

Lightspeed
Alert™

Safety is our top priority

How does it work?

Lightspeed Alert scans school-issued devices for warning signs of self-harm, suicide, drugs and weapons.

If detected, alert notifications are sent to safety specialists highly trained to assess threat.

If necessary, threats are escalated to school safety personnel and/or police officers for immediate intervention.

Why does it matter?

Early Intervention: Identifies concerning behaviors early, helping prevent targeted violence and promoting student well-being.

Mental Health Support: Connects individuals in need with mental health resources.

Privacy First: Lightspeed Alert respects privacy at all times.
