May 6, 2019

CABE welcomes the opportunity to work with Oxnard School District to offer our Family, School, Community Engagement program. Our program builds the capacity of schools to meaningfully engage parents in their children's education with the outcome being increased student achievement.

The CABE 2-INSPIRE Program works with parents to increase their knowledge about schooling to ensure that parents have vital information about high quality educational options for their children (especially those traditionally underserved and/or attending Program Improvement schools). The Project 2-INSPIRE curriculum informs parents of their role in their children's education, works with parents so they learn how to work with the information acquired and develops parent leadership skills to ensure their participation and collaboration as part of the school community.

All three levels of the program share the same objective and goal: To increase parental engagement in their child's learning at home, school, and/or community; and thereby increase their child's academic achievement. However, each of the levels differs markedly in their approach, strategies, methods, activities, and outcomes for parents and their children.

Level 1- Awareness Level –This level has strong coverage of basic content and skill development delivered through traditional presenter-centered workshop format. The outcome is increased parent knowledge.

Level 2 – Mastery Level (comprised of 12 modules and available to schools and districts participating in the research study) - This participant-centered intensive training is provided at the school with on-going follow-up coaching and mentoring to accomplish two things: First, to help parents, teachers and administrators from the same school apply what they are learning to develop and implement individual action plans; and second, to help parents, teachers, and administrators in the same school develop the skills needed to work together as an effective Family-School-Community collaboration team. These efforts are clearly linked to specific student academic performance standards.

Level 3 – Expert Level (comprised of 16 modules and available to schools and districts participating in the research study) Trainer of Trainers, builds upon the knowledge and skills developed in Level 2 training in two ways: more in-depth coverage of the topics and issues covered; and, development of specific leadership skills, e.g., outreach, group process and facilitation skills to work with diverse communities, as well as how to engage diverse communities in a collaborative strategic planning process for providing children with quality teaching and learning at home, school, and community. This level provides parents with optimal on-going coaching and feedback as well as opportunities to “practice” teaching of the program modules to other parents.

All three levels are designed to provide parents with a strong awareness of California's school accountability system, academic content and performance standards, standards-based report cards,

assessment, public school choice options, and supplemental service providers, in addition to topics identified by parents (e.g., home learning activities, early childhood education, beyond high school opportunities, goal setting and financial planning for college).

The parent engagement program will be offered at your facility to up to 40 parents attending. We encourage you and any teachers from the site to also participate in the program so you have an understanding of what the parents are learning and how you can work together as a team.

In order to facilitate communication and schedule the parent engagement program at your school, we suggest appointing one person to whom we can contact to facilitate conducting the parent outreach and training. This person will have the authority to immediately respond to our requests for meeting space and parent outreach information.

The following is our overall schedule of proposed activities.

1. Approval of Work Proposal and signed District Contract
2. Submit a signed copy to CABE along with PO
3. Site agrees to provide LCD Projector and Screen
4. Meeting with school community to outline program, goals and outcomes
5. Orientation meeting for parents and teachers
6. Schedule parent workshops
7. Conduct meetings according to the approved schedule (weekly, biweekly or monthly workshops for parents)

We will be available to work with your school and help you establish a timeline for the services. Thank you again for this opportunity to work with you on this program to effectively engage parents and raise student achievement at your school.

Respectfully,

Jan Gustafson
CABE Chief Executive Officer

Name of Contributor: Dr. Anabolena DeGenna **Date of Meeting:** August 7, 2019

Approval of Agreement #19-70 – DrumBus, LLC (DeGenna/Ridge)

The OSD Drum Bus Program will focus on students in grades 5 and 7 with a therapeutic drum program delivered by trained program facilitators at the school site within the mobile music classroom known as the “Drum Bus”. The program will utilize the evidenced-based program “Beat the Odds” from UCLA’s Center for the Healing Arts. Beat the Odds® integrates activities from group drumming and group counseling to build core social-emotional strengths such as focus and listening (a constant theme throughout the program), team building, positive risk taking, self-esteem, awareness of others, leadership, expressing feelings, managing anger/stress, empathy and gratitude.

UCLA researchers have shown that Beat the Odds® can significantly reduce a spectrum of behavior problems in children, such as behaviors related to inattention, withdrawn/depression, posttraumatic stress, anxiety, attention deficit/hyperactivity, oppositional defiance, and sluggish cognitive tempo. (Ho, Tsao, Bloch, & Zeltzer, 2011)

The Drum Bus program will serve targeted student groups at all OSD school sites with the use of the Beat the Odds curriculum. In addition, the program will maintain a more intensive focus upon the District’s Opportunity Class setting which is located at each of OSD’s three (3) middle schools.

The Drum Bus program will measure its positive impact on the school climate and community via the California Healthy Kids Survey (CHKS) within three (3) critical areas listed below. Students within the Opportunity Classroom setting will be monitored with the use of pre and post surveys. The expected outcome for students in the Opportunity classroom setting is to provide a description of how the Drum Bus program has assisted them in focusing (attention), working with classmates, managing difficult emotions and having positive self-esteem.

Executive Summary

DrumBus® will provide hands-on musical activities for thousands of students in Oxnard elementary and middle school campuses with the specific goals of increasing communication skills, increasing students’ personal wellness, reducing social friction in school communities, and providing opportunities for artistic expression, personal creativity, empathy, awareness of others, and the development of leadership skills.

The program will target specific student groups in order to maximize impact by focusing upon students in fifth grade and seventh grade at K-5 and K-8 sites. Additionally, the program will also provide an intensive focus on students within the Opportunity Class at each of the middle school sites. Altogether, the program will provide service to approximately 1,900 fifth grade students and 1,900 seventh grade students. In the Opportunity Class, approximately 60 students will be served in grades six through eight,

The DrumBus is a self-equipped mobile classroom. Students participate while seated inside the bus, all instruments and instruction are provided. A teacher with valid CA teaching credential must be present at all times, but DrumBus facilitators will provide all behavior management and instruction during the musical activities.

The DrumBus program will utilize the evidenced-based “Beat the Odds” curriculum from UCLA’s Center for the Healing Arts. Beat the Odds® integrates activities from group drumming and group counseling to build core social-emotional strengths such as maintaining focus and attentive listening, team building, positive risk taking, self-esteem, awareness of others, leadership, expressing feelings, managing anger/stress, empathy and gratitude. (Ho, Tsao, Bloch, & Zeltzer, 2011)

OXNARD SCHOOL DISTRICT
CONSULTANT AGREEMENT #19-70

Therapeutic drumming is perfectly suited for many of the unique social and cultural challenges of OSD because music is “the universal language.” Students can participate, contribute, and even demonstrate leadership, regardless of language or level of previous musical experience. Participation in the drumming activities is not precluded by test scores, language proficiency, socioeconomic status, or any other factors, and in that sense, is a fantastically level playing field. Everyone participates, all instruments provided, no experience necessary, 100% hands-on, musical education, with numerous opportunities for individual and group success. Multiculturalism and appreciation of diversity are core components of every lesson, and the instruments the students play represent a variety of cultures worldwide.

The DrumBus program will measure its impact on the school communities via the California Healthy Kids Survey (CHKS). Students within the Opportunity Classroom setting will be monitored with the use of pre and post surveys. CHKS surveys will assess outcomes in the Opportunity Classroom setting, describing how the DrumBus program assisted the students in focusing their attention, collaborating with classmates, managing difficult emotions and having positive self-esteem.

Program Overview

Total number of students: Approximately 2,500

Frequency: DrumBus will support students In Oxnard School District for a total of 88 days. 5th graders will receive 4 hours per student over 4 visits. Middle schools will receive 12-16 visits for the Opportunity classes. DrumBus will also facilitate several staff development days either on the DrumBus or inside a building as part of special meetings or team-building functions. These could be for staff at individual schools, OSD district office personnel, a meeting with principals, community members, or special parental groups. Periodically we’ll work with the SDC classrooms.

Maximum class size on the DrumBus: 36 students. Students will rotate through the DrumBus in groups of 36, for 50-minutes each group, until all students have participated. Sessions will include drumming and reflection.

Facilitators: DrumBus will hire, train, and support the facilitators. Selecting the right facilitators is paramount since they will literally make or break this program. It is essential that we hire people from within the community that can relate with and know how to connect with the students being served.

Training: Each facilitator will receive up to 20 hours of training as a DCF (drum circle facilitator) and trained specifically in the Beat the Odds program. DrumBus will provide this training. We request an Oxnard school to hold the trainings.

Trainers: Cameron Tummel, a professional interactive rhythm-event facilitator and trainer for 25 years, will lead the project. Cameron, in conjunction with other DrumBus staff, will conduct the facilitator trainings. He will also be on site, at the schools, working directly with facilitators about half the time.

Expenses: DrumBus will provide the classroom (DrumBus), hire and train facilitators, maintain the DrumBus, keep it in good mechanical condition, pay for all gas, insurance and maintenance.

Safety: The DrumBus will always be parked while students are on board. The bus will never travel with students on board; however, the bus meets all safety standards for school buses as described in California law.

- B. Following submission of a proposal or bid for the performance of the Services, Consultant was selected by the District to perform the Services.
- C. The Parties desire to formalize the selection of Consultant for performance of the Services and desire that the terms of that performance be as particularly defined and described herein.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained here and other consideration, the value and adequacy of which are hereby acknowledged, the parties agree as follows:

- Incorporation of Recitals and Exhibits.** The Recitals set forth above and all exhibits attached to this Agreement, as hereafter amended, are incorporated by this reference as if fully set forth herein.
- Term of Agreement.** Subject to earlier termination as provided below, this Agreement shall remain in effect from August 8, 2019 through June 30, 2020 (the “Term”). This Agreement may be extended only by amendment, signed by the Parties, prior to the expiration of the Term.
- Time for Performance.** The scope of services set forth in **Exhibit A** shall be completed during the Term pursuant to the schedule specified **Exhibit A**. Should the scope of services not be completed pursuant to that schedule, the Consultant shall be deemed to be in Default as provided below. The District, in its sole discretion, may choose not to enforce the Default provisions of this Agreement and may instead allow Consultant to continue performing the Services.
- Compensation and Method of Payment.** Subject to any limitations set forth below or elsewhere in this Agreement, District agrees to pay Consultant the amounts specified in **Exhibit B** “Compensation”. The total compensation shall not exceed Twenty Thousand Dollars (\$20,000.00), per attached proposal/rate sheet, unless additional compensation is approved in writing by the District.

- a. Each month Consultant shall furnish to District an original invoice for all work performed and expenses incurred during the preceding month. The invoice shall detail charges by the following categories: labor (by sub-category), travel, materials, equipment, supplies, and sub-consultant contracts. Sub-consultant charges, if any, shall be detailed by the following categories: labor, travel, materials, equipment and supplies. District shall independently review each invoice submitted by the Consultant to determine whether the work performed and expenses incurred are in compliance with the provisions of this Agreement. In the event that no charges or expenses are disputed, the invoice shall be approved and paid according to the terms set forth in subsection b. In the event any charges or expenses are disputed by District, the original invoice shall be returned by District to Consultant for correction and resubmission.
- b. Except as to any charges for work performed or expenses incurred by Consultant which are disputed by District, District will use its best efforts to cause Consultant to be paid within forty-five (45) days of receipt of Consultant's correct and undisputed invoice.
- c. Payment to Consultant for work performed pursuant to this Agreement shall not be deemed to waive any defects in work performed by Consultant.

5. **Termination.** This Agreement may be terminated at any time by mutual agreement of the Parties or by either Party as follows:

- a. District may terminate this Agreement, with or without cause, at any time by giving thirty (30) days written notice of termination to Consultant. In the event such notice is given, Consultant shall cease immediately all work in progress; or

6. **Inspection and Final Acceptance.** District may, at its discretion, inspect and accept or reject any of Consultant's work under this Agreement, either during performance or when within sixty (60) days after submitted to District. If District does not reject work by a timely written explanation, Consultant's work shall be deemed to have been accepted. District's acceptance shall be conclusive as to such work except with respect to latent defects, fraud and such gross mistakes as amount to fraud. Acceptance of any of Consultant's work by District shall not constitute a waiver of any of the provisions of this Agreement including, but not limited to indemnification and insurance provisions.

7. **Default.** Failure of Consultant to perform any Services or comply with any provisions of this Agreement may constitute a default. The District may give notice to Consultant of the default and the reasons for the default. District shall not have any obligation or duty to continue compensating Consultant for any work performed after the date of the notice until the default is cured. The notice shall include the timeframe in which Consultant may cure the default. This timeframe is presumptively thirty (30) days, but may be extended, though not reduced, at the discretion of the District. During the period of time that Consultant is in default, the District shall hold all invoices and shall, when the default is cured, proceed with payment on the invoices. If Consultant does not cure the default, the District may terminate this Agreement as provided above. Any failure on the part of the District to give notice of the Consultant's default shall not be deemed to result in a waiver of the District's legal rights or any rights arising out of any provision of this Agreement.

8. **Ownership of Documents.** All maps, models, designs, drawings, photographs, studies, surveys, reports, data, notes, computer files, files and other documents prepared, developed or discovered by Consultant in the course of providing any services pursuant to this Agreement (collectively and individually, the "Documents") shall

become the sole property of District and may be used, reused or otherwise disposed of by District without the permission of the Consultant. Upon completion, expiration or termination of this Agreement, Consultant shall turn over to District all such Documents.

9. **Use of Documents by District.** If and to the extent that District utilizes for any purpose not related to this Agreement any Documents, Consultant's guarantees and warrants related to Standard of Performance under this Agreement shall not extend to such use of the Documents.

- b. Any and all such records or documents shall be made available for inspection, audit and copying, at any time during regular business hours, upon request by District or its designated representative. Copies of such documents or records shall be provided directly to the District for inspection, audit and copying when it is practical to do so; otherwise, unless an alternative is mutually agreed upon, such documents and records shall be made available at Consultant's address indicated for receipt of notices in this Agreement.

Neither Consultant, nor any of Consultant's officers, employees or agents, shall, by virtue of services rendered under this Agreement, obtain any rights to retirement, health care or any other benefits which may otherwise accrue to District's employees. Consultant will be responsible for payment of all Consultant's employees' wages, payroll taxes, employee benefits and any amounts due for federal and state income taxes and Social Security taxes since these taxes will not be withheld from payment under this agreement.
- b. Consultant shall have no authority to bind District in any manner, or to incur any obligation, debt or liability of any kind on behalf of or against District, whether by contract or otherwise, unless such authority is expressly conferred in writing by District, or under this Agreement.

12. **Standard of Performance.** Consultant represents and warrants that it has the qualifications, experience and facilities necessary to properly perform the services required under this Agreement in a thorough, competent and professional manner. Consultant shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all services described herein. In meeting its obligations under this Agreement,

Consultant shall employ, at a minimum, generally accepted standards and practices utilized by persons engaged in providing services similar to those required of Consultant under this Agreement.

Ventura County SELPA
AGREEMENT
FOR SOCIAL/EMOTIONAL SERVICES SPECIALIST
2019-2020

This will serve as an agreement with Oxnard School District to cover hourly costs for services provided by VC SELPA staff as follows:

Social/Emotional Services Specialist

Hours/Days per week: 52 hours per week

Cost per hour: \$90.00 per hour

Formula: (52 hrs/wk x \$90/hr) = \$4,680.00 x 48 weeks = \$224,640.00

This is an eleven-month program, from September 1st-July 31st each year. SELPA staff are classified employees of the Ventura County Office of Education (VCOE) and will be paid for any regularly scheduled work day of the VCOE, regardless of District calendar, including paid vacations. Some staff are ten-month employees only, in which case district will be billed September 1st to June 30th only.

SELPA Social/Emotional Services Specialists and District Administrator will work together to develop a schedule of duties to best meet the District's needs. SELPA Specialists will be accountable to the District for carrying out these duties and will provide a monthly schedule to district upon request.

The District will be responsible for costs for **all regularly scheduled times**, regardless of whether or not direct services are provided. *Prior authorization by District Administrator must be obtained* if extra overtime hours are necessary in order to accomplish duties requested by the District. Overtime hours will be accrued as compensation time at 1 ½ hours per hour.

Acceptable reasons for not providing regularly scheduled services to students may be District request for other duties (such as assessments or IEP meetings), student absence or unavailability, staff vacations, compensation time, and sick leave or in-service.

The SELPA Director will work with Social/Emotional Services Specialists to schedule compensation time, vacations, and other employee absences to result in minimal disruption of services to students, absorbed as equally as possible by all Districts within the Specialist's schedule. The SELPA Director will provide supervision to staff.

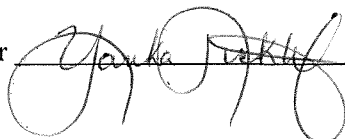

The District Special Education Director will receive a quarterly statement noting amount spent. The SELPA will bill the district directly, unless another account has been indicated by the District Special Education Director.

*Please note, in the event of district's need to reduce hours, the SELPA must be given 90 days notice of the district's intent to reduce hours. If a 90 day notice is not given, the district will be billed during that period for the original contracted hours.

This agreement is in effect from September 1, 2019 through July 31, 2020.

The notice shall include the timeframe in which Consultant may cure the default. If Consultant does not cure the default, the District may terminate this Agreement as provided above. OPERATIVE PROVISIONS

- Term of Agreement.** Subject to earlier termination as provided below, this Agreement shall remain in effect from August 8, 2019 through June 30, 2020 (the “Term”). This Agreement may be extended only by amendment, signed by the Parties, prior to the expiration of the Term.
- Time for Performance.** The scope of services set forth in **Exhibit A** shall be completed during the Term pursuant to the schedule specified **Exhibit A**. Should the scope of services not be completed pursuant to that schedule, the Consultant shall be deemed to be in Default as provided below. The District, in its sole discretion, may choose not to enforce the Default provisions of this Agreement and may instead allow Consultant to continue performing the Services.
- Compensation and Method of Payment.** Subject to any limitations set forth below or elsewhere in this Agreement, District agrees to pay Consultant the amounts specified in **Exhibit B** “Compensation”. The total compensation shall not exceed Five Thousand Dollars (\$5,000.00), per the attached hourly rate sheet as listed, unless additional compensation is approved in writing by the District.

- a. Each month Consultant shall furnish to District an original invoice for all work performed and expenses incurred during the preceding month. The invoice shall detail charges by the following categories: labor (by sub-category), travel, materials, equipment, supplies, and sub-consultant contracts. Sub-consultant charges, if any, shall be detailed by the following categories: labor, travel, materials, equipment and supplies. District shall independently review each invoice submitted by the Consultant to determine whether the work performed and expenses incurred are in compliance with the provisions of this Agreement. In the event that no charges or expenses are disputed, the invoice shall be approved and paid according to the terms set forth in subsection b. In the event any charges or expenses are disputed by District, the original invoice shall be returned by District to Consultant for correction and resubmission.
- b. Except as to any charges for work performed or expenses incurred by Consultant which are disputed by District, District will use its best efforts to cause Consultant to be paid within forty-five (45) days of receipt of Consultant's correct and undisputed invoice.
- c. Payment to Consultant for work performed pursuant to this Agreement shall not be deemed to waive any defects in work performed by Consultant.

5. **Termination.** This Agreement may be terminated at any time by mutual agreement of the Parties or by either Party as follows:

District's acceptance shall be conclusive as to such work except with respect to latent defects, fraud and such gross mistakes as amount to fraud. Acceptance of any of Consultant's work by District shall not constitute a waiver of any of the provisions of this Agreement including, but not limited to indemnification and insurance provisions.

The notice shall include the timeframe in which Consultant may cure the default. Guidelines

AML-Global will confirm the interpretation assignment with the client. AML-Global reserves the most qualified and experienced interpreters for each job. In order to ensure a successful event AML-Global will be requesting specific background information about the presentations and detailed information and terminology specific to your client and/or their industry. Failure to provide this information on a timely basis or at all may severely hamper the interpreter’s ability to do their job effectively. AML-Global will not be responsible for subpar performance due to lack of information preceding the event.

The quote does not include labor charges that may be required due to unforeseen circumstances including acts of nature, after the contract is executed. AML-Global is not responsible for

Optional Certification

If you need the document certified, an additional \$50.00 per certification will be charged. In order not to delay processing, the client must provide the document title, on a timely basis. AML–Global will create a title if we are not given one in a timely manner. AML-Global certification process is as follows: AML-Global certifies in a one page affidavit that the completed translation is a true and accurate representation of the original document. We affirm that we have retained a professional translator. We then notarize the affidavit on one separate page and mail the client the original copy. If you would like to see an example of what we use, please request one and we will be happy to send it to you.

We utilize National Association Notary forms to notarize the affidavit, which constitutes the official “Certification”. AML-Global cannot guarantee that these forms will be acceptable to the institution they are being sent to and we are not responsible for the decisions of the receiving party. The forms we use are industry standard and are generally acceptable. Before starting the assignment, and depending on the

language combination, an ATA Certified, Judicial Council or other State Certified linguist may be requested, to translate and/or to certify the translations. If this is requested and/or we are required to change our standard certification and/or translation process, we are happy to do so, but please note this may affect the total cost of the project. If this is requested after the start of the project, this will affect the total cost of the project.

Translation Process

As an ISO 9001 and 13485 Certified company we adhere to comprehensive and well established processes to achieve the highest quality translations. Our translation process centers on a 360 degree feedback mechanism. It starts with our experienced teams of native speaking linguists and project managers who translate and edit text. The text is translated, reviewed by an external editor and reviewed again by our multilingual project managers. Adjustments are made accordingly throughout the process to ensure the final product is a consistent and precisely accurate localized document. To augment our quality system we have the most up to date document technology available and all documents are treated with the highest degree of confidentiality and security within our entire system. Our detailed processes have proven to be highly effective over a long period of time.

Deliverables

To achieve the highest quality of translation, AML-Global requests that each client provide us with a preferential glossary of terms (if one exists). This will ensure that preferential word usage is properly followed.

There are many options for delivery to complete a project (Word, PDF, Excel, rolling basis, with bates numbers, etc.). In the outset of the project, you will decide what methods you will require. AML-Global will need all instructions and all files, including source files at the inception of the project. If all files are not received on a timely basis or any changes occur afterwards, this may lead to adjustments in delivery schedules as well as additional fees being charged.

Post Delivery & Editing

Please note the client has a right within 14 business days to ask AML-Global to review any potential adjustments to the translation project that may be needed and to determine if they are preferential in nature. If they are preferential in nature and the client has not provided a glossary of terms for the words and phrases in question, AML-Global has the right to charge for these post edits at the hourly fee of \$75.00/hour with a 1-hour minimum. After 14 days, AML-Global has the right to charge for any changes.

If the project involves desktop publishing (DTP), editing, or formatting, and editing needs to be made post final delivery, this will result in additional costs at the same hourly rates quoted at the start of the project. Please note that the turnaround times quoted do not include time for client review, preferential changes and post editing. Proofing of final documents in which the client has provided DTP services will be billed at \$75 per hour.

4. **Compensation and Method of Payment.** Subject to any limitations set forth below or elsewhere in this Agreement, District agrees to pay Consultant the amounts specified in **Exhibit B** “Compensation”. The total compensation, including reimbursement for actual expenses, shall not exceed One Hundred Twelve Thousand Sixty Dollars (\$112,060.00), unless additional compensation is approved in writing by the District. The invoice shall detail charges by the following categories: labor (by sub-category), travel, materials, equipment, supplies, and sub-consultant contracts. Sub-consultant charges, if any, shall be detailed by the following categories: labor, travel, materials, equipment and supplies. District shall independently review each invoice submitted by the Consultant to determine whether the work performed and expenses incurred are in compliance with the provisions of this Agreement. District's acceptance shall be conclusive as to such work except with respect to latent defects, fraud and such gross mistakes as amount to fraud. Acceptance of any of Consultant's work by District shall not constitute a waiver of any of the provisions of this Agreement including, but not limited to indemnification and insurance provisions.

7. **Default.** Failure of Consultant to perform any Services or comply with any provisions of this Agreement may constitute a default. The District may give notice to Consultant of the default and the reasons for the default. If Consultant does not cure the default, the District may terminate this Agreement as provided above. RE: Defense and Indemnity Obligations Under Contract

Dear Ms. Atilano:

This letter serves to advise that the County of Ventura maintains a self-insured retention (SIR) of liability coverage of \$1.0 million. County agencies and local school districts often partner to provide services, necessitating the two entities to enter into agreements wherein the entities are obligated to extend coverage, defend, and indemnify, for the acts and/or omissions of their agents.

This confirms that the County will honor its obligation under the SIR, as it would had there been an insurance policy in force under which the school district would be an additional insured. Where your districts would ordinarily look for an additional insured endorsement to document that obligation, this letter serves the purpose of that endorsement, since there is no policy upon which to endorse within the SIR.

Thank you for your assistance in mutually developing this understanding. Should you have any questions or concerns, I remain available.

Sincerely,

Chuck Pode

Oxnard, CA 93030

This letter is written in response to your District's request for a workshop to be provided by our firm on Associated Student Body (ASB) accounting procedures. Attached to this letter is an outline of the topics covered in the workshop.

Attendees

Of course, for the workshop to be the most effective, we encourage personnel from all aspects of ASB to attend. This would include principals, vice-principals, advisors, teachers, coaches, students, secretaries and bookkeepers. We also want to tailor the workshop to meet the specific needs of the District.

Format

The workshop will be presented in a lecture format, with an accompanying Power Point presentation. We will need a room with lights that can be dimmed and a projection screen. We can provide our own computer and projector, but if you have one readily available, please let us know. We also allow time during and after the workshops for questions and answers from attendees.

Date and Time

The workshop will be held on October 1, 2019 at a time to be determined for approximately 2½ to 3 hours. At the conclusion of the session, we may ask participants to complete a workshop evaluation.

Presenter

The workshop will be presented by Faith Kondrit. As an audit supervisor in the firm, she has years of experience auditing and advising ASBs of all sizes throughout California. She has either presented or co-presented this workshop numerous times.

Cost

The cost is \$960 for the workshop. The District will also be billed for mileage at the standard IRS rate.

Of course, the workshop will be tailored to your district. In other words, you tell us how much time you want us to spend going over particularly troublesome areas, and we'll do it. Attached is a proposed agenda for your review and approval prior to the workshop.

We thank you for allowing us the opportunity to provide this workshop to the District. If you are in agreement with the terms of this proposal, please sign in the space below, make a copy for your records, and return the original to my office. We look forward to hearing from you.

I. Overview

This Customer Statement of Work (“SOW”) is made pursuant to the Agreement dated September 1, 2019 between Ellevation and Oxnard School District (“Customer”). This Customer Statement of Work #4 including (collectively referred to as the (“Sow-4”) shall describe in detail the scope of the Services for the next period of the Agreement term. The terms and conditions of the Agreement are deemed incorporated herein by this reference. The products and Services to be provided by Ellevation pursuant to this Sow-4 and the Agreement are sometimes referred to herein collectively as the “Program.” The term of this Sow-4 shall commence on the Effective Date and shall terminate on August 31, 2020, or later if mutually agreed by the Parties in writing.

II. Introduction and Purpose

The purpose of this Sow-4 is to outline the scope and completion criteria for the ongoing support of Ellevation. Our processes are based on success, building on a collaborative relationship between our Customer and our Partner Support Organization. Your Ellevation Engagement Director (ED) will continue to provide direction, oversight, communication, and project execution to support both the Ellevation team and your OSD team in moving the project forward.

Your Ellevation Implementation Manager will continue to work closely with the OSD to provide project planning and product specialist consulting. Day-to-day product related questions will be managed by the Ellevation Help Desk. This will ensure that all issues are tracked and can be resolved quickly and efficiently.

Year two (2) will provide the opportunity to reflect on the progress made in year one (1), assess OSD priorities, and set new goals for implementation. The phases for implementation in year 2 may overlap and in some cases may also be cyclical depending upon the scheduled deployment of particular features. Ellevation’s Partner Support Organization (PSO) utilizes a six-phase implementation process with clearly defined steps, deliverables, and timeframes. A detailed overview of the implementation process for year 2 is delineated below:

Please read through this Sow-4 entirely to gain an understanding of the expected scope, Ellevation deliverables, and any Customer responsibilities.

III. Customer Goals

Dr. Batista and members of the OSD team articulated the following goals for the implementation of Ellevation:

1. EL leads will analyze multiple pieces of data and monitor language proficiency growth in order to create groups and provide targeted instruction based on student needs.
2. EL leads will use Ellevation to streamline and conduct reclassification meetings for 100% of students meeting exit criteria. In addition, users will leverage the exit center to monitor progress for all students missing criteria in order to determine validity of exit measures and provide targeted support to ensure timely and appropriate reclassification.
3. Classroom teachers will complete monitoring forms for 100% of RFEP students during the Spring. In addition, EL leads will review flagged forms and follow up with 100% of classroom teachers within four weeks of the form due date, in order to address flagged concerns and identify next steps to ensure RFEP students are appropriately supported.

IV. Scope and Schedule

This Statement of Work (Sow-4) describes the work, deliverables, and services to be provided in program year 2. Services shall be based on the deliverables agreed to between the parties and further described in this document. Precise dates will be reflected in the weekly status report provided by Ellevation and the associated meeting agendas. This Sow-4 references specific service deliverables. These dates are dependent on various factors and may change the delivery schedule if certain conditions arise.

SOW-4 does not include items or issues yet to be identified that may or may not result in changes to scope that have not yet been vetted through the discovery process. Any such items would only be added to Sow-4 via the change control process noted in Appendix C of this document.

RECITALS

WHEREAS, EDUCATIONAL INSTITUTION operates a School, as defined by State Law located in California and wishes to engage MAXIM to provide personnel to supplement EDUCATIONAL INSTITUTION's staff.

WHEREAS, MAXIM operates a supplemental staffing agency and employs licensed health care personnel to provide healthcare services to EDUCATIONAL INSTITUTION.

THEREFORE, in consideration of the above premises set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, and intending to be legally bound, EDUCATIONAL INSTITUTION and MAXIM hereby agree to the following terms and conditions.

ARTICLE 1. TERM OF AGREEMENT

Section 1.1 Term. This Agreement will be in effect for the period of May 2, 2019 through June 30, 2020 and will be automatically renewed at the end of the first year and each subsequent year unless terminated.

Section 1.2 Termination. Either party may terminate this Agreement at any time, with or without cause, by providing at least thirty (30) days advance written notice of the termination date to the other party. Such termination will have no effect upon the rights and obligations resulting from any transactions occurring prior to the effective date of the termination.

ARTICLE 2. RESPONSIBILITIES OF MAXIM

Section 2.1 Services. MAXIM will, upon request by EDUCATIONAL INSTITUTION, provide one or more licensed or certified health care providers (i.e. LPNs, RNs, SLPs, School Psychologists, SPED Teachers, BCBA's, and other various health and related services personnel) as specified by EDUCATIONAL INSTITUTION (collectively, "Personnel") for supplemental staffing services, subject to availability of qualified Personnel. Subject to the terms of Section 6.8 of this Agreement, to the extent that MAXIM is unable to provide the type of healthcare provider requested by EDUCATIONAL INSTITUTION, MAXIM will provide EDUCATIONAL INSTITUTION with a higher skilled healthcare provider. MAXIM must, however, bill that higher skilled provider at that provider's fair market value rate.

Section 2.2 Personnel. MAXIM will supply EDUCATIONAL INSTITUTION with Personnel who meet the following criteria and will provide evidence of the following to EDUCATIONAL INSTITUTION upon written request:

- 1) Possess current state license, certification(s) and/or credential(s), as applicable and appropriate for the services provided to EDUCATIONAL

INSTITUTION, documentation of which will be kept in the MAXIM employee file and will be provided to EDUCATIONAL INSTITUTION as requested in writing.

- 2) Skills competency evaluation, if applicable, to be verified by a MAXIM clinician.
- 3) Completed MAXIM standard OSHA and HIPAA training.
- 4) Complete state-specific background checks and health assessment requirements, as defined by state-specific educational code.
- 5) MAXIM will ensure completion of documentation, as requested by EDUCATIONAL INSTITUTION, to assist in Local Education Agency reimbursement.

Section 2.3 Insurance. MAXIM will maintain (at its sole expense), or require the individuals it provides under this Agreement to maintain, valid policies of insurance evidencing general and professional liability coverage of not less than \$1,000,000 per occurrence and \$3,000,000 in the aggregate, covering the sole negligent acts or omissions which may give rise to liability for services provided under this Agreement. MAXIM will provide a certificate of insurance evidencing such coverage upon request by EDUCATIONAL INSTITUTION.

Section 2.4 Use of Independent Contractors and Subcontractors. Personnel provided to EDUCATIONAL INSTITUTION are employees of MAXIM and are subject to MAXIM'S standard screening process, as well as additional qualifications as required in this Agreement. If MAXIM deems it necessary to obtain the services of a subcontractor to fulfill its requirements under this Agreement, MAXIM will notify EDUCATIONAL INSTITUTION in writing of its intent to use subcontractors and will obtain written approval from EDUCATIONAL INSTITUTION. MAXIM will ensure that any subcontractor will comply with all applicable terms of this Agreement. MAXIM will provide written notification to EDUCATIONAL INSTITUTION if it becomes necessary for MAXIM to utilize independent contractors to fulfill its staffing obligations to EDUCATIONAL INSTITUTION. Any Personnel provided to EDUCATIONAL INSTITUTION by an independent contractor will be subject to the same qualifications as MAXIM employees.

Section 2.5 Employment and Taxes. MAXIM will follow its standard employment policies and procedures to verify that all Personnel meet applicable licensing requirements. MAXIM, or its subcontractor if applicable, will maintain direct responsibility as employer for the payment of wages and other compensation, and for any applicable mandatory withholdings and contributions such as federal, state, and local income taxes, social security taxes, worker's compensation, and unemployment insurance. EDUCATIONAL INSTITUTION shall be responsible for any sales tax, gross receipts tax, excise tax or other state taxes applicable to the Services provided by MAXIM.

ARTICLE 3. RESPONSIBILITIES OF EDUCATIONAL INSTITUTION

Section 3.1 Orientation. EDUCATIONAL INSTITUTION will promptly provide MAXIM Personnel with an adequate and timely orientation to EDUCATIONAL INSTITUTION. EDUCATIONAL INSTITUTION shall review instructions regarding confidentiality (including student and employee), and orient MAXIM Personnel to the specific Exposure Control Plan of the EDUCATIONAL INSTITUTION as it pertains to OSHA requirements for bloodborne pathogens, as well as any of the EDUCATIONAL INSTITUTION'S specific policies and procedures provided to MAXIM for such purpose.

Section 3.2 Requests for Personnel. EDUCATIONAL INSTITUTION will use its best efforts to request Personnel at least twenty-four (24) hours prior to reporting time in order to assure prompt arrival of assigned Personnel. All information regarding

reporting time and assignment will be provided by EDUCATIONAL INSTITUTION at the time of the initial call.

- Section 3.3 Short-Notice Requests.** MAXIM will bill EDUCATIONAL INSTITUTION for the entire shift if an order for staff is made less than two (2) hour(s) prior to the start of the shift, as long as the Personnel report for work within a reasonable prompt period of time under existing conditions after receiving notice of the assignment.
- Section 3.4 Staff Order Cancellation.** If FACILITY changes or cancels an order less than two (2) hours prior to the start of a shift, MAXIM will bill FACILITY for two (2) hours at the established fee for each scheduled Personnel. MAXIM will be responsible for contacting MAXIM Personnel prior to reporting time.
- Section 3.5 Responsibility for Student Care.** EDUCATIONAL INSTITUTION retains full authority and responsibility for professional and medical management of care for each of its students, for developing and providing Individualized Healthcare Plans (IHP's) for its students, and for ensuring that services provided be MAXIM Personnel under this agreement are furnished in a safe and effective manner and in accordance with applicable standards.
- Section 3.6 Placement Fee.** For a period of twelve (12) months following that date on which MAXIM Personnel last worked a shift at EDUCATIONAL INSTITUTION, EDUCATIONAL INSTITUTION agrees that it will take no steps to recruit, hire or employ as its own employees or as a contractor those Personnel provided by MAXIM during the term of this Agreement. EDUCATIONAL INSTITUTION understands and agrees that MAXIM is not an employment agency and that Personnel are assigned to the EDUCATIONAL INSTITUTION to render temporary service(s) and are not assigned to become employed by the EDUCATIONAL INSTITUTION. The EDUCATIONAL INSTITUTION further acknowledges and agrees that there is a substantial investment in business related costs incurred by MAXIM in recruiting, training and employing Personnel, to include advertisement, recruitment, interviewing, evaluation, reference checks, training, and supervising Personnel. In the event that EDUCATIONAL INSTITUTION, or any affiliate, subsidiary, department, or division of EDUCATIONAL INSTITUTION hires, employs or solicits MAXIM Personnel, EDUCATIONAL INSTITUTION will be in breach of this Agreement. EDUCATIONAL INSTITUTION agrees to give MAXIM either (a) one hundred and eighty (180) days prior written notice of its intent to hire, or employ, continuing to staff Personnel through MAXIM for a minimum of thirty-six (36) hours per week through the one hundred and eighty (180) days notice period; OR (b) to pay MAXIM a placement fee equal to the greater of: five thousand dollars (\$5,000) or the sum of thirty percent (30%) of such Personnel's annualized salary (calculated as Weekday Hourly Bill Rate x 2080 Hours x 30%).
- Section 3.7 Per Diem or Short Term Staff Non-Performance.** If EDUCATIONAL INSTITUTION concludes, in its sole discretion, that any Personnel provided by MAXIM have engaged in misconduct, or have been negligent, EDUCATIONAL INSTITUTION may require the Personnel to leave the premises and will notify MAXIM immediately in writing, providing in reasonable detail the reason(s) for such dismissal. EDUCATIONAL INSTITUTION'S obligation to compensate MAXIM for such Personnel's services will be limited to the number of hours actually worked. MAXIM will not reassign the individual to EDUCATIONAL INSTITUTION without prior approval of the EDUCATIONAL INSTITUTION.
- Section 3.8 Per Diem or Short Term Staff Right to Dismiss.** EDUCATIONAL INSTITUTION may request the dismissal of any MAXIM Personnel for any reason. EDUCATIONAL INSTITUTION agrees to notify MAXIM of any such action immediately in writing, providing in reasonable detail the reason(s) for such

dismissal. EDUCATIONAL INSTITUTION shall be obligated to compensate MAXIM for all Personnel hours worked prior to dismissal.

Section 3.9 Assignment Confirmation. MAXIM may cancel the remaining term of an assignment with notification to EDUCATIONAL INSTITUTION. MAXIM will use its best efforts to provide a qualified replacement for such cancelled Personnel within fourteen (14) days from the date of notification.

Section 3.10 Assignment Cancellation for Convenience. EDUCATIONAL INSTITUTION agrees to utilize Personnel for the specified period of time, agreed upon by both parties. Should EDUCATIONAL INSTITUTION staffing needs change and EDUCATIONAL INSTITUTION wishes to cancel Personnel already being utilized, EDUCATIONAL INSTITUTION must give MAXIM thirty (30) days' notice before cancellation date. EDUCATIONAL INSTITUTION will compensate MAXIM 50% of the uncompleted portion of the original assignment period.

Section 3.11 Insurance. EDUCATIONAL INSTITUTION will maintain at its sole expense valid policies of general and professional liability insurance with minimum limits of \$1,000,000 per occurrence and \$3,000,000 annual aggregate covering the acts or omissions of its employees, contractors and agents which may give rise to liability in connection with the Services under this Agreement. EDUCATIONAL INSTITUTION will give MAXIM prompt written notice of any material change in EDUCATIONAL INSTITUTION coverage.

Section 3.12 Incident Reports. EDUCATIONAL INSTITUTION shall report to MAXIM any unexpected incident known to involve any Personnel (such as Personnel errors, unanticipated deaths or other unanticipated student-related events or injuries known to be attributable to Personnel, and any safety hazards known to be related to the services provided by Personnel) if the incident may have an adverse impact on the EDUCATIONAL INSTITUTION and/or MAXIM in order to comply with MAXIM'S incident tracking program. Complaints and grievances regarding MAXIM Personnel may be reported to the local MAXIM representative at any time.

A conflict of interest occurs when an employee or Contractor has professional or personal interests that compete with his/her services to or on behalf of MAXIM or the EDUCATIONAL INSTITUTION, or the best interests of students. Such competing interests may make it difficult for an employee or Contractor to fulfill his or her duties impartially.

ARTICLE 7. CONFIDENTIALITY OF PROTECTED HEALTH INFORMATION

Section 7.1 Confidentiality.

A. MAXIM/EDUCATIONAL INSTITUTION Information. The parties recognize and acknowledge that, by virtue of entering into this Agreement and providing services hereunder, the parties will have access to certain information of the other party that is confidential and constitutes valuable, special, and unique property of the party. B. Terms of this Agreement. Except for disclosure to his/her legal counsel, accountant or financial or other advisors/consultants neither party nor its respective staff shall disclose the terms of this Agreement to any person who is not a party or signatory to this Agreement, unless disclosure thereof is required by law or otherwise authorized by this Agreement. In addition, if necessary, the parties agree to resist any effort to obtain access to such records or information in judicial proceedings, except such access as is expressly permitted by federal/state regulations.

To the extent that EDUCATIONAL INSTITUTION may be a "Covered Entity" as defined by HIPAA, and would therefore be subject to applicable requirements, including, but not limited to, requirements to enter into certain contracts with their "business associates," by HIPAA, the parties acknowledge that a business associate agreement is not needed due to the nature of services provided by MAXIM. Specifically, the parties acknowledge that under HIPAA, Personnel provided hereunder are considered part of EDUCATIONAL INSTITUTION's workforce and to that end, all Protected Health Information ("PHI") is created, viewed, used, maintained and otherwise stored and safeguarded in EDUCATIONAL INSTITUTION's work environment. Date of Meeting: August 7, 2019

Agenda Section: Section C: Consent Agenda

Ratification of the District's Submission of the 2019-20 Consolidated Application for Funding (Penanhoat/Crandall Plasencia)

The California Department of Education (CDE) uses the Consolidated Application (ConApp) to distribute categorical funds from various federal programs to school districts throughout California. Annually, in June, each local educational agency (LEA) submits the spring release of the application to document participation in these programs and provides assurances that the district will comply with the legal requirements of each program. Program entitlements are determined by formulas contained in the laws that created the programs. Furthermore, data submission also occurs during January/February of each school year. The January/February submission of data is a monitoring mechanism for the State and District to ensure accuracy in that data.

The District agrees to have the use of these funds reviewed and/or audited according to the standards and criteria set forth in the California Department of Education's Federal Program Monitoring (FPM). The District accepts the legal assurances for all programs as the basic legal conditions for the operation of selected projects and programs and copies of assurances are on site.

The District submitted the Consolidated Application prior to the deadline of June 28, 2019. Due to the process and timeline of completing the Consolidated Application, it is necessary to submit the required information prior to having access to the completed report, hence the request for the ratification.

FISCAL IMPACT:

Submission of application makes the district eligible for federal categorical funds for the 2019-20 fiscal year.

RECOMMENDATION:

It is the recommendation of the Assistant Superintendent, Business & Fiscal Services and the Director of Finance that the Board of Trustees ratify the District's submission of the 2019-2020 Consolidated Application for Funding.

2019-20 LCAP Federal Addendum Certification

CDE Program Contact:

Local Agency Systems Support Office, LCFF@cde.ca.gov, 916-323-5233

To receive funding under the Every Student Succeeds Act (ESSA), a local educational agency (LEA) must have a plan approved by the State Educational Agency on file with the State. Within California, LEAs that apply for ESSA funds are required to complete the Local Control and Accountability Plan (LCAP), the LCAP Federal Addendum Template (Addendum), and the Consolidated Application (ConApp). The LCAP, in conjunction with the Addendum and the ConApp, serve to meet the requirements of the ESSA LEA Plan.

In order to apply for funds, the LEA must certify that the 2017/18–2019/20 LCAP has been approved by the local governing board or governing body of the LEA. As part of this certification the LEA is agreeing to submit the LCAP Federal Addendum that has been approved by the local governing board or governing body of the LEA to the California Department of Education (CDE), and acknowledging that the LEA agrees to work with the CDE to ensure that the Addendum addresses all required provisions of the ESSA programs for which they are applying for federal education funds.

QUESTION

Detail 13/A-61.3 calls out for the metal lath to be cut and fastened on both sides at all Control Joints. However, this requires additional framing at all CJ locations to allow for the additional fastening. Please see the attached Technical Bulletin for Lath and Plaster Control Joints over Continuous Lath from the Technical Services Information Bureau. Please confirm that it is acceptable to keep the Lath continuous at all Control Joints per the Technical Bulletin and the detail shown in lieu of cutting it

ANSWER

Per the discussion with the team, it will be acceptable to keep the lath continuous at all control joints per the Technical Bulletin attached for the Classroom Building only
All other Buildings (MPR, Administration and Kindergarten) will follow the attached detail to cut the lath at all control joints

QUESTION

Detail 13/A-61.3 calls out for the metal lath to be cut and fastened on both sides at all Control Joints. However, this requires additional framing at all CJ locations to allow for the additional fastening. Please see the attached Technical Bulletin for Lath and Plaster Control Joints over Continuous Lath from the Technical Services Information Bureau. Please confirm that it is acceptable to keep the Lath continuous at all Control Joints per the Technical Bulletin and the detail shown in lieu of cutting it

ANSWER

Per the discussion with the team, it will be acceptable to keep the lath continuous at all control joints per the Technical Bulletin attached for the Classroom Building only. All other Buildings (MPR, Administration and Kindergarten) will follow the attached detail to cut the lath at all control joints.

The ASTM C1063 states the lath shall not be continuous through control joint. This standard does not explain that to do so, you must have adequate framing members/backing at both sides of the vertical control joint to secure the discontinuous ends of the lath and the flanges of the accessory. On horizontal application, additional backing is not required where the control joint spans perpendicular framing members spaced not greater than 16 inches on center.

Framing members/backing shall be specified by the architect or designer and installed where indicated on the plans. Where framing members/backing is not provided for and cannot be added for scheduling or other issues, it is recommended that the control joint is surface-applied to the face of continuous lath with tie wire. This method of installation has been successfully practiced and proven for decades. The Northwest Wall and Ceiling Bureau, the Wall and Ceiling Bureau of Northern CA. and the Technical Services Information Bureau have also approved and endorsed this installation method.

Control joints can provide stress relief from minor movement, such as that associated with hydration during the first 21 days following the initial plaster application. Control joints should not be a substitution for an expansion joint, where accommodation of structural movement is required.

WHEREAS, the District operates Elm Street Elementary School, located at 450 East Elm Street, Oxnard, California 93033 (hereinafter referred to as the "School Facility"); and

WHEREAS, the District desires to construct and modernize facilities and improvements (as more fully described below) at those portions of the School Facility identified in the Site Lease, as defined in Section 1G below (the "Site"); and

WHEREAS, the District has determined that it is in its best interests to pursue the improvements to the School Facility through the lease-leaseback method of project delivery pursuant to California Education Code §17406 which permits the governing board of the District, without advertising for bids, to lease to Contractor property owned by the District if the instrument by which property is leased requires the lessee to construct, or provide for the construction, on the leased property, of a facility for the use of the District during the term of the lease, and provides that title to that facility shall vest in the District at the expiration of the lease; and

WHEREAS, the District desires to finance a portion of the improvements utilizing the lease/leaseback methodology; and

WHEREAS, the District has conducted an RFQ process by which it selected Contractor; and

WHEREAS, the District intends to undertake work to improve the School Facility, the scope of which is generally described in **Exhibits A and B** attached hereto and incorporated by reference herein; and

WHEREAS, in connection with the approval of this Agreement, the District will enter into a site lease with Contractor, under which it will lease to Contractor the Site in order for Contractor to construct the Project as described in the Scope of Work set forth generally in **Exhibits A and B** (hereinafter referred to as the "Scope of Work"); and

WHEREAS, assuming that the District and Contractor can agree on the terms, including the price, for the additional scope of work, the District and Contractor anticipate that the scope of the Project may be amended to include additional work; and

#16-199

WHEREAS, Contractor will lease the Site back to the District pursuant to a sublease agreement, under which the District will be required to make payments to Contractor for the use and occupancy of the Site, including the Project (hereinafter the "Financing"); and

WHEREAS, Contractor represents that it is sufficiently experienced in the construction of the type of facility and type of work sought by the District and is willing to perform said work for lease and the Financing to the District, all as more fully set forth herein; and

Contractor shall assume the risk of cost overruns which were not foreseeable at the time this Agreement is entered into and the GMP determined, except for undocumented events of the type set forth in Section 19 hereof, work mandated by an outside agency after issuance of Construction Documents that could not have been reasonably foreseen from review of the Contract Documents, or costs arising from undocumented geotechnical issues. Contractor acknowledges that (i) Contractor has conducted a site inspection and is familiar with the site conditions based on records, studies and visible conditions relating to construction and labor and (ii) Contractor has reviewed the Contract Documents and is familiar with the contents thereof. District directed changes to the scope of the Project not contemplated in the Scope of Work shall be deemed Extra Work/Modifications pursuant to the procedures set forth in Section 10 of this Agreement. The GMP shall include, but not be limited to, increases in labor and materials. The GMP has been used to calculate the Tenant Improvement Payments and the Sublease Payments to be paid by the District to Contractor pursuant to the Sublease. The GMP includes the cost of all labor, materials, equipment, general conditions, overhead, profit and a Contractor Contingency as indicated above.

#16-199

The Contractor Contingency is for the purpose of covering the cost of very specific issues that may arise during construction and it may be used only upon the written agreement of the Contractor, the architect of record, and the District. The Contractor Contingency is to be used only to pay Contractor for the following enumerated reasons: (1) additional costs resulting from discrepancies in the bid buy-out process; (2) conflicts, discrepancies or errors in the Construction Documents; (3) work required by the Inspector of Record or any governmental agency involved in the permitting or approval/certification process that is not otherwise shown in the Construction Documents; and (4) any other items of cost agreed to in writing by the Contractor and District to be included in the Contractor Contingency. The Contractor Contingency shall not be used for costs incurred as a result of Contractor's acts, errors or omissions.

Contractor shall be responsible for tracking expenditures of the Contractor Contingency and shall provide periodic written updates to the District as directed. Unused Contractor Contingency and Allowances at Project completion will reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and possibly the Sublease Payments.

The District shall at all times have the right to reduce the scope of the Project. If the District reduces the scope of the Project, the GMP shall be reduced commensurate with the reduced Scope of Work pursuant to the provisions of Section 10, below, and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 6. NOTICE TO PROCEED WITH CONSTRUCTION

Upon receipt of an approved GMP, the District shall issue a notice to Contractor to proceed with the Construction of the Project. In the event that a Notice to Proceed with Construction is not issued for the Project, the Site Lease and the Sublease shall terminate upon written notice from the District to Contractor that a Notice to Proceed will not be issued.

SECTION 7. SAVINGS

If Contractor realizes a savings on one aspect of the Project, such savings shall be tracked and Contractor shall provide periodic written updates of such savings. Such savings shall be added to the Contractor Contingency and the use of such savings shall be as set forth in Section 5. However, if such savings are not so utilized, the amount of such savings shall reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 8. SELECTION OF SUBCONTRACTORS

In the interest of minimizing the expenditure of funds for the construction of the Project, Contractor agrees to select Subcontractors who are appropriately licensed by the State of California for each trade component of the Project in a manner that fosters competition. Contractor agrees that it will either solicit bids from potential subcontractors pursuant to the

- 6 -

#16-199

competitive bid procedures set forth in the California Public Contract Code, including specifically Public Contract Code section 20110, et seq., or that it will utilize an informal bidding process established by Contractor which also incorporates competitive bid procedures. Regardless of the method Contractor employs, Contractor will make a good faith effort to contact and utilize DVBE contractors and suppliers in securing bids for performance of the Project in accordance with the procedures set forth in Section 1.77 of the General Conditions. In the event that Contractor chooses to select Subcontractors pursuant to an informal bidding process, Contractor shall ensure that it receives at least three competitive quotes from potential subcontractors for each trade component of the Project, unless the parties agree otherwise on a trade-by-trade basis. The District reserves the right to oversee the bidding process. Contractor shall inform all bidders that the District will not be a party to any contracts for construction services executed by Contractor and selected bidders. Contractor shall submit a listing of proposed subcontractors to the District for the District's review. In no case, will Contractor award any sub-contracts until the District has concurred in the scope and price of the sub-contracted services. In addition, Contractor shall provide the District with full documentation regarding the bids or competitive quotes received by Contractor. In no event, shall such documentation be redacted or obliterated. In the event Contractor does not comply with this provision, the District may terminate this Agreement in accordance with the provisions of the General Conditions. Subcontractors awarded contracts by Contractor shall be afforded all the rights and protections of listed subcontractors under the provisions of the Subletting and Subcontracting Fair Practices Act (Public Contract Code Section 4100, et seq.).

SECTION 9. CONSTRUCTION SCOPE OF WORK

- A. Prior to commencing Construction, Contractor shall comply with the initial schedule requirements set forth in the General Conditions.
- B. Contractor shall complete the Construction pursuant to the Construction Documents as amended subject to any additional DSA or other regulatory approvals as may be required, performing all work set forth in the Scope of Work, and shall make reasonable efforts in scheduling to prevent disruption to classes.
- C. Contractor shall be responsible for complying with all applicable building codes, including without limitation mechanical codes, electrical codes, plumbing codes and fire codes, each of the latest edition, required by the regulatory agencies and for arranging and overseeing all necessary inspections and tests including inspections by the DSA or regulatory agencies, permits and occupancy permits, and ensuring compliance with any Federal and State laws, including, but not limited to, safety procedures and requirements, and construction employee training programs which cover among other items, hazardous chemicals and materials.

- 7 -

#16-199

- D. Contractor shall establish procedures for the protection of all existing structures, equipment, utilities, and other existing improvements, both on-site and off-site. Contractor assumes all risk of loss of vandalism, theft of property or other property damage ("Vandalism") which occurs at a site at which Contractor is undertaking construction of the Project. Contractor assumes all risk of loss which occurs where Contractor is undertaking construction of the Project from causes due to negligence or misconduct by Contractor, its officers, employees, subcontractors, licensees and invitees. Contractor shall replace District property damaged by such Vandalism or theft or compensate the District for such loss, including payment of out of pocket expenses such as insurance deductibles the District might incur under such circumstances.
- E. Contractor shall develop a mutually agreed upon program with the District to abate and minimize noise, dust, and disruption to normal activities at the existing facilities at the School Facility, including procedures to control on-site noise, dust, and pollution during construction.
- F. The District shall cause the appropriate professionals to stamp and sign, as required, the original Construction Documents or parts thereof and coordinate the Project's design with all utilities.
- G. Contractor shall, for the benefit of the Subcontractors, attend pre-construction orientation conferences in conjunction with the Architect to set forth the various reporting procedures and site rules prior to the commencement of actual construction. Contractor shall also attend construction and progress meetings with District representatives and other interested parties, as requested by the District, to discuss such matters as procedures, progress problems and scheduling. Contractor shall prepare and promptly distribute official minutes of such meetings to all parties in attendance, including without limitation the District, the Architect and the District Inspector of Record.
- H. Contractor shall incorporate approved changes as they occur, and develop cash flow reports and forecasts for submittal to the District as requested. Contractor shall provide regular monitoring of the approved estimates for Construction costs, showing actual costs for activities in progress, and estimates for uncompleted tasks. Contractor shall maintain cost accounting records on authorized additional services or work performed under unit costs, additional work performed on the basis of actual costs of labor and materials, and for other work requiring accounting records.
- I. Contractor shall record the progress of the Project and shall submit monthly written progress reports to the District and the Architect including information on the entire Project, showing percentages of completion and the number and amounts of

- 8 -

#16-199

proposed Extra Work/Modifications and their effect on the construction costs as of the date of each respective report.

- J. Contractor shall keep a log containing a record of weather, Subcontractors, work on the site, number of workers, work accomplished, problems encountered, and other similar relevant data as the District may require. Contractor shall make the log available to the District, the Architect, and the District's project manager. The District shall be promptly advised on all anticipated delays in the Project.
- K. The District shall bear the cost for the DSA Inspector, soils testing, DSA or other regulatory agency fees, and special testing required in the construction of the Project. If additional review or permits become necessary for reasons not due to Contractor's fault or because of DSA or regulatory agency requirements or regulations implemented after the date the Final GMP is established and not reasonably anticipated at the time the Final GMP is established, Contractor may seek additional compensation for the cost of that review as an additional cost. In the alternative, the District may pay such costs directly.

SECTION 10. EXTRA WORK/MODIFICATIONS

- A. The District may prescribe or approve additional work or a modification of requirements or of methods of performing the Construction which differ from the work or requirements set forth in the Construction Documents ("Extra Work/Modifications"); and for such purposes the District may at any time during the life of this Agreement, by written order, make such changes as it shall find necessary in the design, line, grade, form, location, dimensions, plan, or material of any part of the work or equipment specified in this Agreement or in the Construction Documents, or in the quantity or character of the work or equipment to be furnished. In the event conditions develop which, in the opinion of Contractor, makes strict compliance with the specifications impractical, Contractor shall notify the District of the need for Extra Work/Modifications by placing the matter on the agenda of regularly scheduled construction meetings with the District for discussion as soon as practicable after the need for the Extra Work/Modifications is determined. Additionally, Contractor shall submit to the District for its consideration and approval or disapproval, a written request for Extra Work/Modifications before such work is performed. If the District approves the request in writing, the costs of the Extra Work/Modification shall be added to or deducted from the GMP or the Scope of Work shall be modified to complete the Project within the GMP, as applicable. Any adjustments to the GMP will result in an adjustment of the Tenant Improvement Payment and, if applicable, the Sublease Payments.

- 9 -

- B. Extra Work/Modifications include work related to unforeseen underground conditions if, and only if, such conditions are not visible or identified on plans, reports or other documents available to Contractor. Extra Work/Modifications do not include underground conditions that are identified on plans, reports or other documents available to Contractor but are in a location different than is set forth on such plans, reports or other documents available to Contractor. It should be noted, however, that the District has advised and provided Contractor with information regarding the shallow water table and recent projects experience with encountering water when digging. Contractor has included in its calculation of the GMP an amount to mitigate for encountering water when completing the scope of work contemplated herein. Therefore, Extra Work/Modifications do not include expenses incurred by, and/or work performed by, Contractor in connection with such shallow water table and with encountering water when digging.
- C. Should Contractor claim that any instruction, request, drawing, specification, action, condition, omission, default or other situation (i) obligates the District to increase the GMP; or (ii) obligates the District to grant an extension of time for the completion of this Agreement; or (iii) constitutes a waiver of any provision in this Agreement, CONTRACTOR SHALL NOTIFY THE DISTRICT, IN WRITING, OF SUCH CLAIM AS SOON AS POSSIBLE, BUT IN NO EVENT WITHIN MORE THAN TEN (10) DAYS FROM THE DATE CONTRACTOR HAS ACTUAL OR CONSTRUCTIVE NOTICE OF THE CLAIM. CONTRACTOR SHALL ALSO PROVIDE THE DISTRICT WITH SUFFICIENT WRITTEN DOCUMENTATION SUPPORTING THE FACTUAL BASIS OF THE CLAIM including items used in valuing said claim. Contractor shall be required to certify under penalty of perjury the validity and accuracy of any claims submitted. Contractor's failure to notify the District within such ten (10) day period shall be deemed a waiver and relinquishment of the claim against the District.
- D. Expenses of reconstruction and/or costs to replace and/or repair damaged materials and supplies, provided that Contractor is not fully compensated for such expenses and/or costs by insurance or otherwise, shall be included in an increase to the GMP if said expenses are the result of the negligent acts or omissions of the District, or its principals, agents, servants, or employees.

SECTION 11. NOT USED

SECTION 12. PERSONNEL ASSIGNMENT

- A. Contractor shall assign **Jaime Pace** as Project Manager/Superintendent for the Project. So long as **Jaime Pace** remains in the employ of Contractor, such person shall not be changed or substituted from the Project, or cease to be fully committed to

#16-199

the Project except as provided in this Section. In the event Contractor deems it necessary, Contractor shall replace the manager and/or the superintendent for the Project with a replacement with like qualifications and experience, subject to the prior written consent of the District, which consent shall not be unreasonably withheld. Any violation of the terms of paragraph A of this Section 12 shall entitle the District to terminate this Agreement for breach, pursuant to the provisions of the General Conditions.

- B. Notwithstanding the foregoing provisions of paragraph A of Section 12, above, if any manager and/or superintendent proves not to be satisfactory to the District, upon written notice from the District to Contractor, such person(s) shall be promptly replaced by a person who is acceptable to the District in accordance with the following procedures: Within five (5) business days after receipt of a notice from the District requesting replacement of any manager and/or superintendent or discovery by Contractor that any manager and/or superintendent is leaving their employ, as the case may be, Contractor shall provide the District with the name of an acceptable replacement/substitution together with such information as the District may reasonably request about such replacement/substitution. The replacement/substitution shall commence work on the Project no later than five (5) business days following the District's approval of such replacement, which approval shall not be unreasonably withheld. If the District and Contractor cannot agree as to the replacement/substitution, the District shall be entitled to terminate this Agreement for breach pursuant to the provisions of the General Conditions.

SECTION 13. BONDING REQUIREMENTS

Contractor shall fully comply with the requirements set forth in Section 6.9 of the General Conditions.

SECTION 14. PAYMENTS TO CONTRACTOR

- A. Contractor shall finance the cost of construction of the Project which costs shall not exceed the GMP, which shall not be adjusted except as otherwise provided in this Agreement. The District shall pay Contractor Tenant Improvement Payments and Sublease Payments pursuant to the terms and conditions of Section 6 of the Sublease. In the event of a dispute between the District and Contractor, the District may withhold from the Tenant Improvement Payments and the Sublease Payments an amount not to exceed one hundred fifty percent (150%) of the disputed amount.
- B. This Agreement is subject to the provisions of California Public Contract Code Sections 7107, 7201 and 20104.50 as they may from time to time be amended.

- 11 -

#16-199

- C. For purposes of this Agreement, the acceptance by the District means acceptance made only by an action of the governing body of the District in session. Acceptance by Contractor of the final Tenant Improvement Payment or the Sublease Payment, as the case may be, shall constitute a waiver of all claims against the District related to those amounts.

SECTION 15. CONTRACTOR'S CONTINUING RESPONSIBILITY

Neither the final payment nor any provision in the Contract Documents shall relieve Contractor of responsibility for faulty materials or workmanship incorporated in the Project or for any failure to comply with the requirements of the Contract Documents.

SECTION 16. INSURANCE

Contractor shall provide, during the life of this Agreement, the types and amounts of insurance set forth in Article 6 of the General Conditions, which are incorporated by reference herein.

SECTION 17. USE OF PREMISES

Contractor shall confine operations at the Site to areas permitted by law, ordinances, permits and the Construction Documents and shall not unreasonably encumber the Site or existing School Facilities at the Site with any materials or equipment. Contractor shall not load or permit any part of the work to be loaded with a weight so as to endanger the safety of persons or property at the Site.

SECTION 18. SITE REPRESENTATIONS

The District warrants and represents that the District has, and will continue to retain at all times during the course of construction, legal title to the Site and that said land is properly subdivided and zoned so as to permit the construction and use of said Site with respect to the Project. The District further warrants and represents that title to said land is free of any easements, conditions, limitation, special permits, variances, agreements or restrictions which would prevent, limit or otherwise restrict the construction or use of said Site pursuant to this Agreement. Reference is made to the fact that the District has provided information on the Site to Contractor. Such information shall not relieve Contractor of its responsibility; and the interpretation of such data regarding the Site, as disclosed by any borings or other preliminary investigations, is not warranted or guaranteed, either expressly or implicitly, by the District. Contractor shall be responsible for having ascertained pertinent local conditions such as location, accessibility and general character of the Site and for having satisfied itself as to the conditions under which the work is to be performed. No claim for any allowances because of Contractor's error or negligence in acquainting itself with the conditions at the Site will be recognized.

- 12 -

SECTION 19. HAZARDOUS WASTE AND UNKNOWN PHYSICAL CONDITIONS

Contractor shall comply with the District's Hazardous Materials Procedures and Requirements as set forth herein.

- A. If the District has identified the presence of hazardous materials on or in proximity to the Site (the "Pre-existing Hazardous Materials"), Contractor shall review all information provided by the District that characterizes the Pre-existing Hazardous Materials and shall take the actions approved by DTSC and issued by the District necessary to address the Pre-existing Hazardous Materials in the performance of the work. Contractor shall conduct the work based on this information issued at the time contract documents are executed. Contractor shall immediately communicate, in writing, any variances from available information to the District.
- B. The District will retain an additional independent environmental consultant to perform the investigation, inspection, testing, assessment, sampling and analysis necessary to prepare and recommend a remediation plan for the Pre-existing Hazardous Materials for the District's approval (the "Remediation Plan").
- C. The District will retain title to all Pre-existing Hazardous Materials encountered during the work. This does not include hazardous material generated by Contractor, including but not limited to used motor oils, lubricants, cleaners, etc. Contractor shall dispose of such hazardous waste in accordance with the provisions of the Contract Documents, as well as local, State and Federal laws and regulations. The District will be shown as the hazardous waste generator and will sign all hazardous waste shipment manifests for non-Contractor generated hazardous waste. Nothing contained within these Contract Documents shall be construed or interpreted as requiring Contractor to assume the status of owner or generator of hazardous waste substances for non-Contractor generated hazardous wastes.
- D. Except as otherwise provided herein, it is the responsibility of Contractor to obtain governmental approvals relating to Hazardous Materials Management, including Federal and State surface water and groundwater discharge permits and permits for recycling and reuse of hazardous materials for all work noted in the contract documents. Contractor shall be responsible for coordinating compliance with such governmental approvals and applicable governmental rules with the District's hazardous materials consultant, including those governing the preparation of waste profiles, waste manifests, and bills of lading. If Contractor encounters hazardous materials, it shall immediately notify the District in writing. The District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District.

#16-199

E. If, during construction, Contractor encounters materials, conditions, waste, contaminated groundwater or substances, not identified in the District's assessment report, that Contractor reasonably suspects are hazardous materials, Contractor shall stop the affected portion of the work, secure the area, promptly notify the District, and take reasonable measures to mitigate the impact of such work stoppage. The District shall retain the services of an environmental consultant to perform investigation, inspection, testing, assessment, sampling and analysis of the suspect materials, conditions, waste, groundwater or substances.

(1) Found Not to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances do not constitute hazardous materials, Contractor shall recommence the suspended work.

(2) Found to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances constitute hazardous materials and such hazardous materials require remediation and disposal, then the District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District. All such costs shall be the responsibility of the District.

F. Exacerbation of Pre-Existing Hazardous Materials.

If during construction Contractor encounters pre-existing environmental conditions that it knew or should have known involve hazardous materials (the "Point of Discovery") (which encounters may include an unavoidable release or releases of hazardous materials) then Contractor must immediately stop the affected portion of the work. If Contractor fails to immediately stop the affected portion of the work after the Point of Discovery, then Contractor is solely responsible for any resultant Exacerbation Cost. "Exacerbate," in all its forms, means the worsening effects of Contractor's failure to stop the affected portion of work after the Point of Discovery. "Exacerbation Cost" means the differential between (i) the actual increase in the cost of remediation and delays to the Project attributable to pre-existing environmental conditions involving hazardous substances, and (ii) the cost thereof or delays thereto had Contractor immediately stopped the affected portion of the work after the Point of Discovery. The standard of "should have known" applies to Contractor's supervisory personnel, whether or not on the Site. Contractor's supervisory personnel must have had the hazardous material training required by applicable OSHA and Cal OSHA rules or regulations.

SECTION 20. INDEPENDENT CONTRACTOR

- A. Contractor is retained as an independent contractor and is not employed by the District. No employee or agent of Contractor shall become, or be considered to be, an employee of the District for any purpose. It is agreed that the District is interested only in the results obtained from service under this Agreement and that Contractor shall perform as an independent contractor with sole control of the manner and means of performing the services required under this Agreement. Contractor shall complete this Agreement according to its own methods of work which shall be in the exclusive charge and control of Contractor and which shall not be subject to control or supervision by the District except as to results of the work. It is expressly understood and agreed that Contractor and its employees shall in no event be entitled to any benefits to which the District employees are entitled, including, but not limited to, overtime, retirement benefits, insurance, vacation, worker's compensation benefits, sick or injury leave or other benefits.
- B. Contractor shall be responsible for all salaries, payments, and benefits for all of its officers, agents, and employees in performing services pursuant to this Agreement.

SECTION 21. ACCOUNTING RECORDS

Contractor, and all Subcontractors, shall check all materials, equipment and labor entering into the work and shall keep or cause to be kept such full and detailed accounts as may be necessary for proper financial management under this Agreement, including true and complete books, records and accounts of all financial transactions in the course of their activities and operations related to the Project. These documents include sales slips, invoices, payrolls, personnel records, requests for Subcontractor payment, and other data relating to all matters covered by the Contract Documents (the "Data"). The Data shall be maintained for ten (10) years from the latest expiration of the term (as such may be extended) of any of the Contract Documents. Contractor shall use its best efforts to cause its Subcontractors to keep or cause to be kept true and complete books, records and accounts of all financial transactions in the course of its activities and operations related to the Project. Upon completion of the Project, Contractor shall provide the District with one (1) complete copy of the Data.

The District, at its own costs, shall have the right to review and audit, upon reasonable notice, the books and records of Contractor and any Subcontractors concerning any monies associated with the Project.

SECTION 22. PERSONAL LIABILITY

Neither the trustees, officers, employees, or agents of District, the District's representative, or Architect shall be personally responsible for any liability arising under the Contract Documents.

SECTION 23. AGREEMENT MODIFICATIONS

No waiver, alteration or modification of any of the provisions of this Agreement shall be binding upon either the District or Contractor unless the same shall be in writing and signed by both the District and Contractor.

SECTION 24. NOTICES

Any notices or filings required to be given or made under this Agreement shall be served, given or made in writing upon the District or Contractor, as the case may be, by personal delivery or registered mail (with a copy sent via fax or regular mail) to the respective addresses given below or at such other address as such party may provide in accordance with the provisions herein. The parties irrevocably agree that any action, suit or proceeding by or among the District and Contractor shall be brought in whichever of the Superior Courts of the State of California, Ventura County, or the Federal Court for the Central District of California in Los Angeles, California, has subject matter jurisdiction over the dispute and waive any objection that they may now or hereafter have regarding the choice of forum whether on personal jurisdiction, venue, forum non conveniens or on any other ground.

SECTION 29. SUCCESSION OF RIGHTS AND OBLIGATIONS

All rights and obligations under this Agreement shall inure to and be binding upon the successors and assigns of the parties hereto.

SECTION 30. NOTIFICATION OF THIRD PARTY CLAIMS

The District shall provide Contractor with timely notification of the receipt by the District of any third-party claim relating to this Agreement, and the District may charge back to Contractor the cost of any such notification.

SECTION 32. ENTIRE AGREEMENT

This Construction Services Agreement and the additional Contract Documents as defined in paragraph C of Section 1 herein, including the Site Lease, the Sublease, and the Specifications, drawings, and plans constitute the entire agreement between Contractor and the District. The Contract Documents shall not be amended, altered, changed, modified or terminated without the written consent of both parties hereto, except as otherwise provided in Section 10 hereof.

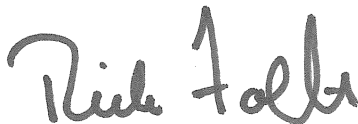

SECTION 33. EXECUTION IN COUNTERPARTS

CONSTRUCTION SERVICES AGREEMENT

This Construction Services Agreement (hereinafter referred to as the "Agreement") is entered into this Fourteenth (14th) day of December, 2016, by and between the Oxnard School District, a California school district organized and existing under the laws of the State of California (hereinafter referred to as the "District") and Bernards which is a contractor licensed by the State of California, with its principal place of business at 555 First Street, San Fernando, CA 91340 (hereinafter referred to as "Contractor").

WHEREAS, the District operates Elm Street Elementary School, located at 450 East Elm Street, Oxnard, California 93033 (hereinafter referred to as the "School Facility"); and

WHEREAS, the District desires to construct and modernize facilities and improvements (as more fully described below) at those portions of the School Facility identified in the Site Lease, as defined in Section 1G below (the "Site"); and

WHEREAS, the District has determined that it is in its best interests to pursue the improvements to the School Facility through the lease-leaseback method of project delivery pursuant to California Education Code §17406 which permits the governing board of the District, without advertising for bids, to lease to Contractor property owned by the District if the instrument by which property is leased requires the lessee to construct, or provide for the construction, on the leased property, of a facility for the use of the District during the term of the lease, and provides that title to that facility shall vest in the District at the expiration of the lease; and

WHEREAS, the District desires to finance a portion of the improvements utilizing the lease/leaseback methodology; and

WHEREAS, the District has conducted an RFQ process by which it selected Contractor; and

WHEREAS, the District intends to undertake work to improve the School Facility, the scope of which is generally described in **Exhibits A and B** attached hereto and incorporated by reference herein; and

WHEREAS, in connection with the approval of this Agreement, the District will enter into a site lease with Contractor, under which it will lease to Contractor the Site in order for Contractor to construct the Project as described in the Scope of Work set forth generally in **Exhibits A and B** (hereinafter referred to as the "Scope of Work"); and

WHEREAS, assuming that the District and Contractor can agree on the terms, including the price, for the additional scope of work, the District and Contractor anticipate that the scope of the Project may be amended to include additional work; and

#16-199

WHEREAS, Contractor will lease the Site back to the District pursuant to a sublease agreement, under which the District will be required to make payments to Contractor for the use and occupancy of the Site, including the Project (hereinafter the "Financing"); and

WHEREAS, Contractor represents that it is sufficiently experienced in the construction of the type of facility and type of work sought by the District and is willing to perform said work for lease and the Financing to the District, all as more fully set forth herein; and

WHEREAS, at the expiration of the Site Lease, title to the Site and the improvements thereon will vest with the District;

NOW, THEREFORE, in consideration of the covenants hereinafter contained, the District and Contractor agree as follows:

SECTION 1. DEFINITIONS

- A. **Construction.** The term "Construction" as used in this Agreement includes all labor and services necessary for the construction of the Project, and all materials, equipment, tools, supplies and incidentals incorporated or to be incorporated in such construction as fully described in the Scope of Work set forth in **Exhibits A and B** attached hereto. - D. **Guaranteed Maximum Price.** The term "Guaranteed Maximum Price" or "GMP" as used in this Agreement means the Guaranteed Maximum Price established pursuant to Section 5 of this Agreement to be used to calculate the Tenant Improvement Payments and the Sublease Payments to be paid by the District to Contractor pursuant to the Sublease, subject only to any adjustments for Extra Work/Modifications as provided in Section 10 of this Agreement.
- E. **Project.** The term "Project" shall mean the improvements and facilities to be constructed and installed by Contractor at the School Facility which will result in complete and fully operational facilities as more fully set forth on **Exhibits A and B** attached hereto.
- F. **Project Manual.** The term "Project Manual" shall mean the compilation of the Specification sections including Division 0, Procurement and Contracting Requirements, Division 1 General Requirements, and technical specifications Division 2 through 33 prepared by the Architect and approved by the District, the DSA, or other regulatory agencies which show or describe the location, character, dimensions or details for the Project, which shall be delivered to Contractor upon execution of this Agreement.

- M. **Tenant Improvement Payments.** The term "Tenant Improvement Payments" as used in this Agreement shall mean the payments made by the District to Contractor pursuant to Section 6 of the Sublease.

SECTION 2. CONTRACTOR'S DUTIES AND STATUS

Contractor covenants with the District to furnish reasonable skill and judgment in constructing the Project. Contractor agrees to furnish efficient business administration and superintendence and to furnish at all times an adequate supply of professionals, workers, and materials and to perform the work appropriately, expeditiously, economically, and consistent with the Contract Documents.

SECTION 3. ADDITIONAL SERVICES

If the District requests Contractor to perform additional services not described in this Agreement, Contractor shall provide a cost estimate and a written description of the additional work necessary to complete such additional services. The cost for such additional services shall be negotiated and agreed upon in writing in advance of Contractor performing or contracting for such additional services, and such cost shall be used to adjust the GMP established pursuant to Section 5 hereof. In the absence of a written agreement, the District will not compensate Contractor for additional services, will not adjust the GMP for such additional services, and Contractor will not be required to perform them. It is understood and agreed that if Contractor performs any services that it claims are additional services without receiving prior written approval from the District Board of Education, Contractor shall not be paid for such claimed additional services and the GMP will not be adjusted. Nothing in this Agreement shall be construed as limiting the valuation of such additional services and amount that the GMP will be adjusted for such additional services, should a written agreement for such services be executed by the parties. Notwithstanding the foregoing, Contractor shall not be entitled to compensation, nor will the GMP be adjusted, for additional services required as a result of Contractor's acts, errors or omissions.

SECTION 4. OWNERSHIP OF PLANS AND DOCUMENTS

All original field notes, written reports, drawings, specifications, Construction Documents, and other documents, produced or developed for the Project are the property of the District, regardless of whether the Project is constructed, and shall be furnished to the District. Such documents are not to be used by Contractor or by the Subcontractors on other work nor shall Contractor nor the Subcontractors claim any right to such documents. This shall not deprive Contractor from retaining electronic data or other reproducible copies of the Construction Documents or the right to reuse information contained in them in the normal course of Contractor's professional activities.

SECTION 5. ESTABLISHMENT OF GUARANTEED MAXIMUM PRICE

The "GMP" for the Project shall be Twenty-Three Million Three Hundred Six Thousand Eight Hundred Eighty-Six Dollars and No Cents (\$23,306,886.00). The GMP consists of (1) a Sublease Tenant Improvement Payment in the amount of Twenty-One Million Four Hundred Sixty-Two Thousand Seven Hundred One Dollars and No Cents (\$21,462,701.00) and, (2) a Contractor Contingency in the amount of Six Hundred Seventy-Eight Thousand Eight Hundred Forty-One Dollars, and No Cents (\$678,841.00), and, (3) Sublease Payments in the amount of \$97,112.00 per month for 12 months, for a total lease value of One Million One Hundred Sixty-Five Thousand Three Hundred Forty-Four Dollars and No Cents (\$1,165,344.00) pursuant to terms and payment schedule as set forth in the Sublease.

The GMP is based upon the plans and specifications existing at the time this Agreement is entered into between Contractor and the District, and more fully described and referenced in the Scope of Work set forth in **Exhibits A and B** attached hereto. Contractor shall assume the risk of cost overruns which were not foreseeable at the time this Agreement is entered into and the GMP determined, except for undocumented events of the type set forth in Section 19 hereof, work mandated by an outside agency after issuance of Construction Documents that could not have been reasonably foreseen from review of the Contract Documents, or costs arising from undocumented geotechnical issues. Contractor acknowledges that (i) Contractor has conducted a site inspection and is familiar with the site conditions based on records, studies and visible conditions relating to construction and labor and (ii) Contractor has reviewed the Contract Documents and is familiar with the contents thereof. District directed changes to the scope of the Project not contemplated in the Scope of Work shall be deemed Extra Work/Modifications pursuant to the procedures set forth in Section 10 of this Agreement. The GMP shall include, but not be limited to, increases in labor and materials. The GMP has been used to calculate the Tenant Improvement Payments and the Sublease Payments to be paid by the District to Contractor pursuant to the Sublease. The GMP includes the cost of all labor, materials, equipment, general conditions, overhead, profit and a Contractor Contingency as indicated above.

#16-199

The Contractor Contingency is for the purpose of covering the cost of very specific issues that may arise during construction and it may be used only upon the written agreement of the Contractor, the architect of record, and the District. The Contractor Contingency is to be used only to pay Contractor for the following enumerated reasons: (1) additional costs resulting from discrepancies in the bid buy-out process; (2) conflicts, discrepancies or errors in the Construction Documents; (3) work required by the Inspector of Record or any governmental agency involved in the permitting or approval/certification process that is not otherwise shown in the Construction Documents; and (4) any other items of cost agreed to in writing by the Contractor and District to be included in the Contractor Contingency. The Contractor Contingency shall not be used for costs incurred as a result of Contractor's acts, errors or omissions.

Contractor shall be responsible for tracking expenditures of the Contractor Contingency and shall provide periodic written updates to the District as directed. Unused Contractor Contingency and Allowances at Project completion will reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and possibly the Sublease Payments.

The District shall at all times have the right to reduce the scope of the Project. If the District reduces the scope of the Project, the GMP shall be reduced commensurate with the reduced Scope of Work pursuant to the provisions of Section 10, below, and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 6. NOTICE TO PROCEED WITH CONSTRUCTION

Upon receipt of an approved GMP, the District shall issue a notice to Contractor to proceed with the Construction of the Project. In the event that a Notice to Proceed with Construction is not issued for the Project, the Site Lease and the Sublease shall terminate upon written notice from the District to Contractor that a Notice to Proceed will not be issued.

SECTION 7. SAVINGS

If Contractor realizes a savings on one aspect of the Project, such savings shall be tracked and Contractor shall provide periodic written updates of such savings. Such savings shall be added to the Contractor Contingency and the use of such savings shall be as set forth in Section 5. However, if such savings are not so utilized, the amount of such savings shall reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 8. SELECTION OF SUBCONTRACTORS

In the interest of minimizing the expenditure of funds for the construction of the Project, Contractor agrees to select Subcontractors who are appropriately licensed by the State of California for each trade component of the Project in a manner that fosters competition. Contractor agrees that it will either solicit bids from potential subcontractors pursuant to the

- 6 -

#16-199

competitive bid procedures set forth in the California Public Contract Code, including specifically Public Contract Code section 20110, et seq., or that it will utilize an informal bidding process established by Contractor which also incorporates competitive bid procedures. Regardless of the method Contractor employs, Contractor will make a good faith effort to contact and utilize DVBE contractors and suppliers in securing bids for performance of the Project in accordance with the procedures set forth in Section 1.77 of the General Conditions. In the event that Contractor chooses to select Subcontractors pursuant to an informal bidding process, Contractor shall ensure that it receives at least three competitive quotes from potential subcontractors for each trade component of the Project, unless the parties agree otherwise on a trade-by-trade basis. The District reserves the right to oversee the bidding process. Contractor shall inform all bidders that the District will not be a party to any contracts for construction services executed by Contractor and selected bidders. Contractor shall submit a listing of proposed subcontractors to the District for the District's review. In no case, will Contractor award any sub-contracts until the District has concurred in the scope and price of the sub-contracted services. In addition, Contractor shall provide the District with full documentation regarding the bids or competitive quotes received by Contractor. In no event, shall such documentation be redacted or obliterated. In the event Contractor does not comply with this provision, the District may terminate this Agreement in accordance with the provisions of the General Conditions. Subcontractors awarded contracts by Contractor shall be afforded all the rights and protections of listed subcontractors under the provisions of the Subletting and Subcontracting Fair Practices Act (Public Contract Code Section 4100, et seq.).

SECTION 9. CONSTRUCTION SCOPE OF WORK

- A. Prior to commencing Construction, Contractor shall comply with the initial schedule requirements set forth in the General Conditions.
- B. Contractor shall complete the Construction pursuant to the Construction Documents as amended subject to any additional DSA or other regulatory approvals as may be required, performing all work set forth in the Scope of Work, and shall make reasonable efforts in scheduling to prevent disruption to classes.
- C. Contractor shall be responsible for complying with all applicable building codes, including without limitation mechanical codes, electrical codes, plumbing codes and fire codes, each of the latest edition, required by the regulatory agencies and for arranging and overseeing all necessary inspections and tests including inspections by the DSA or regulatory agencies, permits and occupancy permits, and ensuring compliance with any Federal and State laws, including, but not limited to, safety procedures and requirements, and construction employee training programs which cover among other items, hazardous chemicals and materials.

- 7 -

#16-199

- D. Contractor shall establish procedures for the protection of all existing structures, equipment, utilities, and other existing improvements, both on-site and off-site. Contractor assumes all risk of loss of vandalism, theft of property or other property damage ("Vandalism") which occurs at a site at which Contractor is undertaking construction of the Project. Contractor assumes all risk of loss which occurs where Contractor is undertaking construction of the Project from causes due to negligence or misconduct by Contractor, its officers, employees, subcontractors, licensees and invitees. Contractor shall replace District property damaged by such Vandalism or theft or compensate the District for such loss, including payment of out of pocket expenses such as insurance deductibles the District might incur under such circumstances.
- E. Contractor shall develop a mutually agreed upon program with the District to abate and minimize noise, dust, and disruption to normal activities at the existing facilities at the School Facility, including procedures to control on-site noise, dust, and pollution during construction.
- F. The District shall cause the appropriate professionals to stamp and sign, as required, the original Construction Documents or parts thereof and coordinate the Project's design with all utilities.
- G. Contractor shall, for the benefit of the Subcontractors, attend pre-construction orientation conferences in conjunction with the Architect to set forth the various reporting procedures and site rules prior to the commencement of actual construction. Contractor shall also attend construction and progress meetings with District representatives and other interested parties, as requested by the District, to discuss such matters as procedures, progress problems and scheduling. Contractor shall prepare and promptly distribute official minutes of such meetings to all parties in attendance, including without limitation the District, the Architect and the District Inspector of Record.
- H. Contractor shall incorporate approved changes as they occur, and develop cash flow reports and forecasts for submittal to the District as requested. Contractor shall provide regular monitoring of the approved estimates for Construction costs, showing actual costs for activities in progress, and estimates for uncompleted tasks. Contractor shall maintain cost accounting records on authorized additional services or work performed under unit costs, additional work performed on the basis of actual costs of labor and materials, and for other work requiring accounting records.
- I. Contractor shall record the progress of the Project and shall submit monthly written progress reports to the District and the Architect including information on the entire Project, showing percentages of completion and the number and amounts of

- 8 -

#16-199

proposed Extra Work/Modifications and their effect on the construction costs as of the date of each respective report.

- J. Contractor shall keep a log containing a record of weather, Subcontractors, work on the site, number of workers, work accomplished, problems encountered, and other similar relevant data as the District may require. Contractor shall make the log available to the District, the Architect, and the District's project manager. The District shall be promptly advised on all anticipated delays in the Project.
- K. The District shall bear the cost for the DSA Inspector, soils testing, DSA or other regulatory agency fees, and special testing required in the construction of the Project. If additional review or permits become necessary for reasons not due to Contractor's fault or because of DSA or regulatory agency requirements or regulations implemented after the date the Final GMP is established and not reasonably anticipated at the time the Final GMP is established, Contractor may seek additional compensation for the cost of that review as an additional cost. In the alternative, the District may pay such costs directly.

SECTION 10. EXTRA WORK/MODIFICATIONS

- A. The District may prescribe or approve additional work or a modification of requirements or of methods of performing the Construction which differ from the work or requirements set forth in the Construction Documents ("Extra Work/Modifications"); and for such purposes the District may at any time during the life of this Agreement, by written order, make such changes as it shall find necessary in the design, line, grade, form, location, dimensions, plan, or material of any part of the work or equipment specified in this Agreement or in the Construction Documents, or in the quantity or character of the work or equipment to be furnished. In the event conditions develop which, in the opinion of Contractor, makes strict compliance with the specifications impractical, Contractor shall notify the District of the need for Extra Work/Modifications by placing the matter on the agenda of regularly scheduled construction meetings with the District for discussion as soon as practicable after the need for the Extra Work/Modifications is determined. Additionally, Contractor shall submit to the District for its consideration and approval or disapproval, a written request for Extra Work/Modifications before such work is performed. If the District approves the request in writing, the costs of the Extra Work/Modification shall be added to or deducted from the GMP or the Scope of Work shall be modified to complete the Project within the GMP, as applicable. Any adjustments to the GMP will result in an adjustment of the Tenant Improvement Payment and, if applicable, the Sublease Payments.

- 9 -

- B. Extra Work/Modifications include work related to unforeseen underground conditions if, and only if, such conditions are not visible or identified on plans, reports or other documents available to Contractor. Extra Work/Modifications do not include underground conditions that are identified on plans, reports or other documents available to Contractor but are in a location different than is set forth on such plans, reports or other documents available to Contractor. It should be noted, however, that the District has advised and provided Contractor with information regarding the shallow water table and recent projects experience with encountering water when digging. Contractor has included in its calculation of the GMP an amount to mitigate for encountering water when completing the scope of work contemplated herein. Therefore, Extra Work/Modifications do not include expenses incurred by, and/or work performed by, Contractor in connection with such shallow water table and with encountering water when digging.
- C. Should Contractor claim that any instruction, request, drawing, specification, action, condition, omission, default or other situation (i) obligates the District to increase the GMP; or (ii) obligates the District to grant an extension of time for the completion of this Agreement; or (iii) constitutes a waiver of any provision in this Agreement, CONTRACTOR SHALL NOTIFY THE DISTRICT, IN WRITING, OF SUCH CLAIM AS SOON AS POSSIBLE, BUT IN NO EVENT WITHIN MORE THAN TEN (10) DAYS FROM THE DATE CONTRACTOR HAS ACTUAL OR CONSTRUCTIVE NOTICE OF THE CLAIM. CONTRACTOR SHALL ALSO PROVIDE THE DISTRICT WITH SUFFICIENT WRITTEN DOCUMENTATION SUPPORTING THE FACTUAL BASIS OF THE CLAIM including items used in valuing said claim. Contractor shall be required to certify under penalty of perjury the validity and accuracy of any claims submitted. Contractor's failure to notify the District within such ten (10) day period shall be deemed a waiver and relinquishment of the claim against the District.
- D. Expenses of reconstruction and/or costs to replace and/or repair damaged materials and supplies, provided that Contractor is not fully compensated for such expenses and/or costs by insurance or otherwise, shall be included in an increase to the GMP if said expenses are the result of the negligent acts or omissions of the District, or its principals, agents, servants, or employees.

SECTION 11. NOT USED

SECTION 12. PERSONNEL ASSIGNMENT

- A. Contractor shall assign **Jaime Pace** as Project Manager/Superintendent for the Project. So long as **Jaime Pace** remains in the employ of Contractor, such person shall not be changed or substituted from the Project, or cease to be fully committed to

#16-199

the Project except as provided in this Section. In the event Contractor deems it necessary, Contractor shall replace the manager and/or the superintendent for the Project with a replacement with like qualifications and experience, subject to the prior written consent of the District, which consent shall not be unreasonably withheld. Any violation of the terms of paragraph A of this Section 12 shall entitle the District to terminate this Agreement for breach, pursuant to the provisions of the General Conditions.

- B. Notwithstanding the foregoing provisions of paragraph A of Section 12, above, if any manager and/or superintendent proves not to be satisfactory to the District, upon written notice from the District to Contractor, such person(s) shall be promptly replaced by a person who is acceptable to the District in accordance with the following procedures: Within five (5) business days after receipt of a notice from the District requesting replacement of any manager and/or superintendent or discovery by Contractor that any manager and/or superintendent is leaving their employ, as the case may be, Contractor shall provide the District with the name of an acceptable replacement/substitution together with such information as the District may reasonably request about such replacement/substitution. The replacement/substitution shall commence work on the Project no later than five (5) business days following the District's approval of such replacement, which approval shall not be unreasonably withheld. If the District and Contractor cannot agree as to the replacement/substitution, the District shall be entitled to terminate this Agreement for breach pursuant to the provisions of the General Conditions.

SECTION 13. BONDING REQUIREMENTS

Contractor shall fully comply with the requirements set forth in Section 6.9 of the General Conditions.

SECTION 14. PAYMENTS TO CONTRACTOR

- A. Contractor shall finance the cost of construction of the Project which costs shall not exceed the GMP, which shall not be adjusted except as otherwise provided in this Agreement. The District shall pay Contractor Tenant Improvement Payments and Sublease Payments pursuant to the terms and conditions of Section 6 of the Sublease. In the event of a dispute between the District and Contractor, the District may withhold from the Tenant Improvement Payments and the Sublease Payments an amount not to exceed one hundred fifty percent (150%) of the disputed amount.
- B. This Agreement is subject to the provisions of California Public Contract Code Sections 7107, 7201 and 20104.50 as they may from time to time be amended.

- 11 -

#16-199

- C. For purposes of this Agreement, the acceptance by the District means acceptance made only by an action of the governing body of the District in session. Acceptance by Contractor of the final Tenant Improvement Payment or the Sublease Payment, as the case may be, shall constitute a waiver of all claims against the District related to those amounts.

SECTION 15. CONTRACTOR'S CONTINUING RESPONSIBILITY

Neither the final payment nor any provision in the Contract Documents shall relieve Contractor of responsibility for faulty materials or workmanship incorporated in the Project or for any failure to comply with the requirements of the Contract Documents.

SECTION 16. INSURANCE

Contractor shall provide, during the life of this Agreement, the types and amounts of insurance set forth in Article 6 of the General Conditions, which are incorporated by reference herein.

SECTION 17. USE OF PREMISES

Contractor shall confine operations at the Site to areas permitted by law, ordinances, permits and the Construction Documents and shall not unreasonably encumber the Site or existing School Facilities at the Site with any materials or equipment. Contractor shall not load or permit any part of the work to be loaded with a weight so as to endanger the safety of persons or property at the Site.

SECTION 18. SITE REPRESENTATIONS

The District warrants and represents that the District has, and will continue to retain at all times during the course of construction, legal title to the Site and that said land is properly subdivided and zoned so as to permit the construction and use of said Site with respect to the Project. The District further warrants and represents that title to said land is free of any easements, conditions, limitation, special permits, variances, agreements or restrictions which would prevent, limit or otherwise restrict the construction or use of said Site pursuant to this Agreement. Reference is made to the fact that the District has provided information on the Site to Contractor. Such information shall not relieve Contractor of its responsibility; and the interpretation of such data regarding the Site, as disclosed by any borings or other preliminary investigations, is not warranted or guaranteed, either expressly or implicitly, by the District. Contractor shall be responsible for having ascertained pertinent local conditions such as location, accessibility and general character of the Site and for having satisfied itself as to the conditions under which the work is to be performed. No claim for any allowances because of Contractor's error or negligence in acquainting itself with the conditions at the Site will be recognized.

- 12 -

SECTION 19. HAZARDOUS WASTE AND UNKNOWN PHYSICAL CONDITIONS

Contractor shall comply with the District's Hazardous Materials Procedures and Requirements as set forth herein.

- A. If the District has identified the presence of hazardous materials on or in proximity to the Site (the "Pre-existing Hazardous Materials"), Contractor shall review all information provided by the District that characterizes the Pre-existing Hazardous Materials and shall take the actions approved by DTSC and issued by the District necessary to address the Pre-existing Hazardous Materials in the performance of the work. Contractor shall conduct the work based on this information issued at the time contract documents are executed. Contractor shall immediately communicate, in writing, any variances from available information to the District.
- B. The District will retain an additional independent environmental consultant to perform the investigation, inspection, testing, assessment, sampling and analysis necessary to prepare and recommend a remediation plan for the Pre-existing Hazardous Materials for the District's approval (the "Remediation Plan").
- C. The District will retain title to all Pre-existing Hazardous Materials encountered during the work. This does not include hazardous material generated by Contractor, including but not limited to used motor oils, lubricants, cleaners, etc. Contractor shall dispose of such hazardous waste in accordance with the provisions of the Contract Documents, as well as local, State and Federal laws and regulations. The District will be shown as the hazardous waste generator and will sign all hazardous waste shipment manifests for non-Contractor generated hazardous waste. Nothing contained within these Contract Documents shall be construed or interpreted as requiring Contractor to assume the status of owner or generator of hazardous waste substances for non-Contractor generated hazardous wastes.
- D. Except as otherwise provided herein, it is the responsibility of Contractor to obtain governmental approvals relating to Hazardous Materials Management, including Federal and State surface water and groundwater discharge permits and permits for recycling and reuse of hazardous materials for all work noted in the contract documents. Contractor shall be responsible for coordinating compliance with such governmental approvals and applicable governmental rules with the District's hazardous materials consultant, including those governing the preparation of waste profiles, waste manifests, and bills of lading. If Contractor encounters hazardous materials, it shall immediately notify the District in writing. The District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District.

#16-199

E. If, during construction, Contractor encounters materials, conditions, waste, contaminated groundwater or substances, not identified in the District's assessment report, that Contractor reasonably suspects are hazardous materials, Contractor shall stop the affected portion of the work, secure the area, promptly notify the District, and take reasonable measures to mitigate the impact of such work stoppage. The District shall retain the services of an environmental consultant to perform investigation, inspection, testing, assessment, sampling and analysis of the suspect materials, conditions, waste, groundwater or substances.

(1) Found Not to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances do not constitute hazardous materials, Contractor shall recommence the suspended work.

(2) Found to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances constitute hazardous materials and such hazardous materials require remediation and disposal, then the District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District. All such costs shall be the responsibility of the District.

F. Exacerbation of Pre-Existing Hazardous Materials.

If during construction Contractor encounters pre-existing environmental conditions that it knew or should have known involve hazardous materials (the "Point of Discovery") (which encounters may include an unavoidable release or releases of hazardous materials) then Contractor must immediately stop the affected portion of the work. If Contractor fails to immediately stop the affected portion of the work after the Point of Discovery, then Contractor is solely responsible for any resultant Exacerbation Cost. "Exacerbate," in all its forms, means the worsening effects of Contractor's failure to stop the affected portion of work after the Point of Discovery. "Exacerbation Cost" means the differential between (i) the actual increase in the cost of remediation and delays to the Project attributable to pre-existing environmental conditions involving hazardous substances, and (ii) the cost thereof or delays thereto had Contractor immediately stopped the affected portion of the work after the Point of Discovery. The standard of "should have known" applies to Contractor's supervisory personnel, whether or not on the Site. Contractor's supervisory personnel must have had the hazardous material training required by applicable OSHA and Cal OSHA rules or regulations.

SECTION 20. INDEPENDENT CONTRACTOR

- A. Contractor is retained as an independent contractor and is not employed by the District. No employee or agent of Contractor shall become, or be considered to be, an employee of the District for any purpose. It is agreed that the District is interested only in the results obtained from service under this Agreement and that Contractor shall perform as an independent contractor with sole control of the manner and means of performing the services required under this Agreement. Contractor shall complete this Agreement according to its own methods of work which shall be in the exclusive charge and control of Contractor and which shall not be subject to control or supervision by the District except as to results of the work. It is expressly understood and agreed that Contractor and its employees shall in no event be entitled to any benefits to which the District employees are entitled, including, but not limited to, overtime, retirement benefits, insurance, vacation, worker's compensation benefits, sick or injury leave or other benefits.
- B. Contractor shall be responsible for all salaries, payments, and benefits for all of its officers, agents, and employees in performing services pursuant to this Agreement.

SECTION 21. ACCOUNTING RECORDS

Contractor, and all Subcontractors, shall check all materials, equipment and labor entering into the work and shall keep or cause to be kept such full and detailed accounts as may be necessary for proper financial management under this Agreement, including true and complete books, records and accounts of all financial transactions in the course of their activities and operations related to the Project. These documents include sales slips, invoices, payrolls, personnel records, requests for Subcontractor payment, and other data relating to all matters covered by the Contract Documents (the "Data"). The Data shall be maintained for ten (10) years from the latest expiration of the term (as such may be extended) of any of the Contract Documents. Contractor shall use its best efforts to cause its Subcontractors to keep or cause to be kept true and complete books, records and accounts of all financial transactions in the course of its activities and operations related to the Project. Upon completion of the Project, Contractor shall provide the District with one (1) complete copy of the Data.

The District, at its own costs, shall have the right to review and audit, upon reasonable notice, the books and records of Contractor and any Subcontractors concerning any monies associated with the Project.

SECTION 22. PERSONAL LIABILITY

All rights and obligations under this Agreement shall inure to and be binding upon the successors and assigns of the parties hereto.

SECTION 30. NOTIFICATION OF THIRD PARTY CLAIMS

100 Series Concealed Overhead Door Holders/Stops

100 Series Heavy-Duty

Glynn-Johnson offers a complete line of overhead door holders and stops, accommodating virtually all openings with solutions for even the most complex door control problems. These concealed holders and stops provide the most attractive and reliable heavy-duty door control available.

Glynn-Johnson 100 series holders and stops provide the most reliable and versatile concealed overhead door control. They are designed for installation on virtually all types of doors mounted on conventional type butt hinges, pivots, continuous hinges, swing clear hinges and numerous other specialty hinges. When used in conjunction with many surface-applied door closers, 100 series holders and stops provide the most effective control for entrance doors and vestibule doors of all types, as well as heavy or often used interior doors. Templates provided allow for variable mounting positions, ranging from 85° - 110° of opening.

Five Models:

- 100H Series Hold-Open Model
- 100HP Series Internal Hold-Open Model
- 100F Series Friction Hold-Open Model
- 100S Series Stop-Only Model
- 100SE Series Special Stop-Only Model

Six Sizes:

- Each model comes in six sizes.
- Simple
- Standardized

Three Options:

- ADJ—Adjustable Jamb Bracket
- CJ—Jamb Bracket for use with LCN5030 Closer
- SOC—Pin-in-Socket Security Screw Package

Unmatched Convenience:

- Non-handed
- Improved Compatibility with Door Closers
- Single/Double-Acting Doors
- Interior/Exterior Applications
- Reduced Door Prep
- Durable
- Improved Corrosion Resistance
- Function Conversion Kits are Available.

Materials and Finishes:

In Heavy Gauge Brass or 300 Series Stainless Steel, these models offer the broadest range of finishes in the industry, complementing any design and offering the highest resistance to corrosion. Available in the following finishes:

Finishes	Description
US3	Polished Brass
US4	Satin Brass
US10	Satin Bronze
US10B	Oil Rubbed Bronze
US32	Polished Stainless Steel
US32D	Satin Stainless Steel
SP4	Powder Coat Brass
SP10	Powder Coat Bronze
SP28	Powder Coat Aluminum
SP313	Powder Coat Dark Bronze
SPBLK	Powder Coat Black

Models

These models provide a wide range of optional features, and are ideal for use on entrance and vestibule doors, large doors, doors opened frequently, or doors subject to abuse. These models are also furnished with an offset-style jamb bracket.

Designed for heavy-duty applications, 100 series models will provide long-lasting protection to doors, frames, hinges, related hardware and surrounding walls or obstructions.

100H Series Hold-Open

(Suffix H) The Hold-Open function should be used where it is desired to hold a door open at a predetermined position for short or long periods of time, permitting an unobstructed traffic flow through the opening.

These models are both selective and adjustable, featuring the most reliable Hold-Open mechanism available. They feature a control knob which protrudes from the face of the door and turns the Hold-Open function on or off. Set in the inactive position, the unit acts as a stop and shock absorber. The tension on the Hold-Open mechanism can be adjusted using an allen wrench to offset air currents or other exterior conditions. The Hold-Open tension adjustment is located in the bottom of the track in the top of the door.

100HP Series Internal Hold-Open

These models provide a Hold-Open unit with the Hold-Open mechanism built into the channel, thus reducing the door prep. The 100HP have a preset Hold-Open force that is not adjustable. The Hold-Open feature is not selectable in these units, so the doors are always held open.

100F Series Friction Hold-Open

(Suffix F) Friction Hold-Open models provide an alternative holding method, ideal for heavy patient room doors, closet doors or similar applications where multiple Hold-Open positions are desired. The friction tension is adjusted using an allen wrench and an open end wrench. The friction tension adjustment is located on the top of the slider in the channel.

100S Series Stop-Only

(Suffix S) When the Hold-Open function is not required, the Stop-Only function provides the same effective door control minus the Hold-Open feature. The Stop-Only model may be used on fire doors.

100SE Series Special Stop-Only

(Suffix SE) When Stop-Only models are used in conjunction with single point Hold-Open electronic door closers, they may be ordered without the shock-absorbing mechanism. Used as an auxiliary stop with these closers, they will prolong the life of the closer. The stop location is adjusted using an allen wrench on the stop block located in the channel.

Note: Caution should be used when using this option in other applications, as the elimination of the shock-absorbing spring can put added stress on door and frame if used improperly.

Application Information

UL Classification

The 100 series Stop-Only models are classified by Underwriters Laboratories (UL) as Miscellaneous Fire Door Accessories. This classification applies to use on either Hollow Metal Fire Doors or Wood Fire Doors. Where Wood Door manufacturer's listing allows for the cutout required for installation, concealed overhead stops may be used on those wood fire doors. These units may be used on doors of any rating. As a reminder, the Miscellaneous Fire Door Accessories (GVUX) section is defined by UL as: "Miscellaneous fire door accessories are intended in the individual Listings. The accessories have been investigated to determine that when installed in accordance with the manufacturer's instructions, the accessories do not adversely affect the fire rating of the fire door and/or fire door frames."

Dead Stop Templating:

If a wall or similar obstruction is in place at 110° or less opening angle (i.e. doors that open back-to-back), Dead Stop Templating should be used. This includes all Hold-Open, Friction and Stop-Only models, except when the "SE" Option is used. The Dead Stop position is reached when the shock-absorbing spring is fully compressed, the initial degree of opening will be 5° to 7° less than the Dead Stop opening.

Example: If the holder is templated to 100° Dead Stop, the door will hold open somewhere between 93° and 95°, but no further than 100°.

Note: Do not use dead-stop templating on the 100SE Series since there is no shock-absorbing spring.

Environmental Considerations:

Environmental factors should always be considered when specifying overhead holders and stops. Doors that are positioned on a building's exterior or subject to corrosive conditions should be equipped with a holder constructed primarily of stainless steel or brass materials. For interior applications, steel is acceptable, though brass substrates generally provide a more attractive architectural-grade finish.

Function Conversion Kits

- FK100F—Converts a 100H or 100S unit into a 100F unit.
To order specify FK100F.
- FK100H—Converts a 100F or 100S unit into a 100H unit.
To order specify FK100H.
- No kit is needed to convert a 100H or 100F unit into a 100S unit.

Options

Suffix ADJ (Adjustable Jamb Bracket):

An additional option on the 100 series is the adjustable jamb bracket, which allows the degree of Hold-Open or Stop angle to be adjusted after installation. Suffix "ADJ" is available in all functions, but only in sizes 3, 4, 5 & 6. ADJ jamb bracket requires additional frame prep. The ADJ option cannot be added to an existing unit, it must be factory ordered.

Suffix CJ (Closer Jamb Bracket):

Provides a special jamb bracket needed for 100 series units used with LCN5030 closers. These special jamb brackets are handed, so handing will need to be specified when ordering the "CJ" option, CJLH for a left hand door and CJRH for a right hand door. The CJ option cannot be added to an existing unit, it must be factory ordered.

Suffix SOC (Pin-in-Socket Security Screw Package):

A screw package with pin-in-socket screws for mounting the jamb bracket to the frame is provided instead of the standard screw package.

DESCRIPTION OF WORK

45 Minute Fire Door

SUMMARY OF COSTS

Item Description	Company	Amount Requested
Subcontract Costs		
Cost to replace eleven doors with 45 minute rated fire doors and associated fire rated louvers.	Construction Hardware Co	11,276
<p>Reason: The doors were not originally called out to be fire rated doors, but they were called out to have louvers. Code requires the doors to be fire rated. RFI 213 was asked if the doors needed to be fire rated, and the response was the doors needed to be 20 minute rated doors. The 20 minute rated doors were purchased and installed at no additional cost. Because 20 minute fire rated doors can not have louvers and 20 minute rated louvers are not made, the doors were made without louvers. The rooms the doors serviced experienced over pressurization because the louvers were not installed. It was decided at an OAC Meeting that the doors needed to be replaced with 45 minute rated doors with fire rated louvers to meet the mechanical and code requirements.</p> <p>Requested By: CFW/AOR/PI</p> <p>Ref: RFI 213</p>

- J. **Subcontractor.** As used in this Agreement, the term "Subcontractor" means any person or entity, including trade contractors, who have a contract with Contractor to perform any of the Construction.

- K. **Sublease.** The term "Sublease" as used in this Agreement shall mean the certain Sublease dated of even date herein between the District and Contractor, together with any duly authorized and executed amendment(s) thereto, pursuant to which the District subleases the Site from Contractor.
- L. **Sublease Payments.** The term "Sublease Payments" as used in this Agreement shall mean the payments made by the District to Contractor pursuant to Section 6 of the Sublease.
- M. **Tenant Improvement Payments.** The term "Tenant Improvement Payments" as used in this Agreement shall mean the payments made by the District to Contractor pursuant to Section 6 of the Sublease.

SECTION 2. CONTRACTOR'S DUTIES AND STATUS

Contractor covenants with the District to furnish reasonable skill and judgment in constructing the Project. Contractor agrees to furnish efficient business administration and superintendence and to furnish at all times an adequate supply of professionals, workers, and materials and to perform the work appropriately, expeditiously, economically, and consistent with the Contract Documents.

SECTION 3. ADDITIONAL SERVICES

If the District requests Contractor to perform additional services not described in this Agreement, Contractor shall provide a cost estimate and a written description of the additional work necessary to complete such additional services. The cost for such additional services shall be negotiated and agreed upon in writing in advance of Contractor performing or contracting for such additional services, and such cost shall be used to adjust the GMP established pursuant to Section 5 hereof. In the absence of a written agreement, the District will not compensate Contractor for additional services, will not adjust the GMP for such additional services, and Contractor will not be required to perform them. It is understood and agreed that if Contractor performs any services that it claims are additional services without receiving prior written approval from the District Board of Education, Contractor shall not be paid for such claimed additional services and the GMP will not be adjusted. Nothing in this Agreement shall be construed as limiting the valuation of such additional services and amount that the GMP will be adjusted for such additional services, should a written agreement for such services be executed by the parties. Notwithstanding the foregoing, Contractor shall not be entitled to compensation, nor will the GMP be adjusted, for additional services required as a result of Contractor's acts, errors or omissions.

SECTION 4. OWNERSHIP OF PLANS AND DOCUMENTS

All original field notes, written reports, drawings, specifications, Construction Documents, and other documents, produced or developed for the Project are the property of the District, regardless of whether the Project is constructed, and shall be furnished to the District. Such documents are not to be used by Contractor or by the Subcontractors on other work nor shall Contractor nor the Subcontractors claim any right to such documents. This shall not deprive Contractor from retaining electronic data or other reproducible copies of the Construction Documents or the right to reuse information contained in them in the normal course of Contractor's professional activities.

SECTION 5. ESTABLISHMENT OF GUARANTEED MAXIMUM PRICE

The "GMP" for the Project shall be **Twenty-Three Million Three Hundred Six Thousand Eight Hundred Eighty-Six Dollars and No Cents (\$23,306,886.00)**. The GMP consists of (1) a Sublease Tenant Improvement Payment in the amount of **Twenty-One Million Four Hundred Sixty-Two Thousand Seven Hundred One Dollars and No Cents (\$21,462,701.00)** and, (2) a Contractor Contingency in the amount of **Six Hundred Seventy-Eight Thousand Eight Hundred Forty-One Dollars, and No Cents (\$678,841.00)**, and, (3) Sublease Payments in the amount of **\$97,112.00** per month for **12** months, for a total lease value of **One Million One Hundred Sixty-Five Thousand Three Hundred Forty-Four Dollars and No Cents (\$1,165,344.00)** pursuant to terms and payment schedule as set forth in the Sublease.

The GMP is based upon the plans and specifications existing at the time this Agreement is entered into between Contractor and the District, and more fully described and referenced in the Scope of Work set forth in **Exhibits A and B** attached hereto. Contractor shall assume the risk of cost overruns which were not foreseeable at the time this Agreement is entered into and the GMP determined, except for undocumented events of the type set forth in Section 19 hereof, work mandated by an outside agency after issuance of Construction Documents that could not have been reasonably foreseen from review of the Contract Documents, or costs arising from undocumented geotechnical issues. Contractor acknowledges that (i) Contractor has conducted a site inspection and is familiar with the site conditions based on records, studies and visible conditions relating to construction and labor and (ii) Contractor has reviewed the Contract Documents and is familiar with the contents thereof. District directed changes to the scope of the Project not contemplated in the Scope of Work shall be deemed Extra Work/Modifications pursuant to the procedures set forth in Section 10 of this Agreement. The GMP shall include, but not be limited to, increases in labor and materials. The GMP has been used to calculate the Tenant Improvement Payments and the Sublease Payments to be paid by the District to Contractor pursuant to the Sublease. The GMP includes the cost of all labor, materials, equipment, general conditions, overhead, profit and a Contractor Contingency as indicated above.

#16-199

The Contractor Contingency is for the purpose of covering the cost of very specific issues that may arise during construction and it may be used only upon the written agreement of the Contractor, the architect of record, and the District. The Contractor Contingency is to be used only to pay Contractor for the following enumerated reasons: (1) additional costs resulting from discrepancies in the bid buy-out process; (2) conflicts, discrepancies or errors in the Construction Documents; (3) work required by the Inspector of Record or any governmental agency involved in the permitting or approval/certification process that is not otherwise shown in the Construction Documents; and (4) any other items of cost agreed to in writing by the Contractor and District to be included in the Contractor Contingency. The Contractor Contingency shall not be used for costs incurred as a result of Contractor's acts, errors or omissions.

Contractor shall be responsible for tracking expenditures of the Contractor Contingency and shall provide periodic written updates to the District as directed. Unused Contractor Contingency and Allowances at Project completion will reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and possibly the Sublease Payments.

The District shall at all times have the right to reduce the scope of the Project. If the District reduces the scope of the Project, the GMP shall be reduced commensurate with the reduced Scope of Work pursuant to the provisions of Section 10, below, and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 6. NOTICE TO PROCEED WITH CONSTRUCTION

Upon receipt of an approved GMP, the District shall issue a notice to Contractor to proceed with the Construction of the Project. In the event that a Notice to Proceed with Construction is not issued for the Project, the Site Lease and the Sublease shall terminate upon written notice from the District to Contractor that a Notice to Proceed will not be issued.

SECTION 7. SAVINGS

If Contractor realizes a savings on one aspect of the Project, such savings shall be tracked and Contractor shall provide periodic written updates of such savings. Such savings shall be added to the Contractor Contingency and the use of such savings shall be as set forth in Section 5. However, if such savings are not so utilized, the amount of such savings shall reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 8. SELECTION OF SUBCONTRACTORS

In the interest of minimizing the expenditure of funds for the construction of the Project, Contractor agrees to select Subcontractors who are appropriately licensed by the State of California for each trade component of the Project in a manner that fosters competition. Contractor agrees that it will either solicit bids from potential subcontractors pursuant to the

- 6 -

#16-199

competitive bid procedures set forth in the California Public Contract Code, including specifically Public Contract Code section 20110, et seq., or that it will utilize an informal bidding process established by Contractor which also incorporates competitive bid procedures. Regardless of the method Contractor employs, Contractor will make a good faith effort to contact and utilize DVBE contractors and suppliers in securing bids for performance of the Project in accordance with the procedures set forth in Section 1.77 of the General Conditions. In the event that Contractor chooses to select Subcontractors pursuant to an informal bidding process, Contractor shall ensure that it receives at least three competitive quotes from potential subcontractors for each trade component of the Project, unless the parties agree otherwise on a trade-by-trade basis. The District reserves the right to oversee the bidding process. Contractor shall inform all bidders that the District will not be a party to any contracts for construction services executed by Contractor and selected bidders. Contractor shall submit a listing of proposed subcontractors to the District for the District's review. In no case, will Contractor award any sub-contracts until the District has concurred in the scope and price of the sub-contracted services. In addition, Contractor shall provide the District with full documentation regarding the bids or competitive quotes received by Contractor. In no event, shall such documentation be redacted or obliterated. In the event Contractor does not comply with this provision, the District may terminate this Agreement in accordance with the provisions of the General Conditions. Subcontractors awarded contracts by Contractor shall be afforded all the rights and protections of listed subcontractors under the provisions of the Subletting and Subcontracting Fair Practices Act (Public Contract Code Section 4100, et seq.).

SECTION 9. CONSTRUCTION SCOPE OF WORK

- A. Prior to commencing Construction, Contractor shall comply with the initial schedule requirements set forth in the General Conditions.
- B. Contractor shall complete the Construction pursuant to the Construction Documents as amended subject to any additional DSA or other regulatory approvals as may be required, performing all work set forth in the Scope of Work, and shall make reasonable efforts in scheduling to prevent disruption to classes.
- C. Contractor shall be responsible for complying with all applicable building codes, including without limitation mechanical codes, electrical codes, plumbing codes and fire codes, each of the latest edition, required by the regulatory agencies and for arranging and overseeing all necessary inspections and tests including inspections by the DSA or regulatory agencies, permits and occupancy permits, and ensuring compliance with any Federal and State laws, including, but not limited to, safety procedures and requirements, and construction employee training programs which cover among other items, hazardous chemicals and materials.

- 7 -

#16-199

- D. Contractor shall establish procedures for the protection of all existing structures, equipment, utilities, and other existing improvements, both on-site and off-site. Contractor assumes all risk of loss of vandalism, theft of property or other property damage ("Vandalism") which occurs at a site at which Contractor is undertaking construction of the Project. Contractor assumes all risk of loss which occurs where Contractor is undertaking construction of the Project from causes due to negligence or misconduct by Contractor, its officers, employees, subcontractors, licensees and invitees. Contractor shall replace District property damaged by such Vandalism or theft or compensate the District for such loss, including payment of out of pocket expenses such as insurance deductibles the District might incur under such circumstances.
- E. Contractor shall develop a mutually agreed upon program with the District to abate and minimize noise, dust, and disruption to normal activities at the existing facilities at the School Facility, including procedures to control on-site noise, dust, and pollution during construction.
- F. The District shall cause the appropriate professionals to stamp and sign, as required, the original Construction Documents or parts thereof and coordinate the Project's design with all utilities.
- G. Contractor shall, for the benefit of the Subcontractors, attend pre-construction orientation conferences in conjunction with the Architect to set forth the various reporting procedures and site rules prior to the commencement of actual construction. Contractor shall also attend construction and progress meetings with District representatives and other interested parties, as requested by the District, to discuss such matters as procedures, progress problems and scheduling. Contractor shall prepare and promptly distribute official minutes of such meetings to all parties in attendance, including without limitation the District, the Architect and the District Inspector of Record.
- H. Contractor shall incorporate approved changes as they occur, and develop cash flow reports and forecasts for submittal to the District as requested. Contractor shall provide regular monitoring of the approved estimates for Construction costs, showing actual costs for activities in progress, and estimates for uncompleted tasks. Contractor shall maintain cost accounting records on authorized additional services or work performed under unit costs, additional work performed on the basis of actual costs of labor and materials, and for other work requiring accounting records.
- I. Contractor shall record the progress of the Project and shall submit monthly written progress reports to the District and the Architect including information on the entire Project, showing percentages of completion and the number and amounts of

- 8 -

#16-199

proposed Extra Work/Modifications and their effect on the construction costs as of the date of each respective report.

- J. Contractor shall keep a log containing a record of weather, Subcontractors, work on the site, number of workers, work accomplished, problems encountered, and other similar relevant data as the District may require. Contractor shall make the log available to the District, the Architect, and the District's project manager. The District shall be promptly advised on all anticipated delays in the Project.
- K. The District shall bear the cost for the DSA Inspector, soils testing, DSA or other regulatory agency fees, and special testing required in the construction of the Project. If additional review or permits become necessary for reasons not due to Contractor's fault or because of DSA or regulatory agency requirements or regulations implemented after the date the Final GMP is established and not reasonably anticipated at the time the Final GMP is established, Contractor may seek additional compensation for the cost of that review as an additional cost. In the alternative, the District may pay such costs directly.

SECTION 10. EXTRA WORK/MODIFICATIONS

- A. The District may prescribe or approve additional work or a modification of requirements or of methods of performing the Construction which differ from the work or requirements set forth in the Construction Documents ("Extra Work/Modifications"); and for such purposes the District may at any time during the life of this Agreement, by written order, make such changes as it shall find necessary in the design, line, grade, form, location, dimensions, plan, or material of any part of the work or equipment specified in this Agreement or in the Construction Documents, or in the quantity or character of the work or equipment to be furnished. In the event conditions develop which, in the opinion of Contractor, makes strict compliance with the specifications impractical, Contractor shall notify the District of the need for Extra Work/Modifications by placing the matter on the agenda of regularly scheduled construction meetings with the District for discussion as soon as practicable after the need for the Extra Work/Modifications is determined. Additionally, Contractor shall submit to the District for its consideration and approval or disapproval, a written request for Extra Work/Modifications before such work is performed. If the District approves the request in writing, the costs of the Extra Work/Modification shall be added to or deducted from the GMP or the Scope of Work shall be modified to complete the Project within the GMP, as applicable. Any adjustments to the GMP will result in an adjustment of the Tenant Improvement Payment and, if applicable, the Sublease Payments.

- 9 -

#16-199

- B. Extra Work/Modifications include work related to unforeseen underground conditions if, and only if, such conditions are not visible or identified on plans, reports or other documents available to Contractor. Extra Work/Modifications do not include underground conditions that are identified on plans, reports or other documents available to Contractor but are in a location different than is set forth on such plans, reports or other documents available to Contractor. It should be noted, however, that the District has advised and provided Contractor with information regarding the shallow water table and recent projects experience with encountering water when digging. Contractor has included in its calculation of the GMP an amount to mitigate for encountering water when completing the scope of work contemplated herein. Therefore, Extra Work/Modifications do not include expenses incurred by, and/or work performed by, Contractor in connection with such shallow water table and with encountering water when digging.
- C. Should Contractor claim that any instruction, request, drawing, specification, action, condition, omission, default or other situation (i) obligates the District to increase the GMP; or (ii) obligates the District to grant an extension of time for the completion of this Agreement; or (iii) constitutes a waiver of any provision in this Agreement, CONTRACTOR SHALL NOTIFY THE DISTRICT, IN WRITING, OF SUCH CLAIM AS SOON AS POSSIBLE, BUT IN NO EVENT WITHIN MORE THAN TEN (10) DAYS FROM THE DATE CONTRACTOR HAS ACTUAL OR CONSTRUCTIVE NOTICE OF THE CLAIM. CONTRACTOR SHALL ALSO PROVIDE THE DISTRICT WITH SUFFICIENT WRITTEN DOCUMENTATION SUPPORTING THE FACTUAL BASIS OF THE CLAIM including items used in valuing said claim. Contractor shall be required to certify under penalty of perjury the validity and accuracy of any claims submitted. Contractor's failure to notify the District within such ten (10) day period shall be deemed a waiver and relinquishment of the claim against the District.
- D. Expenses of reconstruction and/or costs to replace and/or repair damaged materials and supplies, provided that Contractor is not fully compensated for such expenses and/or costs by insurance or otherwise, shall be included in an increase to the GMP if said expenses are the result of the negligent acts or omissions of the District, or its principals, agents, servants, or employees.

SECTION 11. NOT USED

SECTION 12. PERSONNEL ASSIGNMENT

- A. Contractor shall assign **Jaime Pace** as Project Manager/Superintendent for the Project. So long as **Jaime Pace** remains in the employ of Contractor, such person shall not be changed or substituted from the Project, or cease to be fully committed to

- 10 -

#16-199

the Project except as provided in this Section. In the event Contractor deems it necessary, Contractor shall replace the manager and/or the superintendent for the Project with a replacement with like qualifications and experience, subject to the prior written consent of the District, which consent shall not be unreasonably withheld. Any violation of the terms of paragraph A of this Section 12 shall entitle the District to terminate this Agreement for breach, pursuant to the provisions of the General Conditions.

- B. Notwithstanding the foregoing provisions of paragraph A of Section 12, above, if any manager and/or superintendent proves not to be satisfactory to the District, upon written notice from the District to Contractor, such person(s) shall be promptly replaced by a person who is acceptable to the District in accordance with the following procedures: Within five (5) business days after receipt of a notice from the District requesting replacement of any manager and/or superintendent or discovery by Contractor that any manager and/or superintendent is leaving their employ, as the case may be, Contractor shall provide the District with the name of an acceptable replacement/substitution together with such information as the District may reasonably request about such replacement/substitution. The replacement/substitution shall commence work on the Project no later than five (5) business days following the District's approval of such replacement, which approval shall not be unreasonably withheld. If the District and Contractor cannot agree as to the replacement/substitution, the District shall be entitled to terminate this Agreement for breach pursuant to the provisions of the General Conditions.

SECTION 13. BONDING REQUIREMENTS

Contractor shall fully comply with the requirements set forth in Section 6.9 of the General Conditions.

SECTION 14. PAYMENTS TO CONTRACTOR

- A. Contractor shall finance the cost of construction of the Project which costs shall not exceed the GMP, which shall not be adjusted except as otherwise provided in this Agreement. The District shall pay Contractor Tenant Improvement Payments and Sublease Payments pursuant to the terms and conditions of Section 6 of the Sublease. In the event of a dispute between the District and Contractor, the District may withhold from the Tenant Improvement Payments and the Sublease Payments an amount not to exceed one hundred fifty percent (150%) of the disputed amount.
- B. This Agreement is subject to the provisions of California Public Contract Code Sections 7107, 7201 and 20104.50 as they may from time to time be amended.

- 11 -

#16-199

- C. For purposes of this Agreement, the acceptance by the District means acceptance made only by an action of the governing body of the District in session. Acceptance by Contractor of the final Tenant Improvement Payment or the Sublease Payment, as the case may be, shall constitute a waiver of all claims against the District related to those amounts.

SECTION 15. CONTRACTOR'S CONTINUING RESPONSIBILITY

Neither the final payment nor any provision in the Contract Documents shall relieve Contractor of responsibility for faulty materials or workmanship incorporated in the Project or for any failure to comply with the requirements of the Contract Documents.

SECTION 16. INSURANCE

Contractor shall provide, during the life of this Agreement, the types and amounts of insurance set forth in Article 6 of the General Conditions, which are incorporated by reference herein.

SECTION 17. USE OF PREMISES

Contractor shall confine operations at the Site to areas permitted by law, ordinances, permits and the Construction Documents and shall not unreasonably encumber the Site or existing School Facilities at the Site with any materials or equipment. Contractor shall not load or permit any part of the work to be loaded with a weight so as to endanger the safety of persons or property at the Site.

SECTION 18. SITE REPRESENTATIONS

The District warrants and represents that the District has, and will continue to retain at all times during the course of construction, legal title to the Site and that said land is properly subdivided and zoned so as to permit the construction and use of said Site with respect to the Project. The District further warrants and represents that title to said land is free of any easements, conditions, limitation, special permits, variances, agreements or restrictions which would prevent, limit or otherwise restrict the construction or use of said Site pursuant to this Agreement. Reference is made to the fact that the District has provided information on the Site to Contractor. Such information shall not relieve Contractor of its responsibility; and the interpretation of such data regarding the Site, as disclosed by any borings or other preliminary investigations, is not warranted or guaranteed, either expressly or implicitly, by the District. Contractor shall be responsible for having ascertained pertinent local conditions such as location, accessibility and general character of the Site and for having satisfied itself as to the conditions under which the work is to be performed. No claim for any allowances because of Contractor's error or negligence in acquainting itself with the conditions at the Site will be recognized.

- 12 -

SECTION 19. HAZARDOUS WASTE AND UNKNOWN PHYSICAL CONDITIONS

Contractor shall comply with the District's Hazardous Materials Procedures and Requirements as set forth herein.

- A. If the District has identified the presence of hazardous materials on or in proximity to the Site (the "Pre-existing Hazardous Materials"), Contractor shall review all information provided by the District that characterizes the Pre-existing Hazardous Materials and shall take the actions approved by DTSC and issued by the District necessary to address the Pre-existing Hazardous Materials in the performance of the work. Contractor shall conduct the work based on this information issued at the time contract documents are executed. Contractor shall immediately communicate, in writing, any variances from available information to the District.
- B. The District will retain an additional independent environmental consultant to perform the investigation, inspection, testing, assessment, sampling and analysis necessary to prepare and recommend a remediation plan for the Pre-existing Hazardous Materials for the District's approval (the "Remediation Plan").
- C. The District will retain title to all Pre-existing Hazardous Materials encountered during the work. This does not include hazardous material generated by Contractor, including but not limited to used motor oils, lubricants, cleaners, etc. Contractor shall dispose of such hazardous waste in accordance with the provisions of the Contract Documents, as well as local, State and Federal laws and regulations. The District will be shown as the hazardous waste generator and will sign all hazardous waste shipment manifests for non-Contractor generated hazardous waste. Nothing contained within these Contract Documents shall be construed or interpreted as requiring Contractor to assume the status of owner or generator of hazardous waste substances for non-Contractor generated hazardous wastes.
- D. Except as otherwise provided herein, it is the responsibility of Contractor to obtain governmental approvals relating to Hazardous Materials Management, including Federal and State surface water and groundwater discharge permits and permits for recycling and reuse of hazardous materials for all work noted in the contract documents. Contractor shall be responsible for coordinating compliance with such governmental approvals and applicable governmental rules with the District's hazardous materials consultant, including those governing the preparation of waste profiles, waste manifests, and bills of lading. If Contractor encounters hazardous materials, it shall immediately notify the District in writing. The District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District.

#16-199

E. If, during construction, Contractor encounters materials, conditions, waste, contaminated groundwater or substances, not identified in the District's assessment report, that Contractor reasonably suspects are hazardous materials, Contractor shall stop the affected portion of the work, secure the area, promptly notify the District, and take reasonable measures to mitigate the impact of such work stoppage. The District shall retain the services of an environmental consultant to perform investigation, inspection, testing, assessment, sampling and analysis of the suspect materials, conditions, waste, groundwater or substances.

(1) Found Not to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances do not constitute hazardous materials, Contractor shall recommence the suspended work.

(2) Found to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances constitute hazardous materials and such hazardous materials require remediation and disposal, then the District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District. All such costs shall be the responsibility of the District.

F. Exacerbation of Pre-Existing Hazardous Materials.

If during construction Contractor encounters pre-existing environmental conditions that it knew or should have known involve hazardous materials (the "Point of Discovery") (which encounters may include an unavoidable release or releases of hazardous materials) then Contractor must immediately stop the affected portion of the work. If Contractor fails to immediately stop the affected portion of the work after the Point of Discovery, then Contractor is solely responsible for any resultant Exacerbation Cost. "Exacerbate," in all its forms, means the worsening effects of Contractor's failure to stop the affected portion of work after the Point of Discovery. "Exacerbation Cost" means the differential between (i) the actual increase in the cost of remediation and delays to the Project attributable to pre-existing environmental conditions involving hazardous substances, and (ii) the cost thereof or delays thereto had Contractor immediately stopped the affected portion of the work after the Point of Discovery. The standard of "should have known" applies to Contractor's supervisory personnel, whether or not on the Site. Contractor's supervisory personnel must have had the hazardous material training required by applicable OSHA and Cal OSHA rules or regulations.

SECTION 20. INDEPENDENT CONTRACTOR

- A. Contractor is retained as an independent contractor and is not employed by the District. No employee or agent of Contractor shall become, or be considered to be, an employee of the District for any purpose. It is agreed that the District is interested only in the results obtained from service under this Agreement and that Contractor shall perform as an independent contractor with sole control of the manner and means of performing the services required under this Agreement. Contractor shall complete this Agreement according to its own methods of work which shall be in the exclusive charge and control of Contractor and which shall not be subject to control or supervision by the District except as to results of the work. It is expressly understood and agreed that Contractor and its employees shall in no event be entitled to any benefits to which the District employees are entitled, including, but not limited to, overtime, retirement benefits, insurance, vacation, worker's compensation benefits, sick or injury leave or other benefits.
- B. Contractor shall be responsible for all salaries, payments, and benefits for all of its officers, agents, and employees in performing services pursuant to this Agreement.

SECTION 21. ACCOUNTING RECORDS

Contractor, and all Subcontractors, shall check all materials, equipment and labor entering into the work and shall keep or cause to be kept such full and detailed accounts as may be necessary for proper financial management under this Agreement, including true and complete books, records and accounts of all financial transactions in the course of their activities and operations related to the Project. These documents include sales slips, invoices, payrolls, personnel records, requests for Subcontractor payment, and other data relating to all matters covered by the Contract Documents (the "Data"). The Data shall be maintained for ten (10) years from the latest expiration of the term (as such may be extended) of any of the Contract Documents. Contractor shall use its best efforts to cause its Subcontractors to keep or cause to be kept true and complete books, records and accounts of all financial transactions in the course of its activities and operations related to the Project. Upon completion of the Project, Contractor shall provide the District with one (1) complete copy of the Data.

The District, at its own costs, shall have the right to review and audit, upon reasonable notice, the books and records of Contractor and any Subcontractors concerning any monies associated with the Project.

SECTION 22. PERSONAL LIABILITY

Neither the trustees, officers, employees, or agents of District, the District's representative, or Architect shall be personally responsible for any liability arising under the Contract Documents.

SECTION 23. AGREEMENT MODIFICATIONS

No waiver, alteration or modification of any of the provisions of this Agreement shall be binding upon either the District or Contractor unless the same shall be in writing and signed by both the District and Contractor.

SECTION 24. NOTICES

Any notices or filings required to be given or made under this Agreement shall be served, given or made in writing upon the District or Contractor, as the case may be, by personal delivery or registered mail (with a copy sent via fax or regular mail) to the respective addresses given below or at such other address as such party may provide in accordance with the provisions herein. SECTION 29. SUCCESSION OF RIGHTS AND OBLIGATIONS

All rights and obligations under this Agreement shall inure to and be binding upon the successors and assigns of the parties hereto.

SECTION 30. NOTIFICATION OF THIRD PARTY CLAIMS

The District shall provide Contractor with timely notification of the receipt by the District of any third-party claim relating to this Agreement, and the District may charge back to Contractor the cost of any such notification.

SECTION 32. ENTIRE AGREEMENT

This Construction Services Agreement and the additional Contract Documents as defined in paragraph C of Section 1 herein, including the Site Lease, the Sublease, and the Specifications, drawings, and plans constitute the entire agreement between Contractor and the District. The Contract Documents shall not be amended, altered, changed, modified or terminated without the written consent of both parties hereto, except as otherwise provided in Section 10 hereof.

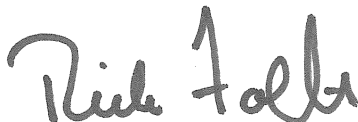

SECTION 33. EXECUTION IN COUNTERPARTS

This Agreement may be executed in any number of counterparts, each of which shall be an original, but all of which together shall constitute one instrument.

Subject: Rough in plumbing and electrical in shear walls

Discipline: Structural

QUESTION

Ref. A1-41.3

We have to rough-in waste lines to the sinks in Classroom restrooms-103, 105 and 110. Those sinks are on shear walls. Details 9,10 and 14 give requirements for cutting, notching, and boring sill plates and studs. Please verify with the structural engineer that it will be acceptable to rough-in both waste AND electrical through shear wall sill plates.

ANSWER

Refer to attached revised sheets for furred walls at the sink locations in the restrooms and furred walls at drinking fountain at exterior of restrooms. Also, per discussion with Bernard's the plumbing chase wall studs changed from 2x6 to 2x4 to accommodate the required room for the furred wall and also to keep ADA standards met.

QUESTION

Note 526 on sheet A3-41.1 calls out for a wall mounted 100" TV with minimum (3) HDMI inputs and built in Wi-Fi capability. Per conversation at the OAC meeting on 5/1, changes were going to be made to the AV and Electrical rough-in and a furred wall was to be added as well to match all other TV locations. Please provide updated drawings showing the changes that will be required for AV and Electrical, an elevation which shows TV location and the extent of the furred wall, and cut sheets of the TV and Wall mount that will be used at this location.

ANSWER

Refer to attached sketches for TV wall layout in Admin Building. Also, see attached cut sheets for TV and TV mount models.

Information regarding shifts:

1. Working a day shift only is not considered a "shift" under the terms of the agreement.
2. The day shift is the first shift, the swing shift is the second shift and the graveyard shift is the third shift. Thus, the regular work week begins Monday morning with the first shift and ends Saturday morning with the third shift. The graveyard shift for Friday ends on Saturday morning, therefore Saturday's overtime rate does not apply. This is also true for shifts that end on Sundays and holidays.
3. One (1) employee constitutes the establishment of a "shift."
4. Where shifts are worked overtime, after the regular shift the applicable overtime rate (1½ times up to 12 hours worked) shall apply in the addition to the designated shift differential pay. However, the shift differential is not paid on overtime days -- which includes Saturdays, Sundays, holidays and overtime days on approved four ten-hour day workweeks. Double the straight time rate of pay is the maximum amount paid for any work.
5. Shifts must be a minimum of five (5) days duration, which may include Saturday, Sunday and holidays. (This requirement applies to the scheduling and performance of work, not the uninterrupted presence of a particular individual or individuals on the job.)
6. Either the swing or graveyard shifts may be worked alone without the requirement of a day shift.
7. While the shift must last for a minimum of five days duration, it is not necessary for each employee to work the five days in order to fall under the shift work provisions of the agreement.
8. Per Section 3.12 of the agreement, the shift rate of pay is determined by the start time of the shift (see chart below).

First Shift (Day Shift): Start time between 6:00 AM and 10:00 AM (Straight Time Rate)
Second Shift (Swing): Start time between 10:01 AM and 8:00 PM (Straight Time Rate +17.3%)
Third Shift (Graveyard): Start time between 8:01 PM and 5:59 AM (Straight Time Rate +31.4%)

- M. **Tenant Improvement Payments.** The term "Tenant Improvement Payments" as used in this Agreement shall mean the payments made by the District to Contractor pursuant to Section 6 of the Sublease.

SECTION 2. CONTRACTOR'S DUTIES AND STATUS

Contractor covenants with the District to furnish reasonable skill and judgment in constructing the Project. Contractor agrees to furnish efficient business administration and superintendence and to furnish at all times an adequate supply of professionals, workers, and materials and to perform the work appropriately, expeditiously, economically, and consistent with the Contract Documents.

SECTION 3. ADDITIONAL SERVICES

If the District requests Contractor to perform additional services not described in this Agreement, Contractor shall provide a cost estimate and a written description of the additional work necessary to complete such additional services. The cost for such additional services shall be negotiated and agreed upon in writing in advance of Contractor performing or contracting for such additional services, and such cost shall be used to adjust the GMP established pursuant to Section 5 hereof. In the absence of a written agreement, the District will not compensate Contractor for additional services, will not adjust the GMP for such additional services, and Contractor will not be required to perform them. It is understood and agreed that if Contractor performs any services that it claims are additional services without receiving prior written approval from the District Board of Education, Contractor shall not be paid for such claimed additional services and the GMP will not be adjusted. Nothing in this Agreement shall be construed as limiting the valuation of such additional services and amount that the GMP will be adjusted for such additional services, should a written agreement for such services be executed by the parties. Notwithstanding the foregoing, Contractor shall not be entitled to compensation, nor will the GMP be adjusted, for additional services required as a result of Contractor's acts, errors or omissions.

SECTION 4. OWNERSHIP OF PLANS AND DOCUMENTS

All original field notes, written reports, drawings, specifications, Construction Documents, and other documents, produced or developed for the Project are the property of the District, regardless of whether the Project is constructed, and shall be furnished to the District. Such documents are not to be used by Contractor or by the Subcontractors on other work nor shall Contractor nor the Subcontractors claim any right to such documents. This shall not deprive Contractor from retaining electronic data or other reproducible copies of the Construction Documents or the right to reuse information contained in them in the normal course of Contractor's professional activities.

SECTION 5. ESTABLISHMENT OF GUARANTEED MAXIMUM PRICE

The "GMP" for the Project shall be Twenty-Three Million Three Hundred Six Thousand Eight Hundred Eighty-Six Dollars and No Cents (\$23,306,886.00). The GMP consists of (1) a Sublease Tenant Improvement Payment in the amount of Twenty-One Million Four Hundred Sixty-Two Thousand Seven Hundred One Dollars and No Cents (\$21,462,701.00) and, (2) a Contractor Contingency in the amount of Six Hundred Seventy-Eight Thousand Eight Hundred Forty-One Dollars, and No Cents (\$678,841.00), and, (3) Sublease Payments in the amount of \$97,112.00 per month for 12 months, for a total lease value of One Million One Hundred Sixty-Five Thousand Three Hundred Forty-Four Dollars and No Cents (\$1,165,344.00) pursuant to terms and payment schedule as set forth in the Sublease.

The GMP is based upon the plans and specifications existing at the time this Agreement is entered into between Contractor and the District, and more fully described and referenced in the Scope of Work set forth in **Exhibits A and B** attached hereto. Contractor shall assume the risk of cost overruns which were not foreseeable at the time this Agreement is entered into and the GMP determined, except for undocumented events of the type set forth in Section 19 hereof, work mandated by an outside agency after issuance of Construction Documents that could not have been reasonably foreseen from review of the Contract Documents, or costs arising from undocumented geotechnical issues. Contractor acknowledges that (i) Contractor has conducted a site inspection and is familiar with the site conditions based on records, studies and visible conditions relating to construction and labor and (ii) Contractor has reviewed the Contract Documents and is familiar with the contents thereof. District directed changes to the scope of the Project not contemplated in the Scope of Work shall be deemed Extra Work/Modifications pursuant to the procedures set forth in Section 10 of this Agreement. The GMP shall include, but not be limited to, increases in labor and materials. The GMP has been used to calculate the Tenant Improvement Payments and the Sublease Payments to be paid by the District to Contractor pursuant to the Sublease. The GMP includes the cost of all labor, materials, equipment, general conditions, overhead, profit and a Contractor Contingency as indicated above.

#16-199

The Contractor Contingency is for the purpose of covering the cost of very specific issues that may arise during construction and it may be used only upon the written agreement of the Contractor, the architect of record, and the District. The Contractor Contingency is to be used only to pay Contractor for the following enumerated reasons: (1) additional costs resulting from discrepancies in the bid buy-out process; (2) conflicts, discrepancies or errors in the Construction Documents; (3) work required by the Inspector of Record or any governmental agency involved in the permitting or approval/certification process that is not otherwise shown in the Construction Documents; and (4) any other items of cost agreed to in writing by the Contractor and District to be included in the Contractor Contingency. The Contractor Contingency shall not be used for costs incurred as a result of Contractor's acts, errors or omissions.

Contractor shall be responsible for tracking expenditures of the Contractor Contingency and shall provide periodic written updates to the District as directed. Unused Contractor Contingency and Allowances at Project completion will reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and possibly the Sublease Payments.

The District shall at all times have the right to reduce the scope of the Project. If the District reduces the scope of the Project, the GMP shall be reduced commensurate with the reduced Scope of Work pursuant to the provisions of Section 10, below, and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 6. NOTICE TO PROCEED WITH CONSTRUCTION

Upon receipt of an approved GMP, the District shall issue a notice to Contractor to proceed with the Construction of the Project. In the event that a Notice to Proceed with Construction is not issued for the Project, the Site Lease and the Sublease shall terminate upon written notice from the District to Contractor that a Notice of Proceed will not be issued.

SECTION 7. SAVINGS

If Contractor realizes a savings on one aspect of the Project, such savings shall be tracked and Contractor shall provide periodic written updates of such savings. Such savings shall be added to the Contractor Contingency and the use of such savings shall be as set forth in Section 5. However, if such savings are not so utilized, the amount of such savings shall reduce the GMP and will result in an adjustment of the Tenant Improvement Payments and, if applicable, the Sublease Payments.

SECTION 8. SELECTION OF SUBCONTRACTORS

In the interest of minimizing the expenditure of funds for the construction of the Project, Contractor agrees to select Subcontractors who are appropriately licensed by the State of California for each trade component of the Project in a manner that fosters competition. Contractor agrees that it will either solicit bids from potential subcontractors pursuant to the

- 6 -

#16-199

competitive bid procedures set forth in the California Public Contract Code, including specifically Public Contract Code section 20110, et seq., or that it will utilize an informal bidding process established by Contractor which also incorporates competitive bid procedures. Regardless of the method Contractor employs, Contractor will make a good faith effort to contact and utilize DVBE contractors and suppliers in securing bids for performance of the Project in accordance with the procedures set forth in Section 1.77 of the General Conditions. In the event that Contractor chooses to select Subcontractors pursuant to an informal bidding process, Contractor shall ensure that it receives at least three competitive quotes from potential subcontractors for each trade component of the Project, unless the parties agree otherwise on a trade-by-trade basis. The District reserves the right to oversee the bidding process. Contractor shall inform all bidders that the District will not be a party to any contracts for construction services executed by Contractor and selected bidders. Contractor shall submit a listing of proposed subcontractors to the District for the District's review. In no case, will Contractor award any sub-contracts until the District has concurred in the scope and price of the sub-contracted services. In addition, Contractor shall provide the District with full documentation regarding the bids or competitive quotes received by Contractor. In no event, shall such documentation be redacted or obliterated. In the event Contractor does not comply with this provision, the District may terminate this Agreement in accordance with the provisions of the General Conditions. Subcontractors awarded contracts by Contractor shall be afforded all the rights and protections of listed subcontractors under the provisions of the Subletting and Subcontracting Fair Practices Act (Public Contract Code Section 4100, et seq.).

SECTION 9. CONSTRUCTION SCOPE OF WORK

- A. Prior to commencing Construction, Contractor shall comply with the initial schedule requirements set forth in the General Conditions.
- B. Contractor shall complete the Construction pursuant to the Construction Documents as amended subject to any additional DSA or other regulatory approvals as may be required, performing all work set forth in the Scope of Work, and shall make reasonable efforts in scheduling to prevent disruption to classes.
- C. Contractor shall be responsible for complying with all applicable building codes, including without limitation mechanical codes, electrical codes, plumbing codes and fire codes, each of the latest edition, required by the regulatory agencies and for arranging and overseeing all necessary inspections and tests including inspections by the DSA or regulatory agencies, permits and occupancy permits, and ensuring compliance with any Federal and State laws, including, but not limited to, safety procedures and requirements, and construction employee training programs which cover among other items, hazardous chemicals and materials.

- 7 -

#16-199

- D. Contractor shall establish procedures for the protection of all existing structures, equipment, utilities, and other existing improvements, both on-site and off-site. Contractor assumes all risk of loss of vandalism, theft of property or other property damage ("Vandalism") which occurs at a site at which Contractor is undertaking construction of the Project. Contractor assumes all risk of loss which occurs where Contractor is undertaking construction of the Project from causes due to negligence or misconduct by Contractor, its officers, employees, subcontractors, licensees and invitees. Contractor shall replace District property damaged by such Vandalism or theft or compensate the District for such loss, including payment of out of pocket expenses such as insurance deductibles the District might incur under such circumstances.
- E. Contractor shall develop a mutually agreed upon program with the District to abate and minimize noise, dust, and disruption to normal activities at the existing facilities at the School Facility, including procedures to control on-site noise, dust, and pollution during construction.
- F. The District shall cause the appropriate professionals to stamp and sign, as required, the original Construction Documents or parts thereof and coordinate the Project's design with all utilities.
- G. Contractor shall, for the benefit of the Subcontractors, attend pre-construction orientation conferences in conjunction with the Architect to set forth the various reporting procedures and site rules prior to the commencement of actual construction. Contractor shall also attend construction and progress meetings with District representatives and other interested parties, as requested by the District, to discuss such matters as procedures, progress problems and scheduling. Contractor shall prepare and promptly distribute official minutes of such meetings to all parties in attendance, including without limitation the District, the Architect and the District Inspector of Record.
- H. Contractor shall incorporate approved changes as they occur, and develop cash flow reports and forecasts for submittal to the District as requested. Contractor shall provide regular monitoring of the approved estimates for Construction costs, showing actual costs for activities in progress, and estimates for uncompleted tasks. Contractor shall maintain cost accounting records on authorized additional services or work performed under unit costs, additional work performed on the basis of actual costs of labor and materials, and for other work requiring accounting records.
- I. Contractor shall record the progress of the Project and shall submit monthly written progress reports to the District and the Architect including information on the entire Project, showing percentages of completion and the number and amounts of

- 8 -

#16-199

proposed Extra Work/Modifications and their effect on the construction costs as of the date of each respective report.

- J. Contractor shall keep a log containing a record of weather, Subcontractors, work on the site, number of workers, work accomplished, problems encountered, and other similar relevant data as the District may require. Contractor shall make the log available to the District, the Architect, and the District's project manager. The District shall be promptly advised on all anticipated delays in the Project.
- K. The District shall bear the cost for the DSA Inspector, soils testing, DSA or other regulatory agency fees, and special testing required in the construction of the Project. If additional review or permits become necessary for reasons not due to Contractor's fault or because of DSA or regulatory agency requirements or regulations implemented after the date the Final GMP is established and not reasonably anticipated at the time the Final GMP is established, Contractor may seek additional compensation for the cost of that review as an additional cost. In the alternative, the District may pay such costs directly.

SECTION 10. EXTRA WORK/MODIFICATIONS

- A. The District may prescribe or approve additional work or a modification of requirements or of methods of performing the Construction which differ from the work or requirements set forth in the Construction Documents ("Extra Work/Modifications"); and for such purposes the District may at any time during the life of this Agreement, by written order, make such changes as it shall find necessary in the design, line, grade, form, location, dimensions, plan, or material of any part of the work or equipment specified in this Agreement or in the Construction Documents, or in the quantity or character of the work or equipment to be furnished. In the event conditions develop which, in the opinion of Contractor, makes strict compliance with the specifications impractical, Contractor shall notify the District of the need for Extra Work/Modifications by placing the matter on the agenda of regularly scheduled construction meetings with the District for discussion as soon as practicable after the need for the Extra Work/Modifications is determined. Additionally, Contractor shall submit to the District for its consideration and approval or disapproval, a written request for Extra Work/Modifications before such work is performed. If the District approves the request in writing, the costs of the Extra Work/Modification shall be added to or deducted from the GMP or the Scope of Work shall be modified to complete the Project within the GMP, as applicable. Any adjustments to the GMP will result in an adjustment of the Tenant Improvement Payment and, if applicable, the Sublease Payments.

- 9 -

- B. Extra Work/Modifications include work related to unforeseen underground conditions if, and only if, such conditions are not visible or identified on plans, reports or other documents available to Contractor. Extra Work/Modifications do not include underground conditions that are identified on plans, reports or other documents available to Contractor but are in a location different than is set forth on such plans, reports or other documents available to Contractor. It should be noted, however, that the District has advised and provided Contractor with information regarding the shallow water table and recent projects experience with encountering water when digging. Contractor has included in its calculation of the GMP an amount to mitigate for encountering water when completing the scope of work contemplated herein. Therefore, Extra Work/Modifications do not include expenses incurred by, and/or work performed by, Contractor in connection with such shallow water table and with encountering water when digging.
- C. Should Contractor claim that any instruction, request, drawing, specification, action, condition, omission, default or other situation (i) obligates the District to increase the GMP; or (ii) obligates the District to grant an extension of time for the completion of this Agreement; or (iii) constitutes a waiver of any provision in this Agreement, CONTRACTOR SHALL NOTIFY THE DISTRICT, IN WRITING, OF SUCH CLAIM AS SOON AS POSSIBLE, BUT IN NO EVENT WITHIN MORE THAN TEN (10) DAYS FROM THE DATE CONTRACTOR HAS ACTUAL OR CONSTRUCTIVE NOTICE OF THE CLAIM. CONTRACTOR SHALL ALSO PROVIDE THE DISTRICT WITH SUFFICIENT WRITTEN DOCUMENTATION SUPPORTING THE FACTUAL BASIS OF THE CLAIM including items used in valuing said claim. Contractor shall be required to certify under penalty of perjury the validity and accuracy of any claims submitted. Contractor's failure to notify the District within such ten (10) day period shall be deemed a waiver and relinquishment of the claim against the District.
- D. Expenses of reconstruction and/or costs to replace and/or repair damaged materials and supplies, provided that Contractor is not fully compensated for such expenses and/or costs by insurance or otherwise, shall be included in an increase to the GMP if said expenses are the result of the negligent acts or omissions of the District, or its principals, agents, servants, or employees.

SECTION 11. NOT USED

SECTION 12. PERSONNEL ASSIGNMENT

- A. Contractor shall assign **Jaime Pace** as Project Manager/Superintendent for the Project. So long as **Jaime Pace** remains in the employ of Contractor, such person shall not be changed or substituted from the Project, or cease to be fully committed to

#16-199

the Project except as provided in this Section. In the event Contractor deems it necessary, Contractor shall replace the manager and/or the superintendent for the Project with a replacement with like qualifications and experience, subject to the prior written consent of the District, which consent shall not be unreasonably withheld. Any violation of the terms of paragraph A of this Section 12 shall entitle the District to terminate this Agreement for breach, pursuant to the provisions of the General Conditions.

- B. Notwithstanding the foregoing provisions of paragraph A of Section 12, above, if any manager and/or superintendent proves not to be satisfactory to the District, upon written notice from the District to Contractor, such person(s) shall be promptly replaced by a person who is acceptable to the District in accordance with the following procedures: Within five (5) business days after receipt of a notice from the District requesting replacement of any manager and/or superintendent or discovery by Contractor that any manager and/or superintendent is leaving their employ, as the case may be, Contractor shall provide the District with the name of an acceptable replacement/substitution together with such information as the District may reasonably request about such replacement/substitution. The replacement/substitution shall commence work on the Project no later than five (5) business days following the District's approval of such replacement, which approval shall not be unreasonably withheld. If the District and Contractor cannot agree as to the replacement/substitution, the District shall be entitled to terminate this Agreement for breach pursuant to the provisions of the General Conditions.

SECTION 13. BONDING REQUIREMENTS

Contractor shall fully comply with the requirements set forth in Section 6.9 of the General Conditions.

SECTION 14. PAYMENTS TO CONTRACTOR

- A. Contractor shall finance the cost of construction of the Project which costs shall not exceed the GMP, which shall not be adjusted except as otherwise provided in this Agreement. The District shall pay Contractor Tenant Improvement Payments and Sublease Payments pursuant to the terms and conditions of Section 6 of the Sublease. In the event of a dispute between the District and Contractor, the District may withhold from the Tenant Improvement Payments and the Sublease Payments an amount not to exceed one hundred fifty percent (150%) of the disputed amount.
- B. This Agreement is subject to the provisions of California Public Contract Code Sections 7107, 7201 and 20104.50 as they may from time to time be amended.

- 11 -

#16-199

- C. For purposes of this Agreement, the acceptance by the District means acceptance made only by an action of the governing body of the District in session. Acceptance by Contractor of the final Tenant Improvement Payment or the Sublease Payment, as the case may be, shall constitute a waiver of all claims against the District related to those amounts.

SECTION 15. CONTRACTOR'S CONTINUING RESPONSIBILITY

Neither the final payment nor any provision in the Contract Documents shall relieve Contractor of responsibility for faulty materials or workmanship incorporated in the Project or for any failure to comply with the requirements of the Contract Documents.

SECTION 16. INSURANCE

Contractor shall provide, during the life of this Agreement, the types and amounts of insurance set forth in Article 6 of the General Conditions, which are incorporated by reference herein.

SECTION 17. USE OF PREMISES

Contractor shall confine operations at the Site to areas permitted by law, ordinances, permits and the Construction Documents and shall not unreasonably encumber the Site or existing School Facilities at the Site with any materials or equipment. Contractor shall not load or permit any part of the work to be loaded with a weight so as to endanger the safety of persons or property at the Site.

SECTION 18. SITE REPRESENTATIONS

The District warrants and represents that the District has, and will continue to retain at all times during the course of construction, legal title to the Site and that said land is properly subdivided and zoned so as to permit the construction and use of said Site with respect to the Project. The District further warrants and represents that title to said land is free of any easements, conditions, limitation, special permits, variances, agreements or restrictions which would prevent, limit or otherwise restrict the construction or use of said Site pursuant to this Agreement. Reference is made to the fact that the District has provided information on the Site to Contractor. Such information shall not relieve Contractor of its responsibility; and the interpretation of such data regarding the Site, as disclosed by any borings or other preliminary investigations, is not warranted or guaranteed, either expressly or implicitly, by the District. Contractor shall be responsible for having ascertained pertinent local conditions such as location, accessibility and general character of the Site and for having satisfied itself as to the conditions under which the work is to be performed. No claim for any allowances because of Contractor's error or negligence in acquainting itself with the conditions at the Site will be recognized.

- 12 -

SECTION 19. HAZARDOUS WASTE AND UNKNOWN PHYSICAL CONDITIONS

Contractor shall comply with the District's Hazardous Materials Procedures and Requirements as set forth herein.

- A. If the District has identified the presence of hazardous materials on or in proximity to the Site (the "Pre-existing Hazardous Materials"), Contractor shall review all information provided by the District that characterizes the Pre-existing Hazardous Materials and shall take the actions approved by DTSC and issued by the District necessary to address the Pre-existing Hazardous Materials in the performance of the work. Contractor shall conduct the work based on this information issued at the time contract documents are executed. Contractor shall immediately communicate, in writing, any variances from available information to the District.
- B. The District will retain an additional independent environmental consultant to perform the investigation, inspection, testing, assessment, sampling and analysis necessary to prepare and recommend a remediation plan for the Pre-existing Hazardous Materials for the District's approval (the "Remediation Plan").
- C. The District will retain title to all Pre-existing Hazardous Materials encountered during the work. This does not include hazardous material generated by Contractor, including but not limited to used motor oils, lubricants, cleaners, etc. Contractor shall dispose of such hazardous waste in accordance with the provisions of the Contract Documents, as well as local, State and Federal laws and regulations. The District will be shown as the hazardous waste generator and will sign all hazardous waste shipment manifests for non-Contractor generated hazardous waste. Nothing contained within these Contract Documents shall be construed or interpreted as requiring Contractor to assume the status of owner or generator of hazardous waste substances for non-Contractor generated hazardous wastes.
- D. Except as otherwise provided herein, it is the responsibility of Contractor to obtain governmental approvals relating to Hazardous Materials Management, including Federal and State surface water and groundwater discharge permits and permits for recycling and reuse of hazardous materials for all work noted in the contract documents. Contractor shall be responsible for coordinating compliance with such governmental approvals and applicable governmental rules with the District's hazardous materials consultant, including those governing the preparation of waste profiles, waste manifests, and bills of lading. If Contractor encounters hazardous materials, it shall immediately notify the District in writing. The District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District.

#16-199

E. If, during construction, Contractor encounters materials, conditions, waste, contaminated groundwater or substances, not identified in the District's assessment report, that Contractor reasonably suspects are hazardous materials, Contractor shall stop the affected portion of the work, secure the area, promptly notify the District, and take reasonable measures to mitigate the impact of such work stoppage. The District shall retain the services of an environmental consultant to perform investigation, inspection, testing, assessment, sampling and analysis of the suspect materials, conditions, waste, groundwater or substances.

(1) Found Not to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances do not constitute hazardous materials, Contractor shall recommence the suspended work.

(2) Found to be Hazardous Materials. If the environmental consultant determines that the materials, conditions, waste, contaminated groundwater or substances constitute hazardous materials and such hazardous materials require remediation and disposal, then the District, Consultant and Contractor shall jointly establish the plan for disposition and actions to be taken with respect to the hazardous materials, subject to final written approval by the District. All such costs shall be the responsibility of the District.

F. Exacerbation of Pre-Existing Hazardous Materials.

If during construction Contractor encounters pre-existing environmental conditions that it knew or should have known involve hazardous materials (the "Point of Discovery") (which encounters may include an unavoidable release or releases of hazardous materials) then Contractor must immediately stop the affected portion of the work. If Contractor fails to immediately stop the affected portion of the work after the Point of Discovery, then Contractor is solely responsible for any resultant Exacerbation Cost. "Exacerbate," in all its forms, means the worsening effects of Contractor's failure to stop the affected portion of work after the Point of Discovery. "Exacerbation Cost" means the differential between (i) the actual increase in the cost of remediation and delays to the Project attributable to pre-existing environmental conditions involving hazardous substances, and (ii) the cost thereof or delays thereto had Contractor immediately stopped the affected portion of the work after the Point of Discovery. The standard of "should have known" applies to Contractor's supervisory personnel, whether or not on the Site. Contractor's supervisory personnel must have had the hazardous material training required by applicable OSHA and Cal OSHA rules or regulations.

SECTION 20. INDEPENDENT CONTRACTOR

- A. Contractor is retained as an independent contractor and is not employed by the District. No employee or agent of Contractor shall become, or be considered to be, an employee of the District for any purpose. It is agreed that the District is interested only in the results obtained from service under this Agreement and that Contractor shall perform as an independent contractor with sole control of the manner and means of performing the services required under this Agreement. Contractor shall complete this Agreement according to its own methods of work which shall be in the exclusive charge and control of Contractor and which shall not be subject to control or supervision by the District except as to results of the work. It is expressly understood and agreed that Contractor and its employees shall in no event be entitled to any benefits to which the District employees are entitled, including, but not limited to, overtime, retirement benefits, insurance, vacation, worker's compensation benefits, sick or injury leave or other benefits.
- B. Contractor shall be responsible for all salaries, payments, and benefits for all of its officers, agents, and employees in performing services pursuant to this Agreement.

SECTION 21. ACCOUNTING RECORDS

Contractor, and all Subcontractors, shall check all materials, equipment and labor entering into the work and shall keep or cause to be kept such full and detailed accounts as may be necessary for proper financial management under this Agreement, including true and complete books, records and accounts of all financial transactions in the course of their activities and operations related to the Project. These documents include sales slips, invoices, payrolls, personnel records, requests for Subcontractor payment, and other data relating to all matters covered by the Contract Documents (the "Data"). The Data shall be maintained for ten (10) years from the latest expiration of the term (as such may be extended) of any of the Contract Documents. Contractor shall use its best efforts to cause its Subcontractors to keep or cause to be kept true and complete books, records and accounts of all financial transactions in the course of its activities and operations related to the Project. Upon completion of the Project, Contractor shall provide the District with one (1) complete copy of the Data.

The District, at its own costs, shall have the right to review and audit, upon reasonable notice, the books and records of Contractor and any Subcontractors concerning any monies associated with the Project.

SECTION 22. PERSONAL LIABILITY

Neither the trustees, officers, employees, or agents of District, the District's representative, or Architect shall be personally responsible for any liability arising under the Contract Documents.

SECTION 23. AGREEMENT MODIFICATIONS

No waiver, alteration or modification of any of the provisions of this Agreement shall be binding upon either the District or Contractor unless the same shall be in writing and signed by both the District and Contractor.

SECTION 24. NOTICES

Any notices or filings required to be given or made under this Agreement shall be served, given or made in writing upon the District or Contractor, as the case may be, by personal delivery or registered mail (with a copy sent via fax or regular mail) to the respective addresses given below or at such other address as such party may provide in accordance with the provisions herein. SECTION 29. SUCCESSION OF RIGHTS AND OBLIGATIONS

All rights and obligations under this Agreement shall inure to and be binding upon the successors and assigns of the parties hereto.

SECTION 30. NOTIFICATION OF THIRD PARTY CLAIMS

The District shall provide Contractor with timely notification of the receipt by the District of any third-party claim relating to this Agreement, and the District may charge back to Contractor the cost of any such notification.

SECTION 31. SEVERABILITY

If any one or more of the terms, covenants or conditions of this Agreement shall to any extent be declared invalid, unenforceable, void or voidable for any reason whatsoever by a court of competent jurisdiction, the finding or order or decree of which becomes final, none of the remaining terms, provisions, covenants and conditions of the Contract Documents shall be affected thereby, and each provision of the Contract Documents shall be valid and enforceable to the fullest extent permitted by law.

SECTION 32. ENTIRE AGREEMENT

This Construction Services Agreement and the additional Contract Documents as defined in paragraph C of Section 1 herein, including the Site Lease, the Sublease, and the Specifications, drawings, and plans constitute the entire agreement between Contractor and the District. DRAWING & SPECIFICATION REFERENCES

Drawing Sheet / Specification	Detail / Sub Section	Comments
M-4.1.1		
P-4.1.1		

QUESTION

Plan sheet M4-1.1 (attachment "A") shows a PTAC unit in equipment room 4-109, plan sheet P4-1.1 doesn't show a condensate drain from this PTAC unit. Can we drain the condensate from the PTAC unit located in room #4-109 into a wye branch tailpiece installed at the ST-1 sink in room #4-102? Also not shown on the plans is a branch controller located in room #4-103 (see attachment "A"). This unit will require an 1-1/4" condensate drain that will have to be terminated into a drywell outside of the building. We're hoping to stub the 1-1/4" condensate drain through the wall into the mechanical enclosure outside, then run below grade to a drywell located a minimum of 5'-0" away from the building. Please advise if this will be acceptable?

ANSWER

Both suggested methods are acceptable. Check routing of the 1-1/4" condensate line down the outside wall and exposed outside near grade before routing underground to dry sump also with architect

Both suggested methods are acceptable. Check routing of the 1-1/4" condensate line down the outside wall and exposed outside near grade before routing underground to dry sump also with architect.

ROUTING OUTSIDE WALL EXCEPTABLE.

Condensate from branch controller and PTAC unit in Kindergarten Bldg.		Yes	Yes
Description of Information/Clarification Required:			
<p>Plan sheet M4-1.1 (attachment "A") shows a PTAC unit in equipment room 4-109, plan sheet P4-1.1 doesn't show a condensate drain from this PTAC unit. Can we drain the condensate from the PTAC unit located in room #4-109 into a wye branch tailpiece installed at the ST-1 sink in room #4-102? Also not shown on the plans is a branch controller located in room #4-103 (see attachment "A"). This unit will require an 1-1/4" condensate drain that will have to be terminated into a drywell outside of the building. We're hoping to stub the 1-1/4" condensate drain through the wall into the mechanical enclosure outside, then run below grade to a drywell located a minimum of 5'-0" away from the building. Please advise if this will be acceptable?</p>

Revisions to Architecture sheets:

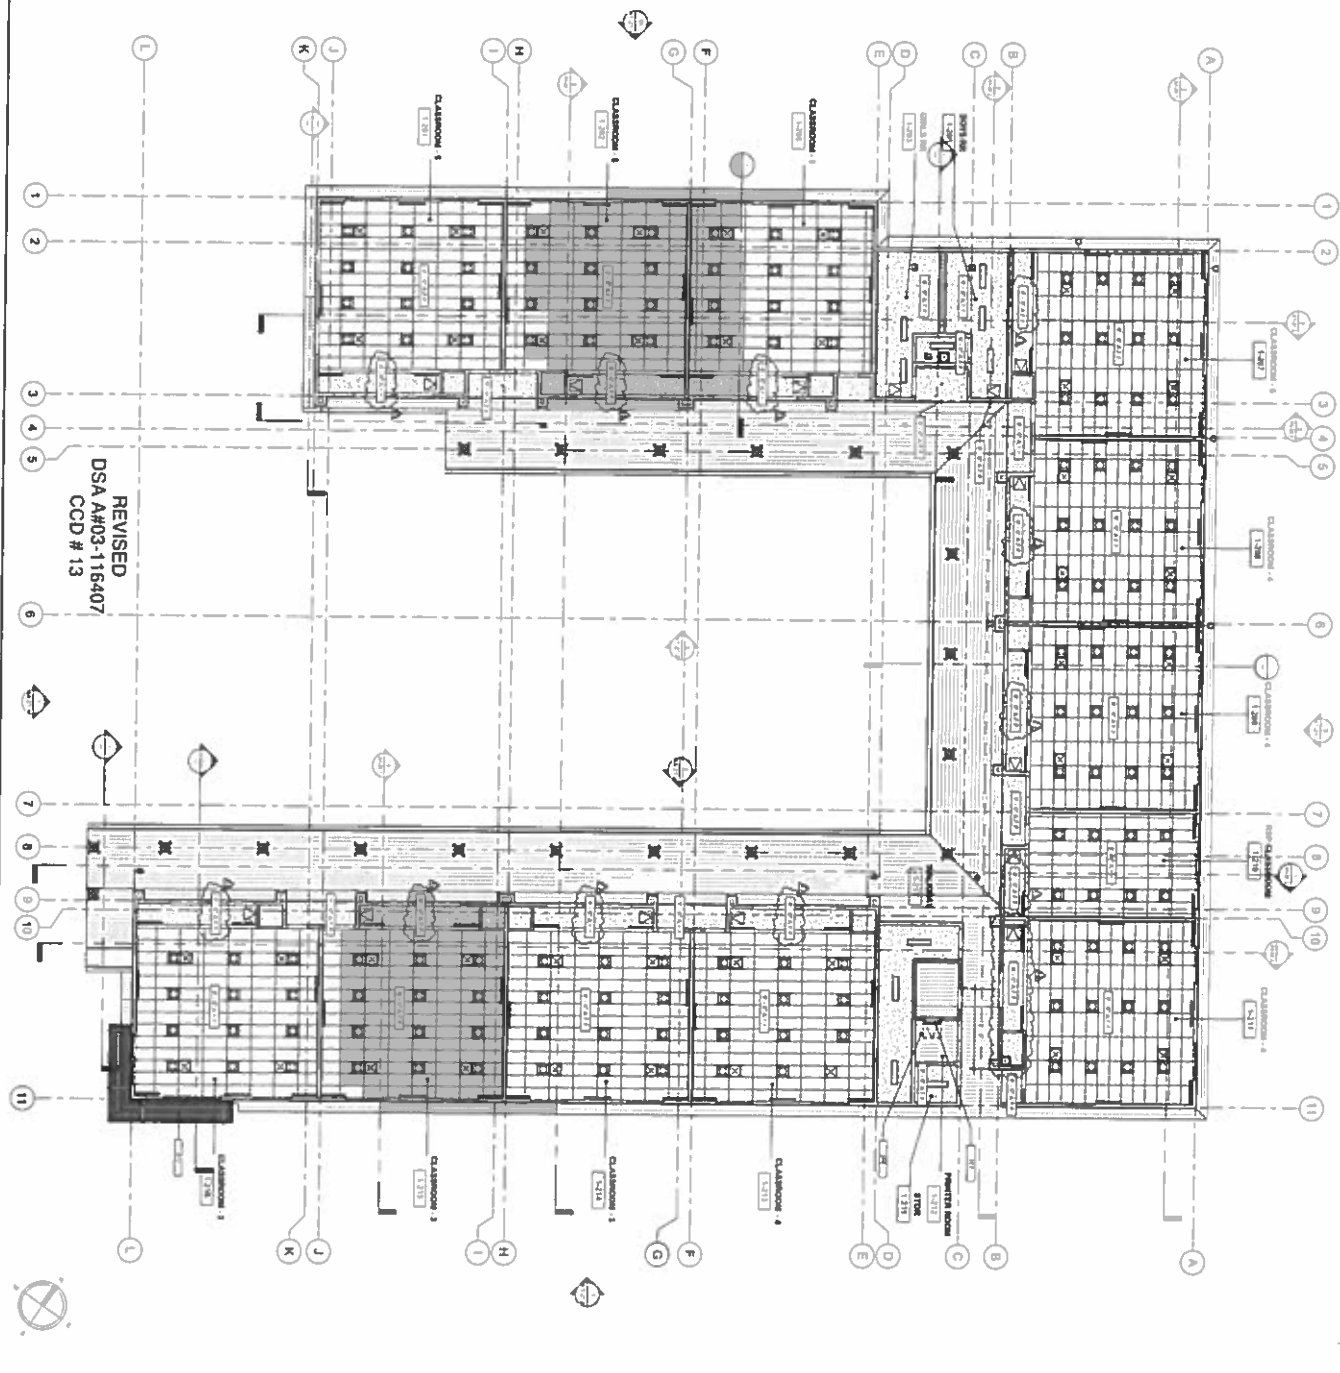

A1-11.2: Revised mechanical closet location and expanded closet to fit rated shaft along with fan coil in room 1-211. Provided addition mechanical chase in classroom space for utility lines. Reduced window to one 2'-0" x 6'-0". All corridor windows on second floor moved down 12" to accommodate the louver above the windows. Also, markerboard track was reduced in length.

A1-11.5: Revised soffit ceiling heights in all classrooms to 8'-0" on the second floor to accommodate louver above windows. Provided mechanical chase in classroom space for utility lines.

Revisions to Mechanical sheets:

Revisions to Fan Coil Closets and Relief Louvers in Ceilings on 1st and 2nd floor of Classroom Building (See M1-1.1, M1-1.3, M1-3.0, M1-3.1).

- Adjust intake louver location in fan coil closets, and include fire dampers in outside walls.
- Revise relief louvers in ceilings to two smaller ones instead of one large one, and include back draft dampers.
- Provide access doors and access panels for closets and in ductwork, as indicated and as required.
- Location of ceiling relief grille system is flexible and can be moved around.

12. Warnings

- Minimum spacing and edge distance requirement of 6da per ACI 318 Sections D.8.1 and D.8.2 for torqued cast-in-place anchor is waived per designer option.

Brittle failure governs for tension. Governing anchor failure mode is brittle failure. Attachment shall be designed to satisfy the requirements of ACI 318-11 Section D.3.3.4.3 for structures assigned to Seismic Design Category C, D, E, or F when the component of the strength level earthquake force applied to anchors exceeds 20 percent of the total factored anchor force associated with the same load combination. In case when ACI 318-11 Sections D.3.3.4.3 (a)3 to 6, (b), (c), or (d) is satisfied for tension loading, select appropriate checkbox from Inputs tab to disable this message. Alternatively, Ω0 factor can be entered to satisfy ACI 318-11 Section D.3.3.4.3(d) to increase the earthquake portion of the loads as required.

- Per designer input, ductility requirements for shear have been determined to be satisfied – designer to verify.

- Designer must exercise own judgement to determine if this design is suitable.

- Refer to manufacturer's product literature for hole cleaning and installation instructions.

SMC COR #12 RFI #368 Shear Wall Penetrations for Duct - Admin T&M

Dear Kyle,

Below is our cost on Time & Material per RFI #368 to furnish and install additional ductwork to stack it through one penetration in lieu of two as the SEOR would not allow two separate penetrations through the shear wall. The ductwork was installed up to the shear wall prior to the RFI response, in which case we had to take down the ductwork and reroute it with the additional fittings to be able to stack the ductwork through one penetration.
