

A LETTER FROM OUR SUPERINTENDENT

Dear Members of the NLPS' Community,

Our district's comprehensive budget development process began in November and continued throughout the winter months. I wish to thank the Board of Education, central office staff, school and department leaders, teachers, support staff, students, and parents who were active in sharing ideas, needs, and requests as we worked to develop the district's proposed budget for school year 2024-2025 and we wish to thank the Mayor and City Council for approving our budget in May of 2024. A budget should be aligned to the vision and mission of the organization and should speak to its unwavering belief in the amazing abilities of all. This budget does just that, maintaining NLPS' excellent core and magnet academic programs, needed support services for students, and its enrichment programs.

Our district's budget is comprised of two types of funding sources: 1.) taxpayer dollars that support our General Fund; and 2.) grant monies that come to us through three levels: the CT State Department of Education, the federal government, and competitively awarded grants.

This general fund budget reflects an approved 2.53% increase over last fiscal year's general education fund budget. It was designed around inflationary and contractual increases, and the loss of \$10.9 million dollars, as COVID-relief funding is expiring. It is noted that after rolling up a same-services budget in the winter of 2024, effort was made to reduce the total budget request amount. Although there continues to be much work ahead in all departments, this approved budget has trimmed (-56.4 FTE) positions to assist with maintaining lower operating costs, thus accounting for a savings of \$2.5 million dollars.

The total number of positions in this budget, funded through the general fund and regular grants is 700.45 FTEs. The total number of certified positions is 399.95 FTEs, and the total number of non-certified positions is 300.50 FTEs.

This comprehensive Budget Book, revised in August 2024, is available for review in electronic form on our district website at www.newlondon.org. Please note that additional detailed information, on each school's profile, is now found at the end of this publication.

I am pleased with the student-centered SY25 budget and look forward to a great year ahead! The budget aligns to the goals outlined in our district's Strategic Plan: a commitment to robust early childhood programming, employing diverse and high-quality staff, delivering excellent and innovative academic programs, insisting on safe and engaging learning environments, and implementing innovative strategies to ensure all students meet success. Coherence, equity, and teamwork will also continue to be promoted throughout.

Our district's collective strength comes as we work together to support our students, staff, and families, being United in Excellence. I/we thank you for your continued partnership.

Sincerely,

Cynthin Rotchie

Dr. Cynthia Ritchie, Superintendent of Schools

United in Excellence

To educate and graduate students who specialize in one of the three themed Magnet pathways: International Education, STEM, and Visual & Performing Arts, who are well versed in the academic knowledge and practical experiences necessary to exceed beyond high school; who are critical thinkers and innovators; who are courageous and self-reliant; and who challenge the status quo while enriching their community, country, and global society.

MAGNET-PROGRAMMING

NLPS GRANT FUNDING THROUGH MAGNET

\$9,020,224

Please refer to page 127 to read more regarding Magnet Grant Funding.

A Day in the Life of an NLPS Magnet Student Video

New London Public Schools is the first all magnet school district in Connecticut. The magnet pathways consist of STEM, Arts and International Education. Watch this video to see an illustration of all the wonderful opportunities the students of New London Public School receive!

BUDGET DRIVERS

- » Loss of \$10.9m in ESSER funding beginning in September 2024
- » Contractual salary increases (contract negotiations to come for AFT [contract expires 6/30/24])
- » Fully budgeting ADEC and OPEB
- » Inflation/Cost of living increases
- » Transportation contract increases (9% increase)
- » Unfunded state mandates
- » Continued investment in early childhood preschool programs. (We are absorbing \$2.5m in our operating budget to continue our programs at the BP Mission.)
- » New requirement to educate special education identified students who are 18-22 years old
- » New requirement to educate MLL identified students up to age 21
- » Increased need for additional services for students (MLL, special education, homeless population)
- » Growing overall student population (200+ students joined NLPS since October 1st)
- » Compounded results of deficient appropriations to properly fund the school system

COSTSAVERS

- » Reduction of the Superintendent's Cabinet team (cut of Assistant Superintendent position and reduction in FTE of Chief Financial Officer position), as well as a reduction of the Communications Manager position.
- » Transitioned Harbor School back to the City. (operational cost savings)
- » Reductions in staff positions across all departments. (-61.0 FTEs)
- » Reduction in line items across all departments.
- » Strategic use of remaining 3 months of ESSER dollars to fund non staffing expenses.
- » Collaboration is ongoing with SDE regarding request to magnetize full district now
- » Possible new funding/support for early childhood initiatives.

(6,284,948)

^{*} Note that the Board of Education calculates the general fund percentage of increase as the percentage of increased general funds available to support education. The Board of Education is unable to determine the impact of the Education general fund budget on the New London taxable mill rate. Many factors impact the taxable mill rate, including changes in the value of the grand list, increases or decreases in revenue to the city, and changes in expenditures in other city departments

GENERAL K-5 CORE

Program 1: Instruction - General K-5 Core

The K-5 CORE Instructional program ensures our elementary students receive education in the four core subject areas: English Language Arts, Math, Science and Social Studies, aligned to CT State Standards. The elementary English Language Arts program emphasizes reading, speaking, process writing, listening, viewing, and using conventions to ensure students master the ability to communicate effectively, both orally and in written forms.

Students in grades K-2 also receive systematic instruction in phonics and phonemic awareness that lay the foundation for life-long literacy. Illustrative Math (IM) is the core Mathematics Curriculum. The program focuses on inquiry-based learning and continuing to develop the deep conceptual knowledge, skills and practices students need to be successful in mathematics. Staff in K-5 utilize Mystery Science as the core science resources for the Elementary Science Program. The program promotes scientific inquiry, literacy, and numeracy by developing conceptual understandings through classroom and hands-on learning experiences. Students also work to develop their abilities to apply knowledge of fundamental concepts, principles, and theories within a context that is relevant and engaging.

Currently, the elementary Social Studies program is anchored by the CT Frameworks and the CT Core Standards for literacy in the content areas. Work continues on building a core social studies curriculum based on the new CT Social Studies Standards that were adopted in Fall of 2023.

This program also includes our multi-aged Year-Round Program. This program is an innovative approach that allows students to attend school throughout the entire calendar year, from July through June. Students in the program are instructed in school for six-week cycles, then have a two-week break. During their time in school, they engage in a multi-age approach where students are met at their instructional and developmental level that is fostered through various experiences by two certified teachers. At the end of each six-week cycle families are invited into classrooms to review student progress, participate in field trips, and engage in collective experiences with their student that directly aligns with the curriculum. Optional childcare is available if a family needs coverage during the calendar breaks.

This model has five major aims:

- 1) seamless coherence,
- 2) a team approach,
- 3) deep parental engagement,
- 4) differentiated instruction aligned to each student's needs,
- 5) wrap-a-round services for both child and family

^{*}Increase in wages due to moving year-round teachers out of ESSER. The increase is partially offset because the Assistant Superintendent position was moved to Program 83.

GENERAL 6-12-CORERE

Program 2: Instruction - General 6-12 Core

The 6-12 General Core Instructional program ensures that our secondary students receive education in the four main subject areas: English Language Arts, Math, Science and Social Studies, aligned to CT State Standards. During their course of study, students practice listening to others and evaluating what they hear. They read and respond orally, and in writing, to literature and non- fiction text in all genres and forms.

Students write to tell stories, explain, understand, or to persuade and present an argument. Students learn to speak in formal and informal settings to communicate with others. Additionally, students practice the art of critically viewing, creating and responding to various multi-media presentations.

The secondary-level, 6-12, Mathematics Program focuses on developing students' mathematical reasoning skills, to become deep mathematical thinkers. All curriculum is directly aligned to the CT Core Standards and works to develop students to be college and career ready at the time of graduation. At the high school level, a full range of courses are offered including Algebra I, Algebra II, Geometry, Personal Finance, Pre-calculus, and AP Calculus. More specifically, Illustrative Mathematics (IM) is the core curriculum for Algebra II, and Geometry. This program of studies, combined with intervention programs, support student success on the SAT.

The 6-12 Science Program is organized around eleven conceptual themes and guiding questions in physical, life and earth/space science. Content strands and related concepts spiral through the grades at increasing breadth and depth, combining major science concepts and theories, scientific reasoning and the complex interactions between science, technology, and society. Lessons are designed to expand students' understanding and appreciation of science through activities that develop their ability to use inquiry methods and critical thinking skills in science. Science inquiry performance tasks ask students to apply science process skills, read and write about science, and use mathematics to make sense out of data. Science and technology in society standards ask students to apply science to everyday and global issues. STEM-themed courses are offered 6-12. The NGSS aligned Catalyst Curriculum has been adopted in grades 6-12 for core science classes and is being implemented and refined as needed.

Curriculum, a living and working document, should be standards based and reflect the expectations that students need to demonstrate to be college and career ready by the time they graduate high school. Currently, the middle school social studies program is designed around themes at each grade level and is anchored by the CT Frameworks and the CT Core Standards for literacy in the content areas. Work is being conducted to align all social studies curriculum with the newly adopted CT Standards. High school students travel through units of instruction in World, US history, and various electives that encompass civics, economics, and geography through a strong focus on primary documents. Throughout their high school career, students have opportunities to earn honors credits and take Advanced Placement classes.

STAFFING PROFILE

ENGLISH LANGUAGE ARTS 6-12

Program 5: Instruction - English Language Arts - 6-12

Students study English/Language Arts to become proficient listeners, speakers, readers, writers, and viewers. During their course of study students in grades 6-12 practice listening to others and evaluating what they hear. They read and respond orally and in writing, to literature and non-fiction text in all genres and forms. Students write to tell stories, explain, understand, or to persuade and present an argument. Students learn to speak in formal and informal settings to communicate with others. Additionally, students practice the art of critically viewing, creating, and responding to various multi-media presentations.

The Middle School English Language Arts courses are literature and writing based. Writing process instruction is further developed with an emphasis on informative, narrative, and argumentative writing. The study of literature includes the exploration of a variety of literary genres and forms and it emphasizes the construction of meaning through text and other media. The program stresses interdisciplinary connections between English and the other content areas.

All English courses at the high school level are founded in the knowledge and skills outlined in the Common Core State Standards and emphasize reading, writing, listening, speaking and language. Instruction in analyzing literature, writing, conducting research, and utilizing valid source materials is an integral part of all courses. All classes utilize a variety of classic and contemporary literature, as well as texts of historical significance. Critical, creative thinking, problem-solving, and decision-making skills are emphasized to prepare students for college, careers, and success on the SAT. English I Honors, English II Honors, AP Language, AP Literature, and ECE English are offered as part of an advanced course of study at the high school level.

A district-wide, K-12, Language Arts Curriculum has been developed in alignment with the Connecticut Core Standards (CCS). The curriculum, a living and working document, is standards-based and reflects the expectations that students at the elementary level need to demonstrate in each elementary grade and beyond, to be college and career ready by the time they graduate high school. The CT Core Standards for English Language Arts can be located here.

MATHEMATICS 6-12-12

Program 6: Instruction - Mathematics - 6-12

The secondary-level, 6-12, Mathematics Program focuses on developing students' mathematical reasoning skills, to become deep mathematical thinkers. All curriculum is directly aligned to the CT Core Standards and works to develop students to be college and career ready at the time of graduation. At the high school level, a full range of courses are offered including Algebra I, Algebra II, Geometry, Personal Finance, Pre-calculus, and AP Calculus.

More specifically, Illustrative Mathematics (IM) is the core curriculum for Algebra I, Algebra II, and Geometry. This program of studies, combined with intervention programs, support student success on the SAT.

The curriculum, a living and working document, is standards-based and reflects the expectations that students at the elementary level need to demonstrate in each elementary grade and beyond, to be college and career ready by the time they graduate high school.

CT Core Standards for Mathematics can be located here.

SCIENCE 6-1212

Program 7: Instruction - Science

The (K-12) Science Program is organized around eleven conceptual themes and guiding questions in physical, life and earth/space science. Content strands and related concepts spiral through the grades at increasing breadth and depth, combining major science concepts and theories, scientific reasoning and the complex interactions between science, technology and society. Lessons are designed to expand students' understanding and appreciation of science through activities that develop their ability to use inquiry methods and critical thinking skills in science. Science inquiry performance tasks ask students to apply science process skills, read and write about science, and use mathematics to make sense out of data. Science and technology in society standards ask students to apply science to everyday and global issues.

The 6-12 Science Program is organized around eleven conceptual themes and guiding questions in physical, life and earth/space science. SOCIAL STUDIES 6-12-12

Program 8: Instruction - Social Studies

The Secondary Social Studies Program focuses on roles of people in community, regions, where we live and the world around us past, present and future. The program provides for the development of skills, concepts, and generalizations in the specific knowledge areas of history, geography, government, economics and sociology.

Currently, the middle school social studies program is designed around themes at each grade level and is anchored by the CT Frameworks and the CT Core Standards for literacy in the content areas. This curriculum, as well as the entire district Social Studies curriculum is being reviewed to align with the newly released CT Social Studies Standards.

The high school social studies program is designed around themes at each grade level and is anchored by the CT Frameworks and the CT Core Standards for literacy in the content areas. The work on a comprehensive social studies curriculum will focus on aligning our current curriculum to the newly released CT Social Studies Standards. Throughout their high school career, students have opportunities to earn honors credits and take Advanced Placement classes.

The Latinos In Action Program addresses the student, tying academics, leadership and self-development into a single program. The asset-based approach engages Latino youth and prepares them for college and careers while helping them to develop skills to become contributing citizens. The Latinos in Action elective is part of the social studies department. The program involves four key essentials: a unique student composition, tutoring at a neighboring elementary school, hands-on leadership experience in the class and the Latinos In Action college and career readiness curriculum.

This curriculum contains 12 units and more than 70 lessons, providing your class with 2-3 years of content. Research based and aligned with both state and WIDA standards, the Latinos In Action curriculum is based in culturally responsive best practices.

The CT Social Studies Framework is located here.

Program 10: Instruction - Art

Visual Art education in New London Public Schools is a sequentially developed curricular area incorporating the artistic processes of creating, producing/presenting, responding, and connecting. Students are provided a wide range of opportunities to learn about and create art using a variety of media utilizing the elements of design, as well as to develop their skills in responding to various art styles, forms and cultures. Through the visual arts, children learn through interdisciplinary connections, experience hands-on art-making, create and solve problems, learn effective critiquing skills when responding to their work as well as famous artwork, and develop skills to learn how to effectively complete a project from start to finish.

Secondary 6-12 students are provided with a wide range of opportunities to learn about and create art using a variety of media utilizing the elements of design, as well as develop their skills in responding to various art styles, forms and cultures. Through art, students learn through interdisciplinary connections, experience hands-on art making, create and solve problems, learn effective critiquing skills when responding to their work as well as famous artwork, and develop skills to learn how to produce quality artwork and present it to others. A variety of media, techniques and technology are explored in a variety of course offerings including Art Foundations, 2-D Painting & Drawing, 3-D Ceramics & Sculpture, Photography, and Arts in Culture for middle school students

The curriculum will continue to be developed using the Connecticut Core Arts Standards which can be located here.

MUSICKE12

Program 11: Instruction - Music

Music education in New London Public Schools is a sequentially developed curricular area incorporating the artistic processes of creating, performing, responding, and connecting. Students are provided the opportunity to develop musical skills and knowledge through a variety of experiences and activities. Through music, they learn the richness of their cultural heritage as well as the diverse society in which they live.

Kindergarten through grade five students across the district participate in a music class every week. They experience a variety of listening, singing, moving, creating, responding and performing opportunities in ways that connect to many cultures and to other disciplinary subjects. The K-5 music curriculum was developed and approved in 2021 based on the Connecticut Core Arts Standards which can be located here.

Students in grades 6-8 on both secondary campuses can receive music instruction as one of their many elective options at middle school. These options include vocal music (chorus), instrumental music (band), as well as other general music courses provided through a hands-on approach using a variety of instruments including guitars and keyboards.

Students in grades 9-12 have the opportunity to choose from a variety of music electives: chorus, symphonic band, music history, music theory, and music technology. Classes are offered for either 0.5 (one semester) or 1.0 credit (full year) credit. All graduating students in New London Public Schools must have earned at least 1.0 credit in the arts, which can be fulfilled by passing a music course. The curriculum will continue to be developed using the Connecticut Core Arts Standards which can be located here.

PHYSICAL EDUCATION/HEALTH K-12

Program 12: Instruction - Physical Education/Health

Physical Education: The physical education classes expose students to a variety of physical activities to aid in individual development in the realms of physical, social, and emotional areas, and to improve personal fitness, promote fair play and cooperation. Health classes are designed to develop students' abilities to provide a foundation for potential risks and proactive approaches to wellness and to make informed decisions relating to health issues. The K-5 Physical Education programs provide instruction for a sequential program of motor skill development and the knowledge necessary to participate in a variety of physical activities. Classroom instruction includes the application of knowledge and skills to improve and maintain the health of the student.

The middle school health program places an emphasis on having the students think critically, creatively, and reflecting through activity. A developmental approach provides students with skill development and knowledge in lifetime sport and leisure activity. New activities that provide for opportunities for students' active participation are always explored. The physical education program is enhanced by school activities provided through interscholastic, intramural, and the city's parks and recreation programming. The health program asks students to read, write, and respond to current issues related to health and proper decision making in order to live a healthy lifestyle.

Health: Implementation of the K-5 Health curriculum was introduced 2021-2022 school year. This curriculum is aligned with National and State Health Standards as well as Common Core Standards. Character Education and effective communication skills are embedded into both the health and physical education programs. The health curriculum incorporates all state mandates which include units on bullying, substance abuse, human growth and development and HIV/AIDS.

The national PE standards can be found here. The national Health standards can be found here.

WORLD-LANGUAGE K-12-12

Program 13: Instruction - World Language

Grades K-8: Developing proficiency in a second language, being able to communicate in a meaningful and functional way, and appreciating diverse cultures are the aim of the World Language Program. The emphasis is on fostering genuine communication skills in listening, speaking, reading, and writing to guide the language learner from structured practice to open-ended, personalized communication. The language program also encompasses the National Standards for World Language Learning: communication, cultures, connections, comparisons, and communities.

Jennings School (K-5) offers students a World Language Program in Spanish within the International Education Curriculum. Students receive classroom instruction as well as time in the Language Lab. At the end of grade 5, all students will be invited to continue the study of Spanish at the middle school's International Education program.

Middle School: In grades 6-8, students have the opportunity to take a world language course. Those who are continuing in the International Education pathway have the opportunity to build upon those skills attained in Grades K-5.

High School (9-12): In grades 9-12, students may elect to study Spanish or French. College bound students are encouraged to study the same World Language for a minimum of a three- year sequence. At the high school level, courses are offered in Spanish I, II, III, IV, Spanish for Native Speakers, Latinx Language and Culture, and Advanced Placement Spanish Language. French course offerings are French I, II, III, & IV and we currently offer Chinese classes through remote learning.

NON-ATHLETIC GLUBS BS

Program 26: Non-Athletic Clubs

New London Public Schools' after-school program supports students and families by providing age appropriate activities that enrich the school day curriculum and foster students' emotional, social and academic growth in a safe and nurturing environment. The District offers multiple opportunities for after school clubs at each school throughout district. Community partners and our own staff are a critical component of these opportunities and are overseen by our District Coordinator of Out-of-School Programs.

TIERED SUPPORTS

Program 40: Tiered Supports

Tiered Supports (SRBI/MTSS) Scientific Research Based Interventions/Multi-Tiered Systems of Supports, emphasize successful instruction for all students through high quality core general education practices as well as targeted interventions for students experiencing learning, social emotional or behavioral difficulties. Core general education practices include comprehensive curriculums in key academic areas, effective instructional strategies, creation and maintenance of a positive and safe school climate, and a comprehensive system of social emotional learning and behavioral supports (Bluestein, 2001; Greenberg et al., 2003; Wessler and Preble, 2003).

Key elements of SRBI include:

- •Differentiation of instruction for all learners, including students performing above and below grade level expectations, and Multi-lingual learners (MLLs) at the Tier 1 level
- •Universal common assessments of all students that enable teachers to monitor academic and social progress, and identify those who are experiencing difficulty early
- •Early intervention for students experiencing academic, social emotional and/or behavioral difficulties to prevent the development of more serious educational issues later on
- •Educational decision making (academic and social/behavioral) driven by data involving students' growth and performance relative to peers; data are carefully and collaboratively analyzed by teams of educators (e.g., data teams, early intervention teams) with the results applied not only to inform instruction for individual students, but also to evaluate and improve core general education practices and the overall efficacy of interventions
- •A systemic district-wide approach to core educational practices in which teachers within a grade use the same common formative assessments for all students (academic and social/behavioral) address the same curricular and social emotional competencies, and share the same behavioral expectations; assessments, curricular and social emotional competencies and behavioral expectations also are well coordinated across all grades.

For more information regarding SRBI/RTI practices, please click here.

PROFESSIONAL DEVELOPMENT

Program 42: Professional Development

The District believes that to educate students with the most up-to-date curriculum and information, it is important to build capacity with staff as well. A professional development program and calendar are developed for the district which includes full-day professional development opportunities, and extended time three Wednesdays each month which allow time for staff to participate in these educational opportunities. In addition to district-organized professional development, staff have the opportunity to attend offsite trainings and educational experiences, as appropriate and related to their field of expertise.

CURRICULUM DEVELOPMENT ENT

Program 43: Curriculum Development

Comprehensive PreK-12 curriculum has been implemented in Language Arts, Mathematics, Science and Social Emotional Learning. At the high school level, Social Studies curriculum continues to be implemented and will be refined as needed based on the release of the new CT SS Standards. The work on a comprehensive social studies curriculum continues at the elementary level with the release of the new CT SS Standards earlier this year.

Professional development activities support effective curriculum implementation as outlined in the District Improvement Plan (D.I.P.). These activities are designed to improve student performance by providing focused support to teachers in curriculum implementation and through teacher collaboration in building strong pedagogy, aligned to 21st century skills, so that students remain engaged and excited about learning.

An emphasis on student learning is promoted through continuous support in differentiated teaching strategies, data-driven decision making, and formative evaluation. Teachers work collaboratively to research standards, plan lessons, and review and respond to a variety of student data.

SUMMER PROGRAMS

Program 46: Summer Programs

New London Public Schools is committed to providing as many educational opportunities as possible to our students. Summer programs run from mid-July to mid-August. Programming is offered for students in all grade levels K-12. Grade 9 -12 programming focuses on credit recovery, while K-8 offers programming to continue student learning between the end of one school year and the beginning of the next.

ADULTEDUCATION

Program 50: Adult Education

New London Adult Education is a mandated program offered to residents 17 years and older who are not enrolled in a comprehensive K-12 education program.

The Adult Education mandated program includes Adult High School Credit Diploma Program (CDP), General Education Development (GED), Adult Basic Education (ABE), English to Speakers of Other Languages (ESOL), and U.S. Citizenship classes. These classes are conducted day and night offering flexible programing and schedules to meet the needs of our school community.

The program is financed by local funds that are matched by the State Adult Education Grant. New London Adult Education is proud to provide its community additional programs by proactively pursuing other sources of funding such as federal grants, foundation grants, fundraising, and collaborations with local businesses and community-based organizations.

INTERNATIONAL EDUCATION MAGNET PATHWAY

Program 53: International Education Magnet Pathway

The International education pathway offers students learning experiences that aim to develop curious, knowledgeable, and caring young people who strive to create a better local and global community through intercultural understanding and cultural respect. C.B. Jennings International Elementary Magnet School offers an exciting and innovative International Education theme offered to New London residents and students from surrounding towns. Students are encouraged to continue their studies at the middle school level. By the end of 8th grade, students may be eligible to receive advance high school credit in Spanish, allowing students to enroll in Advanced Placement classes in high school earlier or an opportunity to become tri-lingual and study a third language.

This program now includes the staffing and financials for NJROTC (9-12), Life Management/Family and Consumer Science, Business Education (9-12).

The NJROTC program is offered to students in grades 9-12. It promotes patriotism, develops leadership, and is grounded in service to the community. Cadets enrolled in NJROTC are not obligated to pursue a career in the military. Students who participate in the program learn about Naval history, operative principles of military leadership, goa setting and are given the opportunity for practical leadership from within the unit. The district NJROTC program requires that 10% of the high school population participate. Our unit has been recognized nationally for their successes and labeled as a "Distinguished Unit".

Business Education is offered to students in grades 9-12. The instructional program encompasses knowledge and skills needed for entry-level employment and advancement in a broad range of business careers. Students will explore both the American and global economic system as well as general accounting, marketing, and personal finances.

Life Management/Family Consumer Sciences (grades 9-12) is designed to prepare students for the role of a contributing member to a family and society. The program concentrates on food and nutrition, with a focus on the culinary arts. The culinary facility is certified as a restaurant, farm, and production kitchen. Students win the program will earn safety/sanitation certification in addition to experience in both restaurant and production kitchen atmospheres.

ARTS MAGNET PATHWAY

Program 54: Arts Magnet Pathway

The Visual and Performing Arts Magnet Pathway offers a comprehensive, integrated educational program in and through the arts. Rigorous academics are combined with an arts curriculum that includes vocal and instrumental music, visual art, dance, theatre, media arts, and arts integration. Using the HOT Schools approach of strong arts, arts integration, and democratic practice, we collaborate with arts partners from throughout the region to offer a challenging academic program responsive to every student's interest and needs. An education built on creative expression enables students to perceive, interpret, analyze, invent and create in ways directly aligned with Common Core Standards and 21st century skills.

While traditional school districts offer just music and art, New London Public Schools' Visual and Performing Arts Magnet Pathway includes additional arts that both set the district apart and engage students in more diverse ways. These include dance, theatre, and media arts (any arts done through technology such as graphic design or film production, etc.). The new construction of specialized, professional-grade facilities at both secondary multi-Magnet campuses ensure that students in all pathways have access to a multitude of opportunities and maximize their success in the arts.

The Arts Magnet Pathway has successfully transitioned the Arts Magnet students in grades 6-8 to the newly constructed middle school wing at the New London High School Multi-Magnet Campus.

A comprehensive Program Guide for the Arts Magnet Pathway is available as a downloadable resource on our website.

STEM MAGNET PATHWAY

Program 55: STEM Magnet Pathway

The Science, Technology, Engineering, and Math or STEM Pathway schools offer comprehensive, integrating inquiry-based Science in all content areas. STEM offers an educational program with a focus on preparing students for the 21st Century. Rigorous academics are combined with STEM curriculum that gives students the opportunity to apply their knowledge of science and mathematics to find suitable solutions to everyday problems by introducing them to the world of Engineering. Our middle school STEM pathway students benefit from new cutting-edge courses such as Oceanography at the BDJ Multi-Magnet Middle School Campus.

Using an inquiry-based approach challenges students to become problem solvers, innovators, and inventors who are ready to become the leaders of tomorrow's industry. Opportunities for experiential learning are provided through a wide array of community partners, which brings STEM to life throughout Southeastern CT. Students are also taught Engineering through Lego creation, EIE and much more.

With programs such as FUSE, 3D printers and Dot N Dash robots, NLPS offers opportunities to learn with cutting edge technology. Students are engaged through a stimulating curriculum that integrates the 4 C's: Critical Thinking, Communication, Collaboration, and Creativity which leads to success academically and socially as students move towards a goal of pursuing higher education or a career in a STEM field graduation.

General technology courses in grades K-5 align content to the International Society for Technology in Education (ISTE) standards. ISTE Standards are a framework for students, educators, administrators, coaches, and computer science educators to rethink education and create innovative learning environments.

In high school, students in grades 9-12 have the opportunity to take the Emergency Medical Responder (EMR)/Emergency Medical Technician (EMT) course. This program guides students in gaining the necessary knowledge and skills to provide immediate medical assistance while awaiting additional Emergency medical Systems resources to arrive on scene. Students in this program will complete the mandated state-approved Emergency Medical Responder course and take the MER Cognitive and Psychomotor assessments to become certified as a national recognized EMR. Students wishing to pursue an EMT Certification can participate in our 3 Part EMT course in which they gain hands-on instruction in theory. This program includes 10 hours of observation experience outside regular classroom instruction and meets the performance requirements of the National Registry of Emergency Medical Technicians (NREMT) certification exam. We are proud to share that during the FY24 school year, we had our first student complete the course and pass all exams to become a certified EMT!

COMMUNICATIONS/MAGNET DEVELOPMENT

Program 58: Communications and Magnet Program Development

Our district is currently transitioning to Connecticut's first, and only, all-magnet public school district. Our district boasts three, comprehensive magnet pathways in International Education, Visual & Performing Arts and STEM (Science, Technology, Engineering and Mathematics). Magnet schools are a specific category of public schools that offer students and parents a unique, education choice. Our interdistrict and intradistrict Magnet Schools' focus on promoting academic excellence, diversity, and community. We currently enroll students from over 40 towns and over 25 sending districts.

The District Magnet Office comprises a multitude of districtwide magnet operations, processes, and procedures. The goal of the District Magnet Office is to promote the district's magnet programming, pathways, and student achievement, through a valuable and enriching magnet experience.

Daily functions of the District Magnet Office include, but are not limited to, the following:

- •District Communications, visual marketing and branding;
- •All District and school website/social media management
- •K-5 and 6-12 lotteries, student recruitment, enrollment and student registration;
- Magnet School Operations Plans;
- Out of district magnet tuition invoicing;
- •Legislative initiatives, district magnet state compliance and reduced isolation; and
- District partnerships

SPECIAL EDUCATION

Program 60: Special Education

New London Public Schools offers a continuum of support services for students with unique learning needs. The range of services varies student-to-student and as is aligned to each one's individualized educational plan (I.E.P.)

Such services can include the following:

- •General education classroom placement with consultation or in-class support
- •General education classroom placement with co-teaching support
- •General education classroom placement with resource room supplemental support
- •Special education classroom placement with part-time general education placement
- •Full-time special education classroom support
- Special/Alternative Day school

BOARD CERTIFIED BEHAVIOR ANALYST

Program 61: Board Certified Behavior Analyst (BCBA) PreK-12

BCBA services are available to students ages 3 to 21 and are provided on an as-needed basis to assist with behavioral challenges that impact student learning. BCBAs are therapists trained in applied behavioral analysis and provide essential services to students who require comprehensive behavior intervention plans. In addition, BCBAs supervise the district's Registered Behavior Technicians (RBT).

SCHOOL MENTAL HEALTH SERVICES

Program 62: School Mental Health Services PreK-12

The goal of the Mental Health Services Department is to enhance and support the healthy social-emotional development of all students. This goal is accomplished through the delivery of counseling, consultation services, and direct delivery of social emotional learning programs. The department includes School Psychologists and School Social Workers throughout the district.

School Psychologists are an integral part of the mental health team by promoting services that enhance learning; mental and behavioral health, safety, and physical well-being through protective and adaptive factors and by implementing effective crisis preparation, response, and recovery. School Psychologists provide consultation to teachers, administrators, and families; assessment and data analysis; development and implementation of academic/behavioral/mental health interventions; school-wide program development; and individual and group counseling services.

School Psychological services and consultation are available to all students and are based on each student's individual need. Referrals for school psychological evaluations are made by the Planning and Placement Team (PPT) or 504 Team. The objective of the evaluation process is to assist the PPT/504 in determining a student's eligibility for special education or 504 services. If a student meets the criteria for special education services or a 504 Plan, the evaluation will assist the PPT/504 Team in developing an appropriate program.

SPEECH LANGUAGE/HEARING

Program 63: Speech Language/Hearing PreK-12

Speech Language Pathologists provide services to students who have a speech, language, and/or communication impairment that adversely affects the child's educational performance.

These services are provided to students' district-wide from age 3 to 22 years old with a variety of communication disorders, typically co-existing with other diagnoses such as Learning Disabilities, Multiple Disabilities, ADHD, Autism and Hearing Loss.

Individual and group services may be provided for students exhibiting moderate to severe disorders in articulation, expressive and receptive language, pragmatics, voice, fluency, and swallowing. Students exhibiting moderate to profound hearing losses may receive direct therapy as well as academic resources support.

The program also provides screening and diagnostic evaluations to students referred through the Planning and Placement Team (PPT). For each student diagnosed as having a speech/language disability, an Individual Education Program (IEP) is written which specifies the goals and amount of specially designed instruction required. Indirect, consultative services may also be provided to students, parents, and teachers. The program is designed to meet varying needs; services are provided by certified Speech/Language Pathologists (SLP) assigned to one or more schools.

Preschool/Elementary (PreK-5): The program emphasizes remediation at the preschool and elementary level where maximum growth in communication skill development can occur.

Secondary level (6-12): Direct services are provided to students as recommended by the PPT or 504 plan.

OCCUPATIONAL/PHYSICAL THERAPY

Program 64: Occupational/Physical Therapy PreK-12

Occupational and Physical Therapists provide essential and unique services to students with unique learning needs. Both therapies are a related service for students with IEPs or 504 plans.

Physical and Occupational Therapy in a school setting is different from a clinical setting. School based therapists focus on removing barriers from the student's ability to learn and help the student increase their independence in the school environment. Everything a therapist does with a student in school must be educationally relevant. Physical Therapists may help students function better in the classroom, the hallway, or the lunchroom. They assist students with mobility throughout the school setting and on field trips and on playgrounds. They help students maintain a good body posture so that the student can have the highest level of function possible. Occupational Therapists assist students with fine motor activities such as learning to write.

Both Physical and Occupational Therapists provide services in each of the district school buildings.

CLIMATE AND CULTURE

Program 65: Climate and Culture

The goal of the Culture and Climate department is to influence factors that serve as conditions for learning and that guide physical and emotional safety, engagement, connection, and support.

A positive school climate characterizes a school that effectively attends to all the social, emotional, and academic support needs of its students.

The department consists of school counselors, behavior motivators, and wellness staff that provide services in all district schools.

HEALTH SERVICES

Program 66: Health Services PreK-12

The School Health Program complements the efforts of all school personnel by evaluating the health needs of students and recommending program adjustments and referrals when necessary. School nurses are responsible for first aid care, vision and hearing screening, postural screening, administering medication when necessary, updating the immunization status of students, referring students to outside agencies, when appropriate, and maintaining student health records. The school nursing program maintains written policies and procedures to ensure quality of services and district-wide uniformity.

Beginning in FY25, nurses will no longer be contracted through the VNA, but will be hired by the District. In addition to a nurse for each school in NLPS, the district is required to provide nursing services to non-public schools including The Williams School and St. Joseph's school. Financials for the non-public positions can be found in Program 76.

SOCIAL-WORK SERVICES

Program 67: Social Work Services PreK-12

School Social Workers are part of the multidisciplinary mental health team providing services in prevention programs to support healthy growth and development, minimize barriers to learning, and provide counseling and intervention services. School Social Workers serve as a school-community liaison and assist students and families with mental health and behavioral concerns; crisis management; positive behavioral, academic, and classroom support; consultation with teachers, parents, and administrators; as well as provide individual and group counseling.

Social work services and consultation are available to all students and are based on each student's individual need.

SCHOOL COUNSELORS

Program 68: School Counselors

Secondary School Counselors assist students in acquiring and using life-long learning skills. Students are provided with opportunities to gain an understanding of self and others, to participate in educational and occupational explorations, and to pursue post- secondary or career opportunities in a caring and encouraging environment.

This program fosters student growth in the areas of academic, career, and person/social development. In this regard, School Counseling involves a planned, purposeful, and sequential program of activities that begins in middle school and continues through high school.

HOMEBOUND/ALTERNATIVE EDUCATION

Program 69: Homebound/Alternative Education K-12

Home instruction provides interim educational services to those students who cannot attend school due to a variety of reasons. Identified (K-12) students are provided instructional services by certified teachers or tutors in the community, in their home, or virtually.

Such students are referred for home instruction by the school's PPT, physician, or hospital.

Possible Reasons for Homebound Instruction:

- *Pregnancy
- *Hospitalization
- *Other medical reasons
- *A disability so severe that it prevents the child from attending school
- *Expulsion-For students that have been expelled from the district an alternative education program and each student has an ILP-Individual Learning Plan.

BILINGUALEDUCATION

Program 70: Bilingual Education K-12

Aligning with New London Public Schools' vision, United in Excellence, our English to Speakers of Other Languages (ESOL) and Bilingual programs are designed to meet the needs of our English/Multilingual learners. NLPS acknowledges and supports the Connecticut State Board of Education's (CSBE) belief that to acquire English language proficiency and academic proficiency for students who are English/Multilingual learners (EL/MLLs), we must provide high-quality, comprehensive, and effective English as a Second Language (ESL) and Bilingual Education programs utilizing research-based instructional practices that support our language learners in general education classrooms. New London Public Schools provides ESOL and Bilingual Education programs as mandated by State and Federal statutes; both have specific entry and exit criteria. The NLPS English/Multilingual learner population continues to grow, we currently have 952 students identified and expect that number to increase by the end of this academic year. English/Multilingual learners are enrolled in every district school. Programming for students varies based on student needs and staffing.

ESOL (English for Speakers of Other Languages): The goal of the ESOL program is to provide students with instructional supports to access the curriculum by developing both basic interpersonal skills (BICS) and cognitive academic language proficiency (CALP). School-based services are provided by teachers certified in TESOL (Teachers of English to Speakers of Other Languages) and Bilingual Tutors, following the Connecticut English Language Proficiency (CELP) Standards.

Bilingual Education: The State of Connecticut mandates that bilingual education is offered to all identified English/Multilingual learners in any school with twenty or more students who share the same native language. A bilingual education program is a transitional program where academic content is initially taught in the student's native language while English language skills are developed. As the English language skills improve, the use of the native language decreases. Per CT statute, students may not exceed 30 months in a transitional bilingual education program, unless an application for an extension is approved by the state.

FAMILY ENGAGEMENT

Program 79: Family Engagement

The NLPS Family Engagement Department works in alignment with the staff and family communities for all six schools. Our overall goal is to promote student success through long lasting partnerships with families and community members. We work closely with families to identify their needs and their preferred form of communication. Through data collection, surveys, phone calls and honest conversations we design events to focus on student achievement and growth.

This data allow our district to identify the needs of our students and will provide us with valuable information that will help us design our themed events and share important information with parents on how they can help their children at home. The parent ambassadors continue assisting their buildings to communicate with parents and share important information about what is happening at their children's schools.

SCHOOL BUILDING ADMINISTRATION

Program 81: School Building Administration

School principals/assistant directors play a vital role in the education of all students. Along with the clerical support staff included in this program, school administrators manage operations for individual elementary, middle, and high schools. Building principals and assistants provide direct supervision of the instructional program as well as supervision and evaluation of certified and classified staff. They are charged with ensuring the overall safety of students and staff as well as maintaining the proper environment for student instruction All administrators serve as instructional leaders. Building maintenance and supervision of playgrounds, cafeterias, and media centers are accomplished through this program. School building administration assist in the selection of staff and in communicating with parents and the community at large.

CENTRAL OFFICE ADMINISTRATION AND STRATION

Program 83: Central Office Administration

This program contains the Office of the Superintendent and accompanying support personnel. The central administration is responsible for all aspects of district operations. The district's vision, mission and strategic expectations are derived from their efforts and communicated throughout the district to staff, students, parents, and community leaders. The central administration also leads the development of schools that are living up to the district's vision to be United in Excellence and oversees the district's promise to deliver a high-quality learning experience for every child, every day through the prudent use of financial resources and commitment to ensuring student achievement. This program also provides funding for Board expenses that support student achievement, strengthen community and district relationships, and provide opportunities for Board members to receive professional development to support their leadership and responsibilities. The central administration promotes that New London Public Schools educators set high expectations for personal and student achievement, align systems and operational efforts, and ensure that every classroom is led by a highly competent educator who is in turn led by a highly competent administrator. The New London Public Schools will deliver a high-quality learning experience for all students resulting in continuously improving academic achievement.

^{*}Assistant Superintendent recorded in Program 1 in FY24. Rental expense for Welcome Center was expensed in ESSER in FY24.

BUSINESS SERVICES

Program 84: Business Services

Business Services is designed to provide for and channel business activities. Included in these activities are Payroll, Accounts Payable, Accounts Receivable, State and Federal grants. Developing, preparing, monitoring, and controlling budgets are functions in this program. The accurate and timely recording and reporting of business activities to and for the Board of Education, the Superintendent, various State and Federal agencies and the independent auditors is imperative. Financial records are audited annually as part of the City of New London CT Federal and Single State Audit as required by law.

More specifically, the Business/Fiscal Services Program works efficiently to ensure fiscal resources are available to support the district's initiatives. The program manages the general budget accounts as well as the accounts for over 50 separate state, federal and private grants. Each grant requires conformity to a set of rules and to a grantor-approved budget and is subject to an independent or grantor audit. Business services manage systems for procurement of goods and services, proper encumbrances of funds, cost projections, budget adjustments, contract review, and plays a critical role in collective bargaining negotiations. General fund and grant budgets are governed by fiscal year and grant period dates, requiring that no more than the total budgeted funds are expended from each source by a specific date and requiring that any unexpended funds as of that date be returned to the provider of the funds. As such, Business services works to ensure maximum value and return from all available resources.

The department is responsible for management of current and future fiscal software systems, through which expenditure requests are processed (from initial request through final payment), employee attendance is recorded, and fiscal planning is communicated. In this effort the Business Services Department continues to enhance the functionality of the MUNIS Financial/HR/Payroll system. As discussed, MUNIS offers a more efficient accounting system for managing the district's resources.

RISKMANAGEMENT

Program 85: Risk Management

This program contains funding for employee health, dental and life insurance benefits as well as required funding for social security and other retirement benefits. The staff tuition reimbursement program is funded here as well. The funding for several risk categories is also in this object code -Workers Compensation and Unemployment, as well as property and other liability insurance. In addition, other Post-Employment Benefits (OPEB) for non-certified retirees in accordance with contractual agreements and Board Policies are included.

TALENT & HUMAN RESOURCES

Program 87: Talent and Human Resources

The Talent and Human Resources Department provides district-wide services that support the district's mission – United in Excellence – in support of the District Improvement Plan.

The department is responsible for supporting the hiring of the most highly qualified staff to provide the best educational opportunities for our students. In addition to recruitment, the department supports the development, recognition, and retention of staff, as well as supporting evaluation and accountability systems.

Areas of focus include recruitment and retention of a diverse workforce; employee relations; labor relations; contract negotiation and implementation; substitute staff management; employee assistance programs; unemployment; workers compensation; health and other employee benefits; continuing education; and mandatory training.

The department is committed to implementing best practices and transitioning to software platforms that will support a transition to a work environment that is more virtual, supporting the online needs of our customers. Initiatives here will be supported by, among others, Frontline Applicant Tracking; TalentEd employee evaluation systems; LinkedIn and other platforms for recruitment; and Vector for employee mandated and other professional development.

FACILITIES AND BUILDING REPAIR

Program 90: Facilities and Building Repair

The New London Public Schools Facilities and Building Repairs program funds provides the resources to maintain the 8 buildings under the management of New London Public Schools. Repair, maintenance and upgrade tasks range anywhere from plumbing, roof repairs and glass replacement to small remodeling projects. Many of these projects can be found in the district's Capital Improvement Plan. The Capital Improvement Plan is a ten-year comprehensive plan which encompasses each facility district-wide, and includes the non-recurring capital expenditures, the useful years of life, and approximate cost for replacement.

STAFFING PROFILE

^{*}Increase in OBJ 430 for mandated air quality testing.

FACILITIES AND OPERATIONS

Program 91: Operations/Facilities/Maintenance

The New London Public Schools Facilities, Maintenance, and Operations Department consists of all services described below servicing 731,331 sq. ft. across 7 New London Public Schools buildings. Led by the Executive Director of District Operations, Technology, Facilities, Food Service, Transportation, Safety and Security, a team of full and part-time custodians, a licensed HVAC Technician and 2 Apprentices, Facilities Supervisor and secretary are responsible for implementing a comprehensive school facilities maintenance plan. This plan encompasses demographic and enrollment projections and the ensuing changes in building demand.

The department identifies improving cleanliness and safety, correcting deficiencies, addressing deferred projects, increasing efficiency, decreasing utility bills as well establishing priority and targets. This unit is also responsible for the district's Environmental Compliance, which consists of inspections required by the Asbestos Hazard Emergency Response Act, indoor air-quality measures, and environmental testing, training, and reporting.

Along with in-house staff, a large network of trade and specialty contractors are utilized to complete the repair, maintenance, and upgrade tasks of district facilities. Required service and testing contracts are included in this program, as well as maintenance related to the New London Public Schools equipment and vehicle fleet.

^{*}Electricity estimate based on actual usage (architect projected usage for MS & HS) based on current contracted supply rate.

TECHNOLOGYINFRASTRUCTURE

Program 95: Technology Infrastructure

The Technology Department's approach has evolved by leveraging cloud-hosted technologies to deliver improved services and by continuing to recognize technology as a direct-connect tool for learners and educators to information and creativity beyond the physical classroom. The technology department maintains hardware and infrastructure, manages projects, and finds ways to increase productivity within the district. The department also provides design, price quotes, implementation, maintenance, and support for all district devices, as well as user account maintenance. A critical task for the department is server and network administration allowing NLPS to maintain a secure and uninterrupted learning environment. Devices and services maintained by the department and costs for maintenance and repair are reflected in this budget.

PowerSchool/Student Information System:

This software application ensures that all student information required for local, state, and federal reporting are accurately entered and properly maintained.

Key functions of PowerSchool:

Student scheduling, grade reporting, attendance and discipline record keeping, progress reports and report cards, and communication with families. The PowerSchool Team is responsible for closely monitoring the accuracy of this comprehensive student database, training all staff in its use and works with staff at all levels to ensure accurate data entry.

In addition, the PowerSchool Team responds to a variety of requests from all departments to support district and school improvement efforts. PowerSchool also includes a customizable feature used by the district to create and refine real-time Data Dashboards that support school- and central-office staff initiatives (such as attendance) and data analysis. These dashboards are integral to the work of school and central office leaders.

<u>Technology Specialists:</u> Technology Specialists are the team which provides staff, students and families with the supports needed for all things technology. They are responsible for the distribution and updating of all district technology devices including desktop computers, laptops, iPads and staff cell phones. This team is also considered the first responders of technology, helping staff and students with technology issues through the use of a HelpDesk ticketing system.

TRANSPORTATION

Program 96: Transportation and Crossing Guards

Transportation provides approximately 4110 students with bus transportation to New London Public Schools. Transportation is provided to 18 different programs, including choice programs, private schools and technical high schools.

The following are some data highlights in regards to our Transportation Program:

- District is currently utilizing 42 buses,
- Total number of students is 6258
- Total number of students on a bus 4110
- Total number of students who do not ride bus 2148
- Total number of students on a medical van 17
- Total number of regular buses routes-168
- Total number of special education routes-37
- Total number of students transported in New London- 2413
- Total number of students transported from Out of district-553
- Total Number of students transported to other schools-1144

SAFETY AND SECURITY

Program 97: Safety and Security

The Safety and Security Office, in addition to day-to-day management of the Security Officers, is responsible for development and implementation of the All Hazards Safety and Security Plans for the district, including each school specific plan.

Security Officers are responsible for ensuring the safety and security of BDJ Multi-Magnet Middle School Campus and NLHS Multi-Magnet Campus, and occasionally other facilities.

The Safety and Security Department coordinates and executes all required drills and training. This program carries the maintenance, repair and upgrade costs associated with fire monitoring systems, surveillance systems, Public Address (PA) Systems, 2-way radios and required training for Security Officers.

NLPS and the NLPD maintain an extremely strong partnership, meeting together and co-sharing in implementing collaborative initiatives to service students, staff, and the community regularly.

	\$3,687,928	\$3,687,928		
Total Grant Funds	\$32,405,653	\$36,124,466		
General Fund	\$50,827,179	\$47,451,526		
Totals	\$83,232,832	\$83,575,992		
		Access to the second	ANTERIOR DE COMPTE DE CONTROL DE	

In FY 2023-2024, the school district had access to over \$10.9m of ESSER funding. This funding was not included in the FY 2023-2024 Budget book because it is a one-time funding source with a specific expiration date. In this current year, ESSER funds are being used to cover the cost of more than 45 FTE's certified teachers and administrators as well as more than 90 non-certified staff, most of whom work directly with students addressing pandemic-related needs. In addition to staffing costs, ESSER funds are being used in FY 2023-2024 to fund the cost of equipment, technology upgrades/replacements, and repairs/upgrades to the school's physical plant.

The FY 2024-2025 budget includes a substantial increase in the requested general fund appropriation over FY 2023-2024. This is primarily driven by a shift of costs that were previously funded in the ESSER grant. Overall expenditures inclusive of all funding sources represent a decrease from FY 2023-2024 to FY 2024-2025 of \$4.8m, which is accomplished through the elimination of numerous positions and non-staffing costs.
