

School News Releases

The public should be fully and promptly informed concerning educational changes, plans and activities at all times. To prevent duplication of reports, it is the practice to require that all news items be released through building principals or the office of the Superintendent. Exceptions shall be write-ups of athletic events, of social and special programs or events and club activities that relate to one school only. The School District shall use the website as the primary location of all releases.

Information will be released equally and fairly to all the mass media without bias. The School Board will be the only body to release information concerning matters legally reserved for discussion in Executive Session.
