

CLAYTON COUNTY PUBLIC SCHOOLS

CCPS CONTAGIOUS DISEASE REPORTING STUDENTS

A contagious disease is defined as a communicable disease that can spread rapidly from person to person through direct contact (touching a person who has the infection), indirect contact (touching a contaminated object), or droplet contact (inhaling droplets made when a person who has the infection coughs, sneezes, or talks). A few examples of contagious diseases include COVID-19, flu, strep throat, stomach virus, conjunctivitis, and measles. Handwashing is the number one way to prevent the spread of communicable diseases. Per the Centers for Disease Control (CDC), the following guidelines should be followed:

COUGH

SHORTNESS
OF BREATH

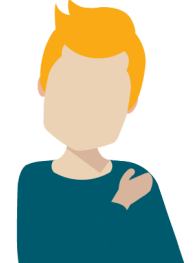

CHILLS

SORE THROAT

LOSS OF TASTE
OR SMELL

MUSCLE
PAIN

DON'T FEEL WELL? STAY HOME WHEN YOU ARE SICK

Student Contagious Disease Reporting

CCPS Students with a Confirmed Contagious Disease with Symptoms:

- Do not report to school
- Consult medical provider, if needed
- Self-Report to the CCPS Contagious Disease Student Portal (to locate the reporting link on the CCPS webpage, go to the Student Services/Health Services page)
- Report diagnosis to teacher
- Self-Isolate per your healthcare provider's recommendations. According to CDC guidance, the period of isolation for COVID-19 is five days from the initiation of symptoms or if no symptoms are present, the date of the positive COVID-19 test.
- Students can return to school per a healthcare provider's recommendations or be fever free for 24 hours without the use of fever-reducing medications.
- Encourage the student to wear a tight-fitting mask when they return to school for an additional five days.

CCPS Students with a Confirmed Contagious Disease without Symptoms:

- Individuals that test positive for a contagious disease, including Covid-19 that are asymptomatic (asymptomatic indicates that the student is without symptoms) may resume normal activities to include work or school wearing a tightly fitted mask.
- Students should wear a tightly fitted mask for five days.
- Once normal activities are resumed, you are encouraged to take additional prevention strategies to curb disease spread, such as taking steps for cleaner air, enhancing hygiene practices, wearing a well-fitting mask, keeping a distance from others, and/or getting tested for respiratory viruses.

Students and their parents are asked to remain in communication with their child's teacher regarding classroom assignments.
