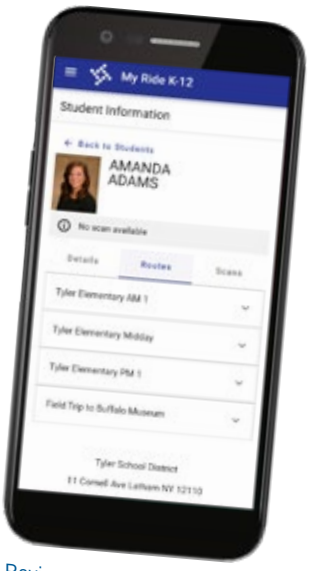
American School Bus Company

My Ride K-12: With Ridership Alerts

Dear Parents/Guardians,

Your school district is introducing My Ride K-12, a new transportation technology, to its transportation operations. My Ride K-12 is a one-of-a-kind mobile app integrated with your district's Student Transportation software that allows both you and your student to access estimated times of arrival or departure for your bus. The app also allows you to view your student's current bus route. This helps ensure that your student is on the right bus, confirms if they have boarded or disembarked, and verifies that you are on time for pick-ups and drop-offs while making the bus route more efficient.

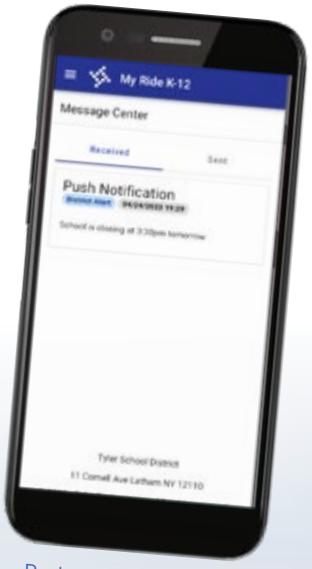


Review your student's routes

Updates are just a few clicks away

My Ride K-12 is designed so you can access your student's bus information in the fastest way possible. GPS technology on the bus works with Student Transportation to automatically calculate the timing of a bus route to give you the most accurate route data with real-time updates. No more calls to your school district are needed to ask about which bus your student is on or if the bus will be on time; that can now be accessed at the touch of a button. Your students may also access the app if they have a mobile device.

Push notifications mean you don't have to worry about checking the app. Sign up for notifications to be automatically alerted about changes in your student's bus status.



Push notifications keep you up to date

Getting started with My Ride K-12

My Ride K-12 is now available for you to download on your Apple or Android mobile device. Simply search the app store for "My Ride K-12" to download and register yourself on the app.
