

Smart Schools Meeting

10/16/19

Present: Christine Ljungberg, Cathy Fabiatos, Dave Fox, Patrick McMillan, Laurie Gregory, Kelleen Kensey, Phillip Brown, Michael Mastrandrea, Tim Magee, and Mike Noga

- Elementary generator is already slated for an upcoming project, so that is not an option for spending Smart Schools money.
- Key items to consider:
 - Other generators (upgrade MS)
 - Access points (doors)
 - Clocks/PA linked to our phone system (probably a good idea to go with analog)
 - More security cameras
 - Door updates so they are up to code
 - Upgrading fiber optic cabling in elementary and middle school
 - Extending wi-fi access outside
 - Storage system in case of ransomware attack
 - Air conditioners for server closets
 - Upgrade bus cameras? Will need to find out if it is an allowable expense.
 - New UPK classrooms
- We will need revised quotes for any items we will purchase. We have recent quotes for cameras.
- Cathy will meet with Dave and Jay tomorrow about what number of classrooms was used for past quotes. They will also have a separate meeting with Pat G. about wireless access.
- Mike talked about the bidding process and what other schools are spending their funds on (similar items).
- Christine mentioned that some schools are considering bullet proof film or glass for windows.
- Cathy will set up another meeting for next month.
