

## Medication Delivery Information for Parents

Dear Parent or Guardian,

Health care provider and parent permission is needed for medications used at school or school-sponsored activities. Please bring medications in their original labeled prescription. Please make sure we get a new doctor's order for the start of school.

### Self-Carry and Use of Medications

If your child's healthcare provider decides your child can carry and use their diabetes, asthma, or epinephrine auto-injector medication independently they must put in writing (attest) that your child can do so safely. Your permission is also required. We can provide the attestation form upon request.

### Asthma Medicines

If your child uses a nebulizer or metered-dose inhaler (MDI).

### Emergency Care Plans and Asthma Action Plans (ECP's)

Emergency Care Plans help school staff safely care for your children. If your health care provider writes medication orders for life-threatening allergies, asthma, and seizure disorders on the ECP a separate medication form is not needed.

### Medication Drop Off

An adult should bring the medications to school unless your student has a health care provider attestation to carry and use their medication independently. If you need to make special arrangements to drop off medication, please call the school health office.

Thank you in advance for your cooperation.
