GRADE LEVEL: 1st grade COURSE NAME: Math
MEASUREMENT TOPIC: Represent and Solve Addition and Subtraction Word Problems within 20

4

In addition to Score 3, the student makes in-depth inferences and applications.

The student can:

- Analyze an addition or subtraction word problem work sample and describe and correct the error(s).

3

The student can:

- Solve word problems with three numbers whose sum is less than or equal to 20 using concrete objects, drawings, OR equations with a symbol for the unknown number
- Use subtraction within 20 to solve word problems and represent the problem using concrete objects, drawings and equations with a symbol for the unknown number.
- Use addition within 20 to solve word problems and represent the problem using concrete objects, drawings and equations with a symbol for the unknown number.

2

The student can:

- Use subtraction strategies within 10 to solve word problems and represent the problem with drawings or equations.
- Use addition strategies within 10 to solve word problems and represent the problem with drawings or equations.

1

With help, a partial understanding of some of the simpler details and processes and some of the more complex ideas and processes.

Key Vocabulary: represent, solve, unknown, equation, addend, sum, comparing, difference, addition, subtraction, word problem, put together, take apart, missing addend, part, whole
