

# Meet Skill Samurai

## About Us

Skill Samurai is dedicated to empowering young minds through innovative and engaging coding education.

Our mission is to equip students with essential tech skills, fostering creativity and problem-solving.

## Young Minds (K-2nd)

A playful and engaging start to coding and computational thinking. Through interactive activities and games, students will embark on a journey that sparks curiosity, ignites creativity, and lays the foundation for future learning in computer science.

## Jr Coders (3rd- 5th)

Through engaging modules, students develop essential coding skills, creativity, and a problem-solving mindset. Beginning with the basics, they gradually master coding fundamentals, from algorithms to logic, building a strong foundation for advanced coding.

## Added to our curriculum

This program, is designed to provide students with basic coding knowledge, delves into HTML, CSS, and JavaScript. You'll learn to structure content and create elements with HTML, style your pages with CSS, and add interactivity using JavaScript. Join us to explore the dynamic world of web development!

(813) 761-2832
