5.NR.2.1) How can you multiply whole numbers using part-whole thinking?
- (5.NR.2.1) How can you apply place value understanding to multiply 2-digit and 3-digit whole numbers?
- (5.NR.2.1) How can you represent part-whole thinking using visual diagrams when multiplying 2-digit and 3-digit whole numbers?
- (5.NR.2.2) I can divide 4 digit dividends by 2 digit divisors up to 25.
- (5.NR.2.1) I can solve real world problems involving multiplication.
- (5.NR.2.2) I can solve real world problems involving division.
- (5.NR.5.1) I can recognize the purpose for grouping symbols.
- (5.NR.2.1) I can multiply 3 digit by 2 digit whole numbers.

Tier II Vocabulary Words- High Frequency Multiple Meaning

Tier III Vocabulary Words- Subject/ Content Related Words

algorithm, order of operations, product, expression, properties of operations, remainder

distributive property, partition division (or fair-sharing), dividend, partial product, divisor, partial quotient, equation, measurement division (or repeated subtraction), quotient, multiplicand, multiplier

Assessments

Formative Assessment(s):

- [NR 2.1 Mini](#)
- [NR 2.2 Mini](#)
- [MCS K-5 Activity & Assessment Collection](#)
- [Unit 3 Summative Assessment](#)

Savvas Topic Performance Task 5.NR.2 (TE p 123-124)

Students will use a real-life scenario involving the cost of baseball uniforms to multiply multi-digit numbers.

It is the responsibility of each schools' grade level PLC to identify appropriate instructional lessons and resources, based on data and student needs, using the suggested pacing duration. The following learning tasks have been vetted to align to the standards included in this unit. The GA Dept. of Education strongly recommends that any additional tasks, resources, and/or assessments used for instruction should be vetted using the [Quality Assurance Rubric](#), to ensure alignment to the state standards.
