Behavior Management and Intervention

All school personnel will work to promote appropriate student behavior to foster a safe and orderly environment where all students can be fully engaged in the learning process.

Student conduct that disrupts class work, involves disorder, or interferes with the rights of others is in conflict with the mission of the Inter-Lakes School District and will be addressed. Responses to such behavior will focus on holding students accountable and aim to support a change in behavior; responses may include additional consequences up to and including possible suspension/expulsion.

If the student has an Individualized Education Program (IEP), the process will follow federal and state laws governing special education.

All available resources will be utilized, including preventative and responsive interventions, to support students' needs. These interventions should include things such as psychological, curricular and behavioral services, which should take place within classrooms, schools, and alternative settings.

The Superintendent will also ensure that classroom behavior management skills are addressed through professional development, and that there is an adequate system of recordkeeping regarding disciplinary infractions and interventions.
