

DATES	DESCRIPTION	DAILY OBJECTIVES
8/19-23	Utilize icebreakers to get to know the students Utilize the handbook so that students are aware of rules and expectations.	Introductions Review class/lab rules Review disaster plan and egress routes Review and create understanding of the cell phone policy.
8/26-30	Discuss the importance of safety by sharing videos with students. Discuss and display various tools used to perform HVAC. Learn to read a tape measure.	Safety protocol and how to properly use PPE Hand tool Identification
9/2-6	No school on 9/2 Learn how to convert various measurements (area, temperature, pressure, and weight) for career performance.	Labor Day Understanding and demonstrating trade math.
9/9-13	Display and describe various types of HVAC equipment and how they operate.	Introduction to HVACR equipment. Explain basic principles of heating, ventilation, air conditioning, and refrigeration. Identify electrical components of HVACR systems and describe how they operate. Outline sequence of operation.
9/16-20	Explain various laws of electricity and how to calculate the measurements obtained with proper tools.	Describe fundamentals of electricity and electrical theory Identify and describe tools used to safely measure voltage, current, and resistance. Build and test various electrical circuits.
9/23-27	Create an understanding of the heat transfer process and demonstrate the differences between heating equipment.	Explain fundamentals of heating, as well as the various types of equipment that are utilized.
9/30-10/4	Explain heat transfer, develop an understanding of pressure and temperature relationships, learn how to identify system components.	Outline fundamental concepts of refrigeration cycle, different types of refrigerant, identify major components and controls of an air conditioning system.
10/7-11	Explain the relationship between pressure, velocity, and volume in ductwork.	Develop an understanding on how air distribution systems work.

10/14-18	Describe various types of motors, applications, and tools that are used for measuring air flow in ductwork.	Identify equipment and materials used to build an air distribution system.
10/21-25	Learn how to measure, bend, and connect different types of tubing mechanically with various connection types.	Basic copper and plastic tubing practices
10/28-11/1	Explain the concept of A/C power frequency and how A/C power is generated.	Understanding alternating current. Define transformers (types and how they work).
11/4-8	Identify basic electrical safety. Identify what instruments to use and how to safely use them.	Explain how to safely test A/C powered devices. Explain different types of A/C motors
11/11-15	Identify different types of compressors and their operation.	Understand and describe compressors in air conditioning.
11/18-22	We will learn how to define refrigerants, identify desirable characteristics, and identify the various applications that require specific refrigerant characteristics.	Identify various refrigerant classifications and describe their environmental impact.
11/25-29		<b>Thanksgiving Break</b>
12/2-6	We will learn how to utilize a pressure-temperature chart, so that we have an understanding on how to calculate superheat and subcooling.	Explain how to use pressure-temperature (P-T) charts to calculate superheat and subcooling.
12/9-13	We will learn the issues related to oil movement through the refrigerant circuit, the various types and sources of oil contamination, and common practices associated with handling, charging, and removing oils.	Describe the important issues related to the function of lubricating oils in the refrigerant circuit.
12/16-20	Demonstrate various leak detection methods and tools, also how to correctly make repairs to equipment that have active leaks	Leak detection & coil repair

12/23-1/3/25	Winter Break	
1/2-1/5		
1/8-1/12		
1/15-1/19		1/15 - MLK Day (No School)
1/22-1/26		
1/29-2/2		
2/5-2/9		
2/12-2/16		

2/19-2/23		2/19 - Presidents' Day (No School)
2/26-3/4		
3/11-3/15		
<b>3/18-3/22</b>		<b>Spring Break</b>
3/25-3/29		
4/1-4/5		
4/8-4/12		
4/15-4/19		4/15 - SkillsUSA Arkansas Leadership Conference Hot Springs, AR 4/16 - SkillsUSA Arkansas Leadership Conference Hot Springs, AR 4/17 - SkillsUSA Arkansas Leadership Conference Hot Springs, AR

4/22-4/26		
4/29-5/3		
5/6-5/10		
5/13-5/17		
5/20-5/24		
5/27-5/31		5/27 - Memorial Day (No Students)
