Dual-Enrollment Decision Guide

Dual-Enrollment is a supplemental option for GSMST students to earn college credit during high school. All GSMST graduation requirements must be taken at GSMST. Courses taken through Dual-Enrollment cannot be used to satisfy core graduation requirements. We offer two programs for students that allow them to use dual-enrollment courses at GSMST:

- Georgia Tech distance learning math and science courses.
- Students enrolled in Gwinnett Tech Game and App Design OR Cyber Security may be used to satisfy the JFE and/or SCE GSMST graduation requirements.

YES, I want to pursue Dual-Enrollment

To improve my GPA	At Georgia Tech	JFE	SCE	To earn college credit now

To improve my GPA

Dual-Enrollment is not an appropriate option to improve your GPA. Schools prefer that you maximize the rigor available at your high school and do well rather than take on additional courses. Talk with your teachers and counselor on how you can improve your current academic performance to improve your GPA.

At Georgia Tech

Georgia Tech provides limited distance learning dual-enrollment courses for high school students. Courses are available in math and science for GSMST students. Selections for math are made within the math department and are available for students with a qualifying AP Score of 5 on the AP Calculus B/C exam and a 95 average. Spaces for advanced math courses at Georgia Tech are limited and qualifying scores do not mean automatic acceptance. Advanced science courses in Genetics and Organic Chemistry are available and based on a student's performance in AP Biology. Students can talk with their AP Calculus teacher or AP Biology teacher if they would like to take the advanced courses in math and science at Georgia Tech. Students who are not selected by their teacher to apply for Georgia Tech Distance Learning programs **cannot** apply directly to the school.

JFE

Students who wish to use Dual-Enrollment to meet their JFE requirements must speak with the JFE Coordinator. She will explain the JFE Dual-Enrollment options during JFE information meetings and outline the process, guidelines, and deadlines for applying to Gwinnett Tech's Cyber Security or Game and App Design program for JFE requirements.

SCE

Students who wish to use Dual-Enrollment to meet their SCE requirements must speak with Ms. Williams, SCE Coordinator, regarding their Dual-Enrollment plans. She will explain the SCE Dual-Enrollment options during SCE information meetings and outline the process, guidelines, and deadlines for applying to Gwinnett Tech's Cyber Security or Game and App Design program for JFE requirements.

To earn college credit now

Check the admissions website for the school or college you are interested in and see if they offer Dual-Enrollment for high school students.

Talk with your counselor at **Counseling Corner** in the cafeteria on Wednesday to see if Dual-Enrollment is appropriate for you. If your counselor approves:

Apply and be accepted to the college or university program

Complete the Dual-Enrollment funding application and student participation agreement in part I in GA Futures.

Go to **Counseling Corner** in the cafeteria during lunch on Wednesday to see a counselor to sign the Dual-Enrollment Student Participation Agreement (SPA) form. Take the form to your advisor at your college/university to register for classes.
