

Center-Based Emotional Support with Clinical Supports Option 2024-2025 Program Profile

Description

The CAIU's Center-Based Emotional Support Program provides individual and group counseling opportunities within the context of an emotional support educational placement. The primary goal of the program is to provide educational and therapeutic support services, connecting with professionals who can address the student's cognitive, emotional and behavioral struggles, increase his or her functional daily living skills, and ultimately, facilitate the return to a less restrictive, appropriate educational placement in the home school district. The program is designed to capitalize on the student's strengths and potential in order to enhance their functioning in the home, school and community. The Center-Based Emotional Support Program classes are designed to meet the needs of students who have a combination of complex educational and mental health needs. Center-Based Emotional Support Program classes feature a therapeutic component in addition to a strong collaborative nature in working with a child's outside agency providers to ensure that each child is receiving coordinated services. The program is committed to identifying any student who may be in need of services from the mental health system and will assist our families in accessing these services and making appropriate recommendations. The program will also work with school districts to facilitate referrals to any case management services that a student may be in need of, above and beyond what is provided in the program.

A recent ER or RR, including a psychiatric or psychological evaluation is requested for determining the appropriateness of placement and necessary level of support; a team review with CAIU and Hill Top administration is also conducted. If a student is being considered for enrollment, a meeting and IEP review will be conducted. Once a student is enrolled in the program, the goal is to meet his or her needs for therapeutic care in addition to providing coursework in the general curriculum and in accordance with the IEP to meet specific academic needs.

The core program team consists of a Teacher, Social Worker/Mental Health Treatment Specialist, Paraprofessionals access to Related Services Personnel as required.

Clinical Support Option *

Although the Center-based Emotional Support program offers extensive foundational therapeutic and social work support, Enhanced Clinical Supports may be added to any Hill Top placement for a deeper and more robust level of interventions, supports and expertise. More specifically this may include:

- Individual counseling and social work services above/beyond 30 mins per week
- Collaborative integrated support from a designated Mental Health Worker(s) and/or BCBA
- Defined consultation and/or support from our Clinical Psychologist and consulting Neuropsychologist
- Enhanced level of interventions/supports (ie., CICO, MHW case management, crisis intervention plan implementation)

* This may be collaboratively decided at intake or at any point during placement.

Placement Criteria

- Chronic and/or severe mental health issues that impact educational progress or participation
- Evaluation/recommendation for mental health supports, services or treatment
- Needs not successfully met through district emotional support services
- Student/parent/guardian agreement to participate in the supportive mental health services
- Eligibility for SPED and/or current IEP
- Clinical review indicates ability to benefit from program and there are no significant counter-indicated issues of concern
- Student eligibility for special education and/or current IEP
- Student may be transitioning to or from a Residential Treatment Facility or hospitalization
- Likely to benefit from ongoing counseling services
- May require extensive case management, including interagency coordination

Exit Criteria

- IEP team recommendation based on IEP goal progress or services or the need for an alternate placement
