Dear Teacher,

Hello, my name is Veronica. I am 16 year old Junior at Northern Burlington High School and I live on Knowhere Farm, a small homestead in Chesterfield, New Jersey. My family moved to Knowhere Farm when I was 13 years old. We got chickens a couple months after moving to Knowhere Farm. I was immediately enamoured. Chickens are some of the funniest and sweetest animals you could ever meet.

My goal is to become a teacher when I'm an adult. I love kids and I enjoy helping people learn, especially about chickens. Thinking of this, (if you'll excuse the pun) I hatched a plan. I could offer an incubation service!

For only \$250 I have an incubation package that is a win for everyone involved. I have developed a presentation that I will bring to your classroom to teach your students about the egg and the chick inside of it. Your class will maintain the incubator for 7-21 days. When the chicks hatch they will return home to Knowhere Farm and be placed with a mamma hen to be raised as part of our flock. As for me, I benefit greatly from the classroom experience as well as increasing my college fund.

I look forward to hearing from you so I can get you on the schedule before all the available dates are taken.

Sincerely,

Veronica Rowse

Veronica is currently a Junior at Northern Burlington High School. She has a passion for chickens and eggs that she loves to share with children of all ages.

Veronica has developed a presentation that covers the anatomy of an egg along with the process of natural incubation and how it can be artificially duplicated in the classroom.

Students experience anticipation waiting and then the thrill of hearing that first peep, witnessing pipping, zipping and then the final hatch.

Veronica will support you through the

process of incubation and hatching so that you never have to worry about how to manage your incubator.

If you would like to have Veronica visit your classroom, set up an incubation and talk to your students about the life cycle of a chicken let us know so we can add you to our spring list.

Rest assured that once your chicks are hatched they are brought back to Knowhere Farm and placed with a hen. Mamma hen will raise them within the flock and teach them all the skills they will need to grow into healthy, happy chickens who roam the fields at Knowhere.

KNOWHERE FARM

Classroom Incubation

with Veronica

Knowhere Farm is more than a barn that houses animals. It's our dream. Our home where we teach our children where their food comes from, how meeting our needs impacts the world around us, and what we need to do to be responsible for our planet.

Knowhere Farm is our bit of tranquility that, through our labor, is becoming a self sustaining homestead. There are so many life lessons and life skills to be learned on the farm.

- Munchie, the cow, teaches us to be assertive yet caring.
- Little Moo teaches us about the depth of our connection to the world we live in.
- The goats are full of drama and antics that can make our stomachs ache with laughter or our eyes water with exasperation.
- The chickens teach us about the importance of social order and tough love.
- We learn to be financially responsible and we learn we are capable of fixing and building things.
- We also learn that there is great satisfaction in a job well done.

We want to be able to share this experience and help everyone understand how important it is to know where your food comes from, the sacrifices it takes and who makes it possible.

Our barn will become a studio, a classroom, and a place to commune and grow surrounded by the sounds and energy of the animals.

Look us up and join us for our next goat yoga session!

RESOLUTION NO. 2

SYNOPSIS

Resolution No. 2 from the Chesterfield Board of Education (BOE) proposes additional NJSBA policy requiring state aid be distributed formulaically, without growth limits and reflect current student population data.

BACKGROUND

The School Funding Reform Act (SFRA), enacted in 2008, was intended to be the basis on which state aid was to be distributed to school districts. The underlying principle of the SFRA was to determine 1.) What would constitute an adequate budget for a district; 2.) What a district could contribute to that adequate budget through its local tax base; and 3.) Provide state aid based on the difference. A major factor in determining an adequate budget is enrollment. The formula was designed on the principle of having state funding “follow the child.”

However, due to a lack of resources to provide full funding of the SFRA commitment; “growth limits” were included in the SFRA. Districts spending above adequacy per the SFRA were capped were limited in the growth of their state aid to no more than 10% of the prior year’s aid. Those deemed below adequacy were capped at 20% growth.

Additionally, after the initial cuts of FY2010 in the first months of the Christie Administration, the Administration determined that no district would receive less state aid than the prior year. It appears the Murphy Administration has chosen to continue this policy, based on the preliminary numbers released by the New Jersey Department of Education on March 15, 2018.

Due to the state aid growth limits and the lack of resources available from the state, districts such as Chesterfield have been limited in the aid they have received. Per NJDOE documents, if the SFRA formula were run without growth limits, Chesterfield would be due \$4,144,448 in state aid for FY2019. Instead, it is scheduled to receive \$862,248; 20.8% of the uncapped aid amount. Statewide, without the growth limit caps; the SFRA would call for \$9.56 Billion in state aid to school districts. The proposed FY2019 budget calls for \$8.13 billion.

RELEVANT NJSBA POLICY

File Code 3220: State School Finance System

B. The NJSBA believes that New Jersey’s school finance system should:

1. Define the elements of and the resources necessary to provide a thorough and efficient education;
2. Provide funds to support and guarantee a thorough and efficient level of education to all public school children;
6. Provide for equalized aid for capital expenditures and debt service, based on individual districts’ ability to pay as defined by the School Funding Reform Act or its successor;
7. Provide state aid based on predictable statutory formulas which is predictable, transparent and capable of being re-calculated at the local district level;
8. Provide current-year funding of all state aid;

DISCUSSION

Chesterfield's issues are two-fold; neither of which is limited to the district. The growth-limit caps have led to state aid numbers that do not reflect true need. The situation is compounded by the fact that failure to run the SFRA formula has resulted in Chesterfield not receiving state aid that reflects its enrollment growth. The district's local fair share, according to the formula, should be approximately \$6.7 million. However, it is anticipated they will be required to raise \$9.2 million locally in order to provide an adequate education for their students.

STATEMENT OF REASONS

1. School districts are required to provide a thorough and efficient education to all school age children in their district, regardless of artificial growth limits in state aid.
2. Growth limits, which were initially designed to phase in the current formula when it was enacted a decade ago are now impeding districts from fulfilling this responsibility.
3. State aid should be provided based on the most recent data, including enrollment, that are available.

RECOMMENDATION

It is recommended that the Resolutions Subcommittee recommend approval of this resolution with the following substitute resolved language which would create **additional** policy language at File Code 3220, State School Finance System to be included in NJSBA's *Manual of Positions and Policies on Education*:

The NJSBA believes that school districts should receive state aid based on the school funding formula in current New Jersey statute, without predetermined growth limits, and calculated based on the most recent and available student population statistics
