

ANNUAL NOTIFICATION

To: Parents, Guardians, and School Employees

From: Jeff Harris, LEA Designated Person

Date: July 16, 2024

Subject: Asbestos Management Plans

This notice is being issued to ensure that you know the Fayette County Board of Education is in compliance with both national and state regulations that relate to building materials which contain asbestos.

An inspection for building materials which contain asbestos has been completed for all buildings owned or leased by Fayette County Board of Education. The original inspection and all subsequent three year reinspections have been completed by EPA accredited persons. Building materials with greater than one percent asbestos content have been identified and made part of a management plan for the system.

The management plans are available for viewing at the John D. Price Administration Building, 450 Park Place. Management Plans may also be viewed at the Principal's office during regular school hours.

We will continue to notify you at least once a year on the status of the management plans. To view the status of your school, refer to the 3 year reinspection tab on the Asbestos Management Plan thumb drive in the principal's office. Should it become necessary, more frequent updates will be issued as a result of an inspection, normal surveillance practices, response actions, or renovation work which might disturb building materials which contain asbestos. Every precaution will continue to be made to assure the well-being of all students and employees of Fayette County Schools.
