### **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Monona Grove School District (the "District"), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

#### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## **Opinions**

In our opinion, the financial statements referred to on the previous page present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Monona Grove School District, as of June 30, 2020, and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States.

## **Other Matters**

### ***Required Supplementary Information***

Accounting principles generally accepted in the United States require that management's discussion and analysis and the budgetary comparison schedule - general fund, the schedules of the employer's proportionate share of the net pension and OPEB liability (asset) and employer contributions – Wisconsin Retirement System and LRLIF, the schedule of changes in the employer's net OPEB liability and related ratios and employer contributions - District OPEB plan, and the schedule of changes in the employer's total pension liability and related ratios - Single Employer Defined Benefit Pension plan on pages 51 through 58 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### ***Supplementary Financial Information***

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The combining statements and schedule of charter school authorizer operating costs are presented for purposes of additional analysis and are not a required part of the basic financial statements. The schedules of expenditures of federal awards and state financial assistance are presented for purposes of additional analysis as required by Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* and the *State Single Audit Guidelines*, issued by the Wisconsin Department of Administration, and are also not a required part of the basic financial statements. The combining statements, schedule of charter school authorizer operating costs and the schedules of expenditures of federal awards and state financial assistance are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the combining statements and the schedules of expenditures of federal awards and state financial assistance are fairly stated in all material respects in relation to the basic financial statements as a whole.

**Other Reporting Required by Government Auditing Standards**

In accordance with *Government Auditing Standards*, we have also issued our report dated December 2, 2020, on our consideration of the Monona Grove School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

## Management's Discussion and Analysis

Year Ended June 30, 2020

---

This section of the Monona Grove School District's annual financial report presents our discussion and analysis of the District's financial performance during the fiscal year that ended on June 30, 2020. Please read it in conjunction with the District's financial statements, which immediately follow this section.

### Financial Highlights

- The District's overall financial position, as reflected in total net position is \$21,640,873.
- Net position increased \$5,579,407 during the year.
- In the governmental funds, the District's total fund balance decreased \$16,721,066 during the year. The General Fund balance increased by \$712,791.

### Overview of the Financial Statements

The basic financial statements are comprised of (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. In addition, other information supplementary to the basic financial statements is provided.

### Government-Wide Financial Statements

- The government-wide financial statements are the *statement of net position* and *statement of activities*. These statements present an aggregate view of the District's finances in a manner similar to private-sector business. Both statements distinguish functions that are supported principally by property taxes and intergovernmental revenues, called *governmental activities*, from functions that are intended to recover all or a significant portion of costs through user fees and charges called *business-type activities*. As of June 30, 2020, the District had no business-type activities.
- The *statement of net position* presents information on all of the District's assets and deferred outflows of resources and liabilities and deferred inflows of resources, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.
- The *statement of activities* presents information showing how the District's net position changed during the year. This statement reports the cost of government functions and how those functions were financed for the fiscal year.

### Fund Financial Statements

- The District also produces *fund financial statements*. A fund is a grouping of related accounts used to maintain control over resources segregated for specific activities. The District, like other state and local governments, uses fund accounting to demonstrate compliance with finance-related legal requirements. Fund statements generally report operations in more detail than the government-wide statements and provide information that may be useful in evaluating a district's near-term financing requirements.
- There are two fund financial statements, the *balance sheet* and the *statement of revenues, expenditures, and changes in fund balances*. Generally, fund statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year.
- Because the focus of fund financial statements is narrower than that of the government-wide statements, it is useful to make comparisons between the information presented. By doing so, readers may better understand the long-term implications of the government's near-term financial decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.
- The District has two kinds of funds: *governmental* and *fiduciary*. The District maintains individual governmental funds (general, special revenue, debt service, and capital projects) as needed. The District has three *fiduciary funds*.
- Financial information is presented separately on both the *balance sheet* and the *statement of revenues, expenditures, and changes in fund balances* for the general fund and capital projects fund since these funds are considered to be major funds. Data for the remaining governmental funds are combined into a single, aggregated column.
- The District serves as a trustee, or fiduciary, for various scholarship programs. The assets of these organizations and programs do not directly benefit nor are they under the direct control of the District. The District's responsibility is limited to ensuring the assets reported in these funds are used only for their intended purposes. *Fiduciary* activities are excluded from the government-wide financial statements because the District cannot use these assets to finance its operations.
- The District adopts an annual budget for all governmental funds. For financial statement reporting purposes, the general fund and special education fund are combined and reported as the general fund. A budgetary comparison statement for the general fund has been provided to demonstrate budget compliance.

## Financial Analysis

### The District as a Whole

**Net position.** As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The District's assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$21,640,873 at the close of the most recent fiscal year.

By far the largest portion of the District's net position (\$22,867,011 or 106 percent) reflects its net investment in capital assets (e.g., land, buildings, furniture, and equipment), less any related debt used to acquire those assets that is still outstanding. The District uses these capital assets to provide services; consequently, these assets are not available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

## The District as a Whole (Continued)

The District's total revenues were \$57,832,802 for the year ended June 30, 2020. Property taxes and state formula aid accounted for 81 percent of total revenue for the year. The remaining 19 percent came from operating grants and contributions, charges for services, and other general revenues.

The total cost of all programs and services was \$52,253,395. The District's expenses are predominantly related to instruction (54 percent). The purely administrative activities of the District accounted for just 8 percent of total costs.

## Governmental Funds

The District completed the year with a total governmental fund balance of \$54,113,283, which is \$16,721,066 less than last year's ending fund balance of \$70,834,349.

The capital projects fund had a decrease in fund balance of \$13,687,188. This was primarily due to the district's capital expenditures funded by a prior year bond issuance.

The debt services fund had a decrease in fund balance of \$3,566,199. This was primarily due to the district's debt service requirements funded by a prior year bond issuance.

The general fund had an increase in fund balance of \$712,791. This was primarily due to the district expenditures being under the budget amounts.

Expenditures exceeded revenues by \$180,470 for the other nonmajor governmental funds. These funds included the Special Revenue Gift Fund, the School Nutrition Services Fund, the Community Services Fund, and the Cooperative Program Fund.

## General Fund Budgetary Highlights

The District's original budget for the general fund anticipated that expenditures and other financing uses would exceed revenues and other financing sources by \$1,729,112. The actual results for the year show a \$712,791 surplus.

Actual revenues were \$429,682 more than expected.

The actual expenditures were \$569,371 less than budget.

## Capital Assets and Debt Administration

### Capital Assets

At the end of the 2020 fiscal year, the District had invested approximately \$100 million in a broad range of capital assets, including land, buildings, and equipment. Additional information about capital assets can be found in Note 5. Total accumulated depreciation on these assets exceeded \$28 million for governmental activities.

Asset acquisitions for governmental activities totaled \$14,885,349.

The District recognized depreciation expense of \$1,302,585 for governmental activities.

## Factors Bearing on the District's Future

The District continues to see and project overall growth in enrollment both in residential students as well as through the school choice program. Enrollment will continue to be monitored closely. It is expected that resident enrollment will decrease for the 2020-2021 fiscal year due to COVID-19, with the expectation those students re-enrolling upon the decrease of risk to COVID-19.

The District passed a \$57 million referendum to issue debt to build a new elementary school in Cottage Grove among other facility upgrades and maintenance during the 2018-2019 fiscal. The District issued this debt during the 2018-2019 fiscal year and construction will continue during the upcoming fiscal year with the expectation to close out funds from the referendum after the 2021-2022 fiscal year.

The District passed a \$930,000 operational referendum to override the revenue limit on a recurring basis for the purpose of the new elementary school opening during 2021-2022 school year as well as operational cost of existing programs.

The District revenue limit will continue to reflect the operational referendum passed in April of 2016 for \$2.6 million, this increase in revenue limits will expire after the 2020-2021 fiscal year.

The District revenue limit per pupil amount will increase by \$179 and the per-pupil aid amount set by the state at \$742 per resident pupil.

Property valuation continues to increase for the District due to development.

### Note 1: Summary of Significant Accounting Policies

#### Introduction

The financial statements of the Monona Grove School District (the "District") have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting principles and policies utilized by the District are described below.

#### Reporting Entity

The Monona Grove School District is organized as a common school district. The District, governed by a seven-member elected school board, operates grades pre-kindergarten through 12 and is comprised of all or part of 6 taxing districts.

This report includes all of the funds of the District. The reporting entity for the District consists of (a) the primary government, (b) organizations for which the primary government is financially accountable, and (c) other organizations for which the nature and significance of their relationship with the primary government are such that their exclusion would cause the reporting entity's financial statements to be misleading or incomplete. A legally separate organization should be reported as a component unit if the elected officials of the primary government are financially accountable to the organization. The primary government is financially accountable if it appoints a voting majority of the organization's governing body and (1) it is able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits to or burdens on the primary government. The primary government may be financially accountable if an organization is fiscally dependent on the primary government.

A legally separate, tax-exempt organization should be reported as a component unit of a reporting entity if all of the following criteria are met: (1) the economic resources received or held by the separate organization are entirely or almost entirely for the direct benefit of the primary government, its component units, or its constituents; (2) the primary government is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization; (3) the economic resources received or held by an individual organization that the specific primary government, or its component units, is entitled to, or has the ability to otherwise access, are significant to that primary government. This report does not contain any component units.

### Note 1: Summary of Significant Accounting Policies (Continued)

#### Basis of Presentation

##### *Government-Wide Financial Statements*

The government-wide financial statements (i.e., the statement of net position and the statement of activities) display information about the reporting government as a whole. These statements include all the financial activities of the District, except for the fiduciary funds. The fiduciary funds are only reported in the statements of fiduciary net position at the fund financial statement level.

The statement of net position and the statement of activities present financial information about the District's governmental activities. These statements include the financial activities of the overall government in its entirety, except those that are fiduciary. Eliminations have been made to minimize the double counting of internal transactions. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions.

The statement of activities presents a comparison between direct expenses and program revenues for each function of the District's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients for goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

The District applies restricted resources first when an expense is incurred for a purpose for which both restricted and unrestricted net position are available. Depreciation expense that can be specifically identified by function is included in the direct expenses of each function. Interest on general long-term debt is considered an indirect expense and is reported separately on the statement of activities.

##### *Fund Financial Statements*

The fund statements provide information about the District's funds, including fiduciary funds. Separate statements for each fund category—governmental and fiduciary—are presented. The emphasis of fund financial statements is on major governmental funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as other governmental funds.

The District reports the following major governmental funds:

- General Fund – This is the District's primary operating fund. It accounts for all financial activity that is not accounted for and reported in another fund, including educational programs for students with disabilities.
- Debt Service Fund – This fund accounts for financial resources that are restricted, committed, or assigned to expenditure for principal and interest on long-term general obligation debt of governmental activities, including amounts accumulated for principal and interest maturing in future years.

---

### Note 1: Summary of Significant Accounting Policies (Continued)

#### Basis of Presentation (Continued)

- Capital Projects Fund – This fund is used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets.

The District accounts for assets held that were accumulated from donations that are used to pay scholarships in the Private-Purpose Trust Funds.

The District accounts for assets accumulated from employer contributions used to pay for postemployment benefits in the Employee Benefit Trust Funds.

The District accounts for assets held as an agent for various student and parent organizations in an agency fund.

#### Measurement Focus and Basis of Accounting

The government-wide and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash transaction takes place. Nonexchange transactions, in which the District gives or receives value without directly receiving or giving equal value in exchange, include property taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

The governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when they become both measurable and available (susceptible to accrual). "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers all revenues reported in the governmental funds to be available if the revenues are collected within 60 days after the end of the current fiscal year.

Expenditures are recognized when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Under the terms of grant agreements, the District may fund certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Therefore, when program expenses are incurred, both restricted and unrestricted net position may be available to finance the program. It is the District's policy to first apply cost-reimbursement grant resources to such programs, followed by general revenues.

### **Note 1: Summary of Significant Accounting Policies** (Continued)

#### **Deposits and Investments**

The District's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less and shares in the local government investment pool.

The Debt Service Fund accounts for its transactions through separate and distinct bank and investment accounts as required by State Statutes. In addition, the Trust and Agency Funds use separate and distinct accounts. All other funds share in common bank and investment accounts.

State Statutes permit the District to invest available cash balances, other than debt service funds, in time deposits (maturing in not more than three years) of authorized depositories, U.S. Treasury obligations, U.S. agency issues, municipal obligations within Wisconsin, high-grade commercial paper, and the local government pooled investment fund administered by the state investment board. Available balances in the Debt Service Fund may be invested in obligations of the United States and the local government pooled investment fund administered by the State of Wisconsin Investment Board.

Donations to the District of securities or other property are considered trust funds and are invested as the donor specifies. In the absence of any specific directions, the District may invest the donated items in accordance with laws applicable to trust investments.

All investments are stated at fair market value, except for the investment in the Wisconsin Investment Series Cooperative, which are reported on the amortized cost basis.

#### **Fair Value Measurements**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three-tier hierarchy prioritizes the inputs used in measuring fair value. These tiers include Level 1, defined as quoted market prices in active markets for identical assets or liabilities; Level 2, defined as inputs other than quoted market prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs, therefore requiring an entity to develop its own assumptions. The asset's or liability's fair value measurement within the hierarchy is based on techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

#### **Receivables and Payables**

All accounts receivable are shown at gross amounts and, where appropriate, are reduced by an allowance for uncollectible accounts. No allowance for uncollectible accounts has been provided since it is believed that such allowance would not be material.

Activities between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the noncurrent portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds."

### **Note 1: Summary of Significant Accounting Policies** (Continued)

#### **Prepaid Items**

Prepaid items represent payments made by the District for which benefits extend beyond June 30.

#### **Capital Assets**

Capital assets are recorded at historical cost, or estimated historical cost for assets where actual historical cost is not available. Donated assets are recorded as capital assets at their estimated acquisition value at the date of donation. The District maintains a threshold level of \$5,000 for capitalizing capital assets.

Capital assets are recorded in the government-wide financial statements but are not reported in the fund financial statements. Capital assets are depreciated using the straight-line method over their estimated useful lives. Since surplus assets are sold for an immaterial amount when declared no longer needed for public school purposes by the District, no salvage value is taken into consideration for depreciation purposes. Useful lives vary from 15 to 50 years for land improvements and buildings and 5 to 30 years for equipment.

The cost of normal maintenance and repairs that does not add to the value of the asset or materially extend the asset's life is not capitalized.

Capital assets not being depreciated include land and construction in progress.

The District does not possess any material amounts of infrastructure capital assets, such as sidewalks and parking lots. Such items are considered to be part of the cost of buildings or other improvable property.

#### **Unearned Revenue**

Unearned revenue consists of money received related to food deposits that have not been earned.

#### **Long-Term Obligations**

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as expenses.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

### Note 1: Summary of Significant Accounting Policies (Continued)

#### Accumulated Unpaid Sick Pay and Other Employee Benefit Amounts

District employees are granted vacation, compensatory time, and sick leave benefits in varying amounts in accordance with District policies. In the event of retirement, death or resignation of an employee, the District is obligated to pay for unused vacation and sick leave benefits not to exceed a maximum amount. All compensated absences are accrued when incurred in the district-wide financial statements. A liability for these amounts is reported in the governmental funds only if they have matured, for example, as a result of employee resignations or retirements.

Pensions - For purposes of measuring the net pension liability (asset), deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Wisconsin Retirement Systems (WRS) and additions to/deductions from WRS' fiduciary net position have been determined on the same basis as they are reported by WRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Postemployment Benefits Other than Pensions (OPEB) Plan - The fiduciary net position of the Local Retiree Life Insurance Fund (LRLIF) has been determined using the flow of economic resources measurement focus and the accrual basis of accounting. This includes for purposes of measuring the Net OPEB Liability, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Other Postemployment Benefits, OPEB Expense, and information about the fiduciary net position of the LRLIF and additions to/deductions from LRLIFs fiduciary net position have been determined on the same basis as they are reported by LRLIF. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

The District also offers an OPEB plan for health insurance. The net other postemployment liability for this plan has been determined using the flow of economic resources measurement focus and the accrual basis of accounting. This includes for purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to other post-employment benefits and OPEB expense. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

#### Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position and/or balance sheet will sometimes report a separate section of deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has deferred outflows related to pension, other postemployment benefit activity, and unamortized loss on refinancing.

In addition to liabilities, the statement of net position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents the acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District has deferred inflows related to pension and other postemployment benefit activity.

### Note 1: Summary of Significant Accounting Policies (Continued)

#### Net Position

Net position represents the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balance of any long-term debt used to build or acquire the capital assets. Net position is reported as restricted when there are limitations imposed on their use through external restrictions imposed by creditors, grantors, or laws or regulations of other governments, or imposed by law through constitutional provisions or enabling legislation.

When both restricted and unrestricted resources are available for use, it is the District's policy to use externally restricted resources first.

#### Fund Balances

In the fund financial statements, governmental funds report aggregate amounts for five classifications of fund balances based on the constraints imposed on the use of these resources. The nonspendable fund balance classification includes amounts that cannot be spent because they are either (a) not in spendable form - prepaid items or inventories or (b) legally or contractually required to be maintained intact.

The spendable portion of the fund balance comprises the remaining four classifications: restricted, committed, assigned, and unassigned.

*Restricted fund balance:* This classification reflects the constraints imposed on resources either (a) externally by creditors, grantors, contributors, or laws or regulations of other governments or (b) imposed by law through constitutional provisions or enabling legislation.

*Committed fund balance:* These amounts can only be used for specific purposes pursuant to constraints imposed by formal resolutions of the Board of Education - the District's highest level of decision-making authority. Those committed amounts cannot be used for any other purpose unless the Board of Education removes the specified use by taking the same type of action that imposed the original commitment. This classification also includes contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.

*Assigned fund balance:* This classification reflects the amounts constrained by the District's "intent" to be used for specific purposes, but the amounts are neither restricted nor committed. The Board of Education has the authority to assign amounts to be used for specific purposes. Assigned fund balances include all remaining amounts (except negative balances) that are reported in governmental funds, other than the General Fund, that are not classified as nonspendable and are neither restricted nor committed.

*Unassigned fund balance:* This fund balance is the residual classification for the General Fund. It is also used to report negative fund balances in other governmental funds.

When both restricted and unrestricted resources are available for use, it is the District's policy to use externally restricted resources first, then unrestricted resources - committed, assigned, and unassigned - in order as needed.

### **Note 1: Summary of Significant Accounting Policies** (Continued)

#### **Property Tax Levy**

Under Wisconsin law, personal property taxes and first installment real estate taxes are collected by city, town, and village treasurers or clerks who then make proportional settlement with the school district and county treasurer for those taxes collected on their behalf. Second installment real estate taxes and delinquent taxes are collected by the county treasurer who then makes settlement with the city, town, village, and school districts before retaining any for county purposes.

The aggregate district tax levy is apportioned and certified by November 6 of the current fiscal year for collection to comprising municipalities based on the immediate past October 1 full or "equalized" taxable property values. As permitted by a collecting municipality's ordinance, taxes may be paid in full or two or more installments with the first installment payable the subsequent January 31 and a final payment no later than the following July 31. On or before January 15, and by the 20th of each subsequent month thereafter, the District may be paid by the collecting municipalities its proportionate share of tax collections received through the last day of the preceding month. On or before August 20, the county treasurer makes full settlement to the District for any remaining balance.

Property taxes are recognized as revenue in the period for which the taxes are levied. The 2019 tax levy is used to finance operations of the District's fiscal year ended June 30, 2020. All property taxes are considered due on January 1 when an enforceable lien is assessed against the property and the taxpayer is liable for the taxes. All taxes are collected within 60 days of June 30 and are available to pay current liabilities.

### **Note 2: Stewardship and Accountability**

#### **Limitation on School District Revenues**

Wisconsin Statutes limit the amount of revenues school districts may derive from general school aids and property taxes unless a higher amount is approved by a referendum. This limitation does not apply to revenues needed for the payment of any general obligation debt service (including refinanced debt) authorized by either of the following:

- A resolution of the school board or by referendum prior to August 12, 1993
- A referendum on or after August 12, 1993

<b>Total</b>	<b>\$ 60,931,388</b>		

The District's cash and investment balances as shown in the basic financial statements are as follows:

Government-wide statement of net position	
Cash and investments	\$ 58,668,801
Fiduciary fund statement of net position	
Cash and investments	2,262,587
<b>Total</b>	<b>\$ 60,931,388</b>

### Deposits

*Custodial Credit Risk:* Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District does not have a deposit policy for custodial credit risk. As of June 30, 2020, the District's bank balance of \$470,437 was not exposed to custodial credit risk.

### Investments

The District is a participant in the Wisconsin Investment Series Cooperative (WISC) funds, which is authorized in Wisconsin Statute 66.0301 and are governed by a commission in accordance with the terms of an intergovernmental cooperation agreement. The WISC is not registered with the Securities Exchange Commission (SEC) as an investment company. The WISC reports to participants on the amortized cost basis. WISC shares are bought and redeemed at \$1 based on the amortized cost of the investments in the pool. Participants in WISC have the right to withdraw their funds in total on one day's notice. The investments in WISC are not subject to the fair value hierarchy disclosures.

*Interest Rate Risk:* The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. State Statute limits the maturity of fixed income securities to not more than seven years.

#### Investments (Continued)

*Credit Risk:* State Statute limits investments in fixed income securities to the top two ratings issued by nationally recognized statistical rating organizations. Ratings are not required, or available, for the money market funds, mutual funds - equity, and mutual funds - fixed income. The Wisconsin Investment Series Cooperative has a credit rating of AAAM. The District has no investment policy that would further limit its investment choices.

### Note 4: Interfund Balances and Activity

Interfund receivable and payable balances in the fund financial statements on June 30, 2020, are as follows:

<b>Due From:</b>	<b>Due To:</b>	
	<b>Employee Benefit Trust</b>	<b>General Fund</b>
General Fund	\$ 44,409	\$ -
Debt Service Fund	-	67,298
<b>Totals</b>	<b>\$ 44,409</b>	<b>\$ 67,298</b>

The purpose for interfund balances between the General Fund and Employee Benefit Trust is to account for employer contributions to the Employee Benefit Trust. The purpose for the interfund balances between the General Fund and Debt Service Fund is to account for a prior year transfer not made between accounts. The amounts will be reimbursed in the subsequent fiscal year.

In the statement of net position, amounts reported in fund balance sheets as interfund balances have been eliminated within the governmental activities columns.

### Note 10: Employee Retirement Plans - Wisconsin Retirement System

#### Plan Description

The WRS is a cost-sharing multiple-employer defined benefit pension plan. WRS benefits and other plan provisions are established by Chapter 40 of the Wisconsin Statutes. Benefit terms may only be modified by the legislature. The retirement system is administered by the Wisconsin Department of Employee Trust Funds (ETF). The system provides coverage to all eligible State of Wisconsin, local government, and other public employees. All employees, initially employed by a participating WRS employer on or after July 1, 2011, and expected to work at least 1,200 hours a year (880 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS.

ETF issued a standalone WRS Financial Report, which can be found at <https://etf.wi.gov/about-etf/reports-and-studies/financial-reports-and-statements>.

#### Vesting

For employees beginning participation on or after January 1, 1990, and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998, and prior to July 1, 2011, are immediately vested. Participants who initially became WRS eligible on or after July 1, 2011, must have five years of creditable service to be vested.

#### Benefits Provided

Employees who retire at or after age 65 (54 for protective occupation employees, 62 for elected officials and executive service retirement plan participants, if hired on or before 12/31/2016) are entitled to receive a retirement benefit based on a formula factor, their final average earnings, and creditable service.

Final average earnings is the average of the participant's three highest annual earnings periods. Creditable service includes current service and prior service for which a participant received earnings and made contributions as required. Creditable service also includes creditable military service. The retirement benefit will be calculated as a money purchase benefit based on the employee's contributions plus matching employer's contributions, with interest, if that benefit is higher than the formula benefit.

Vested participants may retire at or after age 55 (50 for protective occupations) and receive an actuarially-reduced benefit. Participants terminating covered employment prior to eligibility for an annuity may either receive employee-required contributions plus interest as a separation benefit or leave contributions on deposit and defer application until eligible to receive a retirement benefit.

The WRS also provides death and disability benefits for employees.

### Note 10: Employee Retirement Plans - Wisconsin Retirement System (Continued)

#### Postretirement Adjustments

The Employee Trust Funds Board may periodically adjust annuity payments from the retirement system based on annual investment performance in accordance with s. 40.27, Wis. Stat. An increase (or decrease) in annuity payments may result when investment gains (losses), together with other actuarial experience factors, create a surplus (shortfall) in the reserves, as determined by the system's consulting actuary. Annuity increases are not based on cost of living or other similar factors. For Core annuities, decreases may be applied only to previously granted increases. By law, Core annuities cannot be reduced to an amount below the original, guaranteed amount (the "floor") set at retirement. The Core and Variable annuity adjustments granted during recent years are as follows:

Year	Core Fund Adjustment	Variable Fund Adjustment
2010	(1.3)%	22.0 %
2011	(1.2)%	11.0 %
2012	(7.0)%	(7.0)%
2013	(9.6)%	(9.0)%
2014	4.7 %	25.0 %
2015	2.9 %	2.0 %
2016	0.5 %	(5.0)%
2017	2.0 %	4.0 %
2018	2.4 %	17.0 %
2019	0.0 %	(10.0)%

#### Contributions

Required contributions are determined by an annual actuarial valuation in accordance with Chapter 40 of the Wisconsin Statutes. The employee required contribution is one-half of the actuarially determined contribution rate for general category employees, including teachers, and executives and elected officials. Starting on January 1, 2016, the executive and elected officials category was merged into the general employee category. Required contributions for protective employees are the same rate as general employees. Employers are required to contribute the remainder of the actuarially determined contribution rate. The employer may not pay the employee required contribution unless provided for by an existing collective bargaining agreement.

During the reporting period, the WRS recognized \$1,521,111 in contributions from the employer.

### Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2020, the District reported an asset of \$4,703,910 for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2019, and the total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of December 31, 2018, rolled forward to December 31, 2019. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date. The District's proportion of the net pension asset was based on the District's share of contributions to the pension plan relative to the contributions of all participating employers. At December 31, 2019, the District's proportion was 0.14588226%, which was an increase of 0.00232538% from its proportion measured as of December 31, 2018.

For the year ended June 30, 2020, the District recognized pension expense of \$1,755,802.

At June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 8,929,096	\$ 4,468,415
Net differences between projected and actual earnings on pension plan investments	-	9,616,465

## Notes to Financial Statements

### Note 10: Employee Retirement Plans - Wisconsin Retirement System (Continued)

\$828,950 reported as deferred outflows of resources related to pensions resulting from the District's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30	Net Deferred Outflows (Inflows) of Resources
2021	\$ (1,440,103)
2022	(1,074,918)
2023	157,508
2024	(2,474,404)

### Actuarial Assumptions

The total pension liability in the December 31, 2018, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial valuation date	December 31, 2018
Measurement date of net pension liability (asset)	December 31, 2019
Actuarial cost method	Entry age
Asset valuation method	Fair value
Long-term expected rate of return	7.0%
Discount rate	7.0%
Salary Increases:	
Inflation	3.0%
Seniority/Merit	0.1% - 5.6%
Mortality	Wisconsin 2018 Mortality Table
Postretirement adjustments*	1.9%

*\*No postretirement adjustment is guaranteed. Actual adjustments are based on recognized investment return, actuarial experience, and other factors. 1.9% is the assumed annual adjustment based on the investment return assumption and the postretirement discount rate.*

Actuarial assumptions are based on an experience study conducted in 2018 that covered a three-year period from January 1, 2015 to December 31, 2017. The total pension liability for December 31, 2019, is based on a rollforward of the liability calculated from the December 31, 2018, actuarial valuation.

### Note 10: Employee Retirement Plans - Wisconsin Retirement System (Continued)

Long-Term Expected Return on Plan Assets: The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

Asset Allocation Targets and Expected Returns

### Note 10: Employee Retirement Plans - Wisconsin Retirement System (Continued)

Single Discount Rate: A single discount rate of 7.00% was used to measure the Total Pension Liability for the current and prior year. This single discount rate is based on the expected rate of return on pension plan investments of 7.00% and a municipal bond rate of 2.75% (Source: Fixed-income municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-year Municipal GO AA Index" as of December 31, 2019. In describing this index, Fidelity notes that the Municipal Curves are constructed using option-adjusted analytics of a diverse population of over 10,000 tax-exempt securities.). Because of the unique structure of WRS, the 7.00% expected rate of return implies that a dividend of approximately 1.9% will always be paid. For purposes of the single discount rate, it was assumed that the dividend would always be paid. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments (including expected dividends) of current plan members. Therefore, the municipal bond rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the District's Proportionate Share of the Net Pension Liability (Asset) to Changes in the Discount Rate: The following presents the District's proportionate share of the net pension liability calculated using the discount rate of 7.00%, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.00%) or 1 percentage point higher (8.00%) than the current rate:

	<b>1% Decrease to Discount Rate (6.00%)</b>	<b>Current Discount Rate (7.00%)</b>	<b>1% Increase to Discount Rate (8.00%)</b>
District's proportionate share of the net pension liability (asset)	\$ 12,113,409	\$ (4,703,910)	\$(17,276,790)

### Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in separately issued financial statements available at <https://etf.wi.gov/about-etf/reports-and-studies/financial-reports-and-statements>.

### Payables to the Pension Plan

At June 30, 2020, the District reported a payable of \$170,296 for the outstanding amount of contributions to the pension plan required for the year ended June 30, 2020.

### Note 11: Other Postemployment Benefits - Local Retiree Life Insurance Fund

#### Plan Description

The Local Retiree Life Insurance Fund (LRLIF) is a cost-sharing multiple-employer defined benefit OPEB plan. LRLIF benefits and other plan provisions are established by Chapter 40 of the Wisconsin Statutes. The Wisconsin Department of Employee Trust Funds (ETF) and the Group Insurance Board have statutory authority for program administration and oversight. The plan provides postemployment life insurance benefits for all eligible employees.

#### OPEB Plan Fiduciary Net Position

ETF issues a standalone Comprehensive Annual Financial Report (CAFR), which can be found online at <http://etf.wi.gov/publications/cafr.htm>.

#### Benefits Provided

The LRLIF plan provides fully paid up life insurance benefits for post-age 64 retired employees and pre-65 retirees who pay for their coverage.

#### Contributions

The Group Insurance Board approves contribution rates annually, based on recommendations from the insurance carrier. Recommended rates are based on an annual valuation, taking into consideration an estimate of the present value of future benefits and the present value of future contributions. A portion of employer contributions made during a member's working lifetime funds a postretirement benefit.

Employers are required to pay the following contributions based on employee contributions for active members to provide them with Basic Coverage after age 65. There are no employer contributions required for pre-age 65 annuitant coverage. If a member retires prior to age 65, they must continue paying the employee premiums until age 65 in order to be eligible for the benefit after age 65.

Contribution rates as of June 30, 2020, are as follows:

<u>Coverage Type</u>	<u>Employer Contribution</u>
50% postretirement coverage	40% of employee contribution

Employee contributions are based upon nine age bands through age 69 and an additional eight age bands for those age 70 and over. Participating employees must pay monthly contribution rates per \$1,000 of coverage until the age of 65 (age 70 if active). The employee contribution rates in effect for the year ended December 31, 2019, are as follows:

#### OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At June 30, 2020, the District reported a liability of \$1,191,554 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of December 31, 2019, and the total OPEB liability used to calculate the net OPEB asset was determined by an actuarial valuation as of December 31, 2018, rolled forward to December 31, 2019. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date. The District's proportion of the net OPEB liability was based on the District's share of contributions to the OPEB plan relative to the contributions of all participating employers. At December 31, 2019, the District's proportion was 0.27982600%, which was an increase of 0.00825300% from its proportion measured as of December 31, 2018.

For the year ended June 30, 2020, the District recognized pension expense of \$145,227.

At June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to OPEBs from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ -	\$ 53,380
Net differences between projected and actual earnings on pension plan investments	22,477	-

### Note 11: Other Postemployment Benefits - Local Retiree Life Insurance Fund (Continued)

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ended June 30	Net Deferred Outflows (Inflows) of Resources
2021	\$ 66,510
2022	66,510
2023	64,087
2024	61,590
2025	50,575
Thereafter	65,016

The total OPEB liability in the January 1, 2019, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial valuation date	January 1, 2019
Measurement date of net OPEB liability (asset)	December 31, 2019
Actuarial cost method	Entry age normal
20 year tax-exempt municipal bond yield	2.74%
Long-term expected rate of return	4.25%
Discount rate	2.87%
Salary Increases:	
Inflation	3.00
Seniority/Merit	0.1% - 5.6%
Mortality	Wisconsin 2018 Mortality Table

Actuarial assumptions are based upon an experience study conducted in 2018 that covered a three-year period from January 1, 2015 to December 31, 2017. The Total OPEB Liability for December 31, 2019 is based upon a roll-forward of the liability calculated from the January 1, 2019 actuarial valuation.

Long-Term Expected Return on Plan Assets: The long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. Investments for the LRLIF are held with Securian, the insurance carrier. Interest is calculated and credited to the LRLIF based on the rate of return for a segment of the insurance carrier's general fund, specifically 10-year A-Bonds (as a proxy, and not tied to any specific investment). The overall aggregate interest rate is calculated using a tiered approach based on the year the funds were originally invested and the rate of return for that year. Investment interest is credited based on the aggregate rate of return and assets are not adjusted to fair market value. Furthermore, the insurance carrier guarantees the principal amounts of the reserves, including all interest previously credited thereto.

### Note 11: Other Postemployment Benefits - Local Retiree Life Insurance Fund (Continued)

**Local OPEB Life Insurance**  
**Asset Allocation Targets and Expected Returns**  
 As of December 31, 2019

Asset Class	Index	Target Allocation	Long-Term Expected Geometric Real Rate of Return
U.S. Government bonds	Barclays Credit	45%	2.12%
U.S. Long credit bonds	Barclays Long Credit	5%	2.90%
U.S. Mortgages	Barclays MBS	50%	1.53%
Inflation			2.20%
Long-term expected rate of return			4.25%

The long-term expected rate of return decreased slightly from 5.00% in the prior year to 4.25% in the current year. This change was primarily based on the target asset allocation and capital market expectations. The expected inflation rate also decreased slightly from 2.30% in the prior year to 2.20% in the current year. The long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

Single Discount Rate: A single discount rate of 2.87% was used to measure the Total OPEB Liability for the current year, as opposed to a discount rate of 4.22% for the prior year. The significant change in the discount rate was primarily caused by the decrease in the municipal bond rate from 4.10% as of December 31, 2018 to 2.74% as of December 31, 2019. The Plan's fiduciary net position was projected to be insufficient to make all projected future benefit payments of current active and inactive members. Therefore, the discount rate for calculating the Total OPEB Liability is equal to the single equivalent rate that results in the same actuarial present value as the long-term expected rate of return applied to benefit payments, to the extent that the plan's fiduciary net position is projected to be sufficient to make projected benefit payments, and the municipal bond rate applied to benefit payment to the extent that the plan's fiduciary net position is projected to be insufficient. The plan's fiduciary net position was projected to be available to make projected future benefit payments of current plan members through December 31, 2036.

The projection of cash flows used to determine the single discount rate assumed that employer contributions will be made according to the current employer contribution schedule and that contributions are made by plan members retiring prior to age 65.

Sensitivity of the District's Proportionate Share of the Net OPEB Liability (Asset) to Changes in the Discount Rate: The following presents the District's proportionate share of the net OPEB liability calculated using the discount rate of 2.87%, as well as what the District's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower (1.87%) or 1 percentage point higher (3.87%) than the current rate:

### Note 12: Single-Employer Defined Benefit Pension Plan

Plan description - Qualifying Administrators and Teachers are provided with a stipend/supplemental pension. This stipend is a single employer defined benefit pension plan administered by the District. Supplemental pension benefits are funded on a pay as you go basis. There are no assets accumulated in a trust.

Benefits Provided - The District provided eligible Tier 1 Teachers retiring by the end of 2015-2016 with 403(b) contributions upon their retirement. These contributions were based upon the retiree's highest annual salary amount less their monthly/annual expected Social Security benefit at age 62. The 403(b) contributions are paid out monthly over a number of years based on the retiree's retirement age. A Teacher who retired at age 62 or older did not receive any 403(b) payment/contribution.

Teachers in Tier 2 who are eligible to retire between the 2016-2017 and 2026-2027 school years will receive monthly 403(b) contributions from the District upon retirement in an amount and duration based upon the year they first become eligible to retire. Teachers in Tier 1 who did not retire by the end of the 2015-2016 year will automatically become eligible for the Tier 2 benefit and are guaranteed the maximum benefit amount. Teachers in Tier 2 who do not retire by 2027 are guaranteed the amount for which they were eligible had they retired in Tier 2.

Employees covered by benefit terms - At June 30, 2018, the date of the last actuarial valuation, there were approximately 63 active plan members and 18 inactive plan members currently receiving benefits.

Contributions - Contributions are determined by an annual actuarial valuation. The actuarially determined contribution is comprised of the service cost plus the portion of the net pension liability to be amortized in the valuation year. The District is not contractually required to make a contribution to the Trust. During the reporting period, the District did not make any contributions.

Actuarial assumptions - The total pension liability was determined by an actuarial valuation using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial valuation date	June 30, 2018
Measurement date	June 30, 2019
Actuarial Cost Method	Entry Age Normal (level percent of salary)
Inflation	2.5%

Discount rate - The discount rate used to measure the total pension liability was 3.50%. This rate is equivalent to the Bond Buyer GO 20-year AA Bond Index published by the Federal Reserve as of the week of the measurement date. The projection of cash flows used to determine the discount rate assumed that District contributions will be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on the pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

### Note 13: Other Postemployment Benefits

Plan description - The District provides other post-employment benefits (OPEB) for its employees through a single-employer retiree plan that provides postemployment health insurance benefits to retiree's at least age 55 with a minimum of 10 years of service and subject to the rule of 70 (Upon retirement, the District will contribute the same benefit level and premium percentages of the medical and dental premiums at the time of the retiree's last semester of teaching in the District until age 70). Benefits and eligibility are established and amended by the Board of Education.

Employees covered by benefit terms - At June 30, 2018, the date of the latest actuarial valuation, there were no active plan members and 107 inactive plan members receiving OPEB benefits. The Plan is closed to new entrants.

Contributions - There is no requirement for any employee or employer contributions for funding of the plan. During the reporting period, the District did not make any contributions to the Trust.

Actuarial assumptions - The total pension liability was determined by an actuarial valuation using the following actuarial assumptions, applied to all periods included in the measurement:

### Note 14: Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; natural disasters; and workers' compensation for which the District carries commercial insurance. Settled claims have not exceeded this commercial coverage in any of the past three fiscal years. There was no significant reduction in the District's insurance coverage in fiscal 2020.

### Note 15: Risks and Uncertainties

Beginning in March 2020, the United States economy began suffering adverse effects from the COVID-19 Virus Crisis ("CV19 Crisis"). As of the date of issuance of the financial statements, the District has not suffered material adverse impact from the CV19 Crisis. The future impact of the CV19 Crisis on the District cannot be reasonably estimated at this time.

## Notes to Budgetary Comparison Schedule - General Fund

---

### **Note 1: Budgetary Information**

Budgets are adopted each fiscal year for all funds in accordance with Section 65.90 of the Wisconsin Statutes, using the budgetary accounting basis prescribed by the Wisconsin Department of Public Instruction (DPI). The legally adopted budget and budgetary expenditure control are exercised at the two-digit subfunction level in the General Fund and at the function level for all other funds. Reported budget amounts are as originally adopted or as amended by School Board resolution.

The District follows these procedures in establishing the budgetary data reflected in the financial statements:

- Based upon requests from District staff, District administration recommends budget proposals to the School Board.
- The School Board prepares a proposed budget including proposed expenditures and the means of financing them for the July 1 through June 30 fiscal year.
- A public notice is published containing a summary of the budget and identifying the time and place where a public hearing will be held on the proposed budget.
- Pursuant to the public budget hearing, the School Board may make alterations to the proposed budget.
- Once the School Board (following the public hearing) adopts the budget, no changes may be made in the amount of tax to be levied or in the amount of the various appropriations and the purposes of such appropriations unless authorized by a 2/3 vote of the entire School Board.

Appropriations lapse at year-end unless authorized as a carryover by the School Board. The portion of fund balance representing carryover appropriations is reported as an assigned fund balance.

## Notes to the Budgetary Comparison Schedule - General Fund (Continued)

### Note 2: Budgetary Comparisons

GAAP requires a budgetary comparison for the General Fund and each major special revenue fund.

Required comparisons are between the final budget and actual on a budgetary basis. The "original budget" represents the budget as approved by the school board after it sets the tax to be levied for the fiscal year. The "final budget" is the "original budget" adjusted for any budget amendments approved by the school board during the fiscal year and up to the time the financial statements are ready to be issued. The "actual on a budgetary basis" excludes the revenues, expenditures, and other financing sources/(uses) of the special education fund, which is treated as a special revenue fund for budgetary purposes. The following schedule reconciles the "budgetary basis" revenues and expenditures of the *budgetary comparison schedule - general fund* to the *governmental funds - statement of revenues, expenditures, and changes in fund balances*:

	<b>General Fund Actual on Budgetary Basis</b>	<b>Special Education Fund</b>	<b>General Fund Actual on GAAP Basis</b>
Revenues	\$ 44,914,790	\$ 2,278,647	\$ 47,193,437
Expenditures	(39,382,711)	(7,097,935)	(46,480,646)
Other financing sources (uses)	(4,819,288)	4,819,288	-
<b>Net change in fund balance</b>	<b>\$ 712,791</b>	<b>\$ -</b>	<b>\$ 712,791</b>

### Note 3: Excess of Expenditures Over Appropriations

For the year ended June 30, 2020, the General Fund had expenditures in excess of appropriations for the following two-digit subfunction categories:

	<b>Budget</b>	<b>Actual</b>	<b>Actual Over Budget</b>
Vocational instruction	\$ 1,126,743	\$ 1,160,791	\$ 34,048
Pupil services	1,293,365	1,300,692	7,327

## **Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit Performed in Accordance with *Government Auditing Standards***

Board of Education  
Monona Grove School District  
Monona, Wisconsin

We have audited, in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Monona Grove School District (the "District") as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, and have issued our report thereon dated December 2, 2020.

### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

## Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

## Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

## **Independent Auditor's Report on Compliance for Each Federal and State Program and on Internal Control Over Compliance Required by the Uniform Guidance and the State of Wisconsin Single Audit Guidelines**

Board of Education  
Monona Grove School District  
Monona, Wisconsin

### **Report on Compliance for Each Major Federal and State Program**

We have audited the Monona Grove School District's (the "District") compliance with the types of compliance requirements described in the *OMB Compliance Supplement* and the *State of Wisconsin Single Audit Guidelines*, issued by the Wisconsin Department of Administration, that could have a direct and material effect on each of its major federal and state programs for the year ended June 30, 2020. The District's major federal and state programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

### **Management's Responsibility**

Management is responsible for compliance with federal and state statutes, regulations, and the terms and conditions of its federal and state awards applicable to its federal and state programs.

### **Auditor's Responsibility**

Our responsibility is to express an opinion on compliance for each of the District's major federal and state programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance); and the *State of Wisconsin Single Audit Guidelines*, issued by the Wisconsin Department of Administration. Those standards and Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal or state program occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal and state program. However, our audit does not provide a legal determination on the District's compliance.

## Opinion on Each Major Federal and State Program

In our opinion, the District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal and state programs for the year ended June 30, 2020.

## Report on Internal Control Over Compliance

Management of the District is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the District's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal and state program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal and state program and to test and report on internal control over compliance in accordance with the Uniform Guidance and the *State of Wisconsin Single Audit Guidelines*, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the District's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as discussed below, we did identify certain deficiencies in internal control over compliance that we consider to be significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal or state program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal or state program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal or state program that is less severe than a material weakness in internal control over compliance, yet important enough to merit the attention of those charged with governance. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as item 2020-001 to be significant deficiencies.

The District's response to the internal over compliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The District's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance and the *State of Wisconsin Single Audit Guidelines*. Accordingly, this report is not suitable for any other purpose.

## Notes to the Schedules of Expenditures of Federal Awards and State Financial Assistance

Year Ended June 30, 2020

---

### **Note 1: Summary of Significant Accounting Policies**

The accompanying schedules of expenditures of federal awards and state financial assistance include the federal and state award activity of the District under programs of the federal and state government for the year ended June 30, 2020. The information in these schedules is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* ("Uniform Guidance") and *State of Wisconsin Single Audit Guidelines*. Because the schedules present only a selected portion of the operations of the District, it is not intended to, and does not, present the financial position, changes in net position, or cash flows of the District. Expenditures reported on the schedules are reported on the modified accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Negative amounts shown on the schedules represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years.

### **Note 2: De Minimis Cost Rate**

The District has not elected to use the 10-percent de minimis indirect cost rate as allowed under the Uniform Guidance.

### **Note 3: Special Education and School Age Parents Program**

2019-2020 eligible costs under the State Special Education Program are \$6,565,643.

### **Note 4: Subrecipients**

The District does not have subrecipients or subrecipient expenditures.

### Section II - Financial Statement Findings

None.

### Section III - Federal and State Findings and Questioned Costs

2020-001: Uniform Guidance Audit Submission

Criteria - 2 CFR 200.512(a)(1) states, "(a) General. (1) The audit must be completed and the data collection form described in paragraph (b) of this section and reporting package described in paragraph (c) of this section must be submitted within the earlier of 30 calendar days after receipt of the auditor's report(s), or nine months after the end of the audit period. If the due date falls on a Saturday, Sunday, or Federal holiday, the reporting package is due the next business day."

Condition - The form was submitted to the federal audit clearinghouse after the 30 day and nine-month deadline required for timely submission.

Cause - The District did not certify the submission until after the deadline.

Effect - The District was not a low-risk auditee due to the late submission of the 2019 audit report.

Recommendation - We recommend the data collection form be certified within the required deadline.

Management's Response - We agree with the finding and have developed a corrective action plan.
