

Procedure

The Athletic Director will consider the following factors when a request is made to establish new sports or teams:

1. level of interest in sport/activity;
2. whether there is enough interest to sustain a team; and
3. whether there is an opportunity to compete with other teams in the sport/activity.

When considering whether new teams or activities should be added, the Athletic Director will also consider the overall opportunity students already are provided in the District's athletic program. Any recommendations to approve a new team/activity will be presented to the Superintendent for approval and then sent to the Board of Trustees for approval. In the event that the Athletic Director and/or Superintendent denies a request to add a new team or activity, the decision may be appealed following the student/parent complaint process as outlined in FNG(LOCAL).
