# Public Notification of Non-Discrimination in Career and Technical Education Programs

The Fort Worth Independent School District offers CTE programs in the following Career Areas:

Agriculture, Food and Natural Resources; Architecture and Construction; Arts, Audio Video Technology, and Communications (*Arts A/V*); Business, Marketing, and Finance; Education and Training; Energy (*P-TECH Program only*); Engineering; Health Science; Hospitality and Tourism; Human Services; Information Technology; Law and Public Service; Manufacturing; Transportation, Distribution and Logistics.

Admission to the above programs is based on interest, lottery selection, age appropriateness, and class space availability.

It is the policy of Fort Worth ISD not to discriminate on the basis of race, color, religion, gender, national origin, age, sexual orientation, disability, gender identity and expression, military/veteran status, or any other basis prohibited by law in its vocational programs, services or activities and provides equal access to the Boy Scouts and other designated youth groups as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; and Section 504 of the Rehabilitation Act of 1973, as amended.

Fort Worth ISD will take steps to assure that the lack of English language skills will not be a barrier to admission and participation in all educational and vocational programs.

The Fort Worth Independent School District prohibits discrimination, including harassment, against any employee on the basis of race, color, religion, gender, national origin, age, sexual orientation, disability, gender identity and expression, military/veteran status, or any other basis prohibited by law. Retaliation against anyone involved in the complaint process is a violation of District policy. The following persons have been designated to handle inquiries regarding the non-discrimination policies: Patricia Sutton, Director of Special Services, 7060 Camp Bowie Blvd., Fort Worth, TX 76116, 817.814.2458, E-mail: <u>Patricia.Sutton@fwisd.org</u>. Cynthia Allen, Title IX Coordinator, 7060 Camp Bowie Blvd., Fort Worth, TX 76116, 817.814.1880, Email: <u>Cynthia.Allen1@fwisd.org</u>. Dr. Lisa Langston, Director of UIL Compliance, 1501 University Dr, Fort Worth, TX 76107, 817.815.7307, Email: <u>Lisa.Langston@fwisd.org</u>.

Fort Worth ISD Career & Technical Education (CTE) offers a variety of Programs of Study. Each Program of Study has a developed coherent sequence of courses to provide students with an option to receive an Endorsement with their high school diploma based on House Bill 5/Foundation Graduation Program Requirements. Each Program of Study begins with foundation courses that allow students to explore the careers and learn basic concepts and skills needed within that focus. As students move forward in the Program of Study, they will begin to take technical courses that provide them with advanced knowledge and skills in preparation for postsecondary education and/or for jobs in their chosen career field. Programs of Study also prepare students to complete industry certifications that will allow them to become more employable with higher starting wages and provide them with a Performance Acknowledgement in an Endorsement.

#### What is an endorsement?

Endorsements are made up of four courses for four or more credits taken in a coherent sequent providing advanced or more indepth knowledge and skills in a curriculum area. Middle school students should explore career information related to the endorsement areas listed below so they may begin to think about what areas they will want to take more in-depth course work during their educational career in high school.

Each endorsement requires students to complete a foundation of academic courses and a coherent sequence of courses within the endorsement area that lead to advanced studies. Endorsements are earned by successfully completing 26 credits including:

4 math4 science4 or more credits in a coherent sequencecreditscreditsaligned to their endorsement area

**2 additional elective** credits (can be part of the endorsement coherent sequence)

#### What is a Program of Study?

Did you know that there are thousands of different careers in the United States? To help organize the thousands of careers, the U.S. Department of Labor has organized them into career areas with occupations and broad industries that share certain features. In FWISD Career and Technical Education (CTE), the many available programs of study provide you with a developed coherent sequence that can lead to an endorsement with your high school diploma. Think of a program of study as being like a college major. Each program of study begins with foundation courses that allow you to explore the careers within the focus and to learn basic concepts and skills needed for careers within that program of study. As you move forward in the program of study, you will begin to take technical courses that provide you with advanced knowledge and skills in preparation for postsecondary training and/or for jobs in your chosen career field. Many programs of study will lead into a capstone experience junior or senior year, that allows you to graduate with a performance acknowledgement on your diploma. These experiences include earning dual credit, a level I or II college certificate, an industry-based certification, a work-based learning experience, and/or a paid internship opportunity. A CTE Capstone Experience will help you build industry relationships and prepare for the real-world which will, in turn, help you to become more employable in high-need, high-wage jobs of your interest. Additionally, you can use this opportunity to find a job that could help pay for college or post-secondary education.

#### **Business and Industry Endorsement**

Agriculture, Food & Natural Resources careers focus on the essential elements of life food, water, land, and air. This career cluster includes a diverse spectrum of occupations, ranging from farmer, rancher, and veterinarian to geologist, land conservationist, and florist. It also includes non-traditional agricultural occupations like wind energy, solar energy, and oil and gas production.

**Architecture & Construction** careers focus on designing, planning, managing, building and maintaining the built environment.

**Arts, A/V Technology & Communications** careers focus on designing, producing, exhibiting, performing, writing, and publishing multimedia content. These focuses include visual and performing arts, design, journalism, and entertainment services. Careers in the AAVTC career cluster require a creative aptitude, a strong background in computer and technology applications, a strong academic foundation, and a proficiency in oral and written communication.

**Business, Marketing & Finance** careers focus on planning, organizing, directing and evaluating business functions essential to efficient and productive business operations.

**Energy** careers focus on the designing, planning, maintaining, generating, transmission, and distribution of

traditional and alternative energy.

**Hospitality & Tourism** careers focus on the management, marketing and operations of restaurants, food/ beverage services, lodging, attractions, recreation events and travel related services. Students acquire knowledge and skills focusing on

communication, time management, and customer service that meet industry standards. Students will explore the history of the hospitality and tourism industry and examine characteristics needed for success.

**Information Technology** careers focus on building linkages in IT occupations for entry level, technical, and professional careers related to the design, development, support and management of hardware, software, and multimedia and systems integration services.

**Manufacturing** careers focus on planning, managing and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance and manufacturing/process engineering.

**Transportation, Distribution & Logistics** careers focus on planning, management, and movement of people, materials, and goods by road, pipeline, air, rail and water and related professional and technical support services such as transportation infrastructure planning and management, logistics services, mobile equipment, and facility maintenance.

#### **Public Services Endorsement**

Education & Training careers focus on planning, managing and providing education and training services, and related learning support services. All parts of courses are designed to introduce learners to the various careers available within the Education and Training career cluster. Health Science careers focus on planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development. To pursue a career in the health science industry, students should learn to reason, think critically, make decisions, solve problems, communicate effectively, and work well with others.

**Human Services** careers focus on preparing individuals for employment in careers that relate to families and human needs such as counseling and mental health services, family and community services, personal care, and consumer services.

Law and Public Service careers focus on planning, managing, and providing legal services, public safety, protective services, and homeland security, including professional and technical support services. Students will examine the roles and responsibilities of police, courts, corrections, private security, and fire and emergency services.

#### **STEM Endorsement**

**Engineering** careers focus on the planning, designing, testing, building, and maintaining of machines, structures, materials, systems, and processes using empirical evidence and science, technology, and math principles.

Further details about specific programs of study and those with multiple endorsement opportunities can be found on the <u>CTE Programs of Study Alignment to Endorsements</u> page on the <u>http://tea.texas.gov</u> site.

## What is the difference between a program of study and an endorsement?

A program of study is a sequence of courses within a career cluster and link what students learn in school with the knowledge and skills they need for success in college and careers. *Endorsements* require that the students take four courses from basic skills to advanced courses in the sequence to receive the endorsement when the student graduates from high school.

### What is a coherent sequence?

A *coherent sequence* is a series of courses that relate to a student's career interest and program of study. A coherent sequence builds from foundation and/or exploratory courses to courses that include higher level skills and knowledge to courses that allow the student to practice the high-level skills they have learned either in a lab setting or in the workplace.

### Why is it important to offer a coherent sequence of courses?

A coherent sequence of courses helps students take various levels of courses throughout high school that prepares students for their secondary and postsecondary level career goals. The sequence lets students build their knowledge and skills from the basic level to a more technical and advanced level. The more advanced technical level courses provide students with the opportunity to take an industry-based certification offered within their program/career area as well as graduate high school with an industry endorsement.

### How do you know if you are in a coherent sequence?

A coherent sequence of courses builds from foundation-level to workplace-level skills and knowledge. If you follow one of the programs of study listed in this CTE section of the course catalog, you will be participating in a coherent sequence.

## Is a program of study flexible, if I decide to change?

Students should stay in the courses of their selected program of study in order to receive an endorsement when they graduate, but course curriculum can be flexible. Since there are a variety of jobs and positions at different levels within each occupational group, the courses students take for one career pathway may apply to a variety of different careers within the same pathway. Therefore, students have the opportunity to explore a variety of occupations within a chosen program of study and to learn a variety of skills that allows flexibility within students' education and career goals. For example, learning Business Entrepreneurship within their Culinary Program of Study.

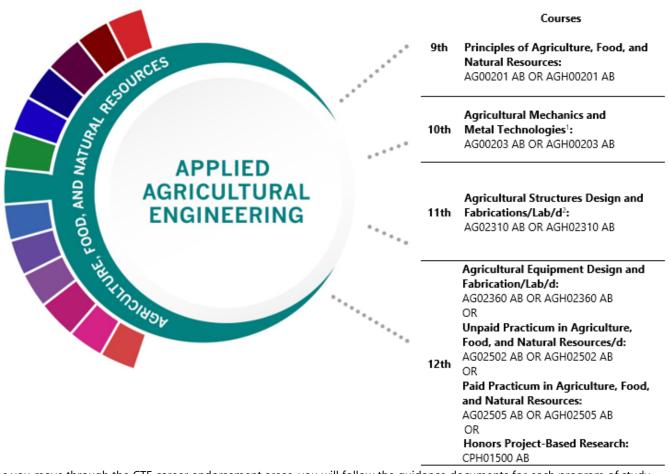

## What if you change your mind?

Students need to take the basic prerequisite courses to build the knowledge and skills before taking the higher-level courses. However, some courses are offered in other programs of study where the student can easily transfer. Additionally, some programs allow for students to switch programs of study after taking the first-level course within the sequence and without repeating the firstlevel course in the new program. The student will need to get guidance from their assigned counselor and CTE teacher, prior to changing. However, even if students start over at the basic course level, students really have not lost anything since they will have gained transferable knowledge and skills from the previous program of study that can used throughout life.

## What is a 4-year progression plan (graduation plan)?

A progression/graduation plan maps out a student's suggested high school coursework that will lead them to their chosen pathway. This helps students choose their future courses and helps guide in scheduling students correctly, which includes all core, elective, and coherent sequence of courses within their selected program of study. Progression plans identify whether students are on track for graduation as well as determine whether a student will graduate with a college and/or career preparedness measure and industry endorsement. Counselors review progression plans with each student annually and update as changes to courses or programs of study arise.

# **Guidance for Reading CTE Career Focus Charts**

As you move through the CTE career endorsement areas, you will follow the guidance documents for each program of study. The following is presented to guide you through understanding each chart.

The example above is taken from the Applied Agricultural Engineering program of study. You can see the grade level where certain courses are to be taken.

Notice that one of the courses offered for 11<sup>th</sup> grade is denoted with the abbreviation of 'd' (short for 'double blocked') in the course number. These courses are scheduled across two class periods and will allow students to earn 2.0 credits. Similarly, "t" stands for "triple blocked" and will allow students to earn 3.0 credits. "T" stands for "term", which is a one-semester only course and will allow students to earn 0.5 credit.

The other courses without a "/d" consist of both an 'A' and 'B' component that must be taken in order for the student to earn 1.0 credit. This is exactly how most students think of taking any core class like English or Math. These courses are **not** to be broken up into separate years of high school. If multiple courses are offered at a grade level but are not **all** required, the word "OR" will be used to demonstrate choice of courses.

Students qualify for certain Practicum Experiences as they near graduation. Each Endorsement will vary in the availability and content of these experiences.

Finally, we know the options can quickly become overwhelming. You are therefore urged to contact your campus counselor or the CTE office for any questions you may have at **817.814.1530**.

# **CTE Elective Courses**

CTE students are expected to follow a four-year coherent sequence of courses as designated in the CTE Career Programs of Study and Focus Charts. However, there are some courses that students are able to take as an elective or enrichment course, outside of a coherent sequence, which may also offer industry-based certification exam opportunities. The CTE elective courses and descriptions are listed below.

# **COURSE DESCRIPTIONS FOR CTE ELECTIVE CLASSES**

PROFESSIONAL COMMUNICATIONS T (PROFCOMM T)	AV09901T
Professional Communications blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Within this context, students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research. This course is also offered at middle school campuses for high school speech and CTE credit. The credit is earned only if the middle school teacher was certified to teach the course at the time the student was enrolled.	13009900 Grade level: 8 - 12 HS Credit(s): 0.5
Instructional Material: Professional Communications, 2017 Edition, Goodheart-Willcox Co. Prerequisite(s): None Professional Communications can be taught by any teacher certified in speech or career and technical education who has been credentialled through the district to teach this course. Contact the CTE Dept. for credentialing and training information.	College Hour(s): NA Tier III
TOUCH SYSTEM DATA ENTRY T (TSDATAE T)	BA11301T
In Touch System Data Entry, students apply technical skills to address business applications of emerging technologies. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students will need to apply touch system data entry skills for production of business documents. This course is also offered at middle school campuses that can qualify for high school CTE credit. The credit is earned only if the middle school teacher was certified to teach the course at the time the student was enrolled.	13011300 Grade level: 8 - 10 HS Credit(s): 0.5
nstructional Material: Cashman Series: Microsoft Office 365 and Office 2016: Introductory, Cengage Learning, Inc. Prerequisite(s): None	College Hour(s): NA <b>Tier III</b>
BUSINESS INFORMATION MANAGEMENT I AB (BUSIM1 AB)	BA11412AB
In Business Information Management I, students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and make a successful transition to the workforce and postsecondary education. Students apply technical skills to address business applications of emerging technologies, create word-processing documents, develop a spreadsheet, formulate a database, and make an electronic presentation using appropriate software.	13011400 Grade level: 9 - 12 HS Credit(s): 1
Instructional Material: Cashman Series: Microsoft Office 365 and Office 2016: Introductory, Cengage Learning, Inc. Prerequisite(s): None	College Hour(s): NA <b>Tier III</b>
HONORS BUSINESS INFORMATION MANAGEMENT I AB (BUSIM1 AB/H)	BAH11412AB
In addition to the regular course curriculum, students in this honors course will complete additional projects and activities related to the program of study.	13011400 Grade level: 9 – 12 HS Credit(s): 1
Instructional Material: Cashman Series: Microsoft Office 365 and Office 2016: Introductory, Cengage Learning, Inc. Prerequisite(s): None	College Hour(s): NA <b>Tier II</b>
MONEY MATTERS AB (MONEYM AB)	FN16201AB
In Money Matters, students will investigate money management from a personal financial perceptive. Students will apply critical-thinking skills to analyze financial options based on current and projected economic factors. Students will gain the knowledge and skills necessary to establish short-term and long-term financial goals. Students will examine various methods of achieving short-term and long-term financial goals through various methods such as investing, tax planning, asset allocating, risk management, retirement planning, and estate planning.	13016200 Grade level: 9 - 12 HS Credit(s): 1
Instructional Material: Dave Ramsey's Foundations of Personal Finance, High School Edition, 2014 <u>Prerequisite(s)</u> : None	College Hour(s): NA <b>Tier III</b>
HONORS MONEY MATTERS AB (MONEYM AB/H)	FNH16201AB
In addition to the regular course curriculum, students in this honors course will complete additional projects and activities related to the program of study.	13016200 Grade level: 9 – 12 HS Credit(s): 1
Instructional Material: Dave Ramsey's Foundations of Personal Finance, High School Edition, 2014 Prerequisite(s): None	College Hour(s): NA Tier II

CHILD DEVELOPMENT AB (CHILDDEV AB)	HV24701AB
This technical laboratory course addresses knowledge and skills related to child growth and development from prenatal through school-age children. Students are equipped with child development skills necessary to promote the well-being and healthy development of children and to investigate careers related to the care and education of children. Students explore the principles and procedures for promoting the physical, emotional, social, and intellectual development of young children, including those with special needs. Topics include characteristics of quality childcare and career options related to the care and education of children.	13024700 Grade level: 9 - 12 HS Credit(s): 1
Instructional Material: Texas - Family & Consumer Science, iCEV <u>Prerequisite(s)</u> : None	College Hour(s): NA <b>Tier III</b>
HONORS CHILD DEVELOPMENT AB (CHILDDEV AB/H)	HVH24701AB
In addition to the regular course curriculum, students in this honors course will complete additional projects and activities related to the program of study.	13024700 Grade level: 9 – 12 HS Credit(s): 1
Instructional Material: Texas - Family & Consumer Science, iCEV <u>Prerequisite(s)</u> : None	College Hour(s): NA <b>Tier II</b>
LIFETIME NUTRITION AND WELLNESS T (LNURTWEL T)	HV24501T
This laboratory course allows students to use principles of lifetime wellness and nutrition to help them make informed choices that promote wellness. This course concentrates on nutrition, food choices, and food management skills. Students address nutrition and food preparation from the perspective of food habits and wellness, menu planning, special dietary needs, food costs and budgeting, consumer food-buying strategies, food safety and sanitation, preparation and storage practices. This course will help students gain the knowledge to	13024500 Grade level: 10 - 12 HS Credit(s): 0.5
pursue careers related to hospitality and tourism, education and training, human services, and health sciences. <u>Instructional Material</u> : <i>Guide to Good Food</i> , Goodheart-Willcox Co., <i>ISBN#</i> : 9781683111764	College Hour(s): NA
Prerequisite(s): None HONORS LIFETIME NUTRITION AND WELLNESS T (LNURTWEL T/H)	Tier III HVH24501T
In addition to the regular course curriculum, students in this honors course will complete additional projects and activities related to the program of study.	13024500 Grade level: 10 – 12
Instructional Material: Guide to Good Food, Goodheart-Willcox Co., ISBN#: 9781683111764 Prerequisite(s): None	HS Credit(s): 0.5 College Hour(s): NA <b>Tier II</b>
CAREER PREPARATION GENERAL I AB (CPGEN1)	CP01300 AB
This course must be approved by the CTE Department before use on campus. This course is a paid capstone	12701111
experience for students who have found employment for the school year. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. This is a full year course.	Grade level: 11 - 12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): None	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION GENERAL II AB (CPGEN2)	CP01400 AB
This course must be approved by the CTE Department before use on campus. The Career Preparation II course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course: working ten hours per week (or average of 20 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation General I course. This is a full year course.	12701112 Grade level: 12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials <u>Prerequisite(s)</u> : None	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION GENERAL I/EXTENDED I AB (EXCPGEN 1)	CP01302 AB
This course must be approved by the CTE Department before use on campus. This course is a paid capstone experience for students who have found employment for the school year. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for <u>fifteen hours per</u> week (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. This is a full year course.	12701131 Grade level: 11-12 HS Credit(s): 3

AP COMPUTER SCIENCE A AB (APTACSA 1AB, APTACSAL AB, APTACSAM AB)	2142AB *WL2142AB **M2142AB
AP Computer Science A is designed for qualified students in grades 10 - 12 who wish to complete the equivalent of a college introductory course in computer science. The course will focus on programming methodology, and procedural abstraction. It also includes the study of algorithms, data structures, and data abstraction, but covered in less depth than in the Computer Science III AB course. The course follows the College Board AP® Computer Science A Curriculum Framework. Students <b>must</b> be scheduled into two of the following three course numbers for this course: 2142 AB for an elective credit, M2142 AB for a math credit, and WL2142 AB for a LOTE credit. Students will be awarded two credits for successful completion of this course.	A3580120, A3580120, A3580110 Grade level: 10 - 12 HS Credit(s): 2

OnRamps COMPUTER SCIENCE 1AB (TACS 1 AB OR)	2159AB
Thriving in Our Digital World is a new dual enrollment course that teaches computer science principles, a set of core ideas that shapes the landscape of computer science and its impact on our society. In addition to learning about the magic and beauty of computing, students will acquire essential Texas College and Career Readiness skills, applying critical thinking, problem solving, and communication within a project-based learning framework. Students will experience high-quality curriculum designed by the faculty at The University of Texas at Austin (UT). Students can earn three hours of UT credit with feedback and assessment provided by UT course staff. OnRamps works through a dual-enrollment model. Using a hybrid delivery approach, students meet rigorous university-level college readiness standards and have the opportunity to earn UT Austin credit from a UT faculty member and high school credit from their local teacher. # Agriculture, Food, and Natural Resources

**Animal Science** 

Agricultural Technology and Mechanical Systems

To reach CTE Completer status, students complete and pass three or more 19 TAC Chapter 126 (C), 127 (B), or 130 CTE courses for four or more credits within a program of study, including at least one level three or level four course from the same program of study.

Courses

# Unpaid Practicum in Agriculture, Food, and Natural Resources/d: AG02502 AB OR AGH02502 AB Paid Practicum in Agriculture, Food, and Natural Resources: AG02505 AB OR AGH02505 AB **Honors Project-Based Research: Career Preparation for Programs of** Study: CPPS 1 AB

# **Enrichment Courses:**

- Floral Design<sup>4</sup>: AG01802 AB OR Honors: AGH01802 AB
- Advanced Animal Science: AG00702 AB OR Honors: AGH00702 AB
- Wildlife, Fisheries and Ecology Management: AG01501 AB OR Honors: AGH01501 AB

# Certification Options:

- Industry Certification Opportunities for Performance Acknowledgment: Feedyard Technician in Cattle Care and Handling<sup>1</sup>; Certified Veterinary Assistant<sup>2</sup>
- Not counted toward Performance Acknowledgment: N/A

# Available at:

• Arlington Heights HS • Diamond Hill-Jarvis HS

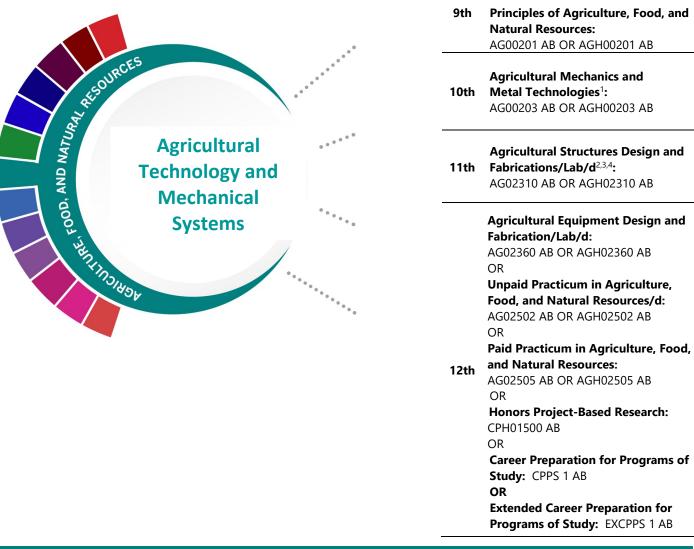

Animal Science program of study focuses on the science, research, and business of animals and other living organisms. It teaches students how to apply biology and life science to real-world life processes of animals and wildlife, either in laboratories or in the field, which could include a veterinary office, a farm or ranch, or any outdoor area harboring animal life. Students may also research and analyze the growth and destruction of species and research or diagnose diseases and injuries of animals.

The Agriculture, Food, and Natural Resources (AFNR) Career Cluster focuses on the essential elements of life food, water, land, and air. This career cluster includes a diverse spectrum of occupations, ranging from farmer, rancher, and veterinarian to geologist, land conservationist, and florist.

Successful completion of the Animal Science program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

#### Courses

## Enrichment Courses:

- Floral Design<sup>4</sup>: AG01802 AB OR AGH01802 AB
- Wildlife, Fisheries and Ecology Management: AG01501 AB OR AGH01501 AB

## Certification Options:

- Industry Certification Opportunities for Performance Acknowledgment: AWS D1.1 Structural Welding<sup>2</sup>; AWS D9.1 - Sheet Metal<sup>3</sup>; Feedyard Technician in Machinery, Operation, Repair and Maintenance<sup>4</sup>
- Not Counted towards Performance Acknowledgment: OSHA 10-Hour Agriculture Industry Certification<sup>1</sup>
- Available at:
- Arlington Heights HS
- South Hills HS

The Applied Agricultural Engineering program of study explores the occupations and educational opportunities associated with applying knowledge of engineering technology and biological science to agricultural problems concerned with power and machinery, electrification, structures, soil and water conservation, and processing agricultural products. This program of study may also include exploration into diagnosing, repairing, or overhauling farm machinery and vehicles, such as tractors, harvesters, dairy equipment, and irrigation systems.

The Agriculture, Food, and Natural Resources (AFNR) Career Cluster® focuses on the essential elements of life—food, water, land, and air. This career cluster includes a diverse spectrum of occupations, ranging from farmer, rancher, and veterinarian to geologist, land conservationist, and florist. It also includes non-traditional agricultural occupations like wind energy, solar energy, and oil and gas production.

Successful completion of the Applied Agricultural Engineering program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised – July 2020

AGRICULTURAL EQUIPMENT DESIGN AND FABRICATION/LAB/D AB (AGEQDFLAB AB)	AG02360AB
In Agricultural Equipment Design and Fabrication, students will acquire knowledge and skills related to the design and fabrication of agricultural equipment. To prepare for careers in mechanized agriculture and technical systems, students must attain knowledge and skills related to agricultural structures design and fabrication. The lab experience is designed to provide students a laboratory and/or field experience opportunity. To prepare for careers in agriculture, food, and natural resources, students must acquire knowledge and skills that meet entry requirements and industry expectations. To prepare for success, students need opportunities to learn, reinforce, apply, and transfer academic knowledge and technical skills in a variety of settings.	13002360 Grade level: 11-12 HS Credit(s): 2

HONORS CTE PROJECT-BASED CAPSTONE AB (PROBS1 AB/H)	CPH01500AB
Students will research a real-world problem and possible solutions throughout this course. Students develop a project on a topic related to career interests, use scientific methods of investigation to conduct in-depth research, are matched with a mentor from the business or professional community, compile findings, and present their findings to an audience that includes experts in the field. This course must be cooperatively planned and supervised by the teacher ensuring that the student has guidance and support of a mentor or interdisciplinary team. The district must maintain a written project plan for each student enrolled in the course.	12701101 Grade level: 11-12 HS Credit(s): 1
Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): Specific to program focus/pathway and is the previous course in the sequence. Offered at: All high school campuses	College Hour(s): NA <b>Tier II</b>
CAREER PREPARATION I FOR PROGRAMS OF STUDY AB (CPPS 1 AB)	CP01121AB
This course is a paid capstone experience for CTE students who have found employment for the school year within their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. This is a full year course.	12701121 Grade level: 11-12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): None	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION I FOR PROGRAMS OF STUDY/EXTENDED I AB (EXCPP 1 AB)	CP001132AB
This course is a paid capstone experience for CTE students who have found employment for the school year within their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for fifteen hours per week (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. - Diamond Hill-Jarvis HS
- Trimble Technical HS

The Architectural Design program of study explores the occupations and educational opportunities associated with developing, engineering, and designing building structures and facilities. This program of study may also include exploration into collecting and interpreting geographic information, researching and preparing maps, and interior design.

The Architectural and Construction Career Cluster<sup>®</sup> focuses on designing, planning, managing, building, and maintaining the built environment. Principles of Architecture provides an overview to the various fields of architecture, interior design, and construction management.

Successful completion of the Architectural Design program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised – July 2020

# Enrichment Courses:

# Certification Options:

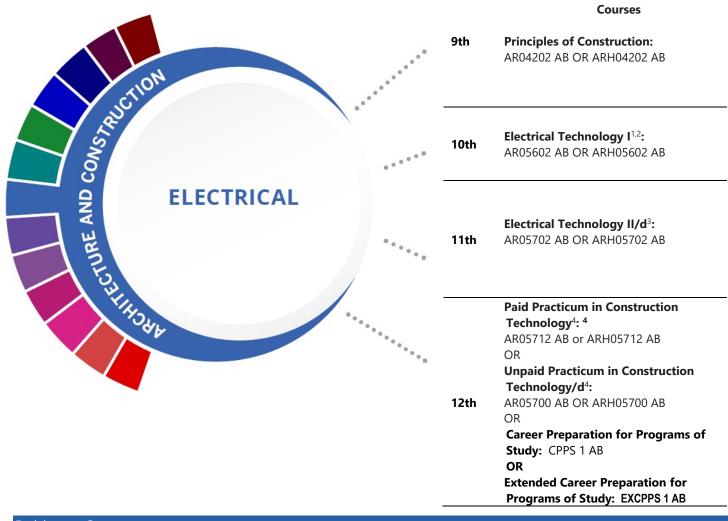

- Industry Certification Opportunities for Performance Acknowledgment: NCCER Core Curriculum<sup>1</sup>; NCCER Construction Technology<sup>2</sup>
- Not Counted Towards Performance Acknowledgment: OSHA 30-Hour Construction Industry Certification<sup>3</sup> Available at:
- Diamond Hill-Jarvis HS
- O.D. Wyatt HS
- Trimble Technical HS

The Carpentry program of study explores the occupations and educational opportunities related to constructing, installing, or repairing structures and fixtures made of wood, such as concrete forms (including frameworks, partitions, joists, studding, rafters, and stairways). This program of study may also include exploration into installing, dismantling, or moving machinery and heavy equipment according to layout plans, blueprints, or other drawings.

The Architecture and Construction Career Cluster<sup>®</sup> focuses on designing, planning, managing, building, and maintaining the built environment.

Successful completion of the Carpentry program of study will fulfill requirements of the Business and Industry Endorsement. Revised – July 2020

The Electrical program of study explores the occupations and educational opportunities associated with installing, maintaining, and repairing electrical wiring, equipment, and fixtures. This program of study may also include exploration into installing and repairing telecommunications cable including fiber optics.

The Architecture and Construction Career Cluster® focuses on designing, planning, managing, building, and maintaining the built environment.

Successful completion of the Electrical Program of Study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised – July 2020

# COURSE DESCRIPTIONS FOR ARCHITECTURE AND CONSTRUCTION CLASSES

PRINCIPLES OF ARCHITECTURE AB (PRINARCH AB)	AR04200AB
rinciples of Architecture provides an overview to the various fields of architecture, interior design, and	13004210
onstruction management. Achieving proficiency in decision making and problem solving is an essential skill for	Grade level: 9 – 10
areer planning and lifelong learning. Students use self-knowledge, education, and career information to set and	HS Credit(s): 1
chieve realistic career and educational goals. Job-specific training can be provided through training modules	
hat identify career goals in trade and industry areas. Classroom studies include topics such as safety, work	
thics, communication, information technology applications, systems, health, environment, leadership,	
eamwork, ethical and legal responsibility, employability, and career development and include skills such as	
problem solving, critical thinking, and reading technical drawings.	
nstructional Material: Architecture, Construction, Transportation and Manufacturing, iCEV	College Hour(s): NA

PAID PRACTICUM IN ARCHITECTURAL DESIGN/EXTENDED AB (EXPRADS1 AB)	AR04812AB
This practicum course is a paid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This is an occupationally specific course designed to provide technical instruction in architectural design. Safety and career opportunities are included in addition to work ethics and architectural design study. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the paid practicum learning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one class period per week during the school year, are employed for <u>fifteen (15) hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during	13004805 Grade level: 12 HS Credit(s): 3
the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA

PRINCIPLES OF CONSTRUCTION AB (PRINCON AB)	AR04202AB
Principles of Construction is intended to provide an introduction and lay a solid foundation for those students entering the construction or craft skilled areas. The course provides a strong knowledge of construction safety, construction mathematics, and common hand and power tools. For safety and liability considerations, limiting course enrollment to 15 students is recommended. This course also provides communication and occupation skills to assist the student in obtaining and maintaining employment.	13004220 Grade level: 9 - 10 HS Credit(s): 1

The Design and Multimedia Arts program of study has 5 sub pathways. It explores the occupations and educational opportunities associated with designing or creating graphics to meet specific commercial or promotional needs, such as packaging, displays, or logos. This program of study may also include exploration into designing clothing and accessories, and creating special effects, animation, or other visual images using film, video, computers, or other electronic tools and media, for use in computer games, movies, music videos, and commercials.

The Arts, A/V Technology and Communications (AAVTC) Career Cluster® focuses on careers in designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and design,

journalism, and entertainment services. Careers in the AAVTC Career Cluster require a creative aptitude, a strong background in computer and technology applications, a strong academic foundation, and a proficiency in oral and written communication.

Successful completion of the Design & Multimedia Arts program of study will fulfill requirements of a Business and Industry Endorsement. Revised – July 2020

UNPAID PRACTICUM IN AUDIO VIDEO PRODUCTION/D AB (PRACAVT AB)	AV08702AB 13008700
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. In this course, students will	Grade level: 12
be expected to develop an increasing understanding of the industry with a focus on applying pre-production,	HS Credit(s): 2
production, and post-production audio and video activities in a studio environment. This course may be	
implemented in an advanced audio/video or audio format. Instruction may be delivered through lab-based	
classroom experiences or career preparation opportunities. Practicum capstone experiences can occur in a	
variety of locations appropriate to the nature and level of experiences such as independent study,	
assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working	
in a simulated environment, running an enterprise, or be involved in program-specific local projects the school	
has approved for this class. Additional capstone experiences also include students being selected to be a part of	
a work-based experience or industry training off-site, outside of school. Some students may be selected to	
participate in an unpaid externship with the FWISD instructional radio and television department to explore	
advanced techniques and theories in all areas of the media industry. Students will build a professional portfolio	
demonstrating skills in advanced video production, production of narrative media, advanced video	
screenwriting, production, and TV and radio news production.

his practicum course is an unpaid capstone experience for students participating in a coherent sequence of career	13009255
nd technical education courses within their designated program of study. In this course, students will be	Grade level: 12
hallenged with the application of knowledge and skills from Commercial Photography at paid employment in the	HS Credit(s): 3
hotography field. The co-requisite extension is included in the Practicum and is designed to give students	
upervised practical application of previously studied knowledge and skills. A student must be a minimum age of	
6 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum	
earning experiences. In order to receive course credit, this course requires that students make a full year	
ommitment to this course and their employment, must have related classroom instruction that averages one	
lass period per week during the school year, are employed for <u>fifteen (15) hours per week</u> (or average of 30 hours	
cross two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included uring the school day or outside of school hours. If work hours are during the school day, students can be	
cheduled for work release (noncredit) periods to work as long as work release does not jeopardize students'	
rojected graduation plan.

UNPAID PRACTICUM IN BUSINESS MANAGEMENT AB (PRACBM AB)	BA12202AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within the designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies. Students develop a foundation in the economic, financial, technological, international, social, and ethical aspects of business to become competent consumers, employees, and entrepreneurs. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students incorporate a broad base of knowledge that includes the legal, managerial, marketing, financial, ethical, and international dimensions of business to make appropriate business decisions. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. Students will build a professional portfolio demonstrating skills in Business Management.	13012200 Grade level: 11-12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): 2 credits from a combination of Business courses	College Hour(s): NA Tier III

PAID PRACTICUM IN BUSINESS MANAGEMENT/EXTENDED AB (EXPBM1 AB)	BA12210AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career	
and technical education courses within their designated program of study. This course is designed to give students	
supervised practical application of previously studied knowledge and skills. Students implement personal and	HS Credit(s): 3
interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful	
transition to the workforce or postsecondary education. Students apply technical skills to address business	
applications of emerging technologies. Students develop a foundation in the economic, financial, technological,	
international, social, and ethical aspects of business to become competent consumers, employees, and	
entrepreneurs. Students enhance reading, writing, computing, communication, and reasoning skills and apply then	1
to the business environment. Students incorporate a broad base of knowledge that includes the legal,	
managerial, marketing, financial, ethical, and international dimensions of business to make appropriate business decision. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security	
card, to enroll in any of the paid practicum learning experiences. In order to receive course credit, this course	
requires that students make a full year commitment to this course and their employment, must have related	
classroom instruction that averages one class period per week during the school year, are employed for fifteen (15	)
hours per week (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of	<u></u>
the course. Work hours can be included during the school day or outside of school hours. If work hours are	
during the school day, students can be scheduled for work release (noncredit) periods to work as long as work	
release does not jeopardize students' projected graduation plan.

- Western Hills HS

The Teaching and Training program of study prepares students for careers related to teaching, instruction, and creation of instructional and enrichment materials. The program of study introduces CTE concentrators to a wide variety of student groups and their corresponding needs. It familiarizes them with the processes for developing curriculum, coordinating educational content, and coaching groups and individuals.

The Education and Training Career Cluster<sup>®</sup> focuses on planning, managing, and providing education and training services and related learning support services. All parts of courses are designed to introduce learners to the various careers available within the Education and Training careercluster.

Successful completion of the Teaching and Training program of study will fulfill requirements of the Public Service Endorsement. Revised - July 2020

## COURSE DESCRIPTIONS FOR ALL EDUCATION AND TRAINING CLASSES

PRINCIPLES OF EDUCATION AND TRAINING AB (PRINEDTR AB)	ED14201AB
The course, Principles of Education and Training, is designed to introduce students to the various careers	13014200
available within the education and training career cluster. Students use self-knowledge and educational and	Grade level: 9 - 10
career information to analyze various careers within the education and training career cluster. They will also gain	HS Credit(s): 1
an understanding of the basic knowledge and skills essential to careers within the education and training career	
cluster.

## **Health Science**

**Exercise Science, Wellness, and Restoration** 

**Diagnostic & Therapeutic Services** 

**Biomedical Science** 

To reach CTE Completer status, students complete and pass three or more 19 TAC Chapter 126 (C), 127 (B), or 130 CTE courses for four or more credits within a program of study, including at least one level three or level four course from the same program of study.

#### **Enrichment Courses:**

Anatomy and Physiology: HS02062 AB OR HSH02062 AB

- Certification Options:
- Industry Certification Opportunities for Performance Acknowledgment: TBA
- Not Counted towards Performance Acknowledgment: BLS/CPR Certification
- Available at:

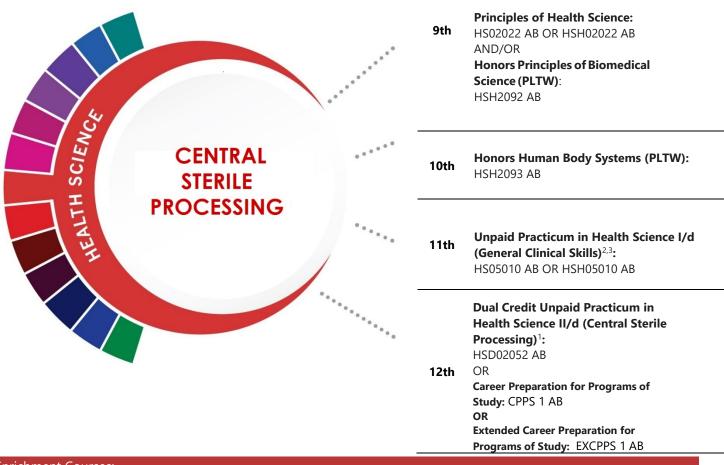

#### South Hills HS

The Exercise Science and Wellness program of study introduces CTE learners to the fields that assist patients with maintaining physical, mental, and emotional health. Students will research diet and exercise needed to maintain a healthy, balanced lifestyle and learn about and practice techniques to help patients recover from injury, illness, or disease.

The Health Science Career Cluster® focuses on planning, managing, and providing therapeutic services, diagnostics services, health informatics, support services, and biotechnology research and development. To pursue a career in the health science industry, students should learn to reason, think critically, make decisions, solve problems, communicate effectively, and work well with others.

Successful completion of the Exercise Science program of study will fulfill requirements of the Public Service or STEM endorsement if the math and science requirements are met. Locally approved Program of Study. Revised – October 2022

#### Enrichment Courses:

- Medical Microbiology: HS02071 AB OR HSH02071 AB
- Pathophysiology: HS20801 AB OR HSH20801 AB
- Pharmacology: HS02044 AB OR HSH2044 AB

Certification Options:

- Industry Certification Opportunities for Performance Acknowledgment: N/A
- Not Counted towards Performance Acknowledgment: Sterile Processing and Distribution Technician Certification<sup>1\*</sup>; OSHA 10-Hour Healthcare Industry Certification<sup>2</sup>; BLS/CPR Certification<sup>3</sup>

#### Available at:

#### • Texas Academy of Biomedical Sciences (TABS) HS

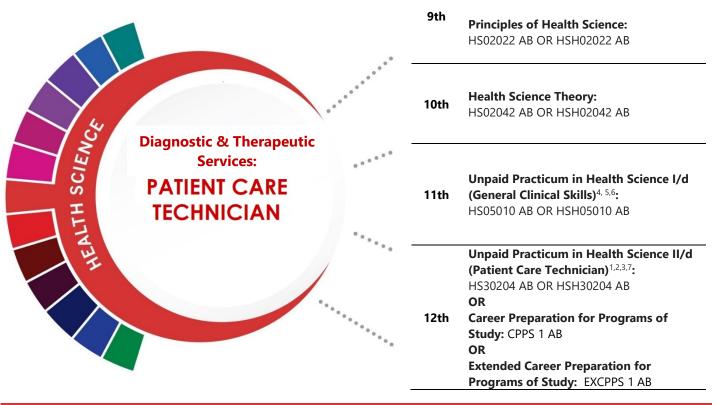

Healthcare Therapeutic' s Certified Sterile Processing program of study under the Healthcare Therapeutics focuses on the practice of the cleaning and sterilization of used surgical instruments and other medical supplies to ensure the safety, redistribution, and reuse of instruments for future patients.

The Health Science Career Cluster® focuses on planning, managing, and providing therapeutic services, diagnostics services, health informatics, support services, and biotechnology research and development. To pursue a career in the health science industry, students should learn to reason, think critically, make decisions, solve problems, communicate effectively, and work well with others.

\*Although this is not a state-recognized Industry-Based Certification, it is a recognized component of meeting CCMR Performance Status

Successful completion of the Healthcare Therapeutic: Central Sterile Processing program of study will fulfill requirements of the Public Service Endorsement. Locally approved Program of Study. Revised – July 2020

#### Enrichment Courses:

- Anatomy and Physiology: HS02062 AB OR HSH02062 AB
- Medical Microbiology: HS02071 AB OR HSH02071 AB
- Pathophysiology: HS20801 AB OR HSH20801 AB
- Pharmacology: HS02044 AB OR HSH2044 AB

#### Certification Options:

- Industry Certification Opportunities for Performance Acknowledgment: Patient Care Technician Certification<sup>1</sup>; *Optional certifications*: Phlebotomy Certification (CPT)<sup>2</sup>; Certified EKG Technician (CET)<sup>3</sup>; Certified Nurse Aide (CNA)<sup>6</sup>; Medical Assistant<sup>7</sup>
- Not Counted towards Performance Acknowledgment: OSHA 10-Hour Healthcare Industry Certification<sup>4</sup>; BLS/CPR Certification<sup>5</sup>

#### Available at:

- North Side HS
- OD Wyatt HS
- Texas Academy of Biomedical Sciences (TABS) HS
- Trimble Technical HS

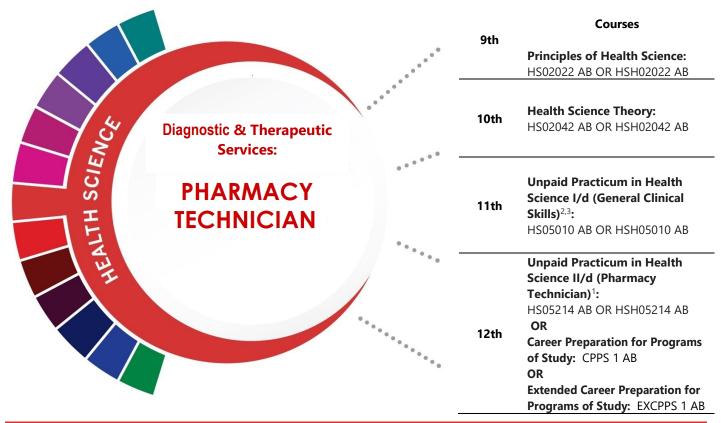

The Diagnostic and Therapeutic Services program of study introduces students to occupations and educational opportunities related to diagnosing and treating acute, episodic, or chronic illness independently or as part of a healthcare team. This program of study also includes an introduction to the opportunities associated with providing treatment and counsel to patients as well as rehabilitative programs that help build or restore daily living skills to persons with disabilities or developmental delays.

The Health Science Career Cluster® focuses on planning, managing, and providing therapeutic services, diagnostics services, health informatics, support services, and biotechnology research and development. To pursue a career in the health science industry, students should learn to reason, think critically, make decisions, solve problems, communicate effectively, and work well with others.

Successful completion of the Healthcare Therapeutics program of study will fulfill requirements of the Public Service or STEM endorsement if the math and science requirements are met. Revised – July 2020

PATHOPHYSIOLOGY AB (PATHO AB)	HS20801AB
In Pathophysiology, students conduct laboratory and field investigations, use scientific methods during	13020800
investigations, and make informed decisions using critical thinking and scientific problem solving. Students in	Grade level: 11 - 12
Pathophysiology study disease processes and how humans are affected. Emphasis is placed on prevention and	HS Credit(s): 1
treatment of disease. Students will differentiate between normal and abnormal physiology.	
Instructional Material: Human Disease 4th edition; Cengage Learning	College Hour(s): NA
Prerequisite(s): Biology and Chemistry; Principles of Health Science	Tier III
4th year science credit	
HONORS PATHOPHYSIOLOGY AB (PATHO AB/H)	HSH20801AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13020800
activities related to the program of study.	Grade level: 11 – 12
Instructional Material: Human Disease 4th edition; Cengage Learning <u>Prerequisite(s)</u> : Biology and Chemistry; Principles of Health Science	HS Credit(s): 1 College Hour(s): NA
Ath year science credit	Tier II
PRINCIPLES OF HEALTH SCIENCE AB (PRINHLSC AB)	HS02022AB
Principles of Health Science provides an overview of the therapeutic, diagnostic, health informatics, support	1302022AB
services, and biotechnology research and development systems of the health care industry. Students learn that to	Grade level: 9
pursue a career in the health science industry, they must be able to reason, think critically, make decisions, solve	HS Credit(s): 1
problems, and communicate effectively. They learn that quality health care depends on the ability to work well	
with others. Students identify and research employment opportunities, technology, and safety requirements of	
the different systems within health science field. They apply knowledge and skills needed to pursue a health	
science career. Students are expected to employ their ethical and legal responsibilities, identify limitations, as well	
as understand the implications of their actions. This course will also introduce students to the structure of medical	
terms, including prefixes, suffixes, word roots, singular and plural forms, and medical abbreviations.	
Instructional Material: Principles of Health Science Texas Student Edition and Medical Terminology, A Living	College Hour(s): NA
Language, Third Edition, 2017, Pearson Education	Tier III
<u>Prerequisite(s)</u> : N/A Offered only at: North Side, Trimble Tech, OD Wyatt, and TABS	
HONORS PRINCIPLES OF HEALTH SCIENCE AB (PRINHLSC AB/H)	HSH02022AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13020200

advanced technical knowledge and skills needed for success in the career fields of interest, students will be	HS Credit(s): 2
expected to develop an increasing understanding of the industry with a focus on applying management,	
inances, product development, and other entrepreneurship concepts in a professional environment Instruction	
nay be delivered through lab-based classroom experiences or career preparation opportunities. Practicum	
capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such	
as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences	
include students working in a simulated environment, running an enterprise, or be involved in program-specific	
local projects the school has approved for this class. Additional capstone experiences also include students	
being selected to be a part of a work-based experience or industry training off-site, outside of school. Students	
will build a professional portfolio demonstrating skills in Entrepreneurship.

HONORS HUMAN BODY SYSTEMS AB (PLTW) (HUMBODSY AB/H)	HSH2093AB
In this Project Lead the Way course, students examine the interactions of body systems as they explore identity, communication, power, movement, protection, and homeostasis. Students design experiments, investigate the structures and functions of the human body, and use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration. Exploring science in action, students build organs and tissues on a skeletal manikin, work through interesting real-world cases and often play the role of biomedical professionals to solve medical mysteries. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.	N1302093 Grade level: 10 HS Credit(s): 1

HONORS MEDICAL INTERVENTIONS AB (PLTW) (MEDINT AB/H)	HSH30209AB
Students investigate a variety of interventions involved in the prevention, diagnosis and treatment of disease as they follow the life of a fictitious family. The course is a "How-To" manual for maintaining overall health and homeostasis in the body. Students explore how to prevent and fight infection; screen and evaluate the code in human DNA; prevent, diagnose and treat cancer; and prevail when the organs of the body begin to fail. Through these scenarios, students are exposed to a range of interventions related to immunology, surgery, genetics, pharmacology, medical devices, and diagnostics. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study. HONORS UNPAID PRACTICUM IN STEM/d AB (PRACSTEM AB/H)	STH37402AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. In addition, students in this honors course will complete a project using the five phases of project management used in the business and industry environment. Practicum capstone experiences can occur in a variety of locations appropriate to the nature study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.	13037400 Grade level: 12 HS Credit(s): 2

SCIENTIFIC RESEARCH AND DESIGN AB (SCIRD AB)	ST37202AB ST37212AB (2 <sup>nd</sup> Time)
The student conducts laboratory and field investigations using safe, environmentally appropriate, and ethical practices. These investigations must involve actively obtaining and analyzing data with physical equipment but may also involve experimentation in a simulated environment as well as field observations that extend beyond the science or CTE classrooms. Research in an area of bio-related technology; communication; construction; energy, power, and transportation; or engineering align with various CTE clusters. Students apply research to problem solving and development of prototypes and working models. Students may repeat the Scientific Research and Design course TEKS with different course content for up to a maximum of three credits. If being taken as their fourth-year science course, DAP students must successfully complete a biology, a chemistry, and a physics course prior to the Scientific Research and Design course or take it concurrently with the third one of these required courses.	130372## Grade level: 11 – 12 HS Credit(s): 1

- Polytechnic HS
- South Hills HS
- Trimble Technical HS

The Culinary Arts program of study introduces students to occupations and educational opportunities related to the planning, directing, or coordinating activities of a food and beverage organization or department. This program of study also explores opportunities involved in directing and participating in the preparation and cooking of food.

The Hospitality and Tourism Career Cluster<sup>®</sup> focuses on the management, marketing, and operations of restaurants and other food/beverage services, lodging, attractions, recreation events, and travel-related services. Students acquire knowledge and skills focusing on communication, time management, and customer service that meet industry standards. Students will explore the history of the hospitality and tourism industry and examine characteristics needed for success.

Successful completion of the Culinary Arts program of study will fulfill requirements of the Business and Industry Endorsement. Revised – July 2020

and technical education courses within the designated program of study. Practicum in Hospitality Services is a unique practicum experience to provide opportunities for students to participate in a learning experience that combines classroom instruction with actual business and industry career experiences. Practicum in Hospitality Services integrates academic and career and technical education; provides more interdisciplinary instruction; and supports strong partnerships among schools, businesses, and community institutions with the goal of preparing students with a variety of skills in a fast-changing culinary art-based workplace. Students are taught employability skills, including job specific skills applicable to their training plan, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Practicum in Hospitality Services is relevant and rigorous, supports student attainment of academic and technical standards, and effectively prepares students for college and career success. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. Students will build a professional portfolio demonstrating skills in Animation. ## **Human Services**

Cosmetology

To reach CTE Completer status, students complete and pass three or more 19 TAC Chapter 126 (C), 127 (B), or 130 CTE courses for four or more credits within a program of study, including at least one level three or level four course from the same program of study.

#### Enrichment Courses:

- Microbiology and Safety for Cosmetology: HV25402 AB OR HVH25402 AB
  Certification Options:
- Industry Certification Opportunities for Performance Acknowledgment: Cosmetology Operator License<sup>1</sup>
- Not Counted towards Performance Acknowledgment: OSHA 10-Hour General Industry Certification<sup>2</sup>

## Available At:

- Dunbar HS
- North Side HS
- Trimble Technical HS

Cosmetology is an extended course of study that enables students to become licensed cosmetologists through Texas Department of Licensing and Regulation (TDLR). Cosmetology is one program of study that allows students to earn an industry certificate that launches them into a professional career immediately, yet also specifies rigorous core curricula that prepares the student to be successful in a post-secondary learning environment

The Human Services Career Cluster® focuses on preparing individuals for employment in career pathways that relate to families and human needs such as counseling and mental health services, family and community services, personal care services, and consumer services.

Successful completion of the Cosmetology and Personal Care Services program of study will fulfill requirements of the Public Service Endorsement. Regionally approved Program of Study. Revised – July 2020

## COURSE DESCRIPTIONS FOR HUMAN SERVICES CLASSES

PRINCIPLES OF COSMETOLOGY DESIGN AND COLOR THEORY AB (PRINCDCT AB)	HV25100AB
In Principles of Cosmetology Design and Color Theory, students coordinate integration of academic, career, and	13025050
technical knowledge and skills in this laboratory instructional sequence course designed to provide job-specific	Grade level: 9 - 10
training for employment in cosmetology careers. Students will attain academic skills and knowledge as well as	HS Credit(s): 1
technical knowledge and skills related to cosmetology design and color theory. Students will develop knowledge	
and skills regarding various cosmetology design elements such as form, lines, texture, structure and illusion or	
depth as they relate to the art of cosmetology. Instruction includes sterilization and sanitation procedures, hair	
care, nail care, and skin care and meets the TDLR requirements for licensure upon passing the state examination.	
Analysis of career opportunities, license requirements, knowledge and skills expectations, and development of	
workplace skills are included.	
Instructional Material: Milady Standard Cosmetology; Cengage	College Hour(s): NA
Prerequisite(s): Registration fee \$25 that is payable to the Texas Cosmetology Commission (must be paid the first	Tier III
week of school). The \$25 fee registers students with the Texas Cosmetology Commission to allow the clock hours.	
Offered only at: Dunbar, North Side, and Trimble Tech	
HONORS PRINCIPLES OF COSMETOLOGY DESIGN AND COLOR THEORY AB (PRINCDCT AB/H)	HVH25100AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13025050
activities related to the program of study.	Grade level: 9 – 10
Instructional Material: Milady Standard Cosmetology, Cengage	HS Credit(s): 0.5
Prerequisite(s): Registration fee \$25 that is payable to the Texas Cosmetology Commission (must be paid the first	College Hour(s): NA
week of school). The \$25 fee registers students with the Texas, Cosmetology Commission to allow the clock hours	Tier II
Offered only at: Dunbar, North Side, and Trimble Tech	
INTRODUCTION TO COSMETOLOGY AB (INTCOSMO AB)	HV25102AB
This course introduces skills that may lead to a lifetime career in cosmetology. Students explore areas such as	13025100
	Grade level: 10
bacteriology, sterilization and sanitation, hair styling, manicuring, shampooing and the principles of hair cutting, hair styling, hair coloring, skin care, and facial makeup. The student researches careers in the personal care services	
	HS Credit(s): 1
industry. To prepare for success, students must have skills relative to this industry, as well as academic knowledge	
and skills. Students may begin to earn clock hours needed to prepare for the Texas Department of Licensing and	
Regulation Examination.	
Instructional Material: Milady Standard Cosmetology, Cengage	College Hour(s): NA
Prerequisite(s): Principles of Cosmetology Design and Color Theory or Principles of Business, Marketing, and	Tier III
Finance	
Offered only at: Dunbar, North Side, and Trimble Tech	
HONORS INTRODUCTION TO COSMETOLOGY AB (INTCOSMO AB/H)	HVH25102AB

CAREER PREPARATION I FOR PROGRAMS OF STUDY AB (CPPS 1 AB)	CP01121AB
This course is a paid capstone experience for CTE students who have found employment for the school year within their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. This is a full year course.	12701121 Grade level: 11-12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials <u>Prerequisite(s):</u> None	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION I FOR PROGRAMS OF STUDY/EXTENDED I AB (EXCPP 1 AB)	CP001132AB
This course is a paid capstone experience for CTE students who have found employment for the school year within their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for fifteen hours per week (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. The Information Technology Computer Support and Services program of study explores the occupations and educational opportunities associated with administering, testing, and implementing computer databases and applying knowledge of database management systems. This program of study may also include analyzing user requirements and problems to automate or improve existing systems and review computer system capabilities. This program of study may also include exploration into the research, design, or testing of computer or computer-related equipment for commercial, industrial, military, or scientific use.

The Information Technology (IT) Career Cluster<sup>®</sup> focuses on building linkages in IT occupations for entry level, technical, and professional careers related to the design, development, support, and management of hardware, software, multimedia, and systems integration services

Successful completion of the Information Technology Support and Services program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

The Networking Systems program of study explores the occupations and educational opportunities associated with designing and implementing computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. This program of study may also include exploration into analyzing science, engineering, and other data processing problems to implement and improve computer systems.

The Information Technology (IT) Career Cluster® focuses on building linkages in IT occupations for entry level, Technical, and professional careers related to the design, development, support, and management of hardware, software, multimedia, and systems integration services

Successful completion of the Networking Systems program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

The Programming and Software Development program of study explores the occupations and education opportunities associated with researching, designing, developing, and testing operating systems-level software, compilers, and network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general computer applications. This program of study may also include exploration into creating, modifying, and testing the codes, forms, and script that allow computer applications to run.

The Information Technology (IT) Career Cluster® focuses on building linkages in IT occupations for entry level, technical, and professional careers related to the design, development, support, and management of hardware, software, multimedia, and systems integration services

Successful completion of the Programming and Software Development program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

# COURSE DESCRIPTIONS FOR INFORMATION TECHNOLOGY CLASSES

PRINCIPLES OF INFORMATION TECHNOLOGY AB (PRINIT AB)	IT27201AB
In Principles of Information Technology, students will develop computer literacy skills to adapt to emerging	13027200
technologies used in the global marketplace. Students will implement personal and interpersonal skills to prepare	Grade level: 9 - 10
for a rapidly evolving workplace environment. Students will enhance reading, writing, computing,	HS Credit(s): 1
communication, and reasoning skills and apply them to the information technology environment.	
Instructional Material: Principles of Information Technology – Texas Student Edition, Pearson Education, Inc.,	College Hour(s): NA
Prerequisite(s): None	Tier III
Offered only at: Carter-Riverside and World Languages Institute	
HONORS PRINCIPLES OF INFORMATION TECHNOLOGY AB (PRINIT AB/H)	ITH27201AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13027200
activities related to the program of study.	Grade level: 9 - 10
Instructional Material: Principles of Information Technology – Texas Student Edition, Pearson Education, Inc.	HS Credit(s): 1
Prerequisite(s): None	College Hour(s): NA
Offered only at: Carter-Riverside and World Languages Institute	Tier II
UNPAID PRACTICUM IN INFORMATION TECHNOLOGY/D (PRACIT1 AB)	IT27202AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of	13028000
career and technical education courses within the designated program of study. In the Practicum in Information	Grade level: 12
Technology, students will gain advanced knowledge and skills in the application, design, production,	HS Credit(s): 2
implementation, maintenance, evaluation, and assessment of products, services, and systems. Knowledge and	
skills in the proper use of analytical skills and application of IT concepts and standards are essential to prepare	
students for success in a technology-driven society. Practicum capstone experiences can occur in a variety of	
locations appropriate to the nature and level of experiences such as independent study, assistantships,	
mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated	
environment, running an enterprise, or be involved in program-specific local projects the school has approved	
for this class. Additional capstone experiences also include students being selected to be a part of a work-	
based experience or industry training off-site, outside of school.	
Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): Internetworking Technologies I, Computer Science II or AP Computer Science	Tier III
Offered only at: Trimble Tech and Carter Riverside	
HONORS UNPAID PRACTICUM IN INFORMATION TECHNOLOGY/D (PRACIT1 AB/H)	ITH27202AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13028000
activities related to the program of study.	Grade level: 12
Instructional Material: Contact Career and Technical Education Department for related materials	HS Credit(s): 2
Prerequisite(s): Internetworking Technologies I, Computer Science II or AP Computer Science	College Hour(s): NA
Offered only at: Trimble Tech and Carter Riverside	Tier II
PAID PRACTICUM IN INFORMATION TECHNOLOGY AB/EXTENDED (EXPRIT1 AB)	IT27210AB
This practicum course is a paid capstone experience for students participating in a coherent sequence of career	13028005
and technical education courses within their designated program of study. In this course, students will gain	Grade level: 12
advanced knowledge and skills in the application, design, production, implementation, maintenance, evaluation,	HS Credit(s): 3
and assessment of products, services, and systems. Knowledge and skills in the proper use of analytical skills	
and application of IT concepts and standards are essential to prepare students for success in a technology-	
driven society. Critical thinking, IT experience, and product development may be conducted in a classroom	
setting along with paid employment in the IT industry. A student must be a minimum age of 16 and hold valid	
work documentation, such as a Social Security card, to enroll in any of the paid practicum learning experiences.	
In order to receive course credit, this course requires that students make a full year commitment to this course	
and their employment, must have related classroom instruction that averages one class period per week during	
the school year, are employed for fifteen (15) hours per week (or average of 30 hours across two weeks) at an	
approved site within ten days of the beginning of the course. Work hours can be included during the school	
day or outside of school hours. If work hours are during the school day, students can be scheduled for work	
release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation	
plan.	
Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA

South Hills, and Trimble Tech. Also offered as an elective course at select high schools.	24.44.8
HONORS COMPUTER SCIENCE I AB/H (TACS 1AB/H)	2141AB
n addition to the regular course curriculum, students in the honors course will complete additional projects and	03580200
activities related to the program of study.	Grade level: 9 - 12
nstructional Material: Texas - Computer Science I, CodeHS	HS Credit(s): 1
Prerequisite(s) (for those pursuing the Computer Science sequence): None	College Hour(s): NA
Prerequisite(s) (for those pursuing the Cybersecurity sequence): Foundations of Cybersecurity	Tier II
Offered at: Arlington Heights, Carter-Riverside, Dunbar, I.M. Terrell, North Side, O.D. Wyatt, Paschal, Polytechnic, South Hills, and Trimble Tech. Also offered as an elective course at select high schools.	
COMPUTER SCIENCE II AB (TACS 2AB)	2153AB
WIT UTEN SCIENCE II AD (TACS ZAD)	2155AB *WL2153AB
Computer Science II will foster students' creativity and innovation by presenting opportunities to design,	03580300
mplement, and present meaningful programs through a variety of media. Students will collaborate with one	Grade level: 10 – 12
another, their instructor, and various electronic communities to solve the problems presented throughout the	HS Credit(s): 1
course. Through data analysis, students will identify task requirements, plan search strategies, and use computer	
science concepts to access, analyze, and evaluate information needed to solve problems. By using computer	
science knowledge and skills that support the work of individuals and groups in solving problems, students will	
select the technology appropriate for the task, synthesize knowledge, create solutions, and evaluate the results.	
Students will learn digital citizenship by researching current laws and regulations and by practicing integrity and	
respect. Students will gain an understanding of computer science through the study of technology operations,	
systems, and concepts. The six strands include creativity and innovation; communication and collaboration;	
research and information fluency; critical thinking; problem solving, and decision making; digital citizenship; and	
technology operations and concepts. Students may be awarded one *LOTE credit (WL2143 AB) or one elective	
credit (2143 AB) for successful completion of this course.	
nstructional Material: Texas - Computer Science II, CodeHS	College Hour(s): NA
Prerequisite(s): Computer Science I	Tier III
Offered as an elective course at select high schools.	
HONORS COMPUTER SCIENCE II AB/H (TACS 2AB/H)	2143AB
	*WL2143AB
n addition to the regular course curriculum, students will complete additional projects and activities related to	03580300
he program of study. Students may be awarded one *LOTE credit (WL2143 AB) or	Grade level: 10 – 12
ne elective credit (2143 AB) for successful completion of this course.	HS Credit(s): 1
nstructional Material: Texas - Computer Science II, CodeHS	College Hour(s): NA
Prerequisite(s): Computer Science I	Tier II
Offered as an elective course at select high schools.	
AP COMPUTER SCIENCE PRINCIPLES AB (APTACS PRIN)	2157AB
	WL2157AB
This course introduces students to the foundational ideas of computer science, while providing exposure to	A3580300
computational content, computational thinking skills, creative aspects of the field and their impact on the world.	Grade level: 9 - 10
students will be provided the opportunity to investigate the innovations in other fields of computing while	HS Credit(s): 1
examining the ethical implications of new computing technologies. The course follows the College Board AP®	
Computer Science Principles Curriculum Framework. Students may be awarded one *LOTE credit (WL2157 AB) or	
one elective credit (2157 AB) for successful completion of this course.	
nstructional Material: Contact Career and Technical Education Department for related materials as well as	College Hour(s): NA
approved materials provided by the AP College Board.	Tier I
Prerequisite(s) (for those pursuing the course as an elective or the Computer Science sequence): None	
Prerequisite(s) (for those pursuing the Cybersecurity sequence): Honors PLTW Computer Science Essentials or	
oundations of Cybersecurity	
Offered at: Arlington Heights, Carter-Riverside, Dunbar, I.M. Terrell, North Side, O.D. Wyatt, Paschal, Polytechnic,	
South Hills, Trimble Tech, and World Lanauaaes Institute. Also offered as an elective course at select hiah schools.	

South Hills, Trimble Tech, and World Languages Institute. Also offered as an elective course at select high schools.

CYBERSECURITY CAPSTONE AB (CYBERCAP AB)	IT27900AB
In the Cybersecurity Capstone course, students will develop the knowledge and skills needed to explore advanced	03580855
concepts related to the ethics, laws, and operations of cybersecurity. Students will examine trends and operations	Grade level: 12
of cyberattacks, threats, and vulnerabilities. Students will develop security policies to mitigate risks. The skills obtained in this course prepare students for additional study toward industry certification. A variety of courses are	HS Credit(s): 1
available to students interested in the cybersecurity field. Cybersecurity Capstone may serve as a culminating	
course in this field of study.	
Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): Engineering Applications for Computer Science Principles	Tier III
Offered at: Trimble Tech	
HONORS CYBERSECURITY CAPSTONE AB (CYBERCAP AB/H)	ITH27900AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	03580855
activities related to the program of study.	Grade level: 12
Instructional Material: Contact Career and Technical Education Department for related materials	HS Credit(s): 1
Prerequisite(s): Engineering Applications for Computer Science Principles	College Hour(s): NA
Offered at: Trimble Tech	Tier II
HONORS UNPAID PRACTICUM IN INFORMATION TECHNOLOGY/D (PRACIT1 AB/H)	ITH27202AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13028000
activities related to the program of study. See the course description for Unpaid Practicum in Information	Grade level: 12
Technology located in the Career and Technical Education; Information Technology section.	HS Credit(s): 2

HONORS DISCRETE MATHEMATICS FOR COMPUTER SCIENCE AB (TADISMA AB/H)	STH80370AB
Discrete Mathematics for Computer Science provides the tools used in most areas of computer science. Exposure	03580370
to the mathematical concepts and discrete structures presented in this course is essential in order to provide an adequate foundation for further study. Course topics are divided into six areas: sets, functions, and relations;	Grade level: 12 HS Credit(s): 1
basic logic; proof techniques; counting basics; graphs and trees; and discrete probability. Mathematical topics are interwoven with computer science applications to enhance the students' understanding of the introduced mathematics. Students will develop the ability to see computational problems from a mathematical perspective.	
In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.

# Law and Public Service

Law Enforcement

**Legal Studies** 

To reach CTE Completer status, students complete and pass three or more 19 TAC Chapter 126 (C), 127 (B), or 130 CTE courses for four or more credits within a program of study, including at least one level three or level four course from the same program of study.

# Enrichment Courses:

• Forensic Science: LA29502 AB OR LAH29502 AB

Criminal Investigations: LA29300 AB OR LAH29300 AB

Certification Options:

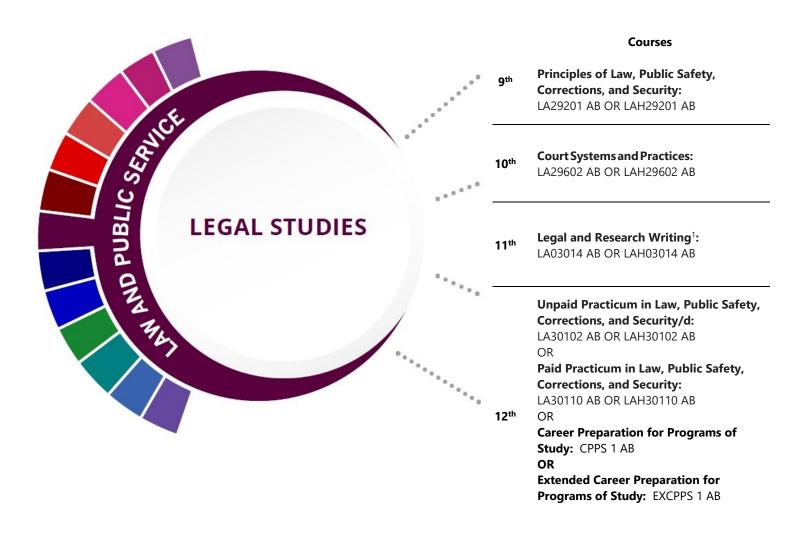

- Industry Certification Opportunities for Performance Acknowledgment: International Academy of Emergency Dispatch (IAED) Emergency Telecommunicator Certification<sup>1</sup>
- Not counted towards Performance Acknowledgment: OSHA 10-hour General Industry Certification<sup>2</sup> Available At:
- Eastern Hills HS
- South Hills HS

The Law Enforcement program of study teaches students about the development of, adherence to, and protection of various branches of law. Students may learn how to appropriately and legally respond to breaches in the law according to statutory rules and regulations as well as investigate how and why the breaches occurred.

The Law and Public Service Career Cluster® focuses on planning, managing, and providing legal services, public safety, protective services, and homeland security, including professional and technical support services. Students will examine the roles and responsibilities of police, courts, corrections, private security, and protective agencies of fire and emergency services.

Successful completion of the Law Enforcement program of study will fulfill requirements of the Public Service Endorsement. Revised - July 2020

# Enrichment Courses:

# • N/A

Certification Options:

- Industry Certification Opportunities for Performance Acknowledgment: Administrative Assisting or General Management (NOCTI)<sup>1</sup>
- Not counted towards Performance Acknowledgment: N/A

# Available At:

# • Eastern Hills HS

The Legal Studies program of study introduces students to the occupations and educational opportunities related to representing clients in criminal and civil litigation and other legal proceedings, as well as assisting lawyers and preparing legal documents. This program of study explores possible specializations in a single area of law.

The Law and Public Service Career Cluster® focuses on planning, managing, and providing legal services, public safety, protective services, and homeland security, including professional and technical support services. Students will examine the roles and responsibilities of police, courts, corrections, private security, and protective agencies of fire and emergency services.

Successful completion of the Legal Studies program of study will fulfill requirements of the Public Service Endorsement. Revised - July 2020

# COURSE DESCRIPTIONS FOR LAW ENFORCEMENT & PUBLIC SAFETY CLASSES

PRINCIPLES OF LAW, PUBLIC SAFETY, CORRECTIONS AND SECURITY AB (PRINLPCS AB)	LA29201AB
The course, Principles of Law and Public Safety, introduces students to professions in the courts and criminal	13029200
justice system such as law enforcement, security, corrections, and emergency management services. Students will	Grade level: 9 - 10
examine the roles and responsibilities of police, courts, corrections, private security, and protective agencies of	HS Credit(s): 1
emergency services. The course provides students with an overview of the skills necessary for careers in law enforcement, security, and corrections.

CRIMINAL INVESTIGATIONS AB (CRIM INV AB)	LA29300AB
Criminal Investigation is a course that introduces students to the profession of criminal investigations. Students will understand basic functions of criminal investigations and procedures and will learn how to investigate or follow up during investigations. Students will learn terminology and investigative procedures related to criminal investigation, crime scene processing, evidence collection, fingerprinting, and courtroom presentation. Through case studies and simulated crime scenes, students will collect and analyze evidence such as fingerprint analysis, bodily fluids, hairs, fibers, shoe and tire impressions, bite marks, drugs, tool marks, firearms and ammunition, blood spatter, digital evidence, and other types of evidence.	13029550 Grade level: 10 - 11 HS Credit(s): 1

FORENSIC SCIENCE AB (FORENSCI AB)	LA29502AB
Forensic Science is a course that uses a structured and scientific approach to the investigation of crimes of assault, abuse and neglect, domestic violence, accidental death, homicide, and the psychology of criminal behavior. Students will learn terminology and investigative procedures related to crime scene, questioning, interviewing, criminal behavior characteristics, truth detection, and scientific procedures used to solve crimes. Using scientific methods, students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprint analysis, ballistics, and blood spatter analysis. Students will learn the history, legal aspects, and career options for forensic science.	13029500 Grade level: 11-12 HS Credit(s): 1

UNPAID PRACTICUM IN LAW AND PUBLIC SAFETY/D AB (PRACLPCS AB)	LA30102AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within their designated program of study. The double-period practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses in the Law and Public Safety cluster. The unpaid practicum is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. The student documents technical knowledge and skills in an updated professional portfolio that includes licensures or certifications; awards and scholarships; examples of extended learning experiences such as community service and active participation in career and technical student organizations and professional organizations; an updated resume; samples of work; and evaluations from the practicum supervisor. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school.	13030100 Grade level: 12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials <u>Prerequisite(s)</u> : Completion of two courses in this career focus Offered only at: Eastern Hills	College Hour(s): NA <b>Tier III</b>

Welding

# Advanced Manufacturing and Machinery Mechanics

To reach CTE Completer status, students complete and pass three or more 19 TAC Chapter 126 (C), 127 (B), or 130 CTE courses for four or more credits within a program of study, including at least one level three or level four course from the same program of study.

# **Enrichment Courses:**

# • N/A

- **Certification Options:**
- Industry Certification Opportunities for Performance Acknowledgment: AWS D1.1 Structural Welding<sup>1</sup>; AWS D9.1 Sheet Metal<sup>2</sup>; and/or NCCER Welding Level I<sup>3</sup>; NCCER Core<sup>4</sup>
- Not Counted Towards Performance Acknowledgment: N/A

# Available At:

- Diamond Hill-Jarvis HS
- South Hills HS
- Southwest HS
- Trimble Technical HS

The Welding program of study focuses on the development and use of automatic and computer-controlled machines, tools, and robots that perform work on metal or plastic. Students will learn how to modify parts to make or repair machine tools or maintain individual machines, and how to use hand-welding or flame-cutting equipment.

The Manufacturing Career Cluster® focuses on planning, managing, and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance, and manufacturing/process engineering.

Successful completion of the Manufacturing Technology program of study will fulfill requirements of the Business and Industry Endorsement. Revised – July 2020

The Advanced Manufacturing and Machinery Mechanics program of study focuses on the assembly, operation, maintenance, and repair of electromechanical equipment or devices. CTE learners may work in a variety of mechanical fields, gaining knowledge and experience in robotics, refinery and pipeline systems, deep ocean exploration, or hazardous waste removal. CTE concentrators may work in a variety of fields of engineering.

The Manufacturing Career Cluster focuses on planning, managing, and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance, and manufacturing/process engineering.

Successful completion of the Advanced Manufacturing and Machinery program of study will fulfill the requirements of the Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

# COURSE DESCRIPTIONS FOR MANUFACTURING CLASSES

INTRODUCTION TO WELDING AB (INTRWELD AB)	MA32300AB
ntroduction to Welding will introduce welding technology with an emphasis on basic welding laboratory	13032250
principles and operating procedures. Students will be introduced to the three basic welding processes. Topics	Grade level: 9-10
nclude: industrial safety and health practices, hand tool and power machine use, measurement, laboratory	HS Credit(s): 1
operating procedures, welding power sources, welding career potentials, and introduction to welding codes and	
standards. Introduction to Welding will provide students with the knowledge, skills, and technologies required	
for employment in welding industries. Students will develop knowledge and skills related to welding and apply	
them to personal career development.	<u> </u>
Instructional Material: NCCER- Welding, Texas Edition 2017 Student Edition, Pearson Education	College Hour(s): NA
Prerequisite(s): None	Tier III
Offered at: Diamond-Hill Jarvis, South Hills, Southwest, Trimble Tech	
HONORS INTRODUCTION TO WELDING AB (INTRWELD AB/H)	MAH32300AB
n addition to the regular course curriculum, students in the honors course will complete additional projects and	13032250
activities related to the program of study.	Grade level: 9 - 10
nstructional Material: NCCER- Welding, Texas Edition 2017 Student Edition, Pearson Education Inc.	HS Credit(s): 1
Prerequisite(s): None	College Hour(s): NA
Offered at: Diamond-Hill Jarvis, South Hills, Southwest, Trimble Tech	Tier II
WELDING I/D AB (WELD 1AB)	MA32302AB
Rapid advances in technology have created new career opportunities and demands in many industries. Welding	13032300
provides the knowledge, skills, and technologies required for employment in metal technology systems.	Grade level: 10 - 11
Students develop knowledge and skills related to this system and apply them to personal career development.	HS Credit(s): 2
This course supports integration of academic and technical knowledge and skills as students apply and transfer	
their understanding and skills to a variety of settings and problems. Knowledge about career opportunities,	
requirements, and expectations and the development of workplace skills prepare students for future success.

PROGRAMMABLE LOGIC CONTROLLER I	MA03689AB
Programmable Logic Controller I is a course designed to introduce students to the function and operation of Programmable Logic Controllers (PLC) through academic and applied instruction. Students will be introduced to relevant terminology, the components that make up a PLC, how PLC communicates with external components and other concepts relating to the use of PLC's in the manufacturing industry. Students will participate in structured, applied learning exercises taken from existing PLC applications. Students will also learn how to read ladder logic diagrams and ultimately write their first program. This course is recommended for students in grade 10 through 12. The central focus of this course is for students to gain an understanding of how programmable logic controllers work and how they are used in automated industries.	N1303689 Grade level: 10-12 HS Credit(s): 1 College Hour(s): NA <b>Tier III</b>
Instructional Material: Contact Career and Technical Education for related materials <u>Prerequisite(s)</u> : Robotics I	
Offered only at: Trimble Tech	
HONORS PROGRAMMABLE LOGIC CONTROLLER I	MAH03689AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	N1303689
activities related to the program of study.	Grade level: 10-12
Instructional Material: Contact Career and Technical Education for related materials <u>Prerequisite(s)</u> : Robotics I	HS Credit(s): 1 College Hour(s): NA
Offered only at: Trimble Tech	Tier II
MANUFACTURING ROBOTICS II AB (MANROBOTIC 2AB)	MA37003AB
In Robotics II, students will explore artificial intelligence and programming in the robotic and automation	13037050
industry. Through implementation of the design process, students will transfer academic skills to component	Grade level: 11-12
designs in a project-based environment. Students will build prototypes and use software to test their designs.	HS Credit(s): 1

CAREER PREPARATION I FOR PROGRAMS OF STUDY AB (CPPS 1 AB)	CP01121AB
This course is a paid capstone experience for CTE students who have found employment for the school year within	12701121
their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. This is a full year course.	Grade level: 11-12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): None	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION I FOR PROGRAMS OF STUDY/EXTENDED I AB (EXCPP 1 AB)	CP001132AB
This course is a paid capstone experience for CTE students who have found employment for the school year within their CTE Program of Study. This course is for CTE students only. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for fifteen hours per week (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. ## Enrichment Courses:

- Robotics I<sup>4</sup>: ST37002AB OR STH37002AB
- Robotics II: ST37003AB OR STH37003AB

 Industry Certification Opportunities for Performance Acknowledgment: Certified SolidWorks Associate - Academic<sup>1</sup>; Autodesk Certified User-Inventor<sup>2</sup>; Autodesk Certified User-Fusion 360<sup>3</sup>

Not Counted Towards Performance Acknowledgment: OSHA 10-Hour General Industry<sup>4</sup>

# Available At:

- I.M. Terrell Academy HS
- Trimble Technical HS

The Engineering program of study focuses on the design, development, and use of engines, machines, and structures. Students will learn how to apply science, mathematical methods, and empirical evidence to the innovation, design, construction, operation, and maintenance of different manufacturing systems.

The Science, Technology, Engineering, and Mathematics (STEM) Career Cluster focuses on planning, managing, and providing, scientific research and professional and technical services, including laboratory and testing services, and research and development services.

The \* denoted courses are specific to Trimble Technical High School.

The \*\* denoted courses are specific to I.M. Terrell Academy

Successful completion of the Engineering program of study will fulfill requirements of a Business and Industry or STEM endorsement if the math and science requirements are met. Revised - July 2020

HONORS ENGINEERING DESIGN AND DEVELOPMENT AB (PLTW) (EDD AB/H)	STH37492AB
his honors course is an engineering research course in which the students work in teams to research, design,	N1303749
nd construct a solution to an open-ended engineering problem. The product development lifecycle and a	Grade level: 11 - 12
lesign process will be used to guide and help the team reach a solution to the problem. The team will present	HS Credit(s): 1
nd defend your solution to a panel of outside reviewers at the end of the school year. Engineering Design and	
Development <sup>™</sup> serves as the capstone course within the Project Lead the Way® course sequence and allows	
tudents to apply all the skills and knowledge learned in the previous Project Lead the Way, Inc. courses. Inventor,	
which is a state of the art 3-D design software package from AutoDesk, will be used for students to design	
olutions to the problem the teams have chosen. This course will also test their time management and team skills, vhich are a valuable asset for the future. In addition to the regular course curriculum, students in the honors	
ourse will complete additional projects and activities related to the program of study.

This course is designed to give tudents supervised practical application of previously studied knowledge and skills. Practicum experiences can beccur in a variety of locations appropriate to the nature and level of experience. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any of the practicum earning experiences. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, must have related classroom instruction that averages one lass period per week during the school year, are employed for ten (10) hours per week (or average of 20 hours cross two weeks) at an approved site within ten days of the beginning of the course. Work hours can be ncluded during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. In addition to the regular course curriculum, students in the honors course will	Grade level: 12 HS Credit(s): 3 College Hour(s): NA <b>Tier II</b> STH37409AB 13037400 Grade level: 12

ENGINEERING DESIGN AND PROBLEM SOLVING AB (ENGDPRS AB)	ST37302AB
The Engineering Design and Problem Solving course is the creative process of solving problems by identifying	13037300
needs and then devising solutions. The solution may be a product, technique, structure, or process depending on	Grade level: 12
the problem. Science aims to understand the natural world, while engineering seeks to shape this world to meet	HS Credit(s): 1
human needs and wants. Engineering design takes into consideration limiting factors or "design under	
constraint." Various engineering disciplines address a broad spectrum of design problems using specific concepts	
from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines. This course satisfies a high school science graduation requirement. Students shall be	
awarded one credit for successful completion of this course.	
Instructional Material: Engineering Fundamentals: Introduction 4th Edition, Cengage; Project Lead the Way	College Hour(s): NA
materials furnished by CTE department (for select campuses and programs)	Tier III
Prerequisite(s): Engineering Design and Presentation II, Computer Integrated Manufacturing (PLTW), Aerospace	
Engineering (PLTW), Engineering Science (PLTW), or Civil Engineering and Architecture (PLTW)	
Course taught by a certified secondary science teacher or any CTE teacher with a baccalaureate degree and 18	
semester credit hours in any combination of sciences. 19 TAC Chapter 231.

- Trimble Technical HS
- North Side HSOD Wyatt HS

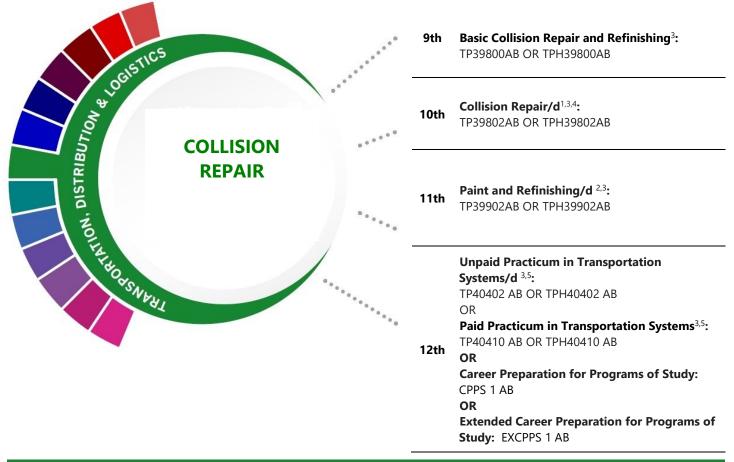

The Automotive program of study teaches students how to repair and refinish automobiles and service various types of vehicles. Students may learn to collect payment for services or supplies and perform typical vehicle maintenance procedures such as lubrication, oil changes, installation of antifreeze, or replacement of accessories like wiper blades or tires.

The Transportation, Distribution, and Logistics Career Cluster® focuses on careers in planning, management, and movement of people, materials, and goods by road, pipeline, air, rail, and water. It also includes related professional support services such as transportation infrastructure planning and management, logistics services, mobile equipment and facility maintenance.

Successful completion of the Automotive program of study will fulfill requirements of the Business and Industry Endorsement. Revised - July 2020

<u>Instructional Material</u> : <i>CDX Fundamentals of Automotive Technology,</i> Jones and Bartlett Learning <u>TCC Course</u> : Introduction to Automotive Technology (AUMT 1405) <u>FWISD Prerequisite(s)</u> : Automotive Basics	College Hour(s): 4 <b>Tier I</b>
TCC Prerequisite(s): TSI	
Course taught by an approved embedded instructor. Offered at: Polytechnic and OD Wyatt	
DUAL CREDIT AUTOMOTIVE TECHNOLOGY: MAINTENANCE AND LIGHT REPAIR I/D B	TPD39602B
(AUTOTEC1B DC) TCC Course: (AUMT 1407) Automotive Electrical Systems	
*Course offerings may vary each year due to availability	
In this dual credit class, students will learn about electrical systems including topics in operational theory,	13039600
testing, diagnosis, and repair of, charging and starting systems, and electrical accessories. Emphasis on electrical	Grade level: 11 - 12
principles, schematic diagrams, and service manuals. May be taught manufacturer specific.	HS Credit(s): 1
Instructional Material: CDX Fundamentals of Automotive Technology, Jones and Bartlett Learning TCC Course: Automotive Engine Performance Analysis I (AUMT 1407)	College Hour(s): 4 <b>Tier I</b>
<u>FWISD Prerequisite(s)</u> : Dual Credit Automotive Technology 1/D A	
TCC Prerequisite(s): TSI, AUMT 1405	
Course taught by an approved embedded instructor.	
Offered at: Polytechnic and OD Wyatt	TD20702AD
AUTOMOTIVE TECHNOLOGY: AUTOMOTIVE SERVICE II/D AB (AUTOTEC 2AB) Students in this double-period laboratory course continue training for entry-level employment in an automotive	TP39702AB 13039700
technology career field. The course includes use of National Automotive Technician Education Foundation	Grade level: 12
(NATEF) standards in the service and repair of the vehicle component of Automotive Engine Performance.	HS Credit(s): 2
Entrepreneurship, safety, and leadership training are included. This is an Automotive Service Excellence (ASE)	
certified program. Instructional Material: CDX Fundamentals of Automotive Technology, Jones and Bartlett Learning	
<u>Prerequisite(s)</u> : Automotive Technology I/D	College Hour(s): NA <b>Tier III</b>
Offered at: Dunbar, North Side, Polytechnic, Trimble Technical, OD Wyatt	
HONORS AUTOMOTIVE TECHNOLOGY: AUTOMOTIVE SERVICE II/D AB (AUTOTEC 2AB/H)	TPH39702AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and	13039700
activities related to the program of study.	Grade level: 12
Instructional Material: CDX Fundamentals of Automotive Technology, Jones and Bartlett Learning <u>Prerequisite(s)</u> : Automotive Technology I/D	HS Credit(s): 2 College Hour(s): NA
Offered at: Dunbar, North Side, Polytechnic, Trimble Technical, OD Wyatt	Tier II
DUAL CREDIT AUTOMOTIVE TECHNOLOGY II: AUTOMOTIVE SERVICE II/D A (AUTOTEC 2A DC)	TDD207024
	TPD39702A
TCC Course: (AUMT 1410) Automotive Brake Systems	TPD39702A
*Course offerings may vary each year due to availability	
*Course offerings may vary each year due to availability	13039700
*Course offerings may vary each year due to availability In this dual credit class, students will learn about the operation and repair of drum/disc type brake systems. Topics include brake theory, diagnosis and repair of power, manual, anti-lock brake systems and parking brakes.	13039700 Grade level: 12
*Course offerings may vary each year due to availability In this dual credit class, students will learn about the operation and repair of drum/disc type brake systems. Topics include brake theory, diagnosis and repair of power, manual, anti-lock brake systems and parking brakes. May be taught with manufacturer-specific instructions.	13039700
*Course offerings may vary each year due to availability In this dual credit class, students will learn about the operation and repair of drum/disc type brake systems. Pathways in Technology Early College High Schools (P-TECH) are innovative open-enrollment high schools that allow students least likely to attend college an opportunity to receive both a high school diploma, an associate degree or at least 60 credit hours and industry certifications and credentials. The hallmark of the P-TECH model is its career focus and the provision of work-based education. P-TECH programs:

- Enroll historically underserved students, targeting at-risk and economically disadvantaged
- Provide students grade 9 through 12 the opportunity to complete a course of study that combines high school and postsecondary courses
- Enable students to earn a high school diploma, along with an associate degree, Level 1 or Level 2 certificate, or industry-based certification within six years
- Offer age-appropriate work-based learning opportunity in every grade level
- Allow students to gain work experience through an internship, apprenticeship, or other job training program
- Align to regional workforce needs, guiding students into high-demand, high-wage careers
- Partner with Texas Institutions of Higher Education (IHEs) and regional businesses and industries, giving students access to post-secondary education and workforce training opportunities

#### COURSE DESCRIPTIONS FOR THE MANUFACTURING P-TECH

HONORS PRINCIPLES OF MANUFACTURING AB (PRINMAN AB/H)	MAH32201AB
In Principles of Manufacturing, students gain knowledge and skills in the application, design, production, and	13032200
assessment of products, services, and systems and how those knowledge and skills are applied to manufacturing.	Grade level: 9
Knowledge and skills in the proper application of principles of manufacturing, the design of technology, the	HS Credit(s): 1
efficient production of technology, and the assessment of the effects of manufacturing production technology	
prepare students for success in the modern world. The study of manufacturing technology allows students to	
reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities,	
problems, and settings in a manufacturing setting. In addition to general academic and technical knowledge and skills, students gain an understanding of career opportunities available in manufacturing and what employers	
require to gain and maintain employment in these careers. In addition to the regular course curriculum, students	
in this honors course will complete a project using the five phases of project management used in the business	
and industry environment.	
Instructional Material: Agriculture, Construction & Manufacturing, iCEV	College Hour(s): NA
Prerequisite(s): None	Tier II
Offered only at: Dunbar (for PTECH)	
HONORS PROJECT-BASED RESEARCH AB (PROBS1 AB/H) (Available Fall 2023)	CPH01500AB
*Previously Problems and Solutions	
Students will research a real-world problem and possible solutions throughout this course. Students develop a	12701101
project on a topic related to career interests, use scientific methods of investigation to conduct in-depth	Grade level: 11-12
research, are matched with a mentor from the business or professional community, compile findings, and present	HS Credit(s): 1
their findings to an audience that includes experts in the field. This course must be cooperatively planned and	
supervised by the teacher ensuring that the student has guidance and support of a mentor or interdisciplinary	
team. The district must maintain a written project plan for each student enrolled in the course.	
Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): Specific to program focus/pathway and is the previous course in the sequence.	Tier II
Offered at: All high school campuses	CD01200AB
CAREER PREPARATION I AB (CAREERP1 AB)	CP01300AB
This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that	127011121 Grade level: 11 - 12
combines classroom instruction with paid business and industry employment experiences. It supports strong	HS Credit(s): 2
partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety	
of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills	
applicable to their training station, job interview techniques, communication skills, financial and budget activities,	
human relations, and portfolio development. Career preparation is relevant and rigorous, supports student	
attainment of academic standards, and effectively prepares students for college and career success. A student	
must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any	
paid learning experience course. In order to receive course credit, this course requires that students make a full	
year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and	
are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten	
days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods	
days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.	
days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan. Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): None CAREER PREPARATION II AB (CAREERP2 AB) The Career Preparation II course is for those students who are taking a Career Preparation course for the second time and continue or have new employment during the duration of the course; working ten hours per week (or average of 20 hours across two weeks). This course provides the same opportunities and requirements as the Career Preparation I course. Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): Career Preparation I course. Instructional Material: Contact Career and Technical Education Department for related materials Prerequisite(s): Career Preparation I AB CAREER PREPARATION I/EXTENDED I AB (EXCAREEI AB) This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I/Extended provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities,	Tier III           CP01400AB           127011122           Grade level: 12           HS Credit(s): 2           College Hour(s): NA           Tier III           CP01302AB           12701305           Grade level: 11-12

year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>fifteen hours per week</u> (or average of 30 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.

*Course offerings may vary each year due to availability	
In this course, students learn the development of three-dimensional drawings and models from engineering	N1303770
sketches and orthographic drawings and utilization of three-dimensional models in design work.	Grade level: 10-12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1
Prerequisite(s): Principles of Manufacturing	College Hour(s): 4
<u>TCC Prerequisite(s)</u> : None	Tier I
Offered only at: Dunbar (P-TECH)	
DUAL CREDIT MANUFACTURING ENGINEERING TECHNOLOGY I A (MANENGT1 A DC)	MAD32900A
TCC Course: (MCHN 1338) Basic Machine Shop I *Course offerings may vary each year due to availability	
In this course, students are introduced to machining fundamentals. The student will use basic machine tools	13032900
including the lathe, milling machine, drill press, power saw, and bench grinder. Machine terminology, theory,	Grade level: 10-12
math, part layout, and bench work using common measuring tools is included. Emphasis is placed on shop	HS Credit(s): 0.5
safety, housekeeping, and preventative maintenance.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 3
Prerequisite(s): Principles of Manufacturing	Tier I
TCC Prerequisite(s): DFTG 1305 and DFTG 1409	
Offered only at: Dunbar (P-TECH)	
DUAL CREDIT MANUFACTURING ENGINEERING TECHNOLOGY I B (MANENGT1 B DC)	MAD32900B
TCC Course: (MCHN 2303) Fundamentals of CNC Machine Controls	
*Course offerings may vary each year due to availability	
In this course, students are introduced to programming and operation of Computer Numerical Controlled (CNC)	13032900
machine shop equipment.	<u> </u>

#### COURSE DESCRIPTIONS FOR THE CYBERSECURITY P-TECH

DUAL CREDIT PRINCIPLES OF INFORMATION TECHNOLOGY AB (PRINIT DC AB)	ITD27201AB
TCC Course: (COSC 1301) Introduction to Computing +	
<u>*Course offerings may vary each year due to availability</u> Students will develop computer literacy skills to adapt to emerging technologies used in the global marketplace.	13027200
Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace	Grade level: 9 - 10
environment. Students will enhance reading, writing, computing, communication, and reasoning skills and apply	HS Credit(s): 1
them to the information technology environment. Additionally, students will learn an overview of computer	
systems-hardware, operating systems, the Internet, and application software including word processing,	
spreadsheets, presentation graphics, and databases. Current topics such as the effect of computers on society,	
and the history and use of computers in business, educational, and other interdisciplinary settings are also	
studied. This course is not intended to count toward a student's major field of study in business or computer	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials. FWISD Prerequisite(s): None	College Hour(s): 3 <b>Tier I</b>
<u>Corequisites</u> : Dual Credit Computer Maintenance AB	Tier I
<u>TCC Prerequisite(s)</u> : None	
Course taught by a TCC-approved adjunct instructor	
Offered only at: Diamond Hill Jarvis (P-TECH), Eastern Hills (P-TECH), South Hills (P-TECH), and TCC South	
Collegiate (P-TECH)	
DUAL CREDIT FUNDAMENTALS OF COMPUTER SCIENCE AB (TAFCS DC AB)	TAD2140AB
TCC Course: (CPMT 1403) Introduction to Computer Technology	
*Course offerings may vary each year due to availability	
Students will gain an understanding of current personal computer hardware including assembly, upgrading,	03580140
setup, configuration, and troubleshooting.	Grade level: 10 – 12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1
<u>FWISD Prerequisite(s)</u> : None	College Hour(s): 4
<u>TCC Prerequisite(s)</u> : None	Tier I
Course taught by a TCC-approved adjunct instructor Offered at: Eastern Hills (P-TECH) and South Hills (P-TECH)	
DUAL CREDIT FOUNDATIONS OF CYBERSECURITY AB (FODCYBER AB DC)	ITD27904AB
TCC Course: (ITSY 1300) Fundamentals of Information Security	II DZI JUHAD
*Course offerings may vary each year due to availability	
Students will develop the knowledge and skills needed to explore fundamental concepts related to the ethics,	03580850
laws, and operations of cybersecurity. Students will examine trends and operations of cyberattacks, threats, and	Grade level: 9
vulnerabilities. Students will review and explore security policies designed to mitigate risks. The skills obtained in	HS Credit(s): 1
this course prepare students for additional study in cybersecurity. A variety of courses are available to students	
interested in this field. Foundations of Cybersecurity may serve as an introductory course in this field of study.	
Additionally, the college course will introduce students to information security including vocabulary and	
terminology, ethics, the legal environment, and risk management. Identification of exposures and vulnerabilities	
and appropriate countermeasures are addressed. The importance of appropriate planning, policies and controls	
is also discussed. Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 3
FWISD Prerequisite(s): None	Tier I
<u>Corequisites</u> : Dual Credit Networking AB	
TCC Prerequisite(s): None	
Course taught by a TCC-approved adjunct instructor	
Offered only at: Eastern Hills (P-TECH)	
DUAL CREDIT NETWORKING AB (NTWRK DC AB)	ITD27402AB
TCC Course: (ITNW 1425) Fundamentals of Networking Technologies	
*Course offerings may vary each year due to availability	
Students will develop knowledge of the concepts and skills related to data networking technologies and practices	13027400
in order to apply them to personal or career development. To prepare for success, students will have	Grade level: 10 – 11
opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.	HS Credit(s): 1
Additionally, students receive Instruction in networking technologies and their implementation. Topics include	
the OSI reference model, network protocols, transmission media, and networking hardware and software. Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 4
<u>Prerequisite(s)</u> : Dual Credit Computer Maintenance	Tier I
<u>Corequisites:</u> Dual Credit Foundations of Cybersecurity AB	
<u>TCC Prerequisite(s)</u> : ITSC 1305 Introduction to PC Operating Systems	
Course taught by a TCC-approved adjunct instructor	
Offered only at: Eastern Hills (P-TECH) and South Hills (P-TECH)	

DUAL CREDIT COMPUTER SCIENCE II (TACS 2 DC AB)	TAD2153AB
FCC Course: (COSC 1436) Programming Fundamentals I+	
Course offerings may vary each year due to availability	
Computer Science I will foster students' creativity and innovation by presenting opportunities to design, mplement, and present meaningful programs through a variety of media. Students will collaborate with one nother, their instructor, and various electronic communities to solve the problems presented throughout the ourse. Through data analysis, students will identify task requirements, plan search strategies, and use computer cience concepts to access, analyze, and evaluate information needed to solve problems. By using computer cience knowledge and skills that support the work of individuals and groups in solving problems, students will elect the technology appropriate for the task, synthesize knowledge, create solutions, and evaluate the results. Students will learn digital citizenship by researching current laws and regulations and by practicing integrity and espect. Students will gain an understanding of the principles of computer science through the study of echnology operations, systems, and concepts. Additionally, will be introduced to the fundamental concepts of tructured programming and provides a comprehensive introduction to programming for computer science and echnology majors. Topics include software development methodology, data types, control structures, functions, irrays, and the mechanics of running, testing, and debugging. This course assumes computer literacy. This course	03580300 Grade level: 10 HS Credit(s): 1
included in the Field of Study Curriculum for Computer Science.	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials. <u>WISD Prerequisite(s)</u> : Dual Credit Principles of IT AB <u>CC Prerequisite(s)</u> : COSC 1301 Introduction to Computing + <u>Course taught by a TCC-approved adjunct instructor</u>	College Hour(s): 4 <b>Tier I</b>
Offered only at: Eastern Hills (P-TECH) and South Hills (P-TECH)	TADALELAD
DUAL CREDIT COMPUTER SCIENCE III (TACS 3 DC AB)	TAD2155AB
<b>FCC Course: (COSC 1437) Programming Fundamentals II +</b> Course offerings may vary each year due to availability	
Students learn advanced skills in programming languages and structured programming techniques through the use of advanced data structures and the discussion of memory allocation and de-allocation. The course offers students the opportunity to explore projects related to individual interests such as business applications, computer graphics, and sound. Additionally, the college course will focus on the object-oriented programming baradigm, emphasizing the definition and use of classes along with fundamentals of object-oriented design. The course includes basic analysis of algorithms, searching and sorting techniques, and an introduction to software engineering processes. Students will apply techniques for testing and debugging software. (This course is ncluded in the Field of Study Curriculum for Computer Science.)	03580350 Grade level: 10 - 11 HS Credit(s): 1
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials. WISD Prerequisite(s): Algebra I; Dual Credit Computer Science 1AB CC Prerequisite(s): COSC 1436 Programming Fundamentals I + Course taught by a TCC-approved adjunct instructor	College Hour(s): 4 <b>Tier I</b>
Dffered only at: Eastern Hills (P-TECH)	
DUAL CREDIT INDEPENDENT STUDY IN TECHNOLOGY AB (TBD: TAIND AB DC)	TAD2144AB
CC Course: (COSC 2436) Programming Fundamentals III	
Course offerings may vary each year due to availability	
Computer Science III will foster students' creativity and innovation by presenting opportunities to design, mplement, and present meaningful programs through a variety of media. Students will collaborate with one another, their instructor, and various electronic communities to solve the problems presented throughout the course. Through data analysis, students will identify task requirements, plan search strategies, and use computer science concepts to access, analyze, and evaluate information needed to solve problems. By using computer science knowledge and skills that support the work of individuals and groups in solving problems, students will exelect the technology appropriate for the task, synthesize knowledge, create solutions, and evaluate the results. Students will learn digital citizenship by researching current laws and regulations and by practicing integrity and respect. Students will gain an understanding of advanced computer science data structures through the study of echnology operations, systems, and concepts. Additionally, the college course will include further applications of programming techniques, introducing the fundamental concepts of data structures and algorithms. Topics	03580900 Grade level: 11 - 12 HS Credit(s): 1
nclude data structures (including stacks, queues, linked lists, hash tables, trees, and graphs), searching, sorting, recursion, and algorithm analysis. Programs will be implemented in an appropriate object-oriented language. This course is included in the Field of Study Curriculum for Computer Science.) <u>nstructional Material</u> : Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 4
<u>Instructional Material</u> : Contact the Office of Innovation, Early College Programs Department for related materials. <u>Prerequisite(s)</u> : DC Computer Science II AB <u>ICC Prerequisite(s)</u> : COSC 1437 Programming Fundamentals II + Course taught by a TCC-approved adjunct instructor Offered only at: Eastern Hills (P-TECH)	Tier I

	TAD2151AB
TCC Course: (ITNW 1309) Fundamentals of Cloud Computing	
*Course offerings may vary each year due to availability	
Students will be introduced to personal computer operating systems including installation, configuration, file management, memory and storage management, control of peripheral devices, and use of utilities.	03580200 Grade level: 11-12
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1
WISD Prerequisite(s): None	College Hour(s): 3
I <u>CC Prerequisite(s)</u> : None	Tier I
Course taught by a TCC-approved adjunct instructor	
Offered at: Carter-Riverside HS (P-TECH)	
DUAL CREDIT ENGINEERING APPLICATIONS FOR COMPUTER SCIENCE PRINCIPLES (EACSP AB DC)	STD03772AB
<b>FCC Course: (ITSE 1450) System Analysis and Design</b> *Course offerings may vary each year due to availability	
This is a design-based high school course for students who want to expand and deepen their engineering design	N1303772
skills and habits of mind through the purposeful integration and application of computer science (CS) principles	Grade level: 11 - 12
and practices. Developed by University of Texas, this hands-on course engages students in authentic, integrated	HS Credit(s): 1
engineering and CS practices in a project-based environment. Additionally, students will be introduced to the	
planning, design, and construction of computer information systems using the systems development life cycle	
and other appropriate design tools.	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 4
<u>FWISD Prerequisite(s)</u> : Dual Credit Computer Science III <u>TCC Prerequisite</u> : COSC 1436 Programming Fundamentals 1+	Tier I
Course taught by a TCC-approved adjunct instructor	
Jourse taught by a TCC-approved adjunct instructor Dffered only at: Eastern Hills (P-TECH)	
HONORS INTERNETWORKING TECHNOLOGIES I AB (INTNET1 AB/H)	ITH28012AB
Jsing a lab setting that corresponds to the work place, students design local and wide-area networks. Students	N1302803
ocus on network fundamentals, router theory, router technologies, network design, and network management.	Grade level: 11 - 12
Students begin preparation for CISCO industry certification. Students in this honors course will complete a project	HS Credit(s): 1
using the five phases of project management used in the business and industry environment.	
nstructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): Networking I AB, excludes P-TECH programs	Tier II
Teacher must be CISCO certified.	
Offered only at: Carter Riverside and Eastern Hills

DUAL CREDIT DIGITAL FORENSICS A (TADGFR A DC)	TAD80360A
TCC Course: (ITSY 2341) Security Management Practices	
*Course offerings may vary each year due to availability	
Digital Forensics introduces students to the knowledge and skills of digital forensics providing a survey of the field of digital forensics and incident response. Digital forensics is an evolving discipline concerned with analyzing anomalous activity on computers, networks, programs, and data. As a discipline, it has grown with the emergence of a globally-connected digital society. As computing has become more sophisticated, so too have the abilities of malicious agents to access systems and private information. By evaluating prior incidents, digital forensics professionals have the ability to investigate and craft appropriate responses to disruptions to corporations, governments, and individuals. Whereas cybersecurity takes a proactive approach to information assurance to minimize harm, digital forensics takes a reactive approach to incident response. Additionally, this college course provides in-depth coverage of security management, practices, including asset evaluation and risk	03580360 Grade level: 9-12 HS Credit(s): 0.5
management; cyber law and ethics issues; policies and procedures; business recovery and business continuity	
planning; network security design; and developing and maintaining a security plan.

DUAL CREDIT CYBERSECURITY CAPSTONE AB (TACYBCAP AB DC) (Available Fall 2023)	ITD27900AB
TCC Course: (ITSY 2459) Security Assessment and Auditing	
*Course offerings may vary each year due to availability	
In the Cybersecurity Capstone course, students will develop the knowledge and skills needed to explore advanced concepts related to the ethics, laws, and operations of cybersecurity. Students will examine trends and operations of cyberattacks, threats, and vulnerabilities. Students will develop security policies to mitigate risks. The skills obtained in this course prepare students for additional study toward industry certification. A variety of courses are available to students interested in the cybersecurity field. Cybersecurity Capstone may serve as a culminating course in this field of study.	03580855 Grade level: 12 HS Credit(s): 1

Students who complete Principles of Health Science, Health Science Theory, Pathophysiology, and Practicum in Health Science will have met requirements for the Healthcare Diagnostics Program of Study for a Public Service or STEM endorsement if the math and science requirements are met.

#### COURSE DESCRIPTIONS FOR THE MEDICAL PROFESSIONS P-TECH

DUAL CREDIT PRINCIPLES OF HEALTH SCIENCE A: (PRINHLSC A DC) TCC COURSE: (HPRS 1206) Essentials of Medical Terminology	HSD02022A
*Course offerings may vary each year due to availability	
Principles of Health Science provides an overview of the therapeutic, diagnostic, health informatics, support services, and biotechnology research and development systems of the health care industry. Students learn that to pursue a career in the health science industry, they must be able to reason, think critically, make decisions, solve problems, and communicate effectively. They learn that quality health care depends on the ability to work well with others. Students identify and research employment opportunities, technology, and safety requirements of the different systems within health science field. They apply knowledge and skills needed to pursue a health science career. Students are expected to employ their ethical and legal responsibilities, identify limitations, as well	13020200 Grade level: 9 HS Credit(s): 0.5
as understand the implications of their actions. This course will also introduce students to the structure of medical erms, including prefixes, suffixes, word roots, singular and plural forms, and medical abbreviations. Additionally, this college course focuses on the study of medical terminology, word origin, structure, and application. <u>nstructional Material</u> : Contact the Office of Innovation, Early College Programs Department for related materials.

#### DUAL CREDIT ACCOUNTING IB (ACCOUNT1B DC) FND16612B TCC Course: Principles of Managerial Accounting: (ACCT 2302) \*Courses may change due to availability This course is an introduction to the fundamental concepts of managerial accounting appropriate for all 13016600 organizations. Students will study information from the entity's accounting system relevant to decisions made by Grade level: 11 - 12 internal managers, as distinguished from information relevant to users who are external to the company. The HS Credit(s): 0.5 emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision making. Topics include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation. Instructional Material: TCC Course: Principles of Managerial Accounting (ACCT 2302) College Hour(s): 3 TCC Prerequisite(s): ACCT-2301 Tier I Course taught by an approved adjunct instructor. Offered only at: Marine Creek, Success HS, and TCC South Collegiate HS (P-Tech)

### **COURSE DESCRIPTIONS FOR THE ENERGY P-TECH**

HONORS PRINCIPLES OF APPLIED ENGINEERING AB (PRAPPENG AB/H)	STH36202AB
In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.	13036200 Grade level: 9
<u>Instructional Material</u> : Principles of Applied Engineering, Texas Edition Reid, et al. 2017, Pearson Education <u>Prerequisite(s)</u> : None	HS Credit(s): 1 College Hour(s): NA
Offered only at: Trimble Tech and I.M. Terrell	Tier II
HONORS PROJECT-BASED RESEARCH IN STEM AB (PROBS1 ST AB/H) *Previously Problems and Solutions STEM	STH01500AB
Honors Project Based Research is a course student will research a real-world problem. Students develop a project on a topic related to career interests, use scientific methods of investigation to conduct in-depth research, are matched with a mentor from the business or professional community, compile findings, and present their findings to an audience that includes experts in the field. This course must be cooperatively planned and supervised by the teacher ensuring that the student has guidance and support of a mentor or interdisciplinary team. The district must maintain a written project plan for each student enrolled in the course.	12701101 Grade level: 11-12 HS Credit(s): 1
Instructional Material: Contact Career and Technical Education Department for related materials <u>Prerequisite(s)</u> : TBD	College Hour(s): NA <b>Tier II</b>
Offered only at: Dunbar and TCC South Collegiate HS	
HONORS UNPAID PRACTICUM IN BUSINESS MANAGEMENT/d AB (PRACBM AB) This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within the designated program of study This course is designed to give students supervised practical application of previously studied knowledge and skill. Students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies. Students develop a foundation in the economic, financial, technological, international, social, and ethical aspects of business to become competent consumers, employees, and entrepreneurs. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students incorporate a broad base of knowledge that includes the legal, managerial, marketing, financial, ethical, and international dimensions of business to make appropriate business decisions. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The various in-class capstone experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. Students will build a professional portfolio demonstrating skills in Business Management.	BAH12202AB 13012200 Grade level: 11-12 HS Credit(s): 2
Instructional Material: Contact Career and Technical Education Department for related materials <u>Prerequisites</u> : 2 credits from a combination of Business courses Offered at: TCC South Collegiate HS	College Hour(s): NA <b>Tier III</b>
CAREER PREPARATION I AB (CAREERP1 AB)	CP01300AB
This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full year commitment to this course and their employment, are scheduled for 1 (one) class period of instruction, and are employed for <u>ten hours per week</u> (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.	12701121 Grade level: 11 - 12 HS Credit(s): 2

DUAL CREDIT DIGITAL ELECTRONICS AB (DIGELC AB DC)	STD37443AB
TCC Course: Digital Systems (CETT 1449)	51D5/445AD
*Course offerings may vary each year due to availability	
In this course, students will learn about electronics covering digital systems. Emphasis on application and	13037600
troubleshooting digital systems using counters, registers, code converters, multiplexers, analog-to-digital to-	Grade level: 10-12
analog circuits, and large-scale integrated circuits.	HS Credit(s): 1
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related	College Hour(s): 4
materials.	Tier I
Prerequisite(s): None	
<u>TCC Prerequisite(s)</u> : MATH 0362 with a minimum grade of C or appropriate TSI Math placement score.	
Offered only at: Dunbar (P-Tech) and TCC South Collegiate HS (P-Tech)	
DUAL CREDIT APPLIED MATHEMATICS FOR TECHNICAL PROFESSIONALS AB	CPD0678AB
(APMTHTP AB DC)	
TCC Course: TECHNICAL CALCULATIONS (TECM 1303)	
*Course offerings may vary each year due to availability	10701410
In this course, students will learn specific mathematical calculations required by business, industry and the health	12701410
occupations.	Grade level: 11 - 12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related	HS Credit(s): 1
materials.	College Hour(s): 3
<u>FWISD Prerequisite(s)</u> : None	Tier I
<u>TCC Prerequisite(s)</u> : MATH 0362 with a minimum grade of C or appropriate TSI Math placement score.	
Offered only at: TCC South Collegiate HS (P-Tech)	17037304 4 0
DUAL CREDIT PRINCIPLES OF INFORMATION TECHNOLOGY AB (PRINIT DC AB)	ITD27201AB
TCC Course: INTRODUCTION TO COMPUTING (COSC 1301)	
*Course offerings may vary each year due to availability	
In this course, students will learn the overview of computer systems - hardware, operating systems, the internet,	13027200
and application software including word processing, spreadsheets, presentation graphics, and databases.	Grade level: 11 - 12
Current topics such as the effect of computers on society, and the history and use of computers in business,	HS Credit(s): 1
educational, and other interdisciplinary settings are also studied. This course is not intended to count toward a	
student's major field of study in business or computer science.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related	College Hour(s): 3
materials.	Tier I

To complete an AA degree, students have the option of completing dual credit core courses. \*TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. Students who complete Principles of Information Technology, Networking, Internetworking Technologies I, and Internetworking Technologies II will have met the requirements for the Networking Program of Study for a Business and Industry or STEM endorsement if the math and science requirements are met.

## COURSE DESCRIPTIONS FOR THE IT/NETWORKING/COMPUTER MAINTENANCE P-TECH

DUAL CREDIT UNPAID PRACTICUM IN EMERGING INFORMATION TECHNOLOGY A/D (PRACITET1 A DC)	ITD28000A
TCC Course: ITSE 1479- Intro to Scripting Languages	
n this course, students will explore scripting languages including basic data types, control structures, regular expressions, input/output, and textual analysis.	13028000 Grade level: 12
Instructional Material: Contact Career and Technical Education for related materials	HS Credit(s): 1
<u>-WISD Prerequisite(s)</u> : Dual Credit Cloud Internetworking II B	College Hour(s): 4
<u>CC Prerequisite(s)</u> : ITC1440, ITSC 1416, ITSE 1303, and ITSC1316	Tier I
)ffered at: Carter-Riverside HS (P-TECH)	
UAL CREDIT PRINCIPLES OF EMERGING INFORMATION TECHNOLOGY A (PRINET DC AB) CC Course: (CMPT 1403) Introduction to Computer Technology Course offerings may vary each year due to availability	ITD27211AB
itudents will be introduced to fundamental computer principles that provides explanation of the procedures to itilize hardware and software. Emphasis on terminology, acronyms, and hands-on activities. Lecture hours: 3; ab hours: 2	13027200 Grade level: 9-10
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1.0
WISD Prerequisite(s): None	College Hour(s): 4 <b>Tier I</b>
<u>CC Prerequisite(s)</u> : None	
ourse taught by a TCC-approved adjunct instructor	
)ffered at: Carter-Riverside HS (P-TECH)	
DUAL CREDIT NETWORKING AB (NTWRK DC AB)	ITD27402AB
CC Course: (ITNW 1425) Fundamentals of Networking Technologies	
Course offerings may vary each year due to availability	13027400
tudents will receive instruction in networking technologies and their implementation. Topics include the OSI efference model, network protocols, transmission media, and networking hardware and software.	Grade level: 10 – 12
<u>instructional Material</u> : Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1
rerequisite(s): None	College Hour(s): 4
<u>CC Prerequisite(s)</u> : ITSC 1305	Tier I
Course taught by a TCC-approved adjunct instructor	
)ffered at: Carter-Riverside (P-TECH), Eastern Hills (P-TECH) and South Hills (P-TECH)	
DUAL CREDIT NETWORKING FOR CLOUD SYSTEMS A (NTWRKC DC A)	ITD27403A
CC Course: (ITNW 1408) Implementing and Supporting Client Operating Systems Course offerings may vary each year due to availability	
tudents will learn the fundamentals of managing and configuring network clients. Skills development in the	13027400
nanagement of client as desktop operating systems.	Grade level: 10-11
istructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 0.5
<u>WISD Prerequisite(s)</u> : Dual Credit Principles of Emerging Information Technologies B	College Hour(s): 4
<u>CC Prereguisite(s)</u> : ITNW1425	Tier I
ourse taught by a TCC-approved adjunct instructor	
Offered at: Carter-Riverside HS (P-TECH)	ITD27403B
Offered at: Carter-Riverside HS (P-TECH) DUAL CREDIT NETWORKING FOR CLOUD SYSTEMS B (NTWRKC DC B) TCC Course: (ITNW 1454) Implementing and Supporting Servers	ITD27403B

Degree: AAS Construction Management Technology - 60 hours

College Level Certification(s): Construction Inspection Technician, Level 1; Construction Management Technology, Level 1 – 19-25 hours

Industry Certification(s): NCCER Core Curriculum, NCCER Construction Technology,

\*TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Students that are not TSI met will take AP courses in-lieu of dual credit course. The COLLEGE DISTRICT and SCHOOL DISTRICT will utilize the crosswalk to collaborate strategic course offerings for students participating in the dual credit program towards college degree completion through the term of the agreement. Career and Technical Education (CTE) program requirements will be provided for CTE course offerings. \*\*Required for AAS

Students who complete Principles of Construction Management, Construction Management I, and Practicum in Construction Management will have met requirements for the Construction Management and Inspection Program of Study for a Business and Industry endorsement.

# COURSE DESCRIPTIONS FOR ARCHITECTURE/CONSTRUCTION & LOGISTICS P-TECH

DUAL CREDIT PRINCIPLES OF ARCHITECTURE A (PRINARC DC A)	ARD04200A
FCC (ARCH 1315) Architectural Computer Graphics	
Course offerings may vary each year due to availability	12004210
Students learn the effective use of representational media, computer aided design, and digital media to engage ormal, organizational, and environmental principles. Emphasis on the appropriate media to inform two-	13004210 Grade level: 9 – 10
limensional and three-dimensional design based upon the conventions of architectural graphic communication.	HS Credit(s): 0.5
Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB) Student	
Performance Criteria: A.1 Professional Communication Skills and A.4 Architecture Design Skills	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
-WISD Prerequisite(s): None	Tier I
<u>CC Prerequisite(s)</u> : None	
Offered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT PRINCIPLES OF ARCHITECTURE B (PRINARC DC B)	ARD04200B
TCC (ARCH 1311) Introduction to Architecture	
*Course offerings may vary each year due to availability	
Students are introduced to architecture that explores the practices, principles, and wider context of architecture	13004210
and design. Focuses on the role of architecture in society, culture, and the broader physical context of the built	Grade level: 9 – 10
environment. Course is intended to fulfill all or part of the following National Architectural Accrediting Board	HS Credit(s): 0.5
NAAB) Student Performance Criteria: A.8 Cultural Diversity and Social Equity and D.1 Stakeholder Roles in	
Architecture	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
WISD Prerequisite(s): Dual Credit Principles of Architecture A	Tier I
<u>ICC Prerequisite(s)</u> : ARCH 1315	
Offered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT ARCHITECTURAL DESIGN I A (ARCHDSN 1 DC A)	ARD04602A
ICC (ARCH 2312) Architectural Technology	
Course offerings may vary each year due to availability	13004600
Students are introduced to materials and methods in the design and construction of buildings. Course will	
nclude a survey of buildings that conserve energy, water, and human resources; sustainable design and construction. The course will illustrate the connection of the previously mentioned topics, when applicable, to	Grade level: 10 – 12 HS Credit: 0.5
he digital age and the Internet of Things (IoT) which are reshaping our built environment. Course is intended to	FIS CIEUIL 0.5
ulfill all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria:	
8.7 Building Envelope Systems and Assemblies and B.8 Building Materials and Assemblies.	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
WISD Prerequisite(s): Dual Credit Principles of Architecture B, Algebra I, and English I	Tier I
<u>ICC Prerequisite(s)</u> : ARCH 1311	
Dffered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT ARCHITECTURAL DESIGN I B (ARCHDSN 1 DC B)	ARD04602B
FCC (ARCH 1303) Architectural Design I - Residential	
Course offerings may vary each year due to availability	
Students will receive an introductory studio providing foundation in the conceptual, perceptual, and manual skills	13004600
necessary for two-dimensional and three-dimensional design. Architectural drawing procedures and practices for	Grade level: 10 – 12
esidential and/or light frame construction. Construction practices and techniques with emphasis on residential	HS Credit: 0.5
onstruction methods. Office procedures for coordinating CAD drawings in the office. Course is intended to fulfill	
Il or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.1	
Professional Communication Skills. A.2 Design Thinking Skills, A.4 Architectural Design Skills, and A.5 Ordering	
Systems.	
nstructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
WISD Prerequisite(s): Dual Credit Architectural Design IA, Algebra I, and English	Tier I
ICC Prerequisite(s): ARCH 2312	
Offered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT ARCHITECTURAL DESIGN II/d A (ARCHDSN 2 DC A)	ARD04702A
ICC (ARCH 1304) Architectural Design II - Commercial	
Course offerings may vary each year due to availability	
Students will engage in creative problem solving and presentation of principles, concepts and ideas as applied	13004700
o introductory architectural projects. Architectural drafting procedures, practices and symbols including the	Grade level: 10 - 12
preparation of detailed working drawings for commercial building, with emphasis on commercial construction	HS Credit(s): 1
nethods. Course is intended to fulfill all or part of the following National Architectural Accrediting Board (NAAB)	
tudent Performance Criteria: A.1 Professional Communication Skills, A.2 Design Thinking Skills, A.4 Architectural	
esign Skills, and A.5 Ordering Systems	

Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials FWISD Prerequisite(s): None	College Hour(s): 3 <b>Tier I</b>
TCC Prerequisite(s): ARCH 1303 and ARCH 1315	
Offered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT ARCHITECTURAL DESIGN II/d B (ARCHDSN 2 DC B)	ARD04702B
TCC (ARCH 1301) Architectural History I	
*Course offerings may vary each year due to availability	
Students will begin with part one of a survey of the history of world architecture from pre-history to the present.	13004700
This course focuses on the period from pre-history up to at least the 14th Century. Course is intended to fulfill	Grade level: 10 - 12
all or part of the following National Architectural Accrediting Board (NAAB) Student Performance Criteria: A.7	HS Credit(s): 1
History and Global Culture	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials FWISD Prerequisite(s): None	College Hour(s): 3 <b>Tier I</b>
<u>TCC Prerequisite(s)</u> : None	
Offered at: Diamond Hill-Jarvis (P-TECH)	
DUAL CREDIT PRINCIPLES OF CONSTRUCTION FOR ARCHITECTURE A (PRINCONA A DC)	ARD04202A
TCC (ARCE 1342) Codes, Specifications, and Contract	
*Course offerings may vary each year due to availability	
Students will study ordinances, codes, and legal documents as they relate to specifications and drawing.	13004220
Discussion of owner-architect-contractor responsibilities, duties, and legal relationships. Preparation of drawing	Grade level: 10-12
for mechanical, electrical, and plumbing (MEP) systems with emphasis on applicable building and energy codes,	HS Credit(s): 0.5
product references, and specifications for construction.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
FWISD Prerequisite(s): None	Tier I
T <u>CC Prerequisite(s)</u> : ARCH 2312	
Offered at: Diamond Hill-Jarvis (P-TECH) DUAL CREDIT PRINCIPLES OF CONSTRUCTION FOR ARCHITECTURE B (PRINCONA B DC)	400042020
	ARD04202B
(ARCE 2352) Mechanical, Electrical, and Plumbing (MEP) Systems *Course offerings may vary each year due to availability	
Students will study ordinances, codes, and legal documents as they relate to specifications and drawing.	13004220
Discussion of owner-architect-contractor responsibilities, duties, and legal relationships. Preparation of drawing	Grade level: 10-12
for mechanical, electrical, and plumbing (MEP) systems with emphasis on applicable building and energy codes,	HS Credit(s): 0.5
product references, and specifications for construction. Course will include a survey of buildings that conserve	
energy, water, and human resources; sustainable design and construction. The course will illustrate the	
connection of the previously mentioned topics, when applicable, to the digital age and the Internet of Things	
(IoT) which are reshaping our built environment.

# COURSE DESCRIPTIONS FOR THE SOFTWARE DEVELOPMENT, IT AND USER EXPERIENCE P-TECH

HONORS PROJECT-BASED RESEARCH AB (PROBS1 AB/H) (Available Fall 2023) Previously Problems and Solutions	СРН01500АВ
Students will research a real-world problem and possible solutions throughout this course. Students develop a project on a topic related to career interests, use scientific methods of investigation to conduct in-depth research, are matched with a mentor from the business or professional community, compile findings, and present their indings to an audience that includes experts in the field. This course must be cooperatively planned and	12701101 Grade level: 11-12 HS Credit(s): 1
upervised by the teacher ensuring that the student has guidance and support of a mentor or interdisciplinary eam. The district must maintain a written project plan for each student enrolled in the course.	
nstructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): Specific to program focus/pathway and is the previous course in the sequence.	Tier II
Dffered at: All high school campuses	
CAREER PREPARATION I AB (CAREERP1 AB)	CP01300AB
This course is a paid capstone experience for students who have found employment for the school year. Career Preparation I provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with paid business and industry employment experiences. It supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, numan relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success. A student must be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any paid learning experience course. In order to receive course credit, this course requires that students make a full rear commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten days of the beginning of the course. Work hours can be included during the school day or outside of school nours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to work as long as work release does not jeopardize students' projected graduation plan.	12701121 Grade level: 11 - 12 HS Credit(s): 2

*Course offerings may vary each year due to availability	
Students will gain an understanding of current personal computer hardware including assembly, upgrading, setup, configuration, and troubleshooting.	03580140 Grade level: 10 - 12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	HS Credit(s): 1
<u>FWISD Prerequisite(s)</u> : None	College Hour(s): 4
<u>TCC Prerequisite(s)</u> : None	Tier I
Course taught by a TCC-approved adjunct instructor	
Offered at: Eastern Hills (P-TECH) and South Hills (P-TECH)	
DUAL CREDIT COMPUTER SCIENCE II AB (TACS 2 DC AB)	TAD2153AB
TCC Course: (COSC 1436) Programming Fundamentals I	
*Course offerings may vary each year due to availability	
This course introduces the fundamental concepts of structured programming and provides a comprehensive	03580300
introduction to programming for computer science and technology majors. Topics include software development	Grade level: 10 - 12
methodology, data types, control structures, functions, arrays, and the mechanics of running, testing, and	HS Credit(s): 1
debugging. This course assumes computer literacy. This course is included in the Field of Study Curriculum for	
Computer Science.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	College Hour(s): 4
FWISD Prerequisite(s): None	Tier I
TCC Prerequisite(s): COSC 1301	
Course taught by a TCC-approved adjunct instructor	
Offered at: South Hills (P-TECH)	
DUAL CREDIT WEB COMMUNICATIONS T (TAWEBCM T DC)	ITD80810T
TCC Course: (ITSE 1411) Beginning Web Programming	
*Course offerings may vary each year due to availability	02500010
Students will develop skills in web page programming including mark-up and scripting languages.	03580810
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials.	Grade level: 10 - 12
<u>FWISD Prerequisite(s)</u> : None	HS Credit(s): 0.5
<u>TCC Prerequisite(s)</u> : COSC 1301	College Hour(s): 4

## COURSE DESCRIPTIONS FOR BUSINESS ADMINSITRATION P-TECH

DUAL CREDIT BUSINESS INFORMATION MANAGEMENT I AB (BUSIM1 AB DC)	BAD11412AB
ICC COURSE: Business Computer Applications (BCIS 1305)	
Courses may change due to availability	10011100
Students will study computer terminology, hardware, and software related to the business environment. The	13011400
focus of this course is on business productivity software applications and professional behavior in computing,	
including word processing (as needed), spreadsheets databases, presentation graphics, and business-oriented	Grade level: 9 - 12
utilization of the Internet.	HS Credit(s): 1
Instructional Material: TCC Course: Business Computer Applications (BCIS 1305)	College Hour(s): 3
FWISD Prerequisite(s): None	Tier I
<u>TCC Prerequisite(s)</u> : TSI Offered only at: Marine Creek, Success HS, YWLA, and TCC South Collegiate HS (P-Tech)	
DUAL CREDIT ADVANCED MARKETING (ADVMKTG AB DC)	MKD34700AB
TCC COURSE: PRINCIPLES OF MARKETING (MRKG 1311)	
*Course offerings may vary each year due to availability	
In this course, students will gain an introduction to the marketing mix functions and processes. The course	13034700
topics include: identification of consumer and organizational needs and explanation of environmental issues.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related	Grade level: 11 - 12
materials.	HS Credit(s): 1
Prerequisite(s): Dual Credit Business Management	College Hour(s): 3
TCC Prerequisite(s): None	Tier I
Offered only at: Marine Creek, Success HS, YWLA, and TCC South Collegiate HS (P-Tech)	
DUAL CREDIT BUSINESS MANAGEMENT AB (BUSMGT AB DC)	BAD12102AB
TCC COURSE: (BUSI 1301) Business Principles	
*Course offerings may vary each year due to availability	
This course provides a survey of economic systems, forms of business ownership, and considerations for running	13012100
a business. Students will learn various aspects of business, management, and leadership functions;	
organizational considerations; and decision-making process. Financial topics are introduced, including	Grade level: 9-12
accounting, money and banking, and securities markets. Also included are discussions of business challenges in	HS Credit(s): 1
the legal and regulatory environment, business ethics, social responsibility, and International business.	
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
Prerequisite(s): None	Tier I
TCC Prerequisite(s): None	
Offered only at: Success HS and YMLA	
DUAL CREDIT BUSINESS LAW (BUSLAW AB DC)	BAD11701AB
TCC COURSE: BUSINESS LAW (BUS 2301)	
*Course offerings may vary each year due to availability	
This course provides the student with foundational information about the U.S. legal system and dispute	13011700
resolution, and their impact on business. The major content areas will include general principles of law, the	15011700
relationship of business and the U.S. Constitution, state and federal legal systems, the relationship between law	Grade level: 9 - 12
and ethics, contracts, sales, torts, agency law, intellectual property, and business law in the global context.	HS Credit(s): 1
Instructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): 3
Prerequisite(s): None	Tier I
Offered only at: TCC South Collegiate HS (P-Tech), Success HS, and Diamond Hill Jarvis (P-Tech)	
	FND16612A
DUAL CREDIT ACCOUNTING IA (ACCOUNT1 A DC)	FND10012A
TCC Course: Principles of Financial Accounting: (ACCT 2301)	
*Courses may change due to availability	
This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally	13016600
accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations.	
Students will examine the procedures and systems to accumulate, analyze, measure, and record financial	
transactions. Students will use recorded financial information to prepare a balance sheet, income statement,	
statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of	
operations and financial position to users of financial information who are external to the company. Students will	
study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for	Crada lavali 0 12
purposes of making decisions about the company. Students will be exposed to International Financial Reporting	Grade level: 9 - 12
Standards (IFRS).	HS Credit(s): 0.5
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 3
Prerequisite(s): None	Tier I
TCC Proroquisita(s): TSL compliant in Math	
<u>TCC Prerequisite(s)</u> : TSI compliant in Math	
<u>TCC Recommended Co-requisites</u> : MATH 1324	

DUAL CREDIT ACCOUNTING IB (ACCOUNT1B DC)	FND16612B
CC Course: Principles of Managerial Accounting: (ACCT 2302)	
Courses may change due to availability	
his course is an introduction to the fundamental concepts of managerial accounting appropriate for all	13016600
rganizations. Students will study information from the entity's accounting system relevant to decisions made by	Grade level: 11 - 12
nternal managers, as distinguished from information relevant to users who are external to the company. The	HS Credit(s): 0.5
mphasis is on the identification and assignment of product costs, operational budgeting and planning, cost	
ontrol, and management decision making. Topics include product costing methodologies, cost behavior,	
perational and capital budgeting, and performance evaluation.	
nstructional Material: TCC Course: Principles of Managerial Accounting (ACCT 2302)	College Hour(s): 3
<u>CC Prerequisite(s)</u> : ACCT-2301	Tier I
ourse taught by an approved adjunct instructor.	
Offered only at: Marine Creek, Success HS, and TCC South Collegiate HS (P-Tech)

The YMLA PTECH Academy offers two (2) Career Focuses.

Degree: AAS Robotics and Automation: 60+ hours

College Level Certification: Mechatronics Technician, Level 1 Certification: 30 hours

Industry Certification(s): Certified SolidWorks Associate or Autodesk Inventor

TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Juniors and seniors that are not TSI met will take AP courses in lieu of a dual credit course.

\*Required Dual Credit course to meet Associate Degree requirements

^Optional Dual Credit course

Students who complete Principles of Applied Engineering, AC/DC Electronics, Solid State Electronics, and Digital Electronics will have met requirements for the Renewable Energy Program of Study for a STEM Endorsement. This is capped with a Practicum in STEM if the math and science requirements are met.

College Level Certification: Business Certification, Level 1: 24 hours

Industry Certification(s): Microsoft Office Specialist – Word or Microsoft Office Specialist – Excel

TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Juniors and seniors that are not TSI met will take AP courses in lieu of a dual credit course.

\*Required Dual Credit course to meet Associate Degree requirements

^Optional Dual Credit course

Business Level 2 certification additional courses: BMGT 1327, BMGT 1341 & BCIS 1305 + 6 hours of electives

Students who complete Business Information Management, Business Management, Business Law, and Practicum in Business

Management/Entrepreneurship will have met requirements for the Business Management Program of Study for a Business and Industry Endorsement.

# COURSE DESCRIPTIONS FOR PTECH AT YMLA

	<b>AB</b> 04000
CAREER PREPARATION I AB (CAREERP1 AB)	CP01300AB
his course is a paid capstone experience for students who have found employment for the school year. Career	12701121
reparation I provides opportunities for students to participate in a work-based learning experience that	Grade level: 11 - 12
ombines classroom instruction with paid business and industry employment experiences. It supports strong artnerships among school, business, and community stakeholders. The goal is to prepare students with a variety	HS Credit(s): 2
f skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills	
pplicable to their training station, job interview techniques, communication skills, financial and budget activities,	
uman relations, and portfolio development. Career preparation is relevant and rigorous, supports student	
attainment of academic standards, and effectively prepares students for college and career success. A student	
nust be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any	
paid learning experience course. In order to receive course credit, this course requires that students make a full	
ear commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and	
are employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten	
days of the beginning of the course. Work hours can be included during the school day or outside of school	
hours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to	
work as long as work release does not jeopardize students' projected graduation plan.	<u> </u>
nstructional Material: Contact Career and Technical Education Department for related materials	College Hour(s): NA
Prerequisite(s): None	Tier III
Offered at: All high school campuses CAREER PREPARATION II AB (CAREERP2 AB)	CP01400AB
The Career Preparation II course is for those students who are taking a Career Preparation course for the second	12701122
ime and continue or have new employment during the duration of the course; working ten hours per week (or	Grade level: 12
average of 20 hours across two weeks). This course provides the same opportunities and requirements as the	HS Credit(s): 2
Career Preparation I course.

HONORS UNPAID PRACTICUM IN BUSINESS MANAGEMENT AB (PRACBM AB/H)	BAH12202AB
This practicum course is an unpaid capstone experience for students participating in a coherent sequence of career and technical education courses within the designated program of study. This course is designed to give students supervised practical application of previously studied knowledge and skills. Students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies. Students develop a foundation in the economic, financial, technological, international, social, and ethical aspects of business to become competent consumers, employees, and entrepreneurs. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students incorporate a broad base of knowledge that includes the legal, managerial, marketing, financial, ethical, and international dimensions of business to make appropriate business decisions. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities. Practicum capstone experiences can occur in a variety of locations appropriate to the nature and level of experiences include students working in a simulated environment, running an enterprise, or be involved in program-specific local projects the school has approved for this class. Additional capstone experiences also include students being selected to be a part of a work-based experience or industry training off-site, outside of school. Students will build a professional portfolio demonstrating skills in Business Management. In addition to the regular course curriculum, students in the honors course will complete additional projects and activities related to the program of study.	13012200 Grade level: 11-12

DUAL CREDIT DIGITAL ELECTRONICS AB (DIGELC DC AB)	STD37443AB
TCC Course: (CETT 1449) Digital Systems	
*Course offerings may vary each year due to availability	
In this course, students will learn about electronics covering digital systems. Emphasis on application and	13037600
troubleshooting digital systems using counters, registers, code converters, multiplexers, analog-to-digital to- analog circuits, and large-scale integrated circuits.	Grade level: 10-12 HS Credit(s): 1
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	College Hour(s): 4
Prerequisite(s): None	Tier I
<u>TCC Prerequisite(s):</u> TSI Met in Algebraic Math pathway	
Offered only at: YMLA	
DUAL CREDIT PROGRAMMABLE LOGIC CONTROLLER II AB (TBD: PROLGCNT2 AB DC)	TBD: STD03690AB
TCC Course: (ELPT 2445) Programmable Logic Control II	
*Course offerings may vary each year due to availability	
In this course, students will learn advanced concepts in programmable logic controllers and their applications and	N1303690
interfacing to industrial controls.	Grade level: 10-12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	HS Credit(s): 1
Prerequisite(s): None	College Hour(s): 4
<u>TCC Prerequisite(s):</u> None Offered only at: YMLA	Tier I
DUAL CREDIT BASIC FLUID POWER AB (BASICFP AB DC)	MAD03683AB
TCC Course: (HYDR 1345) Hydraulics and Pneumatics	IVIADUSUOSAD
*Course offerings may vary each year due to availability	
In this course, students learn the fundamentals of hydraulics and pneumatics, components of each system, and	N1303683
the operations, maintenance, and analysis of each system.	Grade level: 10-12
Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials	HS Credit(s): 1

This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations. Students will examine the procedures and systems to accumulate, analyze, measure, and record financial transactions. Students will use recorded financial information to prepare a balance sheet, income statement, statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of operations and financial position to users of financial information who are external to the company. Students will study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for purposes of making decisions about the company. Students will be exposed to International Financial Reporting Standards (IFRS). Instructional Material: Contact the Office of Innovation, Early College Programs Department for related materials Prerequisite(s): None TCC Prerequisite(s): TSI compliant in Math TCC Recommended Co-requisites: MATH 1324 Offered only at: YMLA DUAL CREDIT ACCOUNTING IB (ACCOUNT1B DC) TCC Course: Principles of Managerial Accounting: (ACCT 2302)	Grade level: 11 - 12 HS Credit(s): 0.5 College Hour(s): 3 Tier I FND16612B

TCC Course: Principles of Managerial Accounting: (ACCT 2302)	
	13016600
This course is an introduction to the fundamental concepts of managerial accounting appropriate for all organizations. Students will study information from the entity's accounting system relevant to decisions made by internal managers, as distinguished from information relevant to users who are external to the company. The emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision making. Topics include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation.	Grade level: 11 - 12 HS Credit(s): 0.5

TSI compliance or TSI waiver will determine if the course is taken as a Dual Credit course for TSI placement courses. Juniors and seniors that are not TSI met will take AP courses in lieu of a dual credit course.

\*Required Dual Credit course to meet Associate Degree requirements

^Optional Dual Credit course

Students who complete Principles of Applied Engineering, AC/DC Electronics, Solid State Electronics, and Digital Electronics will have met requirements for the Renewable Energy Program of Study for a STEM endorsement if the math and science requirements are met. This is capped with a Practicum in STEM.

# COURSE DESCRIPTIONS FOR PTECH AT I.M. TERRELL ACADEMY

CAREER PREPARATION I AB (CAREERP1 AB)	CP01300AB
his course is a paid capstone experience for students who have found employment for the school year. Career reparation I provides opportunities for students to participate in a work-based learning experience that ombines classroom instruction with paid business and industry employment experiences. It supports strong artnerships among school, business, and community stakeholders. The goal is to prepare students with a variety f skills for a fast-changing workplace. Students are taught employability skills, which include job-specific skills pplicable to their training station, job interview techniques, communication skills, financial and budget activities, uman relations, and portfolio development. Career preparation is relevant and rigorous, supports student tainment of academic standards, and effectively prepares students for college and career success. A student nust be a minimum age of 16 and hold valid work documentation, such as a Social Security card, to enroll in any aid learning experience course. In order to receive course credit, this course requires that students make a full ear commitment to this course and their employment, are scheduled for 1 (one) class period of instruction and re employed for ten hours per week (or average of 20 hours across two weeks) at an approved site within ten ays of the beginning of the course. Work hours can be included during the school day or outside of school	12701121 Grade level: 11 - 12 HS Credit(s): 2
ours. If work hours are during the school day, students can be scheduled for work release (noncredit) periods to	
vork as long as work release does not jeopardize students' projected graduation plan.

IONORS UNPAID PRACTICUM IN STEM/d AB (PRACSTEM AB/H)	STH37402AB
his practicum course is an unpaid capstone experience for students participating in a coherent sequence of areer and technical education courses within their designated program of study. This course is designed to give tudents supervised practical application of previously studied knowledge and skills. Practicum experiences can ccur in a variety of locations appropriate to the nature and level of experience. In addition, students in this onors course will complete a project using the five phases of project management used in the business and ndustry environment. Practicum capstone experiences can occur in a variety of locations appropriate to the ature and level of experiences, or laboratories. The ature and level of experiences such as independent study, assistantships, mentorships, or laboratories. The arious in-class capstone experiences include students working in a simulated environment, running an	13037400 Grade level: 12 HS Credit(s): 2

capstone experiences also include students being selected to be a part of a work-based experience or industry	
training off-site, outside of school. In addition to the regular course curriculum, students in the honors course	
will complete additional projects and activities related to the program of study.

HONORS PRINCIPLES OF APPLIED ENGINEERING AB (PRAPPENG AB/H)	STH36202AB
Principles of Applied Engineering provides an overview of the various fields of science, technology, engineering,	13036200
and mathematics and their interrelationships. Students will develop engineering communication skills, which	Grade level: 9
include computer graphics, modeling, and presentations, by using a variety of computer hardware and software	
applications to complete assignments and projects. Upon completing this course, students will understand the various fields of engineering and will be able to make informed career decisions. Further, students will have	
worked on a design team to develop a product or system. Students will use multiple software applications to	
prepare and present course assignments. In addition to the regular course curriculum, students in the honors	
course will complete additional projects and activities related to the program of study.

# Health and Physical Education

The Texas Education Code, (TEC) 38.101, requires the District to test the physical fitness of students enrolled in grades 3-12 in any course that satisfies the curriculum requirements for physical education on an annual basis. This includes all courses that qualify as Physical Education substitutions. Additionally, TEC 38.103 requires the District to provide the results of individual student performance on the physical fitness assessment to the Texas Education Agency. The annual fitness assessment requirement is coordinated by the FWISD Department of Health and Physical Education.

HEALTH I	5001 T
Provides students with the knowledge and skills to develop and sustain health-promoting behaviors. Students will	03810100
learn functional health information, analyze personal values and beliefs that support healthy behaviors, and develop	Grade level: 9 - 10
essential health skills necessary to adopt, practice, and maintain health-enhancing behaviors. # Fort Worth ISD Athletics State Elective or Local Credit Option

The State of Texas requires one year of physical education (PE) for graduation and allows up to four years/four credits of Physical Education/Athletics to count as state graduation credits. When an Athletics course is selected by the student, the student needs to be aware of the various options he/she has in how the credit will be used.

# When selecting courses, pay close attention to the course numbers selected. For the same named course, one set of course numbers are used to count the course as a <u>state credit</u> and another set of course numbers is used to have the course count as a <u>local credit</u>.

# Understanding the Results of the Options Selected:

- 1) **The first year taking an athletic course** will automatically count as a PE substitution unless the student has already satisfied or is currently taking another course that will count as a full credit PE substitution; such as JROTC, Drill Team, Cheerleading, or a Marching Band course coded as a PE substitution or a District-approved off-campus activity substitution.
- 2) When the one credit is already satisfied or the student is also currently scheduled/taking a qualified PE substitution course, the student has the option of choosing how he/she wants the additional athletic course to count. The student is to select the desired option at the time of creating the course schedule.
  - **Option 1 Athletic Course State Credit Option:** Athletics courses taken beyond the one course required for the PE substitution will count toward the number of course electives needed for graduation (up to 3 athletics elective credits may be used toward graduation and will be calculated into the student's GPA).
  - Option 2 Athletic Course Local Credit Option: When students are either scheduled for/or have completed taking a
    PE course/PE substitution, any athletics course beyond the requirement may be taken for local credit. The local credit
    course will not count toward the number of elective credits needed for graduation, and the grades earned as a local
    credit will not be calculated into the student's GPA. Students/Parents must sign a FWISD Athletics State Elective –
    Local Credit Option form one time to have the student's athletic courses count as local credits. See the school counselor
    for this form.

### As students develop their high school schedules, they need to be aware of the manner in which:

- athletic courses,
- physical education courses, and
- physical education substitution courses will:
   (1) <u>be credited toward their graduation requirements</u> and
   (2) <u>impact Grade Point Average.</u>

# **Physical Education Substitutions**

The substitution activities for <u>athletics and private or commercially-sponsored physical activity programs may be awarded up to four PE credits toward graduation</u>, one for the required physical education credit and three additional PE credits as state elective credits.

# ATHLETICS

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

**Prerequisite:** Student is required approval from head coach for placement into a specific sport course. In addition, student is required to complete the UIL Pre-Participation Evaluation – Medical History form and the UIL Pre-Participation Evaluation-Physical Examination form before participation in any practice before, during, or after school. Fort Worth ISD requires the completion of seven (7) Fort Worth ISD/UIL Pre-Participation forms before participating in athletic class. Forms must be complete before the tenth day of the new school year.

# Grade Placement: 9 - 12

# Credit: .5 – 4

Provides instruction and practice for members of competitive athletics teams. Athletics may be awarded up to four credits toward graduation, one for the required physical education credit and three additional credits as state electives.

# ATHLETIC SPORTS FOR STATE GRADUATION CREDIT

Student enrolling in the following athletic sports will receive state graduation credit which will be credited in the following way: one for PE substitution and three for elective credits, up to a total of four graduation credits. All of these courses will count in the calculation of the student's grade point average (GPA) as a Tier III course. These courses will also count as credit toward graduation requirements. Students may not change their schedules after the 10th day class period ends without a penalty.

### ATHLETICS FOR LOCAL CREDIT

Before a student may qualify to enroll in any athletics course for local credit, he/she must have completed the required PE credit or the PE substitution credit, or also be enrolled in such a qualifying course. <u>Parental approval is required</u> using the FWISD Athletics State Elective – Local Credit Option form for any student to opt out of an athletics state elective credit course to take an athletics course for local credit only. Students may not change their schedules after the 10-day class period ends without a penalty.

The following athletics course numbers are to be used when an athletic course is being used as a LOCAL only credit course. As a local credit, these courses will not count toward graduation and they will not count in the calculation of the student's grade point average (GPA).

Course Coding	PEIMS #	Course Titles

#### Athletic Sports for Local Credit

**Prerequisite**: Student is required approval from head coach for placement into a specific sport course. In addition, student is required to complete the UIL Pre-Participation Evaluation – Medical History form and the UIL Pre-Participation Evaluation-Physical Examination form before participation in any practice before, during, or after school. Fort Worth ISD requires the completion of seven (7) Fort Worth ISD/UIL Pre-Participation forms before participating in athletic class. Forms must be complete before the tenth day of the new school year.

#### Grade Placement: 9 - 12

### Credit: .5 - 4

Provides instruction and practice for members of competitive athletics teams.

The following athletic course section has been created for students who do not want the athletic courses beyond the required PE course or PE substitution to count in their grade point average (GPA) calculations.

# Athletic Sports Course Numbers for Local Credit Only

Students enrolling in the following athletic sports courses that are identified with an L at the end of the FWISD number will receive local credit only for each course. These courses <u>will NOT</u> count in the calculation of the student's grade point average (GPA). These local course credits <u>will NOT</u> count toward graduation credit and <u>will not</u> count for the PE substitution requirement for graduation.

# **Physical Education Substitution Activities**

The following substitution activities of <u>drill team</u>, <u>cheerleading</u>, <u>marching band</u>, <u>and JROTC may be awarded one PE substitution credit</u> <u>toward graduation</u> that may satisfy the physical education credit requirement. See substitution charts on the following pages.

# MARCHING BAND SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

The following PE substitution codes are available.		PE Substitution Marching Band (SUBMB)
1372A PE Substitution Marching Band Activity (SUBMB1)		PEIMS #PES00012 provides ½ credit per
1376A PE Substitution Marching Band (SUBMB2)		semester, up to a total of 1 credit.
		Fall semesters only

Marching Band may be substituted for <sup>1</sup>/<sub>2</sub> credit to 1 credit of physical education. PE substitutions for these courses will not receive a weighted course grade. Only the FINE ARTS Honors Marching Band course numbers/PEIMS numbers will qualify for weighted course grade.

### DRILL TEAM SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

# Prerequisite: Cheerleader Grade Placement: 9 – 12

One credit for PE substitution will be available. All Cheerleading classes after the one credit PE substitution will only count as a local credit. Local credit courses do not count toward graduation credits and are not calculated into GPA.

# JROTC SUBSTITUTION

**NOTE:** State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing. A student who successfully completes JROTC may receive a substitution of one semester of PE for each semester of JROTC completed, up to one credit. A student can receive credit for a separate PE class while receiving a JROTC elective credit (see JROTC course descriptions section).

If a student has completed or is enrolled in a separate course that provides for a PE substitution, the student qualifies to enroll in the JROTC1 course number 5949AB which results in ROTC1 on his/her transcript.

5415 A/B	PE Substitution Non-District Program 4	SUBPRO4	.5 - 1	PES00011

### **OFF CAMPUS ACTIVITY SUBSTITUTION**

The Fort Worth ISD Physical Education Waiver Program provides an opportunity for students in grades 7-12 to receive credit for participation in an off-campus, athletic/training program. FWISD is authorized by the Texas Education Agency (TEA) to substitute participation in private or commercially sponsored programs for the FWISD middle school physical education requirement (7<sup>th</sup> and 8<sup>th</sup> grades) and the state-required high school physical education graduation credit. The FWISD Health and Physical Education Department must ensure the program, agency, and instructor meet the waiver criteria in order to approve all requests through the application process.

# DISTRICT-APPROVED OFF-CAMPUS ACTIVITIES

District-approved off-campus activities may also substitute for required physical education if specific criteria are met, listed in 19 Administrative Code Chapter 74, Subchapter F and EIF (LEGAL) and (LOCAL) policies.

- (iii) Appropriate private or commercially-sponsored physical activity programs conducted on or off campus. The district must apply to the commissioner of education for approval of such programs, which may be substituted for state graduation credit in physical education. Such approval may be granted under the following conditions:
- (I) Olympic-level participation and/or competition includes a minimum of 15 hours per week of highly intensive, professional, supervised training. The training facility, instructors, and the activities involved in the program must be certified by the superintendent to be of exceptional quality. Students qualifying and participating at this level may be dismissed from school one hour per day. Students dismissed may not miss any class other than physical education.
- (II) Private or commercially-sponsored physical activities include those certified by the superintendent to be of high quality and well supervised by appropriately trained instructors. Students participating in at least five hours per week is required. Students certified to participate at this level may not be dismissed from any part of the regular school day.

The purpose of this program is to accommodate students who are making a serious effort to develop high level capabilities and to allow them to be involved in an off-campus program that provides training exceeding that offered in the school district. The ability to offer this option is regulated by the Texas Education Agency.

All inquiries and applications for this option are to be directed to the Director of the FWISD Health and Physical Education Department. Applications must be submitted prior to Labor Day for the fall semester and by January 15 for the spring semester. A FWISD enrollment fee of \$25.00 will be assessed per semester unless a single payment of \$50.00 for both semesters is made at the beginning of the year. Fees are subject to change. The Director will notify the counselor and parent whether or not the requested off-campus activity has been approved as a physical education substitution. Attendance and grade reporting is made to the counselor every six weeks. The final grade for each semester will be included on the student's transcript and will count in the calculation of the student's grade point average.

# DISTRICT-APPROVED OFF-CAMPUS ACTIVITY SUBSTITUTION

All of these courses will be calculated into the student's grade point average (GPA) as Tier III courses.

The grade provided is to be a letter grade; the counselor will commute this to a numerical grade using the following letter grade conversion charts.

Letter/Numerical	Letter/Numerical	Letter/Numerical	Letter/Numerical
A+ = 99	B + = 89	C+ = 79	D = 70
A = 96	B = 86	C = 76	F = 65
A- = 92	B- = 82	C- = 72	

# **Additional PE Substitution Credits**

Beginning in 2014-2015, for students that are on the Foundation High School Program, the TAC <u>§74.12 (b)(6)(B)</u>, states that in accordance with local district policy, the required credit may be earned through completion of any TEKS-based course that meets the requirement for 100 minutes of moderate to vigorous physical activity per five-day school week and that is not being used to satisfy another specific graduation requirement.

# SHOW CHOIR II (VOCAL ENSEMBLE II) SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

Course Codes	
The <sup>1</sup> / <sub>2</sub> - 1 Show Choir II cr	edit to count as a PE substitution is to be coded as follows:
Course #	Title
1444PE A/B	PE Substitution Show Choir II
	(SUBSHOWCH)
	PEIMS # PES00015
The above PE substitution Sh	now Choir II (SUBSHOWCH) course WILL count as a state graduation credit and
of Show Choir II may now su	<b>e student's grade point average as a 4.0 course.</b> Both fall and spring semesters ibstitute for PE credit, provided students engage in 100 minutes of "moderate to ay school week. Provides ½ credit per semester; up to a total of 1 credit.

# Prerequisite: Show Choir I (Vocal Ensemble I) Grade Placement: 9 – 12

# Credit: .5 - 1 (PE substitution credit)

Introduces students to different musical genres and performance styles that are not typically taught in a classical choral setting. This musical style includes choreography and physical movement, as well as vocal techniques necessary for understanding and appreciating fine musical performances through various styles of literature, such as pop, rock, contemporary a cappella and jazz. Attendance at all performances and rehearsals is required. One credit for PE substitution will be available.

# PRINCIPLES OF DANCE II SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

Course Codes	
The <sup>1</sup> / <sub>2</sub> - 1 Principles of Dar	ice II credit to count as a PE substitution is to be coded as follows:
Course #	Title
1503PE A/B	PE Substitution Principles of Dance II
	(SUBDANCE)
	PEIMS # PES00015
calculated into the student's gr	les of Dance II (SUBDANCE) course <b>WILL count as a state graduation credit and WILL be</b> <b>rade point average as a 4.0 course.</b> Both fall and spring semesters of Principles of Dance II provided students engage in 100 minutes of "moderate to vigorous activity" per five –day r semester; up to a total of 1 credit.

# Prerequisite: Dance, Level I

Grade Placement: 9-12

# Credit: .5 - 1 (PE substitution credit)

Focuses on classical ballet, modern, and multicultural dance, tap, and jazz. Expands students' experience with dance vocabulary, dimensions of creativity, choreography, artistic judgment, and dance in diverse cultures in contemporary society. Attendance at all performances and rehearsals is required. One credit for PE substitution will be available.

#### TECHNICAL THEATRE II SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

Course Codes	
The 1/2 - 1 Technical	Theatre II credit to count as a PE substitution is to be coded as follows:
Course #	Title
3754PE A/B	PE Substitution Technical Theatre II
	(SUBTECHTH)
	PEIMS # PES00015
<b>calculated into the stud</b> may now substitute for P	n Technical Theatre II (SUBTECHTH) course <b>WILL count as a state graduation credit and WILL be</b> <b>dent's grade point average as a 4.0 course.</b> Both fall and spring semesters of Technical Theatre II IE credit, provided students engage in 100 minutes of "moderate to vigorous activity" per five –day credit per semester; up to a total of 1 credit.

# Prerequisite: Technical Theatre I

Grade Placement: 9-12

#### Credit: .5 - 1 (PE substitution credit)

This course provides instruction in a laboratory and practical settings, in makeup, costuming design, set design and construction, lighting and sound design, business and theatre management, and other technical areas needed for theatrical and performing arts productions. Students will climb ladders, adjust lights, etc. as well as handle heavy materials, machinery and tools. Students will be expected to participate in all behind-the-scenes action of productions. Attendance at all performances and rehearsals is required, as well as behind-the-scenes action of productions. One credit for PE substitution will be available.

### MUSICAL THEATRE II SUBSTITUTION

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

Course Codes	
The <sup>1</sup> / <sub>2</sub> - 1 Musical Th	eatre II credit to count as a PE substitution is to be coded as follows:

Both fall and spring semesters of Musical Theatre II may lit, provided students engage in 100 minutes of "moderate to vigorous activity" per five –day school er semester; up to a total of 1 credit.

# Prerequisite: Musical Theatre I Grade Placement: 9-12

# Credit: .5 - 1 (PE substitution credit)

Students will be active in a wide range of on-stage performance disciplines, including acting performance, vocal performance, and dance performance. The course will also provide an atmosphere in which students benefit from a teaching and learning experience in these performance disciplines of Broadway-style musical theatre.

The course will enable students to study and perform the varied styles of musical theatre with special attention to the principles of stage movement, stage vocal technique, stage choreography, acting, characterization, and all other aspects of a musical production. Attendance at all performances and rehearsals is required. One credit for PE substitution will be available.

NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

CLGD4AB	PE EQ4 - Color Guard IVAB	

### Prerequisite: Color Guard Member Grade Placement: 9-12 Credit: .5 - 1 (PE substitution credit; additional credits count only as local credit)

Students must audition to be accepted in Color Guard. This course deals with learning the basics of Color Guard performance (flag techniques, body movement, and performance skills). This is one of the many sections that make up the marching band that will perform at football games, marching contests, parades, and pep rallies. By taking this course, the student understands that they must attend all rehearsals, performances, and contests that take place outside the school day (regardless of placement). In addition, members will need to attend camps and other rehearsals that my take place during school vacations. After marching season students will participate in winter guard season, learning more comprehensive, in-depth skills while performing indoors. Students will audition for one of several ability- based winter guard groups at the end of the fall semester.

One credit for PE substitution will be available. All Color Guard classes after the one credit PE substitution will only count as a local credit. Local credit courses do not count toward graduation credits and are not calculated into GPA.

# JUNIOR RESERVE OFFICERS TRAINING CORPS

# JROTC (one to four credits) may be used to count as state graduation elective credit(s). Students may also use JROTC to substitute for the 1 credit of PE which is required for graduation; therefore, two semesters of JROTC will fulfill the 1 PE credit requirement.

Students entering Grade 9 beginning with school year 2014-2015 and thereafter will be graduating under the Foundation High School Program. This graduation program requires students to complete the required subject courses, plus an endorsement made up of four courses/four credits in the student's area of career or college interest. Courses used to meet the named subject credits required may also be used as courses making up an endorsement. Four levels of JROTC courses (I, II, III, and IV) qualifies as a public service endorsement, meeting the endorsement graduation requirement.

# All ROTC Students may select how they want the JROTC Level IA/B 1 credit course to count toward graduation:

1. As a PE substitution with the short title on their transcripts of SUBJ1 showing the course meets the 1 credit PE Graduation requirement

OR

2. As a JROTC course credit with the short title of ROTC, AFROTC, or NROTC appearing on the student's transcript for 1 elective credit/no credit for PE. A student using this option has either to have already completed a PE course or PE substitution (such as athletics, marching band, or drill team etc.) or be enrolled in such a PE credited course at the same time as they are enrolled in JROTC.

# NOTE: State law requires that any student who is taking a PE course, or class that substitutes for PE, participate in annual fitness testing.

JUNIOR RESERVE OFFICERS TRAINING I AB (PE SUBSTITUTION) JUNIOR RESERVE OFFICERS TRAINING I AB (NO PE CREDIT AWARDED)	5951 AB (PE Substitution) or 5949 AB
(Introduction to Leadership and Citizenship Development) JROTC is a "world-class," student-centered academic, STEM-based leadership program which familiarizes students with the concept of leadership, rights, responsibilities, privileges, and freedoms that underlie good citizenship. Focus on STEM–LEGO and VEX Robotics. Students individually and within teams will engage in hands-on teaching and learning, applying academic content by creatively solving real-world problems with innovative design-based thinking. Students will begin developing appreciation of teamwork through instruction in STEM– LEGO and VEX Robotics, Cybersecurity, Problem Solving, Drill, and wearing of the uniform	PES000004 (PE Substitution) or 03160100 Grade level: 9 - 12 HS Credit(s): 1

Prerequisites: JROTC I and II

# JUNIOR RESERVE OFFICERS TRAINING IV AB (Advanced Leadership Development) Course provides students with advanced leadership and instructional experiences while allowing them to serve as senior cadet commanders and staff officers. Emphasis is on effective application of training management, planning management, leadership and communication skills, ethical reasoning, office administration, and decision-making in an assigned command or staff position. Applied service learning (community service projects) involves developing a concept, planning, resourcing, and leading a service project. Students are provided access to ACT/SAT prep courses, guidance in selecting a college and pursuing available scholarships, and mentoring in establishing long-range life goals. Students will lead major competitions, activities, and external inspections. At Arlington Heights High School, the NJROTC enters advanced naval operations, intelligence, communications, seamanship, and applied staff and command.

# NAVY SCIENCE JUNIOR OFFICER RESERVE TRAINING IV AB

NJROTC4. Naval Science 4 course focus is primarily on practical leadership techniques and implementation. The intent is to assist seniors in understanding leadership and improving their leadership skills by putting them in positions of leadership, under supervision, then helping them analyze the reasons for them vary degrees of success throughout the year. Classroom activities include seminars, reading assignments, classroom presentations, and practical work with younger cadets. This hands-on experience affords the cadets the opportunity to put theories of previous leadership courses into practice. Seniors are mentored/guided in their presentation for life after high school to include college preparation, scholarship applications, and the variety of choices that are available to them. Instruction is provided in theoretical and applied aspects of leadership, training, and evaluation of performance. Students will become aware of the techniques used to create motivation, develop goals and activities for a work group, and the proper ways to set a leadership example. Students are provided access to ACT/SAT prep courses, guidance in selecting a college and pursuing available scholarships, and mentoring in establishing long-range life goals.

SPECIAL EDUCATION – HIGH SCHOOL

The following courses are offered to those students who require a TEKS-based curriculum, but also for whom the ARD Committee must determine the mastery level, modified course content, goals and objectives, and accommodations. All of these should be aligned to post- secondary goals for the student. Students who complete course work under this plan qualify for a minimum (22 Credits) graduation plan under the Foundation School Program (FSP) Graduation Plan or HB5 FSP w/ Endorsements (26 Credits). Decisions regarding enrollment are made by the ARD Committee.

# ELIGIBLE SPECIAL EDUCATION STUDENTS:

It is imperative that students are placed into their correct ARD – endorsed schedules within ten days of the beginning of the semester. Academic records must be cross-referenced with Bulletin 100 and the proposed schedules in order to avoid duplication of classes for which credits have been earned and/or disruption to the course sequence intended.

State textbooks for students with special needs are available at the campus level. The Special Education Resource Service (SERS) is a center which can be contacted to access supplementary curriculum materials, if needed, to meet students' individual needs. SERS staff can be reached by calling 817.815.5490.

The students enrolled in the following basic courses (English I, English II, Algebra I, Biology and U.S. History) or the applied course equivalents are instructed with modified TEKS and will take the state assessment deemed appropriate by the ARD committee.

# 3031A/B-Basic English IAB (BAENG1 AB)

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 Credit: 0.5 - 1

Coursework will be taken in lieu of general education English I #3011. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the English I EOC*.

# 3033A/B-Basic English IIAB (BAENG2 AB)

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services. Grade Placement: 10 Credit: 0.5 - 1

Coursework will be taken in lieu of general education English II #3013. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the English II EOC*.

# 3035A/B-Basic English IIIAB (BAENG3 A/B)

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services. Grade Placement: 11 Credit: 0.5 - 1

Coursework will be taken in lieu of general education English III #3015. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 3037A/B-Basic English IVAB (BAENG4 A/B)

Prerequisite: English recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education English IV #3017. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 3128T–Basic Communication Applications IT (BACOMMAPP1 T)

Prerequisite: Speech recommended by ARD committee as a special education course and incorporated into the ARD schedule of services. Grade Placement: 9 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Speech #3126. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# PEIMS # 03220200

PEIMS # 03220300

# PEIMS # 03220400

# PEIMS # 03220100

# AV09902T–Basic Professional Communication IT (BAPROFCOMM T)

Prerequisite: Speech recommended by ARD committee as a special education course and CTE course incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: .5

Coursework will be taken in lieu of general education Speech #3126. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. These courses must be taught by individuals who hold both Special Education and CTE certifications.

# 3911A/B-Basic Reading IAB (BAREAD1 A/B)

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Credit: 0.5 - 1 Grade Placement: 9

Coursework will be taken in lieu of general education Reading I #3941. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 3913A/B-Basic Reading IIAB (BAREAD2 A/B)

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading II #3943. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 3915A/B-Basic Reading IIIAB (BAREAD3 A/B)

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading III #3945. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

## 3953T–Basic Reading Application and Study Skills IT (BAREADAPP1T)

Prerequisite: Reading recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Reading #3955. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 7042A/B-Basic Algebra IAB (BAALG1 A/B)

PEIMS # 03100500 Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Algebra I #7051. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. Student will take the Algebra I EOC.

# 7072A/B-Basic Geometry IAB (BAGEOM1 A/B)

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Geometry #7071. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 7054A/B–Basic Mathematical Models with Applications IAB (BAMTHMOD1 A/B)

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Mathematical Models #7052. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 7058A/B-Basic Algebra IIAB (BAALG2 A/B)

Prerequisite: Mathematics recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Algebra II #7053. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

## 7570A/B-Basic Biology IAB (BABIO1 A/B)

PEIMS # 03010200

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services. Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Biology #7572. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the Biology EOC*.

### 7530A/B-Basic Integrated Physics & Chemistry IAB (BAIPHYCHEM1 A/B)

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Integrated Physics & Chemistry #7532. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD schedule of services.

# 7674A/B–Basic Environmental Systems IAB (BAENVSYS1 A/B)

Prerequisite: Science recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education Environmental Systems #7676. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

## 8023A/B–Basic World Geography Studies IAB (BAWGEO1 A/B)

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education World Geography Studies #8011. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 8031A/B-Basic World History Studies IAB (BAWHIST1 A/B)

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5 - 1

Coursework will be taken in lieu of general education World History Studies #8033. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

**8060A/B–Basic United States History Studies Since Reconstruction IAB (BAUSHISTSSR1A/B)** PEIMS # 03340100 Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services. Grade Placement: 9 - 12 Credit: 1

Coursework will be taken in lieu of general education U.S. History Studies #8056. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee. *Student will take the US History EOC*.

## 8074T–Basic United States Government IT (BAUSGOVT1T)

Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12 Credit: 0.5

Coursework will be taken in lieu of general education United States Government #8076. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

**8093T–Basic Economics with Emphasis on the Free Enterprise System and Its Benefits IT (BAECOFE1T)** Prerequisite: Social Studies recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Emphasis on the Free Enterprise System and Its Benefits #8096. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 5015T–Basic Health Education IT (BAHLTHED1T)

Prerequisite: Health recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 11 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Health Education #5001. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 5046T–Basic Foundations of Personal Fitness IT (BAPE1T)

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5050. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 5047T-Basic Aerobic Activities IT (BAPEAA1T)

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5056. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 5048T–Basic Individual Sports and Recreational Activities IT (BAPEIS1T)

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 9 - 10 Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5053. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

# 5049T–Basic Adventure/Outdoor Education IT (BAPEAEO1T)

Prerequisite: Physical Education recommended by ARD committee as a special education course and incorporated into the ARD schedule of services.

Grade Placement: 10 - 12 Credit: 0.5

Coursework will be taken in lieu of general education Physical Education #5062. Instruction is provided at the student's enrolled grade level, with modification of TEKS, as determined by the ARD Committee.

## SPECIAL EDUCATION SIGNIFICANTLY MODIFIED CURRICULUM

With the assistance of a counselor, a four-year plan must be developed and endorsed by the ARD Committee at age fourteen or upon entry into 8<sup>th</sup> grade (whichever comes first) for an eligible special education student. While it is the expectation that students earn as many credits as possible in the general education setting, the courses listed below are intended for students who need prerequisite TEKS Skills development with primary focus placed on functional or life skills, and alignment to the student's post-secondary goals. Decisions regarding services must be approved by the ARD Committee.

Students enrolled in equivalent test courses (#30197, #30217, #70597, #75597, #80177), the STAAR-ALT EOC will likely be the state assessment of appropriate choice. ARD Committee approval is required.

These courses are designed to provide Special Education support and related services to students who are employed with regularly scheduled direct involvement by special education personnel. Students continue to work on general and specifically applicable employability skills that support their progress on the IEP goals and objectives, which are adopted by the ARD committee. Each course is for three periods and receives 1.5 credits. To ensure continual development of independent work skills, the vocational adjustment coordinator maintains a regular visitation schedule to observe students at work. \*Continues the development of independent work skills as described for VAC II-V and completes preparation for graduation. Students should be enrolled in VAC VB during the last semester immediately preceding graduation; this enrollment will signal the placement of the graduation\*.

Credit: Local

A one-year high school intern transition program which provides students training and education leading to employment. The intern (student) attends a community-based worksite and earns local high school credits. The program serves as a workplace alternative for interns (students) during their last year in high school. Interns (students) continue to work on general applicable transferable employability skills that support their post-secondary goals, objectives and progress on the IEP. *Each course is for three periods. (All local credits)*

Grade Placement 11 – 12+ Credit: Local

Provides training in vocational skills for students who exhibit substantial limitations in function. The program consists of supervision and instruction in production line work, basic academics, personal and social development, and recreation. This program operates under the guidelines of the Texas Education Agency. When students achieve the desired criteria, efforts are made to place them in competitive employment. This course may be used for other programs when necessary.

Eligible students will explore options available in the world of work and develop strategies and skills needed to achieve personal and professional goals. This innovative course is to be offered in a community college setting to age and grade appropriate students seeking vocational certification or certificates of training.

# College Transition-Inclusion

Course #Course Title/NameShort TitleCore SubjectPEIMSTest Type Given0854A/BCollege Transition A/BCLGTRN A/BCollege TransitionN1290050Prerequisite:Upper level high school students with special needs exploring future college studiesGrade Placement:11 – 12Credit:1 (state elective credit)

College Transition is a general education elective and innovative course available to upper level high school students. It is designed to equip students with the knowledge, skills and abilities necessary to be active and successful learners in both high school and college. The curriculum addresses the basic steps for entering college including college options, assessments, and admissions, building orientation, services and support, as well as provides preparation for academic content in higher education.

The following additional innovative courses are to be offered as electives on participating high school and/or college campuses.

Course #	Course Title/ Name	Short Title	PEIMS
0856 A/B	Path College Career IA/B	PATHCC1	N1290051
0862 A/B	Path College Career IIA/B	PATHCC2	N1290052
0863 A/B	Path College Career IIIA/B	PATHCC3	N1290053
0864 A/B	Path College Career IVA/B	PATHCC4	N1290054

The Path-College/Career/Prep courses advance intellectual curiosity, conscientiousness, dependability, emotional stability, and perseverance through tasks that foster deeper levels of thinking and reasoning in the four core content areas. Teaching expectations for these innovative courses focus on developing the habits and skills that are expected in college study and the workforce.

areas.	areas.						

Course #Course Title/ NameShort TitlePEIMSTest Type Given9102ABNavigating Life for students who are Deaf or Hard of HearingNAVLOSSN1290330

The purpose of this course is to provide the necessary information, resources, and opportunities that will empower students who are deaf or hard of hearing to effectively apply information and skills learned in educational, home, and community settings in ways that facilitate achievement in secondary and post-secondary environments. This course will emphasize the following areas: Audiology, Hearing Health, Assistive Technology, Support Services, Accommodations, Communication, Self-Determination and Advocacy, as well as Deaf Culture.

For more resources related to graduation for students with disabilities, visit <u>https://www.livebinders.com/play/play?id=2324617&present=true</u> *The following Graduation Code Charts are credited to Region 7 ESC.* 

# **Graduation Options §89.1070. Graduation Requirements**

Graduation Codes for Special Education Eligible Students

**Chart 1-** Special Education Eligible Students who entered Grade 9 **during** the 2014-2015 and thereafter may be awarded a regular high school diploma if one of the following conditions are met.

Grad Code	89.1070 subsection	Plan	Credits Requirements	Modified Curriculum	State Assessment	The student must also successfully complete the student's individualized education program (IEP) and meet one of the following
34	�(b)(1)	FHSP	Met	No	Met Standard on state assessment or passed 3 out of 5	conditions:
35	�(b)(1)	FHSP	Met	No	Participated - ARD may determine not necessary for graduation	
54†	<b>*</b> (b)(2)A	FHSP	Met	1 or more core class	Met Standard or Participated - ARD may determine not necessary for graduation	Obtained full-time employment AND sufficient self-help skills to enable the student to maintain the employment without direct and ongoing educational support of the local school district
55†	<b>*</b> (b)(2)B	FHSP	Met	1 or more core class	Met Standard or Participated - ARD may determine not necessary for graduation	Demonstrated mastery of specific employability skills and self-help skills that do not require direct ongoing educational support of the local school district
56	<b>*</b> (b)(2)C	FHSP	Met	1 or more core class	Met Standard or Participated - ARD may determine not necessary for graduation	Access to services that are not within the legal responsibility of public education or employment Or educational options for which the student has been prepared by the academic program
57	*(b)(2)D	FHSP	Met	1 or more core class	Met Standard or Participated - ARD may determine not necessary for graduation	Completion of IEP and reached age 22

(a) Graduation with a regular high school diploma under subsections (b)(1), (b)(2)(D), (g)(1), (g)(2), (g)(3), or (g)(4)(D) of this section terminates a student's eligibility for special education services under this subchapter and Part B of the Individuals with Disabilities Education Act and entitlement to the benefits of the Foundation School Program, as provided in Texas Education Code (TEC), §42.003(a).

\* If student returns through 89.1070 (k) after graduating and receiving a diploma, a new leaver code does NOT need to be submitted when the student exits again after returning through 89.1070 (k).

<sup>+</sup> Counts toward CCMR (College Career or Military Ready). Remember, modified content, if ARD determines it is substantially rigorous, can be allowed for endorsement credit.

To assist the persons responsible on your campus for scheduling students served in Special Education and taking the STAAR-EOC state assessment, the Special Education Department created the following five scenarios. Each scenario describes a possible Special Education student, with his/her respective instructional setting and state assessment. The Texas Education Agency is requiring that each Special Education student be enrolled in a course number that is aligned to the respective PEIMS number, according to the type of EOC assessment each student takes (e.g. regular or alternate).

If you have any questions, please do not hesitate to contact the Special Education Department at 817.814.2830.

# **SCENARIO 2**

Sp. Ed student instructed in the special education classroom (self-contained setting – RISE) and taking the alternate STAAR/EOC Alternate assessment

# **Course Substitutions**

There should not be any course substitution for the Foundation program. For some students, fulfilling the requirements of the Foundation program may not be possible in the same manner as other students without disabilities. The ARD committee will determine if a child cannot complete the Language Other than English (LOTE) or Physical Education (PE) requirements.

A credit allowed to be substituted for the LOTE or PE credits may NOT be used to satisfy any other graduation credit requirement.

# Options for Languages Other Than English (TEC 28.025 (b-14) (1))

- After completing the first language course, if it appears a child cannot successfully complete a second year, they may take a course in a second language, a Special Topics in Language/Culture Course, another computer programming course, or take World History Studies or World Geography;
- Substitute two courses from English, math, science, or social studies; or
- Substitute two courses in career and technology education (CTE) or technology applications.

FOREIGN LANGUAGE	2 credits in a foreign language (including ASL) or 2 credits in computer programming language For students with disabilities, there are a variety of options:
TEC 28.025(b-14)(1)	<ol> <li>After completing the first language course, if it appears they cannot successfully complete a second year - they may to take a course in a second language, a Special topics in Language/Culture course, another computer programming course or take World History Studies or World Geography Studies.</li> </ol>
	<ol> <li>Substitute two courses from english, math, science or social studies.</li> </ol>
	<ol> <li>Substitute two courses in career and technology education (CTE) or technology applications.</li> </ol>
	Either the ARD Committee or the 504 Committee will determine if the student cannot complete the Language other than English (LOTE) requirements.
	A credit allowed to be substituted LOTE credit may NOT be used to satisfy any other graduation credit requirement

# Options for Physical Education (TEC 28.024 (b-11))

- One credit in English Language Arts, mathematics, science, or social studies
- A locally designed course that meets the state criteria for substitution under state law, or
- One academic credit elective for the physical education requirement if the ARD committee determines that your child is unable to participate in physical activity.
