# Proficiency Scale

Are you looking for resources to help your child? [Click Here](#)

**GRADE LEVEL: 2nd grade COURSE NAME: Math**  
**MEASUREMENT TOPIC: Solve Addition and Subtraction Word Problems involving length**

<b>4</b>	In addition to Score 3, the student makes in-depth inferences and applications. <b>The student can:</b> <ul style="list-style-type: none"><li>• Justify how to use a number line diagram to represent sums and differences to solve word problems involving length.</li></ul>
<b>3</b>	<b>The student can:</b> <ul style="list-style-type: none"><li>• Use subtraction within 100 to solve word problems involving the same units of length of two objects.<ul style="list-style-type: none"><li>• Represent the problem with drawings and/or equations with a symbol for the unknown number</li></ul></li><li>• Use addition within 100 to solve word problems involving the same units of length of two objects.<ul style="list-style-type: none"><li>• Represent the problem with drawings and/or equations with a symbol for the unknown number</li></ul></li><li>• Create a number line diagram and use it to represent differences within 100.</li><li>• Create a number line diagram and use it to represent sums within 100.</li></ul>
<b>2</b>	The student can: <ul style="list-style-type: none"><li>• Use a concrete number line diagram to find differences within 100.</li><li>• Use a concrete number line diagram to find sums within 100.</li></ul>

**1**

With help, a partial understanding of some of the simpler details and processes and some of the more complex ideas and processes.

**Key Vocabulary: equation, measurement, sum, difference, number line, symbol, units, addend, distance, length, equally space, unit, measure**
