NC Pre-K at Troy Elementary School Remote Learning 2020

November 2, 2020

Zoom

Zoom virtual lessons are done twice each day.

Times:
-10 a.m.
-2 p.m.

Lessons include songs, calendar, name recognition cards for who joined zoom that day, Letterland, themed activities, and a read aloud.

Home Packets and Materials

Every 3 weeks, parents come to the front of the school (remaining outside) for packet pick up. Included in the packets are materials and activities that students will need for at home independent work and also materials for daily zoom lessons. This photo shows an example of our a packet sent home in October.

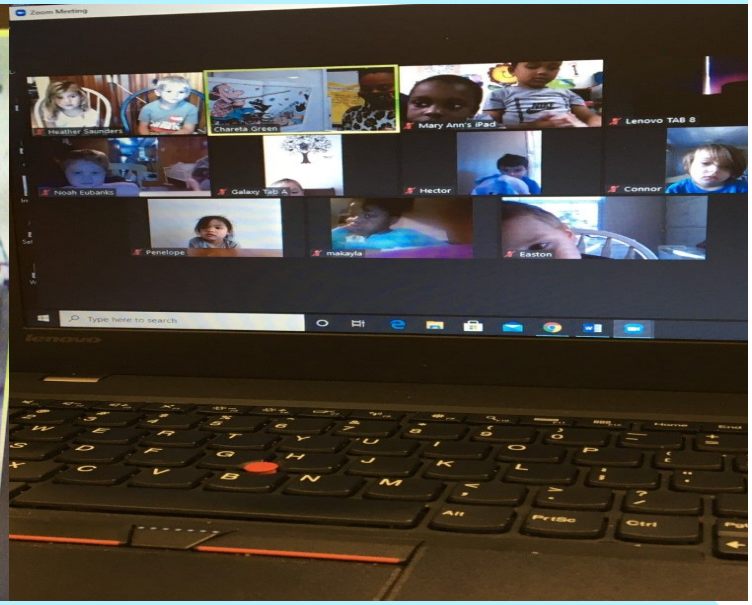

Read Alouds

Read alouds take place daily. Students engage in conversations by asking and answering questions. Story props, puppets, flannel board pieces, etc. are used for read alouds.

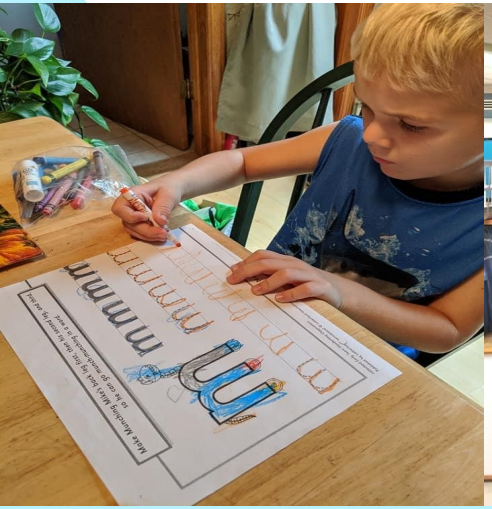

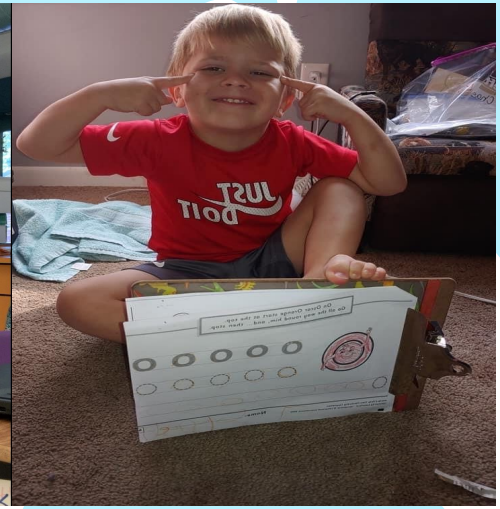

Letterland

Letterland is completed daily. During Letterland the students get to hear the story about each Letterlander, sing the letter sound song, and then use their finger to write each letter in the air while listening to the hand writing song. (i.e. “at the leaf begin, go around the apple this way then add a line down so Annie won’t roll away.” Each week our co teacher dresses up as the Letterland character and the students enjoy their visit.

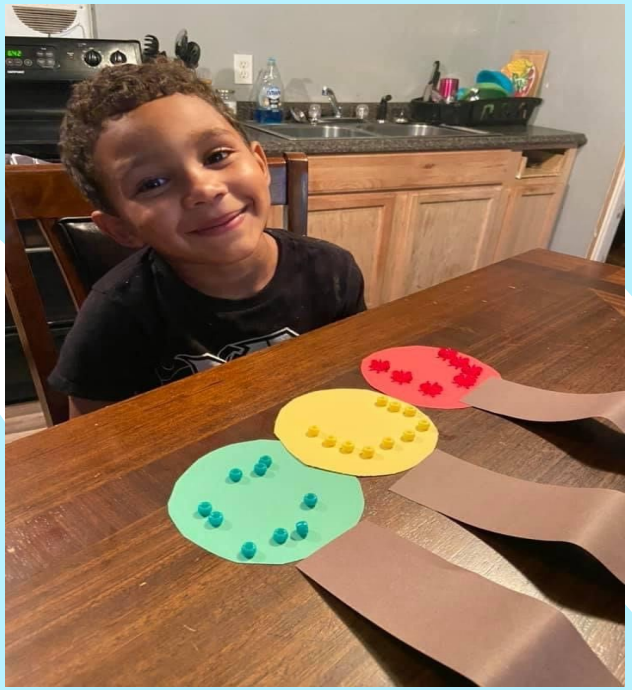

Math

Students are given weekly math assignments. These assignments include sorting, number recognition, one to one counting, shape recognition, etc.

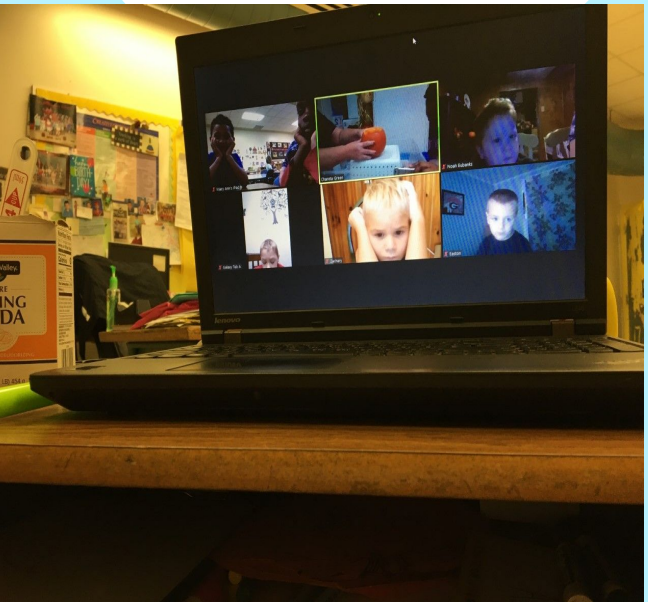

Science Experiments

Science experiments and activities are done weekly. Students are engaged by making predictions, asking questions, answering questions, and using their scientific inquiry skills. In the photos below students watch what happens when you mixed vinegar, food coloring, and baking soda together. Also posted is the experiment "Will a pumpkin float or sink?"

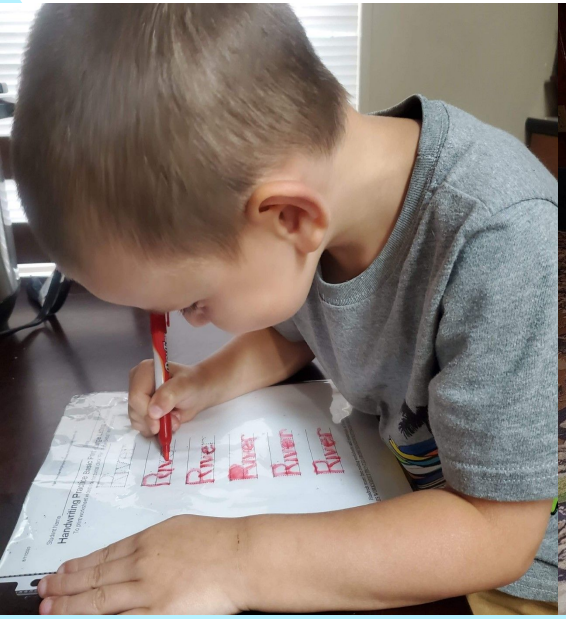

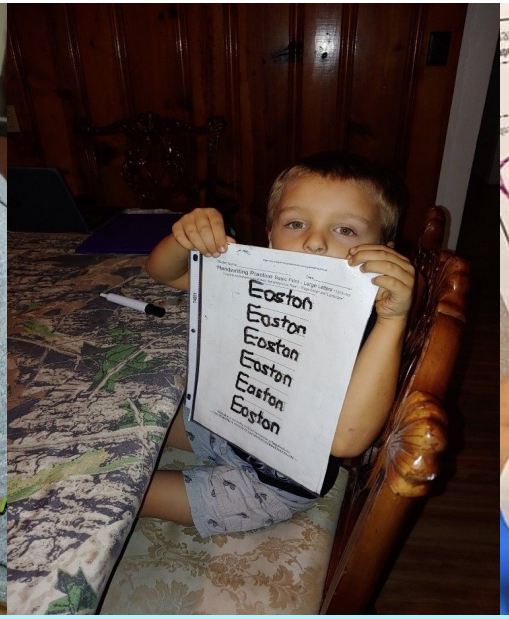

Fine Motor Activities

Students use their name tracing sheets daily to practice tracing and writing their names independently. Parents send photos to teachers of their child's completed work. Other items that are used for fine motor development are scissors, playdough, writing tools, drawing tools, etc.

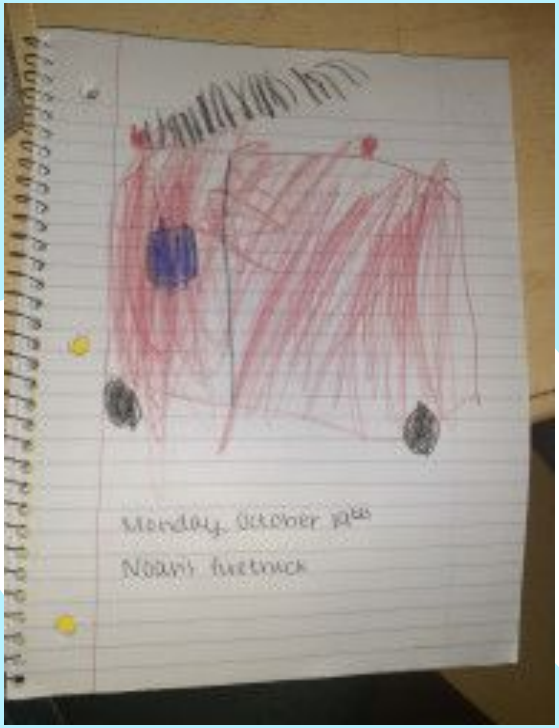

Art

A variety of theme related art activities are given. All materials are provided to the students and their families. Each art activity goes with the week's theme.

Virtual Field Trips

As a part of Fire Safety Month, we took a virtual field trip to the Troy Fire Department. The students joined us on zoom during this trip. Prior to our visit the students came up with questions that were answered during our visit. The awesome firemen showed our students the inside of a fire truck, their uniforms, and much more. One of our teachers even put on all of the fire equipment on for our students to see.

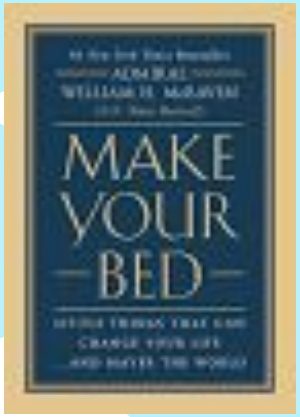

Teacher Activities

Pre-K teachers and assistants have completed the following:

- **Professional Development- Prosolution Trainings, Teaching Strategies Trainings, Ready Rosie training**
- **Weekly PLC's via Zoom (held on Friday's)**
- **"Make Your Bed" book study with weekly discussions**
- **Safe home visits- Each MCS Pre-K teacher and teacher assistant went to visit each family. Home visits took place in the front yard of each home where social distancing took place.**
- **NC Pre-K online registration and drive thru registration were held. Teachers were there for assistance.**
