Facilities Report July 2020

- On June 29th, there was another glycol leak in the building from the same rooftop top unit that had caused a leak last year. One of the joints from the PVC piping failed which caused glycol to leak into the building. The damage to the building seems to be similar to the previous leak. AllRisk has been in the building working on cleanup and assessing repairs needed to be made to classrooms and hallway. An expert mechanical engineer from the insurance company is doing an investigation on what caused the leak. Currently, the piping has been repaired and HVAC system is back up and running.
- Summer Cleaning: The Custodial staff has finished cleaning the bottom floor and now is working on the top floor.
- Gym has been refinished.
