January 5, 2024

Dear K-2 Chesterfield Families,

During the week of January 22nd, your student will take a MAP® Growth™ test from NWEA® for Math on their Chromebook. MAP Growth scores help teachers check student performance by measuring achievement and growth. Teachers use results to tailor classroom lessons and set goals for students. We as a district will use this information to help us identify students who may need additional support.

MAP Growth tests are unique and adapt to your student's responses to measure your student's knowledge. If your student answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier. These results will provide a more complete picture of where your student is on their learning journey— regardless of whether they are on, above, or below their grade level.

Since MAP Growth tests provide immediate and accurate information about your student's learning, it's easy for teachers to identify students with similar scores in similar skills and topics and then plan instruction accordingly.

MAP Growth reports also provide typical growth data for students in the same grade and subject with the same starting performance level. This school year, students in Kindergarten through Second grade will take the test in January and May. Following each testing period, you will receive information on your student's performance.

For more information about MAP Growth, visit [NWEA.org/familytoolkit](https://www.nwea.org/familytoolkit).

Sincerely,

Jeanine May-Sivieri

Jeanine May-Sivieri

Supervisor of Curriculum and Instruction
