

The Title I, Part A Schoolwide Program Plan template was designed to ensure each school site plan is fully developed according to the requirements in [ESEA Section 1114](#). The Title I, Part A Schoolwide Program Plan must be reviewed and submitted annually to the Oklahoma State Department of Education (OSDE) as a part of the Consolidated Application.

1. In the space below, enter the school year (Example 2024-2025) the plan will be implemented.

2024-2025
-----------

2. In the space below, enter the date (month, date, year) the plan was last reviewed. The date should be within the current calendar year.

August 19, 2024
-----------------

3. In the table below, enter the requested information for the district.

<b>District Information</b>	
District Name:	Moore Public Schools
District Number:	I-002
County Name:	Cleveland
County Number:	14
Superintendent Name:	Dr. Robert Romines
Email Address:	robertromines@mooreschools.com

4. In the table below, enter the requested information for the school site.

<b>School Information</b>	
School Name:	Apple Creek Elementary
School Site Code:	135
Principal Name:	Rachel McNear
Email Address:	rachelmcnear@mooreschools.com
*School Poverty Rate:	72.97%

\*Required for the school to report. Please consult with district personnel regarding the rate reported in the Consolidated Application (Grants Management System).

**Instructions**

The template is composed of five sections. Each section has three parts.

- The first part outlines the relevant passages in ESEA and contains a check box where the school principal will certify that the legal requirements have been met.
- The second part describes the expectations for the narratives.
- The third part is a text box where the narrative responses are to be entered. There is no word or character limit, and the text box will expand.

**1. Parent and Community Stakeholder Involvement**

- By checking this box, the school principal certifies that:
- the plan is developed with the involvement of parents and other members of the community to be served and individuals who will carry out such plan, including teachers, principals, other school leaders, paraprofessionals present in the school, administrators (including administrators of programs described in other parts of this title), the local educational agency, to the extent feasible, tribes and tribal organizations present in the community, and, if appropriate, specialized instructional support personnel, technical assistance providers, school staff, if the plan relates to a secondary school, students, and other individuals determined by the school. [ESEA Section 1114\(b\)\(2\)](#)
  - the plan is available to the local educational agency, parents, and the public, and the information contained in such plan shall be in an understandable and uniform format and, to the extent practicable, provided in a language that the parents can understand. [ESEA Section 1114\(b\)\(4\)](#)
  - the school meets the requirements of Section 1116 of ESEA, including the development and implementation of a parent and family engagement policy that includes a school-parent compact outlining shared responsibility for high student academic achievement. [ESEA Section 1116 \(b-g\)](#)

**Expectations**

- Specific strategies to increase family and community stakeholder involvement, particularly among those who represent the most at-risk students, based upon results of the needs assessment have been identified and implemented.
- Parents and community stakeholders who reflect the demographic composition of the school, including those who represent the most at-risk students, are included as decision makers in a broad spectrum of school decisions, including the development and monitoring of the Title I schoolwide plan.
- The school vision and mission for student success are collaboratively developed based on the beliefs and values of the school community, including families and community stakeholders who represent the most at-risk students.
- The Title I schoolwide plan, as well as all communication regarding its development, evaluation, and revision processes, are available in languages and formats accessible for every family and community stakeholder of the school.

**Addressing the above expectations, describe in the box below the strategies to increase family and community stakeholder involvement.**

Apple Creek teachers and staff are committed to the involvement of parents in their children's education. Through Title I funds, parents are given opportunities to attend informational meetings and events to give them ideas and strategies to increase their students' academic performance.

Apple Creek has developed a Parent Community Advisory Council, PCAC, to ensure the involvement of our stakeholders in the planning of parent involvement activities. This committee is comprised of administrators, teachers and parents. The committee meets twice a year, once in the Fall and once in the Spring. In the Fall, the purpose of the meeting is to inform the members of our Title I plan for the year and the parent activities we have planned. We decide when to hold the events and members are asked to share ideas on what topics to focus on. The meeting in the Spring is to update and review the plan and make suggestions on parent activities we should have next school year. We utilize parent evaluations received throughout the year following events and parent surveys sent out in March.

An annual parent informational meeting is held to inform parent about Title I and the services available to them. Teachers, parents and students are asked to evaluate our Title I program and all that it provides through surveys online and in paper format. Title I pamphlets along with parent/teacher/student/administrator compacts, District and Site Parent Involvement Policy, and Parents' Right to Know information is distributed at the beginning of each school year. Parent involvement activities are advertised through notes home, reminder stickers, emails, school marquee, posters, school and district websites, Facebook and the district/schoolwide communication app. These advertisements and invitations are sent out with plenty of notice and vary in times so that all parents have the opportunity to participate.

Parents are also informed and encouraged to gain access to their students' grades and academic performance. Infinite Campus, an online student data system, is provided for teachers to input scores. Parents can gain access to the Campus Portal and view student information. Parents are given a parent report explaining their students' OSTP scores provided by the Oklahoma State Department of Education. These are distributed as soon as the school receives them. Apple Creek also uses the Accelerated Reader (AR)/Parent Home Connect (Grades 1-6), which allows parents to log into the website and view their child's AR reports. These reports show the child's reading level, which books have been read, and their performance on tests taken. Students and parents also have access to Clever and Canvas, which are apps that allow them access to on-line curriculum, assignments and resources to help with homework and extending their learning from home. Parent/Teacher conferences are held twice a year, one in the Fall and one in the Spring. Accommodations are made for parents who cannot attend during designated conference times and scheduled around their availability.

Our vision for Apple Creek Elementary is to provide a learning environment that promotes academic success, good character, leadership, and the life-long skills necessary to be responsible citizens, to see all students learn the district and state standards specific to each grade level, as well as the life principles necessary for positive character development. Our goal is to assist students as they work to reach their fullest potential. As a team, we will monitor student success through formal and informal assessments. Individualized and small group remediation, with the utilization of a variety of resources and techniques, will be enacted for each student who requires further support. We developed a school creed around the word RESPECT. Each letter stands for a character trait; responsibility, effort, spirit, pride, enthusiasm, courtesy and teamwork. We have also implemented a whole-school transformational process called the Leader in Me, which teaches 21st-century leadership and life skills to students and creates a culture of student empowerment based on the idea that every child can be a leader. Students in each grade level are recognized for modeling one of the 7 Habits that are taught through the Leader in Me program and celebrated in various ways.

Moore Public Schools contracts with Multilingual Communications Services for on-site translation services in cases where communication with non-English speaking families is needed. This translation service can translate the Title I Schoolwide Plan to all stakeholders in any language requested. An appointment would be made for the required language specific translator at either the school site or the Moore Public Schools Administration Service Center. This conference is set up through the district's Student Services Department. The Title I Schoolwide Plan is available electronically on the district's Title I webpage and on the school's Title I webpage, as well as printed in the school's Title I Public File. In addition, parents and community stakeholders can request an email or printed copy at any time.

**2. Comprehensive Needs Assessment**

By checking this box, the school principal certifies that the schoolwide plan was developed based on a comprehensive needs assessment of the entire school that took into account information on the academic achievement of children in relation to the challenging state academic standards, particularly the needs of those children who were failing, or were at-risk of failing, to meet the challenging state academic standards and any other factors as determined by the local educational agency. [ESEA Section 1114\(b\)\(6\)](#)

**Expectations**

1. Includes a variety of data, including performance (e.g., local and state student assessment data) and non-performance student data (e.g., student attendance), and process data about the schools system (e.g., diagnostic review) and perception data, gathered from several sources.
2. Includes detailed analysis of performance and non-performance data for each student subgroup identified in 1111(c)(2) of ESEA (economically disadvantaged students, students from major racial and ethnic groups, children with disabilities, and English learners).
3. Examines student, teacher, school and community strengths and needs.
4. School leadership, in collaboration with families and community stakeholders, identifies a manageable number of priorities, at the right level of magnitude and aligned with the needs assessment, for school improvement.
5. Evidence shows that the school’s Title I schoolwide plan and cycle of continuous improvement has improved outcomes for all students, particularly those most at-risk.

**Addressing the above expectations, describe the outcomes of the school’s comprehensive needs assessment, as well as a description of the data sources used in the process. The results should include detailed analysis of all student subgroups; an examination of student, teacher, school and community strengths and needs; and a summary of priorities that will be addressed in the schoolwide program.**

Our Title I plan was developed using a comprehensive needs assessment to ensure we are meeting the needs of all of our students. We utilize a variety of data including performance, non-performance, process and perception data. Data is collected through classroom observations, various assessments, and progress monitoring to determine the strengths and needs of students.

The previous years' OSTP scores are used to determine grade level needs and additional resources required. STAR EL, Reading, Math, CBM and Phonics scores are used to guide intervention and instruction for kindergarten through sixth grade students. Teachers continually progress monitor at-risk students to ensure student success. Attendance data is monitored and used to identify students and families who are at risk for limited academic progress. The district and school sites work closely to support families and encourage regular school attendance.

Data is analyzed monthly through collaborative conversations by administrators, school psychologist, teachers, and reading specialist and shared with stakeholders when appropriate. Moore Public Schools uses the Response to Intervention (RTI) model to provide skill specific intervention to students who are below grade-level in Reading and Mathematics. In addition, data is used to make instructional decisions for whole class, small group, and individual students, as well as, to measure student growth towards proficiency in the Oklahoma Academic Standards. Below are the results of each type of data we gather and analyze to make academic decisions.

OSTP Results								
3 <sup>rd</sup> Grade	Below Basic		Basic		Proficient		Advanced

Year	Program Enrollment	Percent of Student Population
2023-2024	32	6.79%
2022-2023	40	7%
2021-2022	40	8%

**Highly Qualified Teachers (HQT)**

Year	Number of Certified Teachers	Number of HQT	Number of Non HQT
2023-2024	35	32	3
2022-2023	37	36	1
2021-2022	41	38	3

Behavior- According to the behavior summary report in Infinite Campus, there were 144 total suspensions. 85 suspensions have been out of school for reasons such as fighting, assault of staff members, threatening another student, or creating a major classroom disturbance. One singular suspension was a long-term suspension for a weapon at school. We have had 58 in-school suspensions for reasons such as student conflict, use of profanity, and lack of cooperation.

Year	Out of School Suspensions	In School Suspensions	Total Suspensions
2023-2024	85	58	144
2022-2023	70	32	102

**Process Data**

Apple Creek uses the RTI, Response to Intervention, model to identify students who are at risk academically. We use STAR EL/Reading/Math data along with phonological awareness screeners and the STAR CBM phonics screener to analyze and guide instruction for all students. We also have monthly grade level team meetings to track the academic growth of the lower performing students. This is a school-wide initiative.

Our monthly RTI meetings are attended by the principal, reading specialist, school psychologist and the grade level teachers. Sometimes the counselor and special ed teachers attend if needed. At each meeting, teachers are expected to bring their data and be ready to report the progress of students below benchmark. The principal, reading specialist and school psychologist help the teachers by offering suggestions, fidelity checks, intervention ideas and goal decision-making.

Teachers are expected to have a 30-minute block of time designated to RTI in reading and/or math. This model helps teachers to differentiate their instruction to meet each student's individual needs. The data collected is generated into an online data graph which tracks students' progress monitoring scores. These graphs are viewed during RTI meetings to see if interventions have been effective, need to be changed, or if the special education referral process needs to be started. If a student is not making progress in Tier 1, they are moved to Tier 2. In Tier 2, teachers add minutes or number of days to intensify intervention. If the students are still not making progress, they are moved to Tier 3. This is a one-on-one intervention with increased days or minutes. At this point, the team has met many times and the instructional goals have been adjusted. If the student does not show improvement here, they may be referred to the special education team. To determine which students are served through Title I, the homeroom teachers and the Title I staff review data and teacher input is given on what students' academic needs are.

Oklahoma Schools are given an A-F School Report Card based on indicators for an academic year and the results of the OSTP. These indicators are academic achievement, academic growth, ELP progress, and Chronic Absenteeism. Academic achievement and growth are also broken down into subgroups based on the school's population. Schools are awarded a letter grade for each indicator. These scores are calculated to give the school an overall grade. Our overall grade for the 2022-2023 school year was a C. This data will be updated when a new A-F School Report Card is issued for the 2023-2024 academic year.

**Oklahoma Report Card**

<b>Year</b>	<b>Academic Achievement</b>	<b>Academic Growth</b>	<b>English Language Proficiency Progress</b>	<b>Chronic Absenteeism</b>	<b>Overall</b>
2022-2023	67%-B	61%-C	42%-C	81.7%-D	59%-C
2021-2022	67%-B	77%-B	29%-D	78.76%-F	60%-B
2020-2021	No data due to COVID-19				

**Perception Data**

We utilize teacher/staff surveys, parent/community surveys and student surveys to gather perception data for our school each year in the spring. The parent survey is created on-line, and a link is shared with families via the schoolwide communication app. A paper copy of this survey is sent home in Thursday Folders as well. The teacher/staff survey is also created on-line and the link is shared for them to complete. Student surveys are shared to students as an on-line form. The Title I teacher compiles and analyzes the data with the Title I committee to make plans for the following year. The results of the surveys are below.

We had 140 parent surveys returned. The results are based on the surveys returned, not the total school population. Results from parent needs assessment show that 97% of parents surveyed feel that Apple Creek is providing a quality education for their students. Out of reading, math and technology; parents feel that reading is the most important area of focus followed by math and then technology. Overall parents feel like our events are helpful and like them held during the mid-evening time. The events parents liked most were the One School, One Book event and Book Bingo. For future events, parents showed interest in another schoolwide shared reading. They also suggested we provide food and/or concessions at these events. Parents feel like most of the programs/services offered at Apple Creek are beneficial to their students. These include IXL, Waterford, Title I intervention, technology and teacher communication. Some parents expressed a need for more school to home communication.

There were 17 members of the Apple Creek faculty and staff that took this survey. The survey questions ask respondents to review our schoolwide plan and provide suggestions for the next school year. Results from the teacher needs assessment show that overall teachers are satisfied with the Title I program at Apple Creek. The topics surveyed were scheduling, RTI, parent involvement, professional development, purchasing/budget, and students serviced. For the 2024-2025 school year Apple Creek will focus on reading intervention for students not meeting benchmark goals. Each grade level will meet with the Title I reading specialist to review test data and decide which students should be serviced. If the budget allows, teachers would like Title I to continue to fund XtraMath (or other math fact software) and Read Live subscriptions as well as purchase supplemental ELA/Math materials to improve classroom instruction and hire additional tutors. Some ideas given for professional development are more RTI training and reading/math/writing instructional strategies. Some teachers also expressed that they would like more communication and collaboration with Title I.

Results from the student needs assessment show that most students feel safe at Apple Creek and their teachers care about their education. The students responded with positive feedback regarding the various supplemental programs including IXL, Waterford, Prodigy, Accelerated Reader and Pebble Go/Next. Most students felt good about their knowledge and use of Clever and Canvas to access programs and complete classwork. Students were also offered the opportunity to give written responses stating what they wish their teachers would do and what would make our school better.

**Data for student subgroups**

Below is the performance data for student subgroups as identified in our school's 2022-2023 A-F report card. The above performance data shows the overall performance of our school as a whole. This section focuses on the academic achievement in ELA and Math performance of our student subgroups. There is also a breakdown of each subgroup and their composite score with a letter grade on the other indicators which are, Academic Growth, English Language Proficiency Progress, Chronic Absenteeism and Overall Grade. Some groups did not have enough data to receive a score. This data will be updated when the state issues the 2023-2024 report card.

**Academic Achievement**

**Student, teacher, school and community strengths and weaknesses**

All students have access to iPads and/or laptops and are able to engage in learning experiences through technology. Apple Creek has a very interactive Media Center and students take advantage of the available resources. Our students need more small-group collaboration and instructional opportunities in the classroom. Also, students continue to need more social/emotional learning included in their daily instruction. Teachers participated in monthly grade-level RTI meetings and were able to discuss their students' academic concerns effectively. Teachers utilize technology devices that are available for check-out and are incorporating technology into their lessons more. Also, our faculty wants to engage with our stakeholders for family events and we have a strong response of them wanting to plan family events and school to home engagement. All teachers utilize a schoolwide communication app to keep in contact with parents.

Our teachers have expressed needing more training and guidance on effective implementation and documentation of RTI as reported in the Title I Teacher/Staff survey. In order to decrease the number of students performing below benchmark, we will continue to work together to help strengthen core instruction. Teachers also need continued technology integration training to make classroom instruction more effective.

Our school faculty and staff work together to develop, implement, and evaluate our comprehensive schoolwide plan that communicates our purpose, directions, and action plan focused on teaching and learning. Faculty participation in family events has continued to improve. We are confident that participation will increase as we have more student lead events. All grade levels hold parent meetings at the beginning of the year to inform parents of their classroom

expectations. We have many positive comments from parents about our school, communication, and parent involvement. We need to continue communication between teachers and grade levels about students moving to the next grade level. The collection and recording of data still continues to improve each year. We will keep records of data that show growth over time and even from grade to grade. Our execution of family events and publicizing of these events has improved. We need to improve follow-up after those parent meetings at the start of the year. Based on the comprehensive needs assessment, our Title I planning committee decided on the following 3 Schoolwide SMART goals for the 2024-2025 school year:

**Goal 1:** In 2024-2025, the number of students scoring at or above benchmark on the STAR EL/Reading will increase by 20% in grades 1-3 and 15% in grades 4-6 by the end of the school year. Kindergarten will have 90% score at or above benchmark on STAR EL and 1<sup>st</sup> grade will have 60% score at or above benchmark in STAR Reading by the end of the school year.

**Goal 2:** In 2024-2025, the number of students scoring at or above benchmark on the STAR EL/Math will increase by 20% in grades 1-3 and 15% in grades 4-6. Kindergarten will have 90% score at or above benchmark on STAR EL by the end of the school year.

**Goal 3:** In 2024-2025, all K-6th grade students will participate in technology-oriented lessons that result in authentic learning in their reading and math classrooms and learn how to utilize technology for research, presentations and assessments.

Data collected from STAR EL, STAR Reading, and STAR Math is used to determine if our site goals are being met. Our focus goals in reading for the 23-24 school year were met in 2<sup>nd</sup> grade. From the fall of 2023 to the spring of 2024, we saw increases in students reaching 40th percentile in reading in all grades. Our focus goals in math for the 23-24 school year were met in 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> grade. From the fall of 2023 to the spring of 2024, we saw increases in students meeting 40th percentile in math in grades K-5. OSTP scores also improved in both Reading and Math from 2023 to 2024. Through the RTI process, our RTI teams have successfully identified students best served in the special education classrooms. Apple Creek has been working towards technology integration and authentic teaching and learning with technology. Evidence shows that our schoolwide plan and cycle of continuous improvement have improved outcomes for our students, particularly those most at-risk in reading. The data below shows the percentage of students scoring at-or-above benchmark. BOY=beginning of year and EOY=end of year. This data shows a strength in the number of students moving from below benchmark to meeting benchmark by the end of the year in reading and math, except in 1st grade. However, we would like to see the percentages of students meeting the benchmark increase. This further shows the need for stronger core instructional delivery and more skill-based small group instruction in math and reading in grades K-6.

<b>STAR 2023-2024</b>					
<b>% of students scoring benchmark or above</b>					
<b>Grade</b>	<b>BOY Reading</b>	<b>EOY Reading</b>	<b>BOY Math</b>	<b>EOY Math</b>	<b>% Increase/Decrease</b>
Kindergarten	EL: 80%	EL: 84%	NA	NA	EL: +4%
1 <sup>st</sup> Grade	EL: 59%	EL: 67% Reading: 46%	NA	NA	EL: +8%
2 <sup>nd</sup> Grade	38%	59%	33%	58%	Reading:+21% Math:+25%

3 <sup>rd</sup> Grade	56%	68%	54%	69%	Reading:+12% Math:+15%
4 <sup>th</sup> Grade	50%	63%	57%	79%	Reading:+13% Math:+22%
5 <sup>th</sup> Grade	45%	50%	50%	63%	Reading:+5% Math: +13%
6 <sup>th</sup> Grade	41%	45%	59%	56%	Reading:+4% Math: -3%
2023-2024 Goal: K-2 will increase by 20%; 3 <sup>rd</sup> -6 <sup>th</sup> will increase by 15%					

**3. Schoolwide Plan Strategies**

By checking this box, the school principal certifies that the schoolwide plan includes a description of the strategies that the school will be implementing to address school needs, including a description of how such strategies will –

- provide opportunities for all children, including each of the subgroups of students (as defined in [ESEA Section 1111\(c\)\(2\)](#)) to meet the challenging state academic standards;
- use methods and instructional strategies (consider evidence-based strategies as defined in [ESEA Section 8101\(21\)](#)) that strengthen the academic program in the school, increase the amount and quality of learning time, and help provide an enriched and accelerated curriculum, which may include programs, activities, and courses necessary to provide a well-rounded education;
- address the needs of all children in the school, but particularly the needs of those at risk of not meeting the challenging state academic standards; [ESEA Section 1114\(b\)\(7\)\(A\)\(iii\)](#)
- provide professional development (as defined in [ESEA Section 8101\(42\)](#)) and other activities for teachers, paraprofessionals, and other school personnel to improve instruction and use of data from academic assessments, and to recruit and retain effective teachers, particularly in high need subjects.

Additional factors to consider when selecting strategies to be included in the schoolwide program -

- preschool programs [ESEA Section 1114\(c\)](#)
- delivery of services by nonprofit or for-profit external providers [ESEA Section 1114\(d\)](#)
- dual or concurrent enrollment programs [ESEA Section 1114\(e\)](#)

**Expectations**

1. Strategies provide a detailed, enriched, and accelerated curriculum for all students, including each of the subgroups, according to their needs.
2. The school provides multiple opportunities and evidence-based interventions for students in need and address the outcomes of the comprehensive needs assessment in a way that will result in significant improvements in student learning.
3. Timely, effective and additional assistance is provided for students experiencing difficulty mastering the state’s standards through activities which may include: counseling, school-based mental health programs, specialized instructional support services, mentoring services, postsecondary education preparation, transition from preschool to local elementary school programs.
4. The school uses clear criteria and processes for student participation in a tiered model to prevent and address behavior problems and early intervention services.

5. The school uses clear criteria and processes for making decisions regarding level and length of student participation in tiered supports.
6. The school offers a range of extended learning opportunities within and beyond the school day and the school year.
7. Professional development and other activities are offered for teachers, paraprofessionals, and other school personnel to improve instruction and use of data from academic assessments.
8. The school uses clear, diverse strategies to recruit and retain effective teachers, particularly in high need subjects.

**Addressing the above expectations, describe in the box below the strategies the school will use to upgrade the entire educational program in order to improve the achievement of the lowest performing students, including how and when these strategies will be implemented. These strategies should be linked to areas identified in the comprehensive needs assessment and the site budget.**

All curricula taught in Moore Public Schools is research and evidence based and provides enrichment for high-achieving and remediation for at-risk students. These strategies are proven effective through data obtained in curriculum embedded assessments, STAR and OSTP scores. Curriculum is only adopted if it is in alignment with Oklahoma Academic Standards. Teachers use the scope and sequence provided by the curriculum and pacing guides provided by our curriculum department to plan instruction, making sure to teach all tiers of students. MPS introduced STEAM in 19-20 for all elementary schools and is implementing the program through the high schools. This allows for all students to have access to much needed instruction and exploration in the areas of science, technology, engineering, art and music.

Classroom teachers provide instruction for all students through whole group, small group and individual instruction as needed. Teachers work with small groups of students for intervention based on behavioral and academic data. Student data is collected through benchmark testing, weekly progress monitoring, and teacher observations. Students are monitored and evaluated for these interventions based on formal and informal assessments. Data is tracked through the RTI process and timely intervention occurs for students not performing at a proficient level. Students have access to many resources that provide additional assistance throughout the day. These services include but are not limited to: Title I intervention, ELL tutoring, Native American tutoring, speech services, special education services, and summer school. Students are identified for these programs using appropriate assessments. The district participates in child-find to identify students as young as 3 in the community who might need Special Education Services. These may include speech, occupational therapy and/or physical therapy. The site will determine appropriate instructional strategies through ongoing evaluation of the data collected throughout the year.

Title I funds are spent in ways that support the Title I goals. This includes purchasing additional technology devices, subscriptions for supplemental reading/ELA and math software and/or instructional materials, hiring tutors, professional development, and hosting parent involvement events. Moore Public Schools provides Title I Summer School each year as an extension to the school year. Families are informed through paper invitations, Parent/Teacher Conferences, and phone calls from home room teachers. STAR is administered throughout summer school to track student achievement. Home schools and parents are notified of student attendance and achievement at the conclusion of the summer program.

Moore Public Schools uses the Response to Intervention (RTI) model to provide skill specific intervention to students who are below grade-level in Reading and Mathematics. RTI focuses on Reading/ELA and

Mathematics to improve student outcomes for at-risk students. Teachers continually progress monitor at-risk students to ensure student growth. In addition, data is used to make instructional decisions for whole class, small group, and individual students, as well as, to measure student growth towards proficiency in the Oklahoma Academic Standards. STAR EL, Reading, CBM, Phonics and Math scores are used to guide intervention and instruction for K-6<sup>th</sup> grade students. Apple Creek has worked hard towards the implementation of this Three-Tier, RTI model providing the following alternative layers of instruction for our students:

- Tier 1 – A set literacy block of uninterrupted high quality reading/ELA instruction aligned to Oklahoma state standards which all students receive.
- Tier 2 – Tier 2 consists of 5-7 minutes of small group targeted reading/math instruction 3 times a week for those students that did not score benchmark (this instruction is in addition to the core reading instruction). This intervention is implemented during the schoolwide RTI time.
- Tier 3 – For those students not progressing in Tier 2, it is recommended that they receive 7-10 minutes intensive targeted reading instruction, preferably one-on-one with a qualified teacher 4-5 times a week.

Students in grades K-6 in need of intervention are placed on a Response to Intervention Plan of Instruction and monitored weekly. Teachers use on-going progress monitoring data to analyze scores and student responses for identification of deficient skills, to place students into small intervention groups, and as an indicator of whether the intervention is working. Data gained from benchmark assessments and progress monitoring assessments are used to evaluate effectiveness of our intervention programs.

Moore Public Schools offers a range of extended learning opportunities within and beyond the school day and school year. As mentioned above, Title I Summer School is offered to students in grades K-2. The district also offers summer school to all K-3 students. Incoming kindergarten students are given the following materials to prepare for the upcoming school year that include a book, flashcards to practice letters/numbers/colors/shapes, cards, upper and lowercase letter mats, scissors, crayons, etc. and a packet of activities. Apple Creek students are also able to access many on-line resources from home to extend their learning. These include IXL, Waterford, Prodigy, PebbleGo/Next, MyON (district provided during the summer) and many other resources that students can access from our school website and student dashboard on Clever.

A yearly professional development plan has been developed at the district level. The Title I Planning Committee also meets twice a year and determines the areas of need for professional development for the site and uses the comprehensive needs assessment as a guide. After they determine the need, the faculty is surveyed and an overall plan for professional development is developed. The data sources used to indicate the needs for chosen professional development are STAR, OSTP, subject area tests, Individualized Education Plans, teacher surveys, benchmark data, and district requirements. These data sources will drive the needs for professional development throughout the year. All professional development opportunities are aligned with the goals of the Schoolwide/School Improvement Plan. Implementation of learned strategies is monitored by the site principal and the reading specialist through classroom observation and walkthroughs, RTI meetings, and overall student achievement. At the site and district level, teachers are supported and encouraged to facilitate professional development for other teachers to show what they have learned. Curriculum coordinators offer monthly PD in specific content areas and Oklahoma Standards training. Other

professional development opportunities include Teachers Need Teachers Day, Site Improvement Day, book studies, and other various workshops. Apple Creek provides professional development opportunities that are specific to the needs of our school. Regular RTI meetings serve as an additional opportunity to embed PD and horizontal/vertical planning into regular contract hours. Apple Creek considers reading/literacy, math, writing across the curriculum, RTI and interventions, classroom management and school climate to be priorities with professional development to reach our schoolwide goals.

The Moore District teams with local universities, attends local job fairs, and partners with student teachers for possible future employment. Open positions are posted on the district website. Also, the district provides competitive wages to future teachers. The new teacher orientation process provides a new teacher orientation for all teachers that are new to the Moore District. The mentoring program teams an entry year teacher with an Academic Resource administrator and/or Instructional Coach who observes, offers insight, and is a resource for new teachers and/or emergency certified teachers. In addition, principals can refer struggling teachers to be paired with curriculum coordinators for more intense mentoring in needed areas. All buildings and facilities are maintained by the district. Teachers have current, researched based curriculum and textbooks as well as teaching resources and materials. Buildings have updated technology and provide ongoing training for all teachers. The Title 1 Reading Specialist and/or Title I Instructional Coaches serve as a resource for all grade level and content area teams to support new and experienced teachers. Title 1 funds at high poverty, low-performing schools provide additional resources, technology, classroom materials, and professional development opportunities. Teachers are also encouraged to participate in the MPS Foundation grants each year for items or materials needed in the classroom. The district works with local universities to provide cohort opportunities for enhanced degrees to encourage and ease the burden of attending in a traditional format.

**4. Coordination and Integration**

**Select only one box.**

By checking this box, the school principal certifies that, if appropriate and applicable, the schoolwide plan was developed in coordination and integration with other federal, state, and local services, resources, and programs, and the schoolwide plan outlines the ways in which funds are to be braided (in project 511). [ESEA Section 1114\(b\)\(5\)](#)

**OR**

By checking this box, the school principal certifies that, if state, local and other federal programs are to be consolidated in project 785, then the schoolwide plan outlines the ways in which funds will be used to meet the intent and purpose of each program that was consolidated. [ESEA Section 1114\(b\)\(7\)\(B\)](#)

**Expectations**

1. Leverages sufficient resources (i.e., fiscal, human, time) to improve student outcomes.
2. Leverages funding streams to connect the reform strategies developed.
3. Outlines how the school will meet the intents and purposes of each funding source.
4. Outlines how funds from Title I and other state and federal education programs will be used to meet the intent and purpose of the programs.

**Addressing the above expectations, describe in the box below the ways in which funds (e.g., Title III, Part A, donations, competitive grants) are to be braided in the Title I schoolwide program.**

The Apple Creek Title I Planning Committee meets at least twice during the school year to discuss how Title I funds are used. We use the results of our needs assessment to evaluate and plan as well. This year we focused on personnel, technology and supplemental reading and math resources/materials. Title I funds were used to hire a certified reading specialist, Title I highly qualified assistant and day tutor. This allows students needing extra support in reading and/or math to be served in a small group intervention setting. Students are able to fill gaps in knowledge, meet RTI goals, and increase district benchmark and OSTP scores. The technology and resources are used to supplement classroom instruction and target reading and math skills that students struggle with based on performance data. All instruction is required to be focused on achieving the objectives of the Oklahoma Academic Standards. Title I funds are spent on supplemental materials to target the core standards in Reading, Language Arts, Writing, and Mathematics in grades K-6.

Our district follows federal guidelines in helping coordinate programs for qualifying students for additional assistance that supports their success in school. Students who qualify for Title 1, ELL, Native American Education, Guidance/Counseling, Mental Health services, Free and/or Reduced Lunch, and Special Education, including Speech, are enrolled in the qualifying programs as quickly as possible after evaluations take place. The students receive these services until their support team determines that they no longer qualify and/or require the service. Outside services that help improve academic achievement district wide include grants, community partnerships, volunteers, and tutors.

Moore Public Schools strives to serve any and all students who might be in need of academic, social, emotional, and/or special education services at any point during their education through Title I, Title III, Title IV, Native American Education and/or Special Education. Utilizing the Child Find Program, we identify students in the community; at an early age, who might be in need of special education services and work to provide families with education and support before their child even begins school. Once a child begins school, any need that is identified is quickly addressed by either Title I, ELL, Native American Education, Speech, and/or Special Education; in addition to other programs that are available within the district depending on the student's needs and qualifications. We see it as our duty to ensure that all students' needs are being met. We have implemented social and emotional programs at all our elementary, junior high, and high schools through our school counselors and licensed professional counselors and we work to identify any student who might be in need of additional outside counseling services.

Moore Public Schools works with all school sites and programs to ensure that funds from State and Federal programs are being used in the way they were intended to be used. The district utilizes Federal Programs Coordinators who work with the school sites to develop programs and hire staff to carry out programmatic roles and responsibilities directly related to such programs listed below. The district's Federal Programs Coordinators actively participate in consortium meetings with other local districts to help ensure an understanding of current programmatic practices and maintain these procedures are being followed as well as working closely with Oklahoma State Department offices and programs.

- Title I – funds will be used to meet the needs of at-risk and underprivileged youth at sites with more than 40% poverty.
- Title II – funds will be used to improve teacher education; retain and recruit highly skilled teachers for at-risk skills and high needs subject areas.
- Title III – funds will be used to provide educational support for English Language Learners.

- Title IV – funds will be used to provide all students with access to a well-rounded education; improve school conditions for student learning; and improve the use of technology to improve the academic achievement and digital literacy of all students.
- Native American Education – funds will be used to provide educational supports for students of Native American heritage.
- Special Education – funds will be used to provide educational support for students with learning disabilities including but not limited to IEP, 504, OT and PT

Strong Readers Act (SRA) – This is an Oklahoma State law that provides funding for students in grades K-3 to ensure that students are reading on grade level by the end of third grade.

**5. Evaluation and Plan Revision**

By checking this box, the school principal certifies that the plan will be regularly monitored and revised as necessary based on student needs to ensure that all students are provided opportunities to meet the challenging state academic standards. [ESEA Section 1114\(b\)\(3\)](#)

**Expectations**

1. School leadership, including families and community stakeholders, regularly monitors and adjusts implementation of the Title I schoolwide plan based on short- and long-term goals for student outcomes, as well as measures to evaluate high-quality implementation.
2. The monitoring and revising of the Title I schoolwide plan includes regular analysis of multiple types of data (i.e., student learning, demographic, process, perception) and necessary adjustments are made to increase student learning.
3. School leadership, including families and community stakeholders, and instructional staff regularly analyze interim and summative assessment data to evaluate instructional practices, determine patterns of student achievement, growth, and changes in growth gaps across classrooms, grade levels, and content areas.

**Addressing the above expectations, describe in the box below how the school, with assistance from the LEA, will annually evaluate the implementation of, and results achieved by, the schoolwide program, using data from the state’s annual assessments and other indicators of academic achievement to determine whether the schoolwide program has been effective in increasing the achievement of students in meeting the state’s academic standards, particularly for those students who had been furthest from achieving the standards; and how the school will revise the plan, as necessary, based on the results of the evaluation, to ensure continuous improvement of students in the schoolwide program.**

Evaluation and plan revision is an ongoing process throughout the school year. At the beginning of the school year, the Title I reading specialist meets with the faculty and gives an overview of the Schoolwide Title I program. At this meeting, members of the faculty are asked to sign up to be on the Title I planning committee. This committee is made up of the Title I teacher, a classroom teacher from each grade level, a member of the special education team, the school counselor, media specialist, parents and the principal. This committee is involved in the decision-making process for our program. Each year we have a Fall and Spring Site Base meeting. All stakeholders are invited to attend these meetings including the committee, parents and administration. The Fall meeting is to present the Title I plan for the current year. This includes sharing the goals for improvement, budget plan, intervention plan, parent involvement ideas and introducing the Title I staff. The Spring meeting is held to review the year and share our plan for the upcoming school year. Parents

are asked to review and sign the Site Parent Involvement Policy and review our Parent/Teacher/Student compact. The Title I teacher and Principal collect assessment data throughout the year to determine high-quality implementation of our program. This helps us to determine if our goals are being met. This information is shared with teachers at monthly grade level meetings, through emails/schoolwide communication app, and/or at scheduled faculty meetings.

Data is collected through classroom observations, various assessments, and progress monitoring to determine the strengths and needs of students. The previous years' OSTP scores are used to determine grade level needs and additional resources required. STAR EL scores are used to guide intervention and instruction for kindergarten and first grade students in Reading and Mathematics. STAR Reading and Math scores are used to guide intervention and instruction for first through sixth grade students. Phonemic awareness, phonics and other screeners are also used to determine the targeted area of need. Teachers continually progress monitor at-risk students to ensure student success. Goals are adjusted depending on students' growth or lack of growth. These changes are made during RTI meetings. Attendance data is monitored and used to identify students and families who are at risk for limited academic progress. The district and school sites work closely to support families and encourage regular school attendance. Data is analyzed monthly through grade level data meetings by administrators, teachers, and reading specialists and shared with stakeholders when appropriate. In addition, data is used to make instructional decisions for whole class, small group, and individual students, as well as, to measure student growth towards proficiency in the Oklahoma Academic Standards. Our Schoolwide focus goals are presented to stakeholders at the Fall site base meeting. In the Spring, the Title I committee meets to determine if these goals were met. If any goals were met, we decide if we should increase the goal or not. This is determined by the performance of the grade levels above and below. If the goals were not met, we typically leave them the same or adjust as needed.

Interim and summative assessment data is analyzed by school leadership to evaluate instructional practices, determine patterns of student achievement, growth and changes in growth gaps across classrooms, grade levels and content areas. This is accomplished throughout the year, beginning with a teacher in-service day in September. This day is scheduled to provide schools with a full day of reviewing the previous and current years' assessment data including OSTP scores and beginning of the year STAR data. Grade level teams and vertical subject area teams meet and discuss instructional goals. Throughout the year, grade level teams meet monthly for RTI/Data meetings to evaluate student growth and make changes based on RTI data. Grade levels also meet regularly to plan instruction and discuss curriculum. Subject area teachers may meet occasionally during the year to check for vertical alignment of standards.
