School Staff Updates

Role of the School Nurse

- Individual health care needs assessments for students and a member of the School IEP Team
- Health care plan development, revision and evaluation including Emergency Action Plans, Individual Health Care Plans and health-related components of Individual Education Programs
- Direct provision of nursing health care services
- School staff instruction and supervision in provision of care for students with special health care needs

For Safety Reasons...

- Send student to health room with a completed Nurse Referral Slip
- Students **ARE NOT** to go to the Nurse during transition without a note from the teacher.
- Completed slip gives details about symptoms you observed and a place for the nurse to jot a note back to you.
- Completed slips in upper grades decrease #'s students cutting class.
- Documenting times on the slip promotes safety and accountability.
- Substitute nurses will not know "TJ's" last name. Please use full name on slip.
- Keep extra slips and a pen in your red bag, wherever you go (especially playground and cafeteria).

- Out of slips? Please contact your School Nurse

**Symptoms
that Require
Immediate
Nursing
Care:
Call 911 if.....**

- Inability to breathe, turning blue. (Initiate CPR while someone else calls 911)
- Profuse, copious bleeding that does not stop after 10 minutes of firm pressure or bleeding that pulsates
- Fainting (lie on floor, elevate feet approx. 10”) with no response after 1-2 minutes
- Seizure (lasting 5 minutes or more or first-ever seizure in a student)
- Painful limb injuries that may indicate sprain or fracture.
- Emergency first aid needed but student unable to be moved.
- Severe Allergic Reaction requiring administration of Epinephrine
- Head Injury

The “15 Minute Guide”

- Students with **non-urgent symptoms** should **NOT** be sent to the health room for the first 15 minutes after a transition time such as: arrival to school, changing classes
(i.e.Lunch to Music, PE to Language Arts, etc.)
to/from recess.
- Staff should never hesitate to refer a student to the nurse (or front office if the nurse is out of the building) if there is an emergent concern about the student's well being.

Role of the School Nurse

Field Trip Procedure

[Field Trip Procedure](#)

If you are SICK....STAY HOME

Covid Protocol Review:

Exclusion criteria: Positive Covid Test (with or without symptoms)

Day 0=Day of symptom onset or day of positive test without symptoms

Day 1-5- Excluded from work/school

Day 6-10- Return to work/school with mask

If unable to mask must be excluded from work/school for 10 days after first symptom or Positive test if asymptomatic.

Thank you
